for the propagation of fish, with which the Greenbrier river notably abounds.

At a low and conservative estimate the buildings on the property purchased, as herein before described, could not be replaced for less than seventy-five thousand dollars, not making any allowance for the one hundred and eighty-five acres of land.

Since the original purchase was made, the State board of control has taken over the large mill building and brick boiler house of the Maryland Lumber company, which the company expected to remove when they disposed of the property. The price paid for the mill and boiler house was six hundred dollars. These two buildings could not be replaced for less than ten or twelve thousand dollars. The mill building can be used for a large dairy barn and the

storage of hay and other feed sufficient for a large herd of cattle. The brick boiler house can be utilized in the installation of a steam laundry and general electric light plant, when the institution becomes large enough to require it.

There are admitted into the sanitarium persons of the negro race, residents of the State, who are suffering with tuberculosis, divided into two classes:

First—Those unable to pay the expenses of their care and treatment.

Second—Those who are able to pay and shall pay the same.

The reasonable expenses of poor persons admitted at the request of the authorities of any municipal corporation or county, shall be paid by such municipal corporation or county. Regulations may be made to receive persons who are able to pay part but are not able to pay all the expense of their treatment. Schedules of rates to be paid by patients are to be fixed by the State board of control. The institution will be open for the reception of patients the latter part of the present year, (1918.)

Old Firm Consolidates

Announcement is made of the consolidation of the old firm of Williams & Pifer Lumber Company, of Marlinton, with the Ashland Oil Refining Company, of Ashla d, Kentucky.

With the possible exception of the West Virginia Pulp & Paper Company, at Cass—succeeded by the Mower Lumber Company—the Williams & Pifer Lumber Company had the longest continuous operation of any of the dozens of big lumber firms which have operated timber holdings in Pocahontas County.

Williams & Pifer began business in the fall of 1913. as a partnership composed of E. H. Williams and A. C. Pifer. They carried on a lumber production business until 1917 when the firm was incorporated under name of Williams & Pifer Lumber Company. This corporation had a number of stockholders, but as time went on most of the stock was purchased by Dr M. S Wilson

nership composed of E. H. Williams and A. C. Pifer. They carried on a lumber production business until 1917 when the firm was incorporated under name of Williams & Pifer Lumber Company. This corporation had a number of stockholders, but as time went on most of the stock was purchased by Dr M. S Wilson A. C. Pifer and E. H. Williams.

The president of the corporation, from its beginning to its consolidation with Ashland Oil Refining Company. a period of 39 years, was E. H. Williams. He was also general manager. A. C. Pifer served a like period as vice president. The secretary was the late Dr. M. S. Wilson, who served until his death. He was succeeded by his son, Edward S. Wilson.

From the beginning, Williams & Pifer Lumber Company engaged in the lumber business as producers in the Counties of Pocahontas and Greenbrier. In this long time their extensive operations gave employment to many men over a wide area. The money paid out in wages over the pe-

president. The secretary was the late Dr. M. S. Wilson, who served until his death. He was succeeded by his son, Edward S. Wilson.

From the beginning, Williams & Pifer Lumber Company engaged in the lumber business as producers in the Counties of Pocahontas and Greenbrier. In this long time their extensive operations gave employment to many men over a wide area. The money paid out in wages over the period of 43 years, all summed up, would amount to an immense number of dollars.

It was ever the policy of the corporation to be interested in the welfare of their men and the community in general.

Owing to the growing scarcity of timber stumpage, the firm went out of the lumber busines-

The Lumber Industry.

The weather for the past week is of the sort that the lumber jobber longed for last year in vain. Skidding and sliding are cheaply done such a time as this. But there is little cutting going on. Captain Smith has returned from the ark. The rear of the drive just got past Droop. About eight million feet floated into the boom and the mill has two months work assured. They cut 1,300,000 feet the first ten days after the flood. The teams and men of the firm of Smith, Whiting & Co. are employed in taking out logs from the river bed and in shaping up things as well as they can for the breaking up of the ice. A great deal depends on the ice and especially on the order of its going. It may rot in the river, but it more often goes out in gorges which sweep everything before them. The Cumberland Lumber Co. is putting in enough timber in the Driscol neighborhood to insure a

the timber, the rains caused, and the price has fallen. January 4, 1895

in 1952: except to carry a stock finished lumber. This was in connection with a general line of building supplies stocked in their general merchandise store in Marlinton.

In 1938 Williams and Pifer Lumber Company branched off in a wholesale business in gasoline and oil. They had bulk plants at Elkins and Marlinton, and a little later at Caldwell

This office has always been in in the Town of Marlinton, along with their general store.

The firm of Williams and Pifer Lumber is a branch of Ashland Oil Refining Company, with main offices in Ashland, Kentucky.

It is understood that sales offices will be maintained at Marlinton and Caldwell.

The Telephone.

Marlinton has taken a day or two off to do justice to the phones which have been put in at this place. As is well known Marlinton had given a donaton of $50 to the Beverly and Marlinton Telephone Company if they would stretch a wire to this place by the 13th of August. The company was delayed in its work by the wire being shipped to Beverly, Va., instead of Beverly, West Va., and the morning of the 13th saw them at Edray ray with five miles to complete on a very bushy road. They commenced to drive to get through on time, and about dark they had their wire at the west end of the bridge with a mile yet to go. The wire was stretched over the river by a man walking the bridge, and they arrived at Bird's store, the main office, about ten o'clock at night.

The three owners of the lines of this company are three doctors at Crickard and Huttonsville, Dr C.

Crickard and Huttonsville, Dr C. A. Barlow and Drs John and Perry Bosworth. When they take a vacation they go on a wire stretching expedition, living in tents and enjoying their out of doors jaunt. Their camp out fit consisted of two large A tents, one for cooking and eating and one for sleeping. The big affable John Crouch was along managing to have a good time as he always does. Harmon Currence did the wire work and seems to be a natural telephone man. He touched the wire when it was alive and had a burn the size of a dollar made on his shoulder.

The company had the wires open for several days and the public exhausted all its originality in thinking of things to be talked about.

Among the things that the people could not understand is that the sound travels instantaneously. One old man was offended when they told him that they could talk to Huttonsville and back as quick

Those who had never seen a telephone had no conception of what it was like. One thought that there would be a frame work between the poles, and was surprised to find that a single strand of wire was all there was of it.

"Hello--that Mingo?—well--in bed?—this is MARLINTON.—Would you please step down to the store and give us Crickard-- Hollo Crickard—That Hardwick—This is Barlow at MARLINTON---jnat finished the line--thought we were drunk? All right---Sulivan's going to be married tomorrow—don't know her name - two days - how do you hear? Good bye!"

This is the substance of the first talk from Marlinton; after that we took up the strain and talked everybody to bed between here and Crickard, 48 miles away.

The line will be extended to Huntersville by the 15th of September. Uriah Bird will let the contract for seting [sic] poles next Saturday. Specifications can be obtained from him.

If you need a mower

The Telephone War.

There is a good deal of wire-work going on in Pocahontas now owing to different telephone corporations disputing over territory and connections. There is plenty of feeling and a lot of the interested ones are very techy, and to say any thing about it is to take your life in your hands, but in spite of all this we plunge into the middle of the thing to describe the situation as best we can.

At the present time it seems probable that there will be two sets of telephone poles on the road from Marlinton to Huntersville, and that narrow trial will be so plainly marked that it will be impossible for the way-faring man to lose his way. If these two sets of telephone poles are built it will advertise the fact that the relations of the several companies are some what strained.

The Beverly and Marlinton Company were the pioneeers of the work, antedating the Ronceverte and Marlinton Company by several weeks. They built a line from Beverly to Marlinton, and, while

al weeks. They built a line from Beverly to Marlinton, and, while the town was thankful for it, they wished very hard for a line to Ronceverte, and got it. The Beverly Company got a good bonus from Marlinton and secured a subscription of about $40 to extend their line to Huntersville. They have set the poles and expect to stretch the wire this week.

The Ronceverte and Marlinton line expect to stretch their wire this month, beginning on the 20th and reaching Marlinton in five days. The company will not be organized until September 28, but Smith & Whiting, lumber jobbers, are promoters of the company and what they say goes.

The first sign of coming trouble was when the Ronceverte company staked their line to another office in Marlinton; to Crummett's Harness shop, while the Beverly telephone office was in Bird's store. This put the other company on its mettle and the members took it as a sign that they were not to co-operate and the trouble began.

Then the Dunmore company, promoted by two progressive men

mettle and the members ... a sign that they were not to co-operate and the trouble began.

Then the Dunmore company, promoted by two progressive men of the Upper End, B. F. McElwee and Samuel Sheets, was organized and the two other companies began to woo this new company. Beverly proposed that they unite with them at Huntersville or Driscol, and the Ronceverte company that they would unite with them. The Ronceverte company charge that the poles of its rival are only 4in. at the top, while their poles are 6in. The Beverly company says that is true, but a little pole will last longer in the ground than a big one. The Ronceverte company says their wire is welded, while the Beverly company interrupts the flow of conversation by splicing their wire. The Ronceverte company reminds Dunmore that its natural out let is down the Greenbrier Valley, and the Beverly people suggest that Beverly or Huttonsville is to be the depot of the Upper End until Pocahontas has a railroad.

The three companies met at the telephone office last week, the Dun-

while the Beverly company interrupts the flow of conversation by slicing their wire. The Ronceverte company reminds Dunmore that its natural out let is down the Greenbrier Valley, and the Beverly people suggest that Beverly or Huttonsville is to be the depot of the Upper End until Pocahontas has a railroad.

The three companies met at the telephone office last week, the Dunmore and Ronceverte present in person and the Beverly company present at Huttonsville and Crickard by telephone, and the report is that it was a warm meeting. At this time it seems probable that the Dunmore line will be constructed by the firm of Smith & Whiting and meet the Ronceverte line at Marlinton, and that they will not associate with the Beverly company. While these arrangements were being made Edray had the receiver down and directly that town boiled over, and sent word down for a day or two, naming all the men of money in that secton, saying that if the Ronceverte company cut them off in this way they

company. While these arrangements were being made Edray had the receiver down and directly that town boiled over, and sent word down for a day or two, naming all the men of money in that section, saying that if the Ronceverte company cut them off in this way they would never deposit another cent in Ronceverte banks, or touch the town in any way with a forty foot pole.

A propo-ition to the Beverly company to abandon their Huntersville branch was rejected.

We know it is to the interest of the county to be connected and we still hope that there will be a central office in Marlinton for the three lines so that every part of the county can be reached by paying for one message.

Found Guilty

The jury in the Verlon Jones trial returned a verdict of guilty to arson in the first degree Wednesday afternoon. He was tried for arson as a result of a fire at the Pocahontas County Jail on November 25, 1982. First degree Arson is the willful and malicious burning, or causing to be burned, a dwelling under West Virginia law.

The jury had a choice of three verdicts in the case—guilty of first degree arson, guilty of fourth degree arson, or not guilty. Fourth degree arson is the attempt to commit arson of a building or of personal property.

That a jail is considered a dwelling is not spelled out in the W. Va. law on arson, but, instead, is the result of a court decision made almost 200 years ago. A jail was declared to be a dwelling in the Virginia case entitled Commonwealth vs. Posey in the year 1787. As

but, instead, is the result of a court decision made almost 200 years ago. A jail was declared to be a dwelling in the Virginia case entitled Commonwealth vs. Posey in the year 1787. As no law has been written which says otherwise and there have been no additional Court rulings on the matter, this case is still the ruling one in this matter. When W. Va. was formed in 1863, Virginia common law was declared to be the basis for common law in W Va. and thus the Posey case is still the ruling case.

The trial began on Tuesday as reported in last week's paper. On Tuesday the state presented its case through the testimony of several witnesses. One defense witness testified on Tuesday.

Four people were witnesses on Wednesday, all for the defense. They were Paulmer Adkison, Jr., Terry Schoolcraft, John Fitzgerald, and the defendent,

Tuesday.

Four people were witnesses on Wednesday, all for the defense. They were Paulmer Adkison, Jr., Terry Schoolcraft, John Fitzgerald, and the defendent, Verlon Jones. Adkison is a co-defendent in the case.

Jones testified that the fire was set not with the intention of burning the jail building but to destroy the property of Terry Schoolcraft. Schoolcraft had initially been involved with Jones and Adkison in refusing to be deadlocked in their cells for the night, but left the cell block area after being urged to do so by officers. The fire, according to Jones, was set as revenge against Schoolcraft.

The testimony of Adkison and Fitzgerald backed up Jones' testimony on the revenge motive in the setting of the fire.

and Fitzgerald backed up Jones' testimony on the revenge motive in the setting of the fire.

It was brought out in the testimony of several witnesses that those involved in the affair had been drinking. Testimony was given that the inmates had been supplied with alcohol by a visitor to the jail on the 24th but not who the person actually was.

The penalty for first degree arson is two to twenty years in prison.

On Friday of last week the state filed information with the Court on two previous felony convictions allegedly against the defendant, Verlon Jones. If it is found that Jones does indeed have three felony convictions, then he could be given a life sentence

the state filed information with the Court on two previous felony convictions allegedly against the defendant, Verlon Jones. If it is found that Jones does indeed have three felony convictions, then he could be given a life sentence under the state's habitual criminal law. A trial on this has been tentatively set for July 19, pending the outcome of any motions made in the case on July 8.

West Virginia will win an all expense paid trip to the Miss Teen of America Pageant, a $1,000 cash scholarship, and other awards.

Miss Teen of West Virginia is a scholarship program unique in its selection of state and national participants. The pageant utilizes six judging divisions to find the most outstanding young women from all around the country. They are: Scholastic Record, Service/Achievment, Personal Development, Poise and Appearance, Judges Interview, and General Awareness.

The charity event, the judging activities, and production rehearsals lead up to the Miss Teen of West Virginia Pageant Finals to be held at the Ramada Inn of Beckley on Sunday afternoon, July 17th at 4:00 p.m.

Chawna Carr is sponsored by: The Pocahontas Times, VanReenan Funeral

The charity event, the judging activities, and production rehearsals lead up to the Miss Teen of West Virginia Pageant Finals to be held at the Ramada Inn of Beckley on Sunday afternoon, July 17th at 4:00 p.m.

Chawna Carr is sponsored by: The Pocahontas Times, VanReenan Funeral Home, Marlinton Electric Co., C.J. Richardsons, Marlinton Motor Sales, Inc., Men's Shop, John M. Mallow, D.D.S., Glades Building Supplies, Inc., Ernest K. Shaw, Dentist, and The Flower House.

Engagement

Mr. and Mrs. Ronald E. Warner, of Durbin, would like to announce the engagement of their daughter, Cindy Louise, to Vancie Kent Lusk, Jr., son of Mr. and Mrs. Vancie Lusk, of Dunmore.

Cindy and Vancie are both graduates of Pocahontas County High School. Cindy is a 1983 graduate and Vancie is a 1980 graduate.

Wedding plans are in-
complete.

County Knitting Wool

There will be a special exhibit and sale of Pocahontas wool during Pioneer Days at the school. Hill Country Wool - Forst is an organization promoting the use of our wool as knitting yarn. It makes beautiful knitting yarn. So far it has been kept a natural color, thus keeping the lanolin that helps make it shed water.

On Saturday Sheep-To-Shawl demonstrations will be given at the Museum. The wool will be sheared, carded, spun and knitted before your eyes.

Death

LELAND H. PHILLIPS

Leland H. Phillips, age 54, of Baltimore, Maryland, died of cancer June 17, 1983, at the Veterans Hospital in Loch Raven, Md. Mr. Phillips was born at Cass on January 10, 1929, the son of John A. and Birdie A. Phillips. He was married to Maurice Seldomridge.

Dedication of Mary Jo Allen Memorial

The Mary Jo Allen Sunday School Room at St. John's Church was dedicated Sunday, June 26, 1983, by Bishop Robert P. Atkinson. The furniture and equipment for the building were dedicated as a memorial to Clark Brumagin, through the generosity of Helen Brumagin, her relatives and friends.

This project began at the

Leland Phillips was a veteran of World War II and served as Military Police in Japan.

He is survived by three daughters, Susan M. Wheat, Baltimore; Barbara Phillips, Woodlawn, Md.; Wanda Phillips, Miami, Florida; one grandson, Jason Wheat; his father, John A. Phillips; three sisters, Ariettha Galford, Woodlawn, Md.; Violet Cassell, Durbin; Emily Schoolden, Miami, Florida; and one brother, John A., of Elkridge, Md.

He was preceded in death by two brothers, George H. and Henry E. Phillips.

Funeral services were held June 21 at Woodlawn Memorial Chapel with interment in Good Shepherd Cemetery, Baltimore, Md.

the cost of molding tor the depot.

Libby Rexrode reported that there would be a rummage sale for the benefit of Pearl Buck House, May 7.

The club also voted to

This project began at the Annual Meeting of St. John's Church, December 20, 1981, when Betty Frizzell proposed that a memorial be raised for Mary Jo Allen, our recently deceased Senior Warden, who had been a faithful member of St. John's Church most of her life. The congregation unanimously accepted the proposal that this memorial take the form of a Sunday School building at the rear of the church.

Construction began the following summer under the leadership of Glen Wade, People's Warden of the Church and treasurer of the building project. The construction work was done by Glen Wade, Bruce, Betty, and Creighton Frizzell, Bill Phillips, Ed Gardner, Kyle McCarty, Janet Hyer, John Allen, Steve Bray, and Eugene TenBrink. The windows were donated by Reid Mitchell. The insulation and bathroom fixtures were contributed by Peter Brigham for the Whistlepunk Co. at Snowshoe. C.C.C.

by Rocky Hamed

I have been reading the letters from former CCC members with great interest. However, I am puzzled by the fact that you have not heard from a lot more of them since many are still living in the County. Perhaps I can jog a few memories or stir up some reaction from some of them. I am sure that there is a wealth of CCC lore that they could share with others and pass on as historical or human interest stories. I am reaching back into memory forty-four years ago so accuracy may be strained a bit here and there.

Camp Watoga 1939

I entered Camp Watoga as an "Enrollee," the CCC equivalent to an Army private, during the summer of 1939. The Commanding Officer was Captain Bias, the second in command was Lt. Ballentine, Bob McCormick of Marlinton was a Subaltern (similar to a warrant officer), and Gay Fertig was the Senior Leader (First Sergeant). Robert Curry of Hillsboro was, I believe, the Educational Advisor, and there were other non-commissioned types of officers such as Leaders (sergeants), and Assistant Leaders (corporals).

On the Forestry side of the organization there was Mr. Alfred Dean (either the top man or the number two man), a Mr. Dodson, Mr. Nelson, Mr. Bostic, Mr. Bischoff, Mr. Fischer who was in charge of the motor pool, Woods Gaylor who was in charge of the heavy construction equiment, Harry Sharp, of Marlinton or Hillsboro, who was the Comptroller type, and there were others.

Among the boys who barracks, one near each end. These stoves had a water jacket type of fixture around the top. They sure kept the barracks warm. The bunks and foot lockers were Army types. Naturally, all structures were painted green on the outside.

The Right Blend of Personnel Discipline, Project Management, and Camp Administration

The mixture of discipline administered by the semi-military side of the organization and the project management administered by the forestry side was a well-balanced blend that resulted in a pleasant work environment with just enough discipline to keep things moving along. The projects were not completed as rapidly as commercial contractors would have completed them; but they were completed at a much lower cost and many boys learned a trade while working on them, and perhaps most important, the boys learned to work and get along with each other. Many of them had never been away from home before or held a job. Also, in this environment, there was developed a sort of an infectious esprit de corps or just plain good morale and fellowship.

The work details were managed pretty doggoned efficient now that I look back. There were work details for each forestry project in progress. These included roads, trails, park buildings, lakes, and many other structures, all of which required construction. Sometimes lunch was packed for the crews, sometimes hot meals were taken to them, and sometimes they took prepared meals.

There were the usual duty rosters for work details, KP, and guard duty. Guard duty was a joke. Nothing ever happened. Once in a while we would have a surprise inspection by the Army officers, but that was about it. Reveille was at 6:00 a.m. and we had to be out for roll call. Then we had to police the area around the barracks. Then we had breakfast. Then we had to be out for roll call. Then we had to police the area around the barracks. Then we had lunch. Then we had to be out for roll call. Then we had to police the area around the barracks. Then we had supper. Then we had to be out for roll call. Then we had to police the area around the barracks. Then we had to be out for roll call. Then we had to police the area around the barracks. Then we had to be out for roll call. Then we had to police the area around the barracks

Hillsboro was, I believe, the Educational Advisor, and there were other non-commissioned types of officers such as Leaders (sergeants), and Assistant Leaders (corporals).

On the Forestry side of the organization there was Mr. Alfred Dean (either the top man or the number two man), a Mr. Dodson, Mr. Nelson, Mr. Bostic, Mr. Bischoff, Mr. Fischer who was in charge of the motor pool, Woods Gaylor who was in charge of the heavy construction equiment, Harry Sharp, of Marlinton or Hillsboro, who was the Comptroller type, and there were others.

Among the boys who served while I was there, I remember the following from Pocahontas County: Herbert McClure, Gilbert and Donald Jack, Milburn Wilfong, Raymond Friel, Cutlip, Barb, and Beverage all from Marlinton; Guy Mays, a Nelson and a Blanchard from Cass; several Underwoods from Cummings Creek and Beaver Creek; Troy Lusk from Green Bank and my buddy, Keith Gillispie, of Arbovale; Tom Kelly from Frost and a Cleek from Minnehaha Springs. There are several boys from the lower end of the county whose names I would recognize if I saw them. I recognized the names of Kenneth Cross and Harry Schrader from the June 16, 1983 issue of the Times. I could draw you a picture of Kenneth Cross.

From the outside of the county, the ones that I can recall now are: Ralph Coberly from the Logan, Chapmanville, Verdunville area; "Buck" Henry Rife from Shinnston; a Samples from Clarksburg and a Hall from Webster County; and a boy from Erbacon, Webster County by the name of Rose. We teased him about the "beans." We had boys from many West Virginia counties at Watoga.

this environment, there was developed a sort of an infectious esprit de corps or just plain good morale and fellowship.

The work details were managed pretty doggoned efficient now that I look back. There were work details for each forestry project in progress. These included roads, trails, park buildings, lakes, and many other structures, all of which required construction. Sometimes lunch was packed for the crews, sometimes hot meals were taken to them, and sometimes they took prepared meals.

There were the usual duty rosters for work details, kitchen police (K.P.), latrine orderly, night guards who usually kept the fires going in the stoves in the winter time. Of course, the boys had nicknames for every job and some of these were not exactly household words. One of the more unusual ones was the one given to the orderly assigned to take care of the Captain's quarters, take his food to him, run errands, and perform other related duties. This orderly was nicknamed "Dog Robber" because he supposedly ate the scraps from the Captain's table which were supposed to be fed to the Captain's dog. There were not any drugs in any camp that I served in, nor did I hear of any at other camps. Drinking and gambling were not allowed in camp, but there were a few incidents of both on a low key basis at times. Usually those returning from town or leave would be a little loud once in a while, and a few penny ante poker games could be found. If a boisterous drunk came into the barracks after bedtime, usually 9:30 to 10:00 o'clock, chances are that the next time he went to town his bed would be "short-sheeted." The sheets would be folded at the halfway mark of the bed, then tucked under the

tails, had no worries, all the good food you wanted, good medical attention, a lot of good buddies; places to go and things to do such as parties, dances, ball games, a date with your best girlfriend, leave on weekends starting on Friday; or just stay at camp with the few who remained and enjoy the weekend by going to the camp movies, playing tennis, swimming, hiking, or going to church at one of the nearby churches, or just doing nothing if it so pleased you.

An Unwanted Reassignment and a Promotion

A few months after I enrolled at Watoga I was reassigned from the work projects to help the Educational Adviser, Mr. Curry. I became his assistant. Although I received a promotion, I liked the outside work more, but I accepted my new job and worked at it. We had regular classes for the boys. Some of the classes were very good. We also taught some boys who could barely do more than write their names to write letters and perform other written assignments. These boys were not from Pocahontas County. Mr. Curry also helped to coordinate several of the classes that the project managers taught, and he arranged for outside instructors to conduct courses at the camp. There were some excellent technical courses such as Auto Mechanics, Welding, Blacksmithing, etc., for which certificates were given. Many of the boys selected their life occupation from the training and courses they participated in while in the CCC camps.

Do It right! Eyes Right!

One of my additional duties as Assistant Educational Adviser was to play the music for military formations via the loudspeaker system we had installed,

Camp Layout

The barracks were situated parallel to each other, lengthwise, with the front end of each facing a wide path. Beyond this path there was usually a twenty to forty yard strip of grass or lawn. On the other side of that would be another path and then a row of buildings, also facing inward, comprised of the administrative buildings, the Officers quarters, the Forestry offices, and the Educational Building. The latrines and bathrooms, the Canteen and Dayroom were usually on the side the barracks were on. the garages, tool sheds, work buildings, tennis courts, and ball diamonds were either extensions of the other two rows of buildings or sometimes formed a third row. Not to be forgotten is the Mess Hall which was usually a converted barracks at one end of the barracks row. As I recall, there were twelve to fifteen barracks at Watoga. Each would hold fifty to sixty boys, but the camp was never full while I was there; no more than four hundred boys at the most. The barracks were heated by two huge coal stoves per

poker games could be found. If a boisterous drunk came into the barracks after bedtime, usually 9:30 to 10:00 o'clock, chances are that the next time he went to town his bed would be "short-sheeted." The sheets would be folded at the halfway mark of the bed, then tucked under the mattress good and tight so he could not get his body straightened out in bed. In a severe case or that of a repeater, it was always a cure when the "short-sheet" was sewn through his blankets to the mattress with a wool sack needle and twine. Each barracks had a Leader who was in charge. Each Leader had his own method of discipline and it usually worked.

IN THE BEGINNING—
WORK AND FUN

In the beginning I worked in the road crew and the construction crews. One winter day during 1939 we were relocating a small section of the road going from Camp Watoga to the Watoga State Park.

Mr. Dean had me helping with the read level to survey the grade. Before we could finish, a violent snowstorm came up. We went into the park and worked inside of one of the buildings until the snow stopped. Then we started back to the camp. When we got to the place where we had been working on the road, Mr. Dean stopped the trucks, which were now in a convoy, and told me to go out and put up two stakes to show where we had stopped surveying so we

courses they participated in while in the CCC camps.

Do It right!
Eyes Right!

One of my additional duties as Assistant Educational Adviser was to play the music for military formations via the loudspeaker system we had installed, with the controls in the Educational Building. For a formation similar to Retreat in the Army I usually played a portion of the Washington Post March. I taught some of the students to perform this chore and after I thought that they were good enough I would let them handle the music. One day one of them made a mistake and played the wrong record or the wrong portion of the right record. For this little event Capt. Bias gave Mr. Curry a nice lecture; and the good Captain gave me to understand, in no uncertain terms, that as long as he was in command of that Camp that I was to play the music for the formations. His orders were followed.

One Sunday a truckload of boys went to a nearby social function, a picnic I believe. Sometime that afternoon, Capt. Bias got a call from someone complaining about the conduct of the boys there. This call upset the Captain to some extent. He had all of us, those who had remained in camp, called out to fall in and form a formation of two ranks or rows. He then proceeded to give us some close order drill which consisted mostly of commands of "Eyes Right," "Eyes

Play Ball!

We had basketball, baseball, softball, tennis, swimming, horseshoe pitching and boxing and volleyball. I do not recall any football, track or soccer teams. We played basketball at various high school gymnasiums but our biggest sport was baseball. We played at many other CCC camps and other places. I recall playing at Camp Copperhead near Frost; Camp Thornwood, named after the town and located near it; a camp near the Pendleton-Grant County line; and at Lost River to which we went via Mathias from Moorefield, not via Baker and what today is Route 55. Somewhere between Moorefield and Mathias we crossed a mountain via a steeply-graded gravelled road. At one spot all the boys had to get out and push to get the

adjoining room, began laughing.

Mr. CCC Green Goes to War!

In the fall of 1941 we moved from Yellow Springs, Ohio, to Middletown, Ohio, about fifty miles north of Cincinnati, Ohio. We moved in with a contingent of the U.S. Army Fifth Corps Headquarters—we shared the building with them. We tried to act like top professionals at all times. We wanted everybody, including the Army, to look up to the Civilian Conservation Corps.

On 7 December, 1941, Sunday, I was doing what had come to be "doing what was natural," typing special orders to move boys back and forth. This particular shipment was a priority shipment for some reason or other. I was sitting at my typewriter around 11:00 o'clock a.m., a Lieutenant was sitting on the window ledge (this was an older stone building with huge window wells and ledges). I had my small radio on the ledge of another window. I had been listening to the

Somewhere between Moorefield and Mathias we crossed a nountain via a steeply-graded gravelled road. At one spot all the boys had to get out and push to get the trucks up the grade. I don't recall the exact spot, but Guy Mays, from Cass, remembers the place very well. Needless to say we returned via Baker. Somehow I was "volunteered" to be an umpire. I think some of my superiors had a hand in it. Anyway, I umpired many baseball games. One I remember was a regional CCC Championship game, played at the Black Mountain camp on Williams River before a huge crowd of civilians and CCC boys. One team was from one of the nearby CCC camps and the other was from the southern part of West Virginia.

On one trip to Thornwood a car caused us to almost upset on the old Mary Warwick Hill curve below Green Bank. The driver of our truck was Ralph Coberly.

back and forth. This particular shipment was a priority shipment for some reason or other. I was sitting at my typewriter around 11:00 o'clock a.m., a Lieutenant was sitting on the window ledge (this was an older stone building with huge window wells and ledges). I had my small radio on the ledge of another window. I had been listening to the music while typing until the Lieutenant came in. Shortly after the lieutenant came in one of our high ranking CCC Officers came in. He was the equivalent to an Army Lt. Colonel. I do not recall why he came in but he was chatting with the Lieutenant and me. We were wearing our green winter uniforms. A few minutes after he came in, the music on the radio was interrupted by the announcement of a forthcoming special bulletin. It was the announcement that the Japs had bombed Pearl Harbor. To put it mildly there was much excitement and reaction. But the thing that impressed me the most was the fact that the CCC Lt. Col. went out, and I know that not more than twenty minutes later, came back in the uniform of an Army Lt. Colonel! He was a reserve officer. Later I realized that it was a very

southern part of West Virginia.

Go West Young Men!
Go West!

Like all good things my pleasant stay, or nice tour of duty, at Watoga came to an end during the latter part of 1940. Again my superiors with the help of some high-powered recommendations from Bob McCormick and a Lt. Hartshorn (both had moved on to Yellow Springs, near Springfield and Zenia, Ohio). The depot was used as a staging area for CCC boys from eastern states going to various camps in the western part of the United States, especially Boulder Dam and other popular recreational area projects in Colorado, Utah, Wyoming and other nearby states. At the same time those returning would be processed through the depot for discharge and return to civilian life, or for reassignment to a camp near their homes. I worked with Bob McCorm[illegible]

there was much excitement and reaction. But the thing that impressed me the most was the fact that the CCC Lt. Col. went out, and I know that not more than twenty minutes later, came back in the uniform of an Army Lt. Colonel! He was a reserve officer. Later I realized that it was a very significant event—MR. CCC GREEN HAD REALLY GONE TO WAR!!!

Color Me Green!

Sometime shortly after the Japs bombed Pearl Harbor, I was sent on a train trip to one of the nearby Ohio cities. It was either Columbus or Cleveland. I traveled just as the Army and other services do, I had a transportation request (TR) which I presented for my ticket. When I got on the train it was loaded and crowded with U.S. Army soldiers. They went bananas when they saw my green uniform with the CCC insignia and my two little stripes on the sleeves denoting my rank. They swarmed over me and got a little shall we say "insinuating." I responded by telling some of them to go to some unpleasant places in some insulting

Wyoming and other nearby states. At the same time those returning would be processed through the depot for discharge and return to civilian life, or for reassignment to a camp near their homes. I worked with Bob McCormick. He reported to the Adjutant. Our job was to cut (prepare, issue, and distribute) the special orders to transfer officers and boys (enrollees) from Yellow Springs to their new assignments. We moved thousands of them during the period from December, 1940, through December, 1941. During the latter part of 1941 most of the transfers were from the West to Yellow Springs. The recruitments and enrollments were decreasing rapidly and the discharges were increasing at almost the same rate. We used troop trains similar to those used in WWII.

This assignment was almost all work and no play. I did play on a good Headquarters Detachment softball team. I won twenty dollars from one of the local V.F.W. chapters. These WWI veterans would check our barracks

the CCC insignia and my two little stripes on the sleeves denoting my rank. They swarmed over me and got a little shall we say "insinuating." I responded by telling some of them to go to some unpleasant places in some insulting ways. This only whetted their appetite (or curiosity as they later told one of their officers). I knew that I was in for a bad time. I could not retreat and I could not fight all of them but I figured that I could at least leave a few bruises. At this time a Lieutenant joined them and that made matters worse. He didn't want to hear my explanation of who I was and what I represented. We had been taught to respect and listen to our officers but this guy was making things most difficult. At this time I realized that the thing to do was to ask him to take me to his Commanding Officer or his superior officer. Before I could say anything a sharp voice from the rear of the coach yelled, "Get away from that guy and leave him alone!" This turned out to be a Major, much older than the Lieutenant

the same rate. We ...ed troop trains similar to those used in WWII.

This assignment was almost all work and no play. I did play on a good Headquarters Detachment softball team. I won twenty dollars from one of the local V.F.W. chapters. These WWI veterans would check our barracks and award twenty dollars to the boy with the best made-up bunk. This was a very gratifying and rewarding experience in those days. I did manage to have a little fun out of Bob McCormick. One day unknown to him the Adjutant signed a special order to ship out a huge contingent of officers and boys. When Bob inquired the next day I told him that I had signed the order for the Adjutant and let it go. Before Bob could get really upset, the Adjutant, who had walked in from the

difficult. At this time I realized that the thing to do was to ask him to take me to his Commanding Officer or his superior officer. Before I could say anything a sharp voice from the rear of the coach yelled, "Get away from that guy and leave him alone!" This turned out to be a Major, much older than the Lieutenant and the soldiers. The Major had been in the CCC's. He explained to the entire coach who I was and what we did. Furthermore he made the Lieutenant and the soldiers surrounding me apologize and he informed them that he would take care of them later. He turned the tide! It was not long before one of them offered me a drink from his flask and the others began to ply me with questions. They were an Infantry outfit of some sort travelling on commercial orders.

Who Says CCC Training Doesn't Pay Off?

I left the CCC's in January, 1942. I came home, registered for the draft and waited for them to call me. In September, 1942, I was drafted along with twelve other Pocahontas County boys. We were sent to Ft. Hayes, Columbus, Ohio, via Clarksburg. Later we were assigned to Ft. Bliss, Texas, actually to the 453 AW Bn., an anti-aircraft automatic weapons outfit. This battalion went overseas to Germany. They recently held one of their reunions in Marlinton. We had been assigned along with many Ohioans of whom a great number were college graduates, while we West Virginians were only high school graduates or less. After a couple of months two or three of the Ohioans were promoted to corporal and later to buck sergeant (three stripes). As will happen in situations like this there came about a sort of a division, Ohioans versus West Virginians. We beat them good in softball but they lorded it

CCC camps had been excellent training for our boys. They began to respond by telling me what they did in the Hitler Youth camps. After a long conversation with some of the more learned and talkative ones the picture I got was one that indicated that one of the most imporant things in their camps, if not the most important one, was the continual and frequently repeated pledge of allegiance to Hitler, although it was masked as allegiance to the Nazi party and to the motherland or homeland. Later I talked to other groups of prisoners about the youth camps. Apparently many of the young Germans learned to love the outdoors as a result of their youth camp training. There was also some esprit de corps but it was a cultivated or directed and supervised sort of a thing rather than a spontaneous or grass roots sort. If you could set aside the fanatical aspects of Hitlerism or Nazism such as the super race idea and all of the related beliefs from their

had been assigned along with many Ohioans of whom a great number were college graduates, while we West Virginians were only high school graduates or less. After a couple of months two or three of the Ohioans were promoted to corporal and later to buck sergeant (three stripes). As will happen in situations like this there came about a sort of a division, Ohioans versus West Virginians. We beat them good in softball but they lorded it over us in getting the promotions, and the praise of the officers most of the time. The sergeants seemed to assign the West Virginians most of the unwanted details but maybe they really didn't. Maybe we just felt so.

In December, 1942, I was promoted from Private First Class (PFC) to Staff Sergeant, a higher grade than any of the Ohio boys had gotten to at that time. I want you to know that in the parlance, the vernacular or just plain language of the day, that this Pocahontas County, West Virginia, boy laid the rank on those heretofore lordly Ohio sergeants, and I mean heavily. I laid it on one especially heavy per the express in-

groups of prisoners about the youth camps. Apparently many of the young Germans learned to love the outdoors as a result of their youth camp training. There was also some esprit de corps but it was a cultivated or directed and supervised sort of a thing rather than a spontaneous or grass roots sort. If you could set aside the fanatical aspects of Hitlerism or Nazism such as the super race idea and all of the related beliefs from their youth movement, then perhaps you could compare their youth movement to our CCC camps. Then on a scale of 1 to 10 I would say that their score would be 2.5 and that of our CCC camps would be 9.5.

Realization of the Great CCC Contribution—The Living Legacy

It was almost thirty years after I left the Civilian Conservation Corps before I fully realized the intensity and magnitude of the contribution made by the Corps and the section of the Forestry Service that worked with them. This realization came about in a peculiar sort of a way.

In 1968 the U.S. Navy Department assigned me to the Aegis Shipboard Weap-

want you to know that in the parlance, the vernacular or just plain language of the day, that this Pocahontas County, West Virginia, boy laid the rank on those heretofore lordly Ohio sergeants, and I mean heavily. I laid it on one especially heavy per the express instruction (please note that I did not say "orders") of one of the officers, and several of the officers unofficially watched me do it. As I recall that sergeant left the outfit shortly after that. I left a few months later as a member of a cadre selected to train a new battalion of rookies. My CCC training was one of the most important factors if not the most important one leading to this promotion.

Hitler's Youth Camps vs. Our CCC Camps— No Contest!

In 1943, prior to going overseas, I was assigned to the Prisoner of War (POW) Camp at Ft. Lewis, Washington, to help guard the die-hard Nazi German prisoners of war known as Rommel's Afrika Corps. They had been captured in Northern Africa. They were still very fanatical and were

and magnitude of the contribution made by the Corps and the section of the Forestry Service that worked with them. This realization came about in a peculiar sort of a way.

In 1968 the U.S. Navy Department assigned me to the Aegis Shipboard Weapons System design and development program as a Senior Contract Negotiator. This program culminated in January, 1983, with the delivery and commissioning of the first Aegis, the cruiser USS Ticonderoga, also the first ship of the DDG-47 class. When this program started it had the usual management structure that huge research and development programs have, i.e., a senior Navy captain for program manager, a civilian deputy program manager, a civilian contracting officer, a civilian production manager, an attorney, and either a senior Navy commander or junior Navy captain for an engineering manager. The production manager was a native of Roanoke, Va. A month or so after I was assigned to the program he came into the office at noon

ington, to help guard the die-hard Nazi German prisoners of war known as Rommel's Afrika Corps. They had been captured in Northern Africa. They were still very fanatical and were extremely difficult to handle at times. As a Sergeant of the Guard (a guard Battalion assigned solely to guard the prisoners) I had to sign for up to 550 prisoners, take them out on work details, guard them all day, and return them, ALL OF THEM, to the stockade before a certain time of the day.

One day I took 430 of them out into the woods several miles from the North Post at Ft. Lewis. I had a goodly number of perimeter guards. After properly placing these guards I would at times, give my gun to one of my sergeants or other guards and go talk to the prisoners. On this particular day we had them cutting good sized pine trees and clearing the forest to make right of way for a new road and some power lines. The scenery at this location and the work we

engineering manager. The production manager was a native of Roanoke, Va. A month or so after I was assigned to the program he came into the office at noon one day and announced that he was going to take his family on vacation to a beautiful park in West Virginia. I asked him where the park was located. His reply was something like this: "You may be from West Virginia, Rock, but you wouldn't know where this place was if I told you." I said, "Not only do I know more about West Virginia than any Virginian does, I probably know more about West Virginia than most West Virginians do." He was usually a cool, calm, and collected person, but I could see that I had tripped his impulsive reaction trigger. He grimaced, flashed his eyes, then grabbed a piece of paper, went to a corner table, turned his back to me, and began writing on the paper. I surmised that he was getting ready to give me one of his "talking paper"

time of the day.

One day I took 430 of them out into the woods several miles from the North Post at Ft. Lewis. I had a goodly number of perimeter guards. After properly placing these guards I would at times, give my gun to one of my sergeants or other guards and go talk to the prisoners. On this particular day we had them cutting good sized pine trees and clearing the forest to make right of way for a new road and some power lines. The scenery at this location and the work we were having performed made me think of Watoga and the good old days there. As a result I asked several of the German prisoners if they had heard of the CCC's. Some seemed to have a little knowledge of them. So I explained and naturally told them that the

know more about West Virginia than any Virginian does, I probably know more about West Virginia than most West Virginians do." He was usually a cool, calm, and collected person, but I could see that I had tripped his impulsive reaction trigger. He grimaced, flashed his eyes, then grabbed a piece of paper, went to a corner table, turned his back to me, and began writing on the paper. I surmised that he was getting ready to give me one of his "talking paper" lectures at which he was very good. He was a very talented man. When he finally decided to show me the paper I was really surprised. He had drawn a map showing Minnehaha Springs, Huntersville, Marlinton, the highway connecting them, and a portion

of the Greenbrier River from above Marlinton down to Seebert or thereabout. He gave me the paper and his pencil and said, "Since you know so much I will tell you that I am going to the Watoga State Park, and I want you to draw it in on this map and draw in the road that leads into it." I

of the Greenbrier River from above Marlinton down to Seebert or thereabout. He gave me the paper and his pencil and said, "Since you know so much I will tell you that I am going to the Watoga State Park, and I want you to draw it in on this map and draw in the road that leads into it." I said, "You really don't want me to do that do you? I helped to build that park." He replied, "Stop joshing me, Rock, and stop talking, just take the pencil and draw!" I smiled and took the pencil and I began to draw. It was not too hard to put in the road from Huntersville to Camp Watoga, the road up Pyles Mountain to the park, then down Island Lick Run to the Greenbrier River, and

Huntersville to Camp Washington, the road up Pyles Mountain to the park, then down Island Lick Run to the Greenbrier River, and up the river to Seebert. I also put in Cummings Creek and Beaver Creek, and the churches which I did not have in the right place. Then I tried putting in Laurel Run. I knew that it emptied into the river close to Denmar. The man just sat there as if frozen. He would look at the map, then look at me, and then look at the map again. I decided to go further. I put in the lake in the park, the old CCC camp grounds, Burr Valley, and started to put in a park boundary but he stopped me. He said, "Rock, I am very sorry, but I am also very shocked. You must have helped to build it, or

and started to put in a par
boundary but he stopped me. He said, "Rock, I am very sorry, but I am also very shocked. You must have helped to build it, or you must go there often and in that case you would have to have been there recently." When I told him that I had not been there since 1940 he asked how I could remember so much detail for such a long period of time. After I had explained to him how long I had been at Watoga and what we did there he believed me. Then he told me that he had been taking his family to Watoga State Park for 10 years or more. After he returned from his vacation he would come to my office at lunch time and we would trade or swap tales about Watoga. He told me that all of his

come to my office at lunch time and we would trade or swap tales about Watoga. He told me that all of his children had learned to fish there, to swim, ride horses, and learned many things about the outdoors. Sometimes on our long plane trips to the West Coast, he would sit with me and talk for hours about the Park and the surrounding country. For all of us who knew him it was a very sad day when this very fine and talented gentleman died in 1970.

Sometime afterwards I began thinking about this man and his family, of their vacations at Watoga State Park year after year for such a long period. Then I realized that the park had

vacations at Watoga State Park year after year for such a long period. Then I realized that the park had been open to the public for 46 years. It was opened in July 1937. If we had some way to estimate the total number of families who have visited the park since it opened and enjoyed it as the family mentioned above did, then one could begin to get some idea of the intensity and magnitude of the benefits provided by this park which was built by CCC boys. If the same estimates could be made for Camp Seneca, Droop Mountain, and for the indirect benefits provided by Camp Thornwood after it was converted to a youth

have visited the park since it opened and enjoyed it as the family mentioned above did, then one could begin to get some idea of the intensity and magnitude of the benefits provided by this park which was built by CCC boys. If the same estimates could be made for Camp Seneca, Droop Mountain, and for the indirect benefits provided by Camp Thornwood after it was converted to a youth camp, some idea of these contributions can be made.

I checked with Ms. Joyce

Hanna, in the Superintendent's office at the Park. She stated (twice) that presently they estimate visitors and vacationers to be approximately 200,000 a year. I presume that the estimate includes those who use the cabins, the tent, trailer, and motor home campers, and all other visitors. Shortly the park will have been open 50 years. Since usage has probably increased dramatically within the last ten or fifteen years, an average of 50,000 per year for the 50 year period would probably be more appropriate. Using this average 2,500,000 people will have used the park during this 50 year period.

There are hundreds or perhaps a thousand of these parks and recreational areas (rec. areas) in the

years. Since usage has probably increased dramatically within the last ten or fifteen years, an average of 50,000 per year for the 50 year period would probably be more appropriate. Using this average 2,500,000 people will have used the park during this 50 year period.

There are hundreds or perhaps a thousand of these parks and recreational areas (rec. areas) in the United States today that were built by CCC boys. If the total usage of all these parks and rec. areas could be estimated (as indicated above for Watoga), then one has some idea of the national contribution the CCC boys have made to date. However, the story does not stop here. If these parks and rec. areas are properly maintained, they will last another hundred years or more and continue to provide like contributions presently and in the future. Here then is the

national contribution the CCC boys have made to date. However, the story does not stop here. If these parks and rec. areas are properly maintained, they will last another hundred years or more and continue to provide like contributions presently and in the future. Here then is the living legacy that the Civilian Conservation Corps has passed along to the people of this country, and will continue to pass along to present and future generations.

The following statement appears in a history of the Watoga State Park entitled "Watoga State Park, A History of Development," (undated, no author shown, but presumably compiled and printed by the West Virginia Dept. of Natural Resources at the park); "The era of the C.C.C. is

Watoga State Park entitled "Watoga State Park, A History of Development," (undated, no author shown, but presumably compiled and printed by the West Virginia Dept. of Natural Resources at the park); "The era of the C.C.C. is now often remembered with, perhaps, exaggerated nostalgia but the contribution of that program to the development of the state park and forest system could hardly be exaggerated."

A Backward Look and a Commemoration

In looking backward it hardly seems that so many years have gone by. I guess that we are all still CCC boys "at heart." In addition to all the good training we received, all the good fellowship that we enjoyed, and all the contributions

hardly seems that so many years have gone by. I guess that we are all still CCC boys "at heart." In addition to all the good training we received, all the good fellowship that we enjoyed, and all the contributions that we made, I would venture to say that probably 85 to 90 percent of the CCC boys went into the services during WWII. I am not aware of any statistics that we may have, but I am sure that many a CCC boy paid the supreme sacrifice during WWII.

I feel proud and privileged to have had the chance to serve as a CCC boy, and to have served with the other boys and shared in the fellowship, friendship and respect with

chance to serve as a CCC boy, and to have served with the other boys and shared in the fellowship, friendship and respect with them. These things along with the fun and good times we had are what I think of when I look back.

In regard to the commemoration I feel that we made a little bit of history. I believe that we should commemorate it with pride and dignity, and with lots of that good fellowship and fun that existed in the CCC camps a way back there a long time ago.

Actually one CCC boy with all of his frustrations, failures, trials and triumphs becomes all CCC boys. Inevitably History

long time ago.

Actually one CCC boy with all of his frustrations, failures, trials and triumphs becomes all CCC boys. Inevitably History will consider the image of one CCC boy to be the image of all CCC boys. And the same thing goes for the camps. One CCC camp becomes all camps with all of their memories, glories, good and bad times, and with legends galore.

When records of a historical event are not made at the time the event took place, or shortly thereafter, historians have a tendency to assume that the entire historical event happened

historians have a tendency to assume that the entire historical event happened in a manner exactly like the interpretation which they make of the sample bits and pieces of relevant historical data collected by then generations later. So let us leave them a good sample!

I take this chance to thank the Editor and to say "Hello" to all former CCC buddies who read this article, and to ask that all former CCC boys who served in Pocahontas Coun-

CCC's Letter

Please express to the former members of the CCC organization, during their reunion, my congratulations not only on the outstanding job they did for West Virginia and America during the economic crisis of the 30's, but for the outstanding citizens they went on to become. No other organization during that period contributed more to the physical enhancement of our state and country and to the development of patriotism, honesty and high ideals in its members.

While the work was hard, obviously a fellowship developed or you would not be here now at this reunion. You have my respect and admiration.

Sincerely,
Senator Jae Spears
Twelfth District
Majority Whip

I, Clarence Michael, recipient of this letter, concur in the above statements and think this was a worthwhile and justifiable expenditure of public money, of which I'm sure all participants of the Corps and the public profited by this program at the time, as of now, and in the future.

I enrolled in CCC Company 1525, SP5, Camp Watoga, in January, 1934, working for the State on various projects such as road building, cabin building. I then went to work on a steam roller with which we rolled all of the dirt in the earth filled dam. Transferring to the sawmill, we cut the two-inch lumber for the facing of the dam. Then I went to work with the surveyor, doing rod and chain work to establish the water level of the lake,

Howard Barb, deceased, was at Camp Watoga.

About the CCC

I went in the CCC in June 1933 as a local enrollee. There were twelve of us sent to Camp Thornwood to clear off the camp site for the coming of the boys. I was what you call the powder monkey. I shot the rocks and stumps out. After that I became the blacksmith. Then I was transferred to Camp Randolph at Cass where I worked in the shop for a while. Then I worked as a road grader and helped build the road from Cass to Linwood and then I served my time out. I also took care of the garbage and kept a bunch of hogs.

Dear Sir;

After reading about al the C.C.C. boys and camps I am sending my husband's name in. Gerald T. Vandevender, from Arbovale, was at Camp Watoga from 1940 till 1942, then drafted on into World War II from 1942 until 1945.

Saloma Starks Vandevender

Marlinton Woman's Club

The June meeting of the Marlinton Woman's Club was the spring luncheon held at the Red Fox Inn. After a lavish meal the members were entertained with Funny Fashions by members of the Program Committee, the hostesses for the meeting, and their accomplices. Guests were welcomed and new members, Vonnie O'Brien, Jane Robertson Dunshie and Danita Miller were introduced. Our other new members, Dotty Hiner, Nora Workman, and Debra could not be pres-

Members were encouraged to attend the charter ceremony the next day at the Boy Scout camp. Shirley Gilmore, 3rd vice-president WVFWC would be present to charter our partner club, Seneca Woodlands.

It was decided to share with the Marlinton Rotary Club in the organization of the visit of the Bloodmobile, Friday, Sept. 23.

The club decided to ask for a date in August with both afternoon and evening sessions for the Gulf Auto Awareness Clinic and to open this to the public.

Bazaar chairman, Jean Hite, suggested that we have fall workshops to make crafts for the bazaar to make it bigger and better.

The president also read an invitation to the Pearl Buck Stamp ceremony, June 25.

The club voted to give $25 to Alice Waugh, scrapbook chairman, for film.

It was a lovely afternoon enjoyed by all. Members in

BIG DURBIN FIRE

PART OF THE BIG DURBIN TANNERY BURNED

At eleven o'clock last Thursday night February 22, the night watchman at the big tannery at Durbin discovered fire in the scrub house. The blaze was too big for him to put out and the hose too heavy for one man to handle The fire whistle was in a distant part of the plant, and by the time the men had been aroused and responded to the alarm, the fire had gotten great headway. Four large buildings were destroyed—the scrub house, one dry house and two yards. The loss cannot at this time be accurately estimated but will possibly be as much as $400,000. The loss is covered by insurance.

The large dry house was protected by a brick fire wall and this saved the rest of the plant. The fire destroyed the buildings from this wall to the river.

The two yards were filled with leather in vats in the process of tanning. These hides were damaged but it is not yet known whether a total loss or not.

A very serious item is loss of machinery, which cannot be re-

The large dry house was protected by a brick fire wall and this saved the rest of the plant. The fire destroyed the buildings from this wall to the river.

The two yards were filled with leather in vats in the process of tanning. These hides were damaged but it is not yet known whether a total loss or not.

A very serious item is loss of machinery, which cannot be replaced in less than six or eight months. In one pile is machinery which will cost $20,000 to duplicate. The destroyed buildings will be replaced at once.

This tannery belongs to the Pocahontas Tanning Company, and is one of the largest of its kind. Judge Hoffman of Wheeling, is one of the principal stockholders of the company, and the superintendent is J. W. Goodsell, of Durbin.

SPECIFICATIONS FOR THE HEFNER SCHOOL-HOUSE

TO BE SITUATED ON SWAGO NEAR ALEX. HEFNER'S, THE WORK TO BE COMPLETED ON OR BEFORE NOVEMBER 1ST, 1896.

To be built as follows:

18 x 24,—9 feet in clear from floor to ceiling, 9 x 12 pitch. Roof, ⅞ x 6 siding 1½ inch lap, put up against corner boards and frames; ceiling,

SPECIFICATIONS FOR THE HEFNER SCHOOL-HOUSE

TO BE SITUATED ON SWAGO NEAR ALEX. HEFNER'S, THE WORK TO BE COMPLETED ON OR BEFORE NOVEMBER 1ST, 1896.

To be built as follows:

18 x 24,—9 feet in clear from floor to ceiling, 9 x 12 pitch. Roof, ¾ x 6 siding 1½ inch lap, put up against corner boards and frames; ceiling, ¾ x 6 to 9, thoroughly dried and matched; floor, 1¼ x 6 to 8 inches, matched and laid broken jointed, (ceiled throughout.)

Sills, 8 x 10, set on edge, upper sill locust. Sleepers or joists for bottom, 2 x 10, gained down into sills 7 inches, on every two feet, (or 11 joists 18 feet long), two lines of bridging at equal distance apart.

When in operation continuous employment will be given to about two hundred men, beside the number of extra men needed during the busier seasons and the hundreds of laborers indirectly employed in the bark woods.

The superintendent in charge of the works is J. W. Goodsell, a man skilled in the building and operation of a tannery and the handling of men. The book-keeper and time-keeper is O. D. Reynolds, of Marlinton.

AARP-RSE Meeting

Pocahontas County Chapter #1853 of AARP and the Pocahontas County Association of Retired School Employees met together at noon at the Senior Center in Marlinton on Saturday, May 21.

Mrs. Eula Gibson, AARP President, extended a cordial welcome to everyone. Illnesses noted were Mrs. Doris Blackhurst, just released from the local hospital, and Mrs. Goldie Landis, who is scheduled to enter Greenbrier Valley Hospital on Wednesday, May 25, for surgery. Dewey Sharp led us in singing "Happy Birthday" to himself and to Ruby Moses.

A very appropriate and meaningful devotional was presented by Kyle McCarty, giving the history of Memorial Day and scripture readings based on Remembering.

After table grace by Johnie Keen, a covered-dish luncheon was enjoyed, followed by an AARP business meeting. Following the minutes, community service survey and treasurer's report, an announcement was made by Mrs. Edith Triplett concerning the plant and bake sale to be held Saturday, May 28, at 9:30 a.m. A report was given on the Special Olympics, at which cookies had

Deaths

Leonard B. Sharp

Leonard B. Sharp, 89, of Buckeye, died Friday, May 6, 1983, in the Pocahontas Memorial Hospital after a long illness.

Born April 26, 1894, at Woodrow, he was a son of the late William Elliot and Nancy Jane Kelly Sharp. Three brothers and five sisters preceded him in death.

Mr. Sharp was a retired farmer and woodsman, and a member of the Marlinton Church of the Nazarene.

He is survived by his wife, Ilene Davis Sharp; two sons, Albert Sharp, of Cedar Springs, Michigan, and Roger Sharp, of Buckeye; three daughters, Mabel Price, of Campbelltown, Wanda Hamilton, of Huntersville, and Charlotte Ratliff, of Buckeye; 20 grandchildren and 10 great-grandchildren.

Services were held Monday, May 9, 1983, at 1:00 p. m. in the Marlinton Church of the Nazarene with the Rev. Wallace Dorn officiating. Burial was in the Mountain View Cemetery.

—

Hillsboro P. T. O.

On May 17, 1983, Winters Rose, President called the Hillsboro P. T. O. meeting to order in the school cafeteria.

For our devotions Miss

Governor's Youth Opportunity Camp

Plans are underway for the 1983 Pocahontas County Governor's Youth Opportunity Camp. Members of the planning committee, plus volunteer counselors from the 1982 camp met recently at the Marlinton Motor Inn.

Committee members Roger Trusler, Dan Curry, Donna Borders, Bill Stewart, Ella Jo Galford, Jane Dunshie, and John Snyder discussed plans for the upcoming camp. Richard Eye, 4-H Foundation treasurer, and his wife, participated in the discussion. They were joined for dinner by Ken Willis, Tammie Alderman, Andy Walls, Mary Grogg, Mike Friel, Cathy Irvine, DeeDee Walls, and Sheila Nelson, all of whom were counselors at the 1982 camp.

This year's camp will be held July 18 through July 21 at the 4-H Camp at Thornwood. Applications will soon be sent to campers who meet the eligibility guidelines. Ken Willis, a 1982 graduate of PCHS and currently a Fairmont State student, will be director.

In 1982 sixty-seven children attended and were led by thirteen full time staff members. The campers spent one day at the Buckskin Scout Reservation. At the Thornwood site chil-

THE NEW JAIL.

A DESCRIPTION OF ITS CONVENIENCES.

BY THE ARCHITECTURAL EDITOR.

The new jail proper is absolutely fireproof, for all exterior and interior walls are solid brick, all floors and ceilings are solid cement concrete packed on arches that are carried by steel girders from wall to wall, and the roof is covered with slate. There being practically no wood to decay, there will be no expensive repairs or renewals needed for generations to follow. There are no hollow places in walls or floors to harbor vermin, the best of all buildings for indiscriminate collections of humanity. The walls are laid and plastered and will harden year after year.

The design as is shown in our exterior view, while indicating a compact whole, embraces three distinct divisions, to-wit: A residence in front, and office, guard room, hospital room, and detention room, intermediate and jail proper in the rear. These several departments are as fully separated by solid walls as though under separate roofs. The residence has central halls and staircase, with parlor and family room on this floor. The basement has dining room, kitchen, furnace and fuel room. On the first and second floors each room has a nice oak mantelpiece artistically design-

These several departments are as fully separated by solid walls as though under separate roofs. The residence has central halls and staircase, with parlor and family room on this floor. The basement has dining room, kitchen, furnace and fuel room. On the first and second floors each room has a nice oak mantelpiece artistically designed.

All doors have movable transoms, and the finish is polished and varnished in a superior manner

The prisoners all enter the jail through the guard room in the intermediate department. Here are located the inspection and search rooms, the hospital, female and light offense and detention cells. This being the only entrance to the rear cage room, which is built of two tiers of cells. Two floors have been fitted enabling perfect separation of races, and as each floor has four cells, two on each side opening into a central exercise, or prisoner's, corridor, and as each cell is as independent of the others as are the rooms in a hotel similarly arranged, it is possible to make further a perfect classification of the prisoners, but it will hardly be necessary for years to assign so many to a compartment.

These cells with their central exercise or prisoners corridors, are nests together and enclosed on all sides and below and above with a burglar proof grating, and once incarcerated the whole jail life of the prisoner is in this cage, and if the

four cells, two [illegible] into a central exercise, or prisoner's, corridor, and as each cell is as independent of the others as are the rooms in a hotel similarly arranged, it is possible to make further a perfect classification of the prisoners, but it will hardly be necessary for years to assign so many to a compartment.

These cells with their central exercise or prisoners corridors, are nests together and enclosed on all sides and below and above with a burglar proof grating, and once incarcerated the whole jail life of the prisoner is in this cage, and if the rules are adhered to the jailer will always have a steel wall between him and his guests, although the latter will be under close scrutiny and absolute observation at all times from the jailer's corridor which extends all around the cage.

Food is handed to the prisoners through suitable openings in outer gratings. There is a large tank of water near the top of each cell within reach of its inmates, so that this great necessity is at the individual command of each unfortunate. This tank also serves as a flushing reservoir for the iron hopper closet placed in each cell and connected by scientifically trapped pipes and sewer. This provides for the immediate disposal of all excrement, and removes the greatest objection to former jails.

through suitable openings in outer gratings. There is a large tank of water near the top of each cell within reach of its inmates, so that this great necessity is at the individual command of each unfortunate. This tank also serves as a flushing reservoir for the iron hopper closet placed in each cell and connected by scientifically trapped pipes and sewer. This provides for the immediate disposal of all excrement, and removes the greatest objection to former jails.

As has been stated, the doors of each cell open into the central exercise or prisoners corridor on either side. This is wider than our ordinary rooms. Our interior sketch shows it in part, and at rear end can be seen the prisoner's bath tank. At the front of this picture the open door to this corridor shows the only entrance to the cage the upper right hand corner shows an open box in which are levers moving a system of bolts over the doors of each cell and a separate lever for each door enables the jailer to arrange the exercise periods for each cell independent of all others, and this without entering the cage or coming in contact with the prisoners.

Additional locks are

shows an open box in which are levers moving a system of bolts over the doors of each cell and a separate lever for each door enables the jailer to arrange the exercise periods for each cell independent of all others, and this without entering the cage or coming in contact with the prisoners.

Additional locks are provided for all doors, but they are placed and removed, while the corridor is empty, and while the doors are locked by the bolts, the lever box is provided with tell tale reminding devices requiring all levers to be thrown and also locked in their places before the door of the box can be closed. The bolts are also arranged so that they cannot be moved while the door is open, all of which is to preclude mistakes or carelessness by the jailer. The steel floors of the cells and corridors are overlaid with imported cement, giving a comfortable, artificial stone surface easily kept clean.

Lack of space prevents reference to the many special features of the jail construction, which are the result of many years of experience and investigation, but the cage material is a combination of tensile or "blow proof" steel and crucible or "saw proof" steel, and the report of Peck's best metal worker, Robert Burns, appointed by the Board of Commissioners to fully test every tool proof bar in these cells, established the fact that every one, aggregating upwards of a thousand, has had seven trials, and is tool proof and satisfactory.

The Manly Manufacturing Co., of Dalton, Georgia, the only jail builders in the South, who contracted for and completed the entire work, state that this is the first instance in which such careful scrutiny has been given by county officials.

Those of the tax payers who are capable of judging the work, say it is undoubtedly creditable to all concerned, and pleases many of those who have examined it, and TIMES gives this sketch and these illustrations for the benefit of those who can not make a personal examination of the building.

July 16, 1914

The new Bank building is progressing nicely. It is located on the corner lot where the old school house used to stand, and will be a great addition to the town when completed, as well as one of the best bank buildings for a town of this size in the state. The building is to be fireproof being of brick, tile concrete, and steel. The framework will be of Bessamion steel bars with floors and roof of concrete, and stairway of steel. The lobby floor will be of red "Quarry Tile" laid in cement. The only wood used in its construction will be the doors and windows. It is to have two vaults; the one in the basement will be 8X14 feet and 7 ft. high and is to be used for old records only. The one on the banking floor is to be 8X14 ft and 11ft high. It is to be burglar proof, being the only burglar proof vault in the county, and one of best in the state. It has eighteen inch concrete walls, made of very rich concrete mixture and reinforced with railroad steel crossed twelve inch centers completely [illegible] The door will be [illegible] and contain drill and

...rich concrete mixture and re-
...forced with railroad steel crossed
...twelve inch centers completely
surrounding it. The door will be
8 inches thick and contain drill and
torch proof plate and will weigh with
the frame seventeen thousand pounds
The vault is to contain safety deposit
boxes for the use of those who wish
to keep their valuables in a burglar
proof vault, and it is to be so arrang-
ed that customers may go to their
boxes without entering the part of
the vault used by the bank, as the
vault will be divided by a grille
through the center. There is to be a
rest room 11X20 feet, with desk and
chairs where customers may rest and
feel comfortable. The building was
contracted to W. W. Kinninon, a
well known contractor of our commu-
nity, who also has at this time a con-
tract for the Farmers' Warehouse at
Seibert, and for two school houses
near White Suldhur Springs. Owing
to the fact that Mr. Kinnison has to
be on all his jobs a part of the time
the work on the bank is under the
supervision of A. C. Stillwell.

BIG FIRE AT DURBIN

$30,000 Goes up in Smoke Tuesday Morning. Third Big Fire for Pocahontas this Year.

Four large buildings were burned at Tuesday morning—the Eureka Hotel and Town Hall, owned by E. J. Kisner; the large store building of Kenna Rexrode, occupied by Shulman Bros., and the big building of Thomas Cummings

The loss will total $30,000, with $18.000 insurance.

The fire was first discovered in the Eureka Hotel about 6-30 a. m. in rooms occupied by guests who had shortly before departed on the Greenbrier Division train.

The town of Durbin is wholly

Greenbrier Division train.

The town of Durbin is wholly without means of fighting fire and the flames spread from one wooden building to another until the brick building of the Bank of Durbin was reached. Only an alley way six feet wide seperated the Bank from the Cummings building. It was given up that the bank building would have to go, and plans were laid to fortify against the conflagration at the postoffice building.

However, John W. Goodsell, superintendent of the Pocahontas Tannery, arrived on the scene at this time with a hundred men trained in fire drill, and took charge of the situation. Men were put on the bank roof under directions to stay until the building was ready to fall in, and a bucket line formed to some locomotive tenders in the near by railway yards. These tenders were

bucket line formed to some locomotive tenders in the near by railway yards. These tenders were kept full of water at the tank and pump station.

Blankets were hung over the windows and doors and all exposed woodwork, and the building was kept soaked inside and out. The men on the roof stayed and poured water, though the heat burned their hair and blistered their skin.

It was a daring fight against heavy odds, well planned and wonderfully well executed, especially when the lack of means is considered. And it was successful, for here the fire was gotten under control and the town saved.

In the other direction the fire was stopped at Folk's concrete building without great trouble, a broad street intervening. Imme-

trol and the town saved.

In the other direction the fire was stopped at Folk's concrete building without great trouble, a broad street intervening. Immediately in front of the burning buildings was the Durbin depot. The damage to it, however is slight, the heat breaking the windows and burning the paint.

A fair estimate of the value of the property destoyed is as follows: E. J. Kisner, two buildings, hotel and town hall, valued at $6,000, and E. M. Kisner, hotel and hall furniture, valued at $3000 with $3500 insurance on the buildings and contents.

Kenna Rexrode, store building, loss $4,000 with $3,500 insurance; occupied by Shulman Bros.' store

ings and contents.

Kenna Rexrode, store building, loss $4,000 with $3,500 insurance; occupied by Shulman Bros.' store with living rooms above. Shulman Bros.' loss $6500 on merchandise and household goods with $4500 insurance.

Thomas Cummings, $4,000 loss on building and at least as much more on stock of goods, household and restaurant furniture, with $4,000 insurance.

C. C. Watts, $500 loss on pool room, no insurance.

Bank of Durbin, damaged by water.

Ronceverte & Elkins Telephone Company, damage to switchboard and lines.

Pocahontas Military Academy.

MARLINTON, W. VA.

Prepares boys and young men for college, or business.

Military training.

Pleasant surroundings, careful training, thorough instruction, best references.

Session begins Sept. 26th, 1893.

For catalogue and particulars address.

A. M. BYRD.

Marlinton, W. Va.

October 12, 1893

I wonder how many people remembers that Marlinton was once the seat of a military school, where the boys wore a uniform consisting of a blue coat, gray trousers and the style of cap worn during the civil war. As I remember it, it was a great bunch of fellows and my one big ambition was to get old enough to enroll, but this was not to be, for when I was about twelve years old it was discontinued. Do any of you recall the last program? Here it is:

Memories? Sure, we have them.

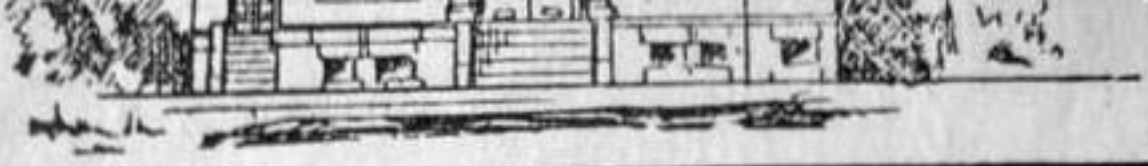
This is the third big fire to occur in Pocahontas county within the past ten weeks, entailing a loss of nearly $75,000. All of the fires were at the same time in the morning, and two of them started in hotels. The first was at Cass February 13, and caused a loss of $25,000; then followed the burning of the Payne store at Academy at a loss of $15000 and now comes the Durbin disaster with a destruction of $30,000 worth of property.

April 24, 1913

WANTED

December 17, 1942

A good middle aged man to



BY THE ARCHITECTURAL EDITOR.

The wonderful development and growth in values of Pocahontas County in the half decade just passed, may be readily illustrated by relative comparison, and the rapid strides of improvement are shown by examination of her new court-house and jail recently completed.

Briefly, the court-house is a well-designed piece of architecture of the most modern design. The building proper is sixty-six feet by seventy-two feet. Consisting of three floors. The basement consists of six rooms and two large halls. In this basement are four large heaters or furnaces, which heat the entire building throughout, and will say just here they have been well tested.

The basement has four furnace rooms, one sanitary room, one storage room, one fresh air room, and one foul air room. This basement story is built of stone, and finished with hard finish on all walls. The floors are all grouted and finished with a smooth Portland cement. One exit from this basement is up a flight of stairs made of native Pocahontas oak. Here we land in the side or cross-hall of the first story floor. We find this hall to be fourteen feet wide and thirty two feet long, with a fourteen foot wall to ceiling. We then enter the main hall, which is ten by seventy-two feet. From this main hall we gain entrance to all the county offices. First the County Clerk's office which is sixteen by thirty feet. Leading from this room we enter a large fire-proof vault, nine by fourteen feet, with walls of brick twenty two inches thich. The floors and ceilings are made of concrete, and supported by large steel beams, with arches of brick, and

All the doors on this floor are, as are all the doors throughout the building, two inches thick, three feet three inches wide, and eight feet six inches high, with a transom over each door thirty nine by forty six inches. The entire building is wainscotted with oak four feet high with eleven inch molded base, finished with a double braded cup of a tasty design. All the hardware in this building is of the best patents and patterns of solid bronze.

The main stairway leading from this floor lands on the ell-shaped hall on the court-room floor. From this hall we enter the main court room, fifty by fifty with ceiling eighteen feet high. This room is well lighted with nine large windows, and has four exits. This room is heated from the furnaces in the basement story. The doors and windows throughout this building are furnished with six-inch reeded arcestrans with plinth block and turned common rosettes of a neat design. The bar is separated from the main court-hall by a substantial railing, with turned balusters, with a free swinging gate. In the bar enclosure there is an elevated platform for the jury, surrounded by a neat railing. To the left of this we find the seat of justice, which is a masterpiece of workmanship.

On leaving the main court-room we enter the hall, from this we enter two elegant rooms which are the two Petit Jury rooms; the third room is the Grand Jury room; the fourth, the Judge's room; fifth, witness room; sixth, lawyers consulting room.

The roof of this structure is self-supporting with three How Trusses and one Queen Truss. This roof is

Leading from this room we enter a large fire-proof vault, nine by fourteen feet, with walls of brick twenty two inches thich. The floors and ceilings are made of concrete, and supported by large steel beams, with arches of brick, and finished with Portland cement. The openings are secured with Manly Mfg's. best fire proof steel shutters of the very latest design; the door opening is closed on the inside by a pair of double steel doors, with an outside door of heavy steel with a combination lock. We find the vaults absolutely fire-proof in every respect.

From this hall we again enter a room. This room will be occupied by the County Court. We find this room well lighted with fine ventilation. The exit from this room is through a pair of double doors leading into the main hall. We then pass into the two elegant rooms of the Prosecuting Attorney, which are lighted by the large windows four by eight feet. In this room there is an artistic ebonized mantel of the Queen Elizabeth design. The windows are hung with

On leaving the main court-room we enter the hall, from this we enter two elegant rooms which are the two Petit Jury rooms; the third room is the Grand Jury room; the fourth, the Judge's room; fifth, witness room; sixth, lawyers consulting room.

The roof of this structure is self-supporting with three How Trusses and one Queen Truss. This roof is first sheated with dressed dry pine, then covered with tarred sun proof paper, and then slated with the best slate that can be secured.

The main tower is eighteen by eighteen and one hundred and four feet high. On the right of this tower can be seen a cluster of minor towers which present a nice construction. On the rear, right, and left sides are two tasty dormer windows. Also the lofty gables, which add greatly to the roof's appearance.

The cut above presents the building from its narrowest dimensions. The jail is directly behind the court-house, which is to be regretted, as it is too tasteful a building to be hid. The cut is a good representation of the front of the building, but does not allow one to judge very well of its size.

This article will be continued

we enter a large fire-proof vault, nine by fourteen feet, with walls of brick twenty two inches thick. The floors and ceilings are made of concrete, and supported by large steel beams, with arches of brick, and finished with Portland cement. The openings are secured with Manly Mfg's. best fire proof steel shutters of the very latest design; the door opening is closed on the inside by a pair of double steel doors, with an outside door of heavy steel with a combination lock. Ralph G. Lowe

Ralph Grady Lowe, 70, died during his sleep at his home at Clover Lick Sunday, June 19, 1983, apparently of a heart attack.

Born October 27, 1912, at Poage Lane, he was a son of Peter Howard and Lucy Shinaberry Lowe.

He was preceded in death by his wife, Virginia Ervine Lowe, in 1964, an infant son, and a brother, Fred Lowe.

Mr. Lowe was a retired carpenter and was a member of the Riverside Masonic Lodge at Cass.

Surviving him are a son, Ralph Grady Lowe, II, of Culloden; four daughters, Betty Lowe Grogg and Nancy Lowe Clements, both of Sterling, Virginia, Rebecca Ruth Tracy, of Gaysville, Ohio, and Sharon Jean Shih, of Gaithersburg, Maryland; a brother, Howard Whitt Lowe, of Huntersville; three grandchildren and two great-grandchildren.

Funeral services were held Tuesday at 2 p. m. in the VanReenen Funeral Home by Rev. David Rittenhouse. Burial with Masonic rites was in the Shinaberry Cemetery at Clover Lick.

Everyone Plays Soccer

Once again we had over 00 players playing soccer nd our thanks go to the ver 65 volunteers who ave of their time and nergy to make this season ur best yet.

Youth soccer is the larg-st sporting activity in the ounty and involves chil-ren from 5-19 years old. Vithout the support of our l volunteer administrative nd coaching staff this pro-ram would not be pos-ble.

The businesses and or-anizations that helped ith this year's program e to be congratulated and anked for their support. If ou are a player or parent a player say "thanks" to coach, a business, a staff ember. They make it ossible.

The results of this year's ccer season are: Division under 19 boys - Hillsbo-; Division 2, under 19 irls - Green Bank; Division under 16 boys - Green ank; Division 4, under 12 - illsboro 1; Division 5, nder 10 - Hillsboro; Divi-on 6, under 8 - Green ank 1.

Let's don't forget Divi-on K, 4-5 year olds. We ad a division of these up nd coming players in

Miss Beth Liptak, daughter of George and Diane Liptak, of Arbovale, received her nursing pin from Marshall University in the pinning ceremony held there on May 6, and graduated the following day with an Associate Degree in Nursing. She will take her State Board Examination for Registered Nurses in July and return to Marshall in the fall to pursue a Bachelor Degree of Science in Nursing. She is the graddaughter of Mrs. Lorraine Felton and Mr. and Mrs. George Liptak, Sr., both of Clarksburg.

Attending the ceremony were her parents, sister and brothers, grandparents, and her aunt, Mrs. Brenda Williams, of Arbovale.

The Town Players set up in the Marlinton Music Building on Friday, July 1, for their final performance before Pioneer Days. Tickets can be purchased at the Pocahontas Times office.

Visiting Mrs. Pearl Shue, of Droop, over the Memorial holidays were five of her children: Mr. and Mrs. William E. McNeal and son, William, of Augusta, Ga.; Ms. Vivian Webb, of Hephzibah, Ga.; Dair Shue, of Droop; Mr. and Mrs.

Dunmore has Queen That Graduates

Mrs. Dorothy Henderson, of Green Bank, was honored at the Tops State Recognition Days in Morgantown on May 21 as Queen of the Top WV #228, Dunmore chapter.

The queen of the chapter is the person who reaches their goal weight and has the biggest loss for the year. Mrs. Henderson lost 17½ pounds during the 1982 year, to her goal and maintained the weight loss for 13 weeks of Kops in Waiting period.

Mrs. Henderson wore an apricot floor length gown with a rhinestone crown and necklace and a swag of gold and white with the word Queen on it. She was also presented a blue and white corsage of carnations.

Mrs. Henderson also received her Kops graduation certificate. For her graduation she wore a white dotted swiss floor length gown, a gold and white carnation corsage and white mortar board cap with tassel of gold and white.

Attractive Schools

Have you had an opportunity to see how attractive our school buildings are after a summer of cleaning and painting? If not, please make a visit to any of the elementary, middle or secondary schools.

Through the hard work of thirty-four participants in the Governor's Summer Jobs Program for youths, each school has classrooms ready for occupancy, by students and teachers for the 1983-84 school year. Major tasks accomplished by the participants in the Governor's Summer Jobs Program include:

Green Bank Elementary

1. Painted walls and doors, 2. assisted in grounds' care, 3. cleaned windows, 4. cleaned and polished furniture, 5. cleaned and waxed floors.

Pocahontas High School

1. Cleaned and polished lockers, 2. painted classrooms, 3. cleaned and waxed floors, 4. assisted in grounds' care, 5. cleaned windows, 6. cleaned fluorescent lights, 7. polished furniture.

Marlinton Middle-Elementary

1. Painted exterior main middle school building, 2. painted interior wall ceiling hallway middle, 3. painted floors and walls of old high school building, 4. cleaned floors, windows, shades and lights, 5. assisted in grounds' care, 6. painted band building interior, 7. painted hallway, walls and doors, 8. painted cafeteria and classrooms, hallways, and bath rooms, and board building classrooms.

Hillsboro Middle-Elementary

1. Painted classrooms and hallways and bathrooms of elementary and middle school, 2. cleaned and waxed floors, 3. cleaned and painted gym, 4. assisted in grounds' care, 5. cleaned windows and lights, 6. painted tennis courts.

The Pocahontas County Board of Education and its administrative staff commend all the supervisors and enrollees for their efforts to give all school buildings the "new look." Custodians and maintenance staff provided the needed assistance for making this a successful program.

HEAD COACH: HARRY BOOTH

PCHS FOOTBALL

Monday night, Aug. 22, the Pocahontas County High School Warriors hosted a football Grid-o-rama. The Warriors played 2 quarters against Bath County and Circleville played 2 quarters against Union. The home side of the Stadium was packed with fans from all the schools. The visiting side had a sprinkling of opposing coaches.

Coach Smith had praise for running back Steve McCloud, quarterback Brian Buchanan, safety Kirk Walton and end Chuck Mullens.

Our biggest weakness was tackling. We need a lot of work in that area and in our receivers' concentration.

In Service

First Lt. Mark E. Mitchell and his tank platoon, 1st PH A Co., 2177th AR.BN. recently participated in a Division Field Exercise FTX LASER MACE in Yakima, Washington. The 2177th Armour Battalion was deployed for 34 days of field training during which time they participated in a division training exercise designed to test the Army's new High Technology Light Division. Following the Div. FTX, the 2177th AR.BN. conducted their semi-annual gunnery training. Lt. Mitchell's tank

trophy for the best in the battalion.

Southern States Cooperative Annual Membership Meeting

Election of local Board of Directors members, Farm Home Advisory Committee members, as well as operative reports, will be among the highlights of the Southern States Cooperative annual Membership meeting on September 2, 1983, at 7:00 p.m. The meeting will be held at the Pocahontas County High School.

The theme of the meeting will be, "Southern States: 100% You." J. Moffett McNeel, Jr., of Hillsboro, will serve as chairman of the local meeting.

R. R. Richardson, of Roanoke, Va., a member of the Southern States Cooperative's regional staff, will report on Southern States supply and marketing operations for the 1982-83 fiscal year. The report will also include a slide/tape presentation entitled "Southern States: 100% You."

Local operations and services rendered to agriculture in the community will be discussed by manager, Layton H. Beverage. There will be special recognition of local Board of Directors and Farm Home Advisory Committee members who retire this year.

Nominees for the local Board of Directors are: Joel Callison, of Hillsboro, Elwood Galford and Dewey McCarty, both of Marlinton, Dolan Irvine, of Minnehaha Springs.

Ladies nominated for the Farm Home Advisory Committee are: Mrs. Ward Barlow, Mrs. Raymond Shinaberry, and Mrs. Hoil Underwood, all of Marlinton, and Mrs. Stella Callison, of Hillsboro.

Tub industry starts at Greenbrier farm

By John Blankenship
Staff Writer

It started in a Greenbrier County farmhouse.

Now its one of the largest hot tub industries in the world.

Beginning as a basement sideline, "Almost Heaven", a hot tub business that's producing hundreds of items a month, is one of Southern West Virginia's fastest growing manufacturers.

The hot tub is booming, to be sure, with costly condominiums going up around the globe, according to Barry Glick and Bob Hoffa, who founded the business at Renick in the early 1970s.

Glick and his brother, Arthur, came to Greenbrier County and bought a farm, where they planted 500 apple trees, after urban life up north lost its appeal, the brothers recalled.

"We chose a country lifestyle and wanted to see what we could make out of it," Arthur Glick said at Almost Heaven. "It has really paid off."

After trying a few of their ideas, the Glicks clicked with hot tubs.

Now they're selling tubs in England, France, South Africa, Virgin Islands, Mexico and Canada. Nearly 500 distributors push Almost Heaven's products around the world.

Used for theraputic as well as recreational reasons, the hot tubs produced at Almost Heaven retail for $2,000-$3,000, the builders said.

And the reason the Glick's heavenly hot tubs are the top of the line in the industry is due to the high quality craftsmen in the Greenbrier County area, Arthur Glick said.

"Down here people are almost born with skills," the Pennsylvania native explained.

"They're the finest group of craftsmen in the world."

Though the Glicks started in a small basement on their farm north of Renick a decade ago, they now have constructed a 50,000 square foot facility at Renick that houses the plant's 30 employees.

Almost Heaven is the largest user of redwood in this part of the country, Glick said.

Other kinds of wood used in making hot tubs are American white oak, British Honduras mahagony and Burmese teak, Glick said.

The hot tub units include the wooden vessel, pump, heater, filter, and plumbing equipment.

"We made a better hot tub and the world beat a path to our door right here in West Virginia," Glick concluded.

PEARL BUCK STAMP CELEBRATION

Saturday was a big day in Hillsboro and the stamp dedication ceremony was very impressive. The McNeel Gymnasium was

Martin and Ryder homes. The two ladies expressed concern about their children being left out in the winter weather, particularly on a day when school may be dismissed early and there is no way to notify either family since phone service does not extend to their residences. The ladies were assured by Superintendent Bailey that their children would not be put out unattended. Mr. Alderman expressed concern about the safety of using a full size bus on the Douthards Creek road (a small bus is now being used).

The following personnel were employed:

—LyAnn Sarver as Mathematics Teacher at PCHS. Ms. Sarver is a native of Monroe County and has been teaching in McDowell County for the past six years.

Kandi Davis as Librarian at PCHS. She is a 1983 graduate of Glenville State College.

—Karen Keener as Fourth Grade Teacher at Green Bank. She has just graduated from Penn State.

—Diane Burger as Language Arts Teacher at Hillsboro. A native of Ohio, she is a recent graduate of W.V.U.

—Robert Sheets as Freshman Football Coach at P.C.H.S.

1933, and went to Fort Knox, Ky. There we were placed into two different companies. I was in Co. 565, and others in Co. 566. Both companies were sent to northern California. All men were native West Virginians and several were from Greenbrier and Nicholas Counties.

I was stationed at Butte Meadows, Calif., in the mountains near Chico. (Chico is where Dr. Jim Hamilton, former doctor in Marlinton, is now living. He says he hunts in Butte Meadows.) I was a life guard at the camp for the first part of the season. Then, I joined the group building low-water bridges.

I left Chico, Oct. 19, 1933, and went to San Bernardino, Southern Calif. There we built fire trails.

I came home, March 22, 1933, and those who signed to stay in, went to Idaho.

While in California, I was able to do and see many interesting things. We went to the Rose Bowl Game between Columbia and Stanford, saw the Rose Parade, watched the construction of the Golden Gate Bridge, visited Mt. Lassen, the only active volcano in the U.S. at that time.

I feel that the CCC program was very valuable and has great possibilities for the present day.

PEARL BUCK STAMP CELEBRATION

Saturday was a big day in Hillsboro and the stamp dedication ceremony was very impressive. The McNeel Gymnasium was crowded—Senator Jennings Randolph estimated 750—with more on the outside. The U. S. Postal Service planned and conducted the ceremony, with F. David Doran, Sectional Center Manager of Bluefield, presiding. The mayor of New York City's China town was responsible for the large banners with book titles in Chinese character on the walls.

Pre-program music was by the Oak Grove Presbyterian Church Choir. Rev. J. D. Arbuckle has the invocation and Rev. Verl Butcher gave the benediction.

The presentation of colors was by the American Legion Post #50 of Marlinton.

Mrs. Jane D. Meadow of Bluefield, sang the National Anthem, accompanied at the piano by Mr. Willard Eskridge.

Mrs. George T. Hoy

Ms. Sarver is a native of Monroe County and has been teaching in McDowell County for the past six years.

Kandi Davis as Librarian at PCHS. She is a 1983 graduate of Glenville State College.

—Karen Keener as Fourth Grade Teacher at Green Bank. She has just graduated from Penn State.

—Diane Burger as Language Arts Teacher at Hillsboro. A native of Ohio, she is a recent graduate of W.V.U.

—Robert Sheets as Freshman Football Coach at P.C. H.S.

The addition of th new mathematics teache the *High School will e*le the *school to offer* a ful time program in comput r education, to be taught by one of the present staff members. The vacancy in the Social Studies Department will be filled by having teachers in other departments with social studies certification teach the classes. Only two classes are involved. The new football coach, Michael Smith, will be teaching Physica Education and Health.

The County has three Special Education vacancies yet to fill for the new school year.

The Board approved several items concerning County policy manual included

There we built fire trails.

I came home, March 22, 1933, and those who signed to stay in, went to Idaho.

Tracy Markers

I am a firm believer in the old saying "We should honor and respect our ancestors."

George Washington and Mary Ann Ervine Tracy reared their eleven children, seven boys and four girls, on Buffalo Mountain during the last half of the nineteenth century. All that remains today to mark the spot is the pure sparkling water from the spring where hunters and wildlife pause to refresh as the water rushes down Buffalo to the Atlantic.

Last February a form letter was sent to many relatives of the 'Tracy Clan' asking for contributions to place markers in the Hartman Cemetery (which is near Arbovale, on land owned by Neil Snyder) for Mary Ann and son, Albert tracy's graves. Markers had been placed for George Washington and son, Preston, earlier. The following people contributed:

Brambel Tracy, Mrs. Cecil Peterson and family, Marshall Tracy, Mrs. Gustava Hiner, William Townsend, Mrs. Erma Pettit, Mrs. Robert Auldridge, Sterl Nicholas, Leo Arbogast, David Parmer, Mr. and Mrs. George Loman, Mr. and Mrs. Robert Bittle, Mr. and Mrs. Glenn Tracy.

The markers were placed at the graves before Memorial Day.

We want to thank you for your contribution.

Glenn P. Tracy

The New Marlinton Motor Sales announces with pride the acquisition of BARTOW MOTORS

We now offer a full line of motor vehicles to totally *[illegible]* will please your tastes. If we don't have it, our experienced and trained sales force can place your order today!

Over 60 new cars and trucks have been ordered to provide you with the widest selection available from the 83's and the exciting 84's.

Sales and Service will be tailored to meet your personal needs and desires. New shop equipment will be in place to provide you new and improved repairs.

Of course, we will continue to offer the finest selection of used cars. Now bigger and better because of increased new car sales.

[illegible] to new customers, and thanks to our past customers. We invite you to stop by our two facilities and see what we have to offer, and give us your suggestions.

PROUD TO SERVE YOU,

BLIX McNEILL, General Manager
Marlinton Division

Deaths

Calvin K. Plyler

Calvin Keith "Dutch" Plyler, 56, died Saturday, August 13, 1983, in the Veterans Administration Hospital at Clarksburg after a two-year illness with cancer.

He owned and operated a service station at Bartow.

Born February 25, 1927, at Marlinton, he was the son of the late Oren Emmit and Kate G. Plyler. A sister, Sue Ann, preceded him in death.

Surviving him are a son, Keith Douglas Plyler, of Portsmouth, Virginia, and a daughter, Jacqueline P. Butler, of Lexington, Kentucky; two grandchildren; a brother, Luther Plyler, of Durbin, and two sisters, Helen Mycka, of Denver, Colorado, and Mary Beale, of Newport News, Virginia.

Graveside services were held Tuesday by Rev. Edwin Tutwiler in Mountain View Cemetery, with Masonic rites.

Hill Reunion

The 34th annual Richard Hill Family Reunion will be held on Sunday, Aug. 21, at Droop Mountain Battlefield State Park. The program will begin at 11:15 am. The Rev. Glen Spinks, pastor of the New Life Baptist Church of Weston, will have the Memorial.

In the afternoon we hope to have different singing groups. Timmy Pyles, of Summersville, will again present a message with the King's Kids thru puppetry.

Everyone is invited to come and be a part of this reunion.

Woodmen of the World

The Woodman Camp 321 will hold their regular monthly meeting on Monday, Aug. 22

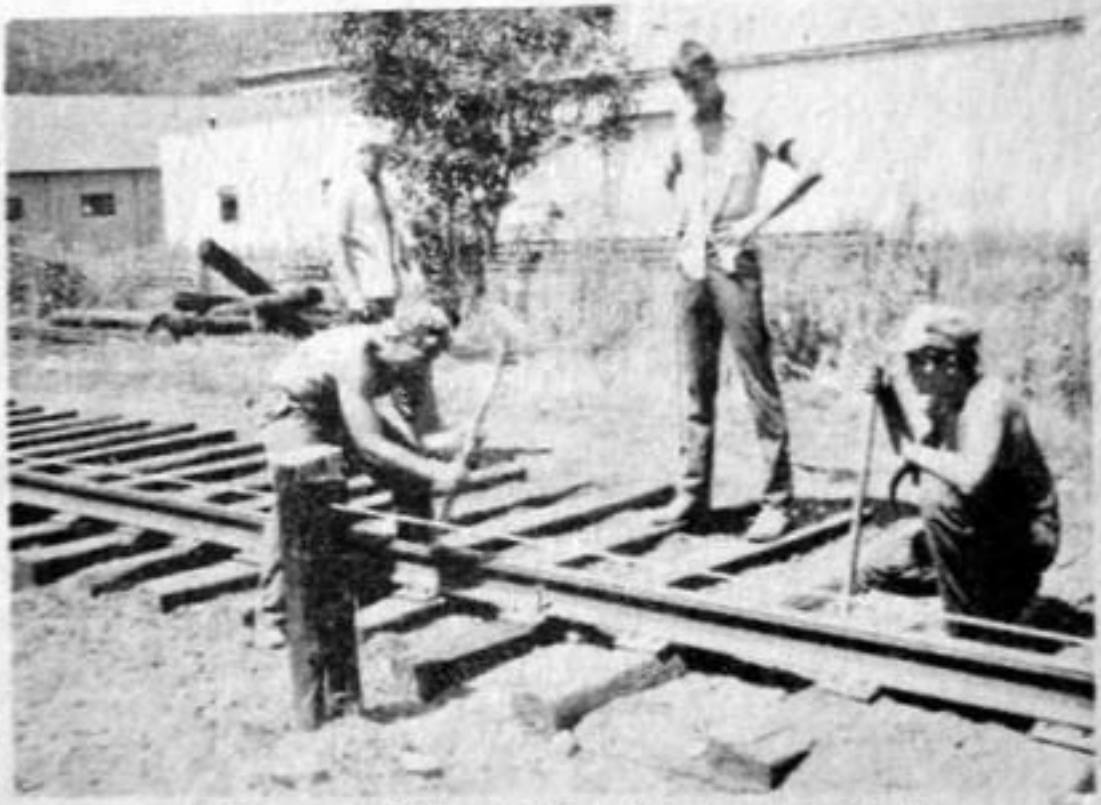
joined potatoes are flat, not over an inch thick.



We would like to be able to report the relaying of the track on the Greenbrier Division but all that is being laid is a short section of track at the Marlinton Depot. The work is being done by the residents of the Anthony Center. Additional track is needed to hold two additional cars that have been donated by the C&O. The cars, a flat car and a camp car, are now at Cass. The rails and fittings being laid were donated by the Midwest Corporation.

tracts of land that had red timber into the city were bought and plats of land laid off and a great number sold to colored people, most of whom made their money in coal mining.

It was enough to appeal to people of industrial centers where all is noise and excitement, to come to the pure air and clear waters of an upland country.

A few years ago when work in the mines was to be had by all that were capable of doing it, the miners made princely incomes. They were envied by professional men who were bearing great burdens of responsibility in fear and anxiety. Miners who had nothing much to worry about were drawing big money. And the colored race furnished some of the best workmen. These men could easily afford to buy land in the mountains to become freeholders. One day a laborer got off the train to look at a plat of ground, and the agent for the land company was trying to find out whether he had any money with him, and it appeared that he had a little stake of seventeen hundred dollars that he was carrying around as petty cash.

About this time an educated colored man showed up at Marlinton for the purpose of starting a paper at

ed man showed up at Marlinton for the purpose of starting a paper at Watoga. This office treated him with all the courtesy that is due in the profession. He installed a first rate plant there and got out one issue of the paper, The Associated Voice. That is, it was the only copy of the paper that came to my notice. Pretty soon he was gone and there were no were no more Voices to be seen or heard The Associated Voice was a phrase that disturbed me for a time It was not usual and yet there was some subconscious suggestion that it had some connection with some thought or other. Finally it dawned on me that one Tennyson suffered from an associated voice: "Oh for the touch of the vanished hand, and the sound of the voice that is still."

And in the case of that newspaper that died a borning, there was a touch of the vanished hand and the voice has been still these many years.

So the foregoing are a few of the things suggested by the wreck at Watoga. You cannot mention a hill or hollow in Pocahontas county but what chapters are suggested to us old timers who have reached the garrulous age when we talk too much, especially about trifles.

The wreck however unfortunate had the effect of bringing a few days

CALVIN W. PRICE, EDITOR.

THURSDAY, MAY 14 1925

Last week the smooth running machinery of the Greenbrier Division was interrupted for some days. For twenty-five years the keen faced railroad men have been running trains on this hundred mile stretch exposed to all the fury of the elements. "Rain hail, and snow that praise the Lord, he's seen them at their work, and wished he had another run, or they another kirk." High winds, floods, and avalanches are all to be counted in a day's work. But the railroad men get the trains through. I never talk to a railroad man but what I have a faint sense of a dual personality. He carries on the conversation but his mind visualizes the track and his mind is on his business. This is the silver anniversary of the Greenbrier Division — twenty-five years successfully combatting the forces of nature in the mountains. It is great work managing trains in

have a faint sense of a dual personality. He carries on the conversation but his mind visualizes the track and his mind is on his business. This is the silver anniversary of the Greenbrier Division — twenty-five years successfully combatting the forces of nature in the mountains. It is great work managing trains in a flat country, but until he has serv- his time in the mountains, a railroad man knows not bad from good.

A year or so ago they inaugurated a fast freight service over this division, and almost any time, day or night, these great trains go thundering through the valley. We have a name for such a train. We say there goes The Manifest. It is a nautical term and refers to an invoice of a ship's cargo, made up at the starting point to be exhibited to the custom house at the end of the voyage.

Monday, the 4th of May, the current Manifest, with sixty-two cars and two engines in front went roaring up the river. And in railroading as in ordinary life things can happen with great suddenness. The train came to the Watoga bridge, and just as the nineteenth car was about to take the bridge, it had the perversity to leave the rails. The bridge is in two long spans upheld by two superstructures. The car caught the beginning of the arch and the superstructure was torn apart and the bridge went down leaving a solution in the continuity of the line of about a hundred and fifty feet. Yet with all the terrible destruction that was then wrought, only four cars went into the river and no one was even hurt. So while it

versity to leave the rails. The bridge is in two long spans upheld by two superstructures. The car caught the beginning of the arch and the superstructure was torn apart and the bridge went down leaving a solution in the continuity of the line of about a hundred and fifty feet. Yet with all the terrible destruction that was then wrought, only four cars went into the river and no one was even hurt. So while it was misfortune, the luck of the division held to some extent. Perhaps if the iron work of the bridge had not been there to check the speed, all the rear of the train had piled into the river.

Transferring by boat commenced the same day and by Friday the trains were running over the river again. A car load of flour, two carloads of lumber, and a carload of brick constituted the goods in the water, none damaged except the flour. The flour was under water and was salvaged by the neighbors on a contract to remove it from the watery right of way for what it was worth. It was all in bags under the water and it was floated to the bank where it was found that centers of the bags contained much good and undamaged flour, and it is estimated that this bread cast upon the waters will show up on the tables in that part of the county for many days.

The bridge at this place crossed the river over a pool that was famous in the old days. Before the railroad came, the knowledge that we had of the Greenbrier River as a whole, were the wonderful tales of the pilots and crews that manned the lumber rafts that ran the river to the main

bread cast upon the waters will show up on the tables in that part of the county for many days.

The bridge at this place crossed the river over a pool that was famous in the old days. Before the railroad came, the knowledge that we had of the Greenbrier River as a whole, were the wonderful tales of the pilots and crews that manned the lumber rafts that ran the river to the main line of the railroad at Ronceverte The travel was over the turnpikes that traversed the plateau far above and out of sight of the stream.

In those days it was thought that the river had so many turnings in it that it was a hundred and fifty miles from Marlinton to Ronceverte, but when the engineers laid off the railroad this was reduced to sixty miles, though it is true that practically all the bends were cut acrosss.

The place of the Watoga bridge, eight miles below Marlinton, was the famous Cat Hole, named from the fish that frequented it. It was deep water in a bend, and no pilot's tale was complete without an account of the whirlpool that occurred here and the difficulties that a raft might experience if caught in that water. Ordinary drift might remain days and weeks in that pool seemingly in the middle of the river in deep water, caught in the circular water. Either the vagaries of a swift river or the building of a great stone pier and abutments by the railroad broke up this whirlpool and if I had not seen it, I would doubt the truth of the pilot's story about it.

Either the vagaries of a swift river or the building of a great stone pier and abutments by the railroad broke up this whirlpool and if I had not seen it, I would doubt the truth of the pilot's story about it.

In 1889, I was one of a crew of a raft of walnut planks and we suffered shipwreck on the island about a mile above the Cat Hole on the head of the island just below the mouth of Beaver Creek. At that time there were some dangerous boulders against the east bank of the main channel that were just covered at a rafting tide. They could be observed by the presence of white caps, and in the uncertain light of a foggy morning, and out of abundant caution, we kept away too far and grounded on the beach of the island. There we were all day, in the water most of the time up to our shoulders. The most embarrassing feature was the passing of more fortunate rafts whose pilots and crews tried to look sorry and

In 1889, I was one of a crew of a raft of walnut planks and we suffered shipwreck on the island about a mile above the Cat Hole on the head of the island just below the mouth of Beaver Creek. At that time there were some dangerous boulders against the east bank of the main channel that were just covered at a rafting ing tide. They could be observed by the presence of white caps, and in the uncertain light of a foggy morning, and out of abundant caution, we kept away too far and grounded on the beach of the island. There we were all day, in the water most of the time up to our shoulders. Th most emrarrasssing feature was the passing of more fortunate rafts whose pilots and crews tried to look sorry and could not. Along towards the close of the long summer day, the McClures heard about us and brought us a boat. Then we accepted the inevitable and lightened the raft and were able to swing off. We left the jettisoned cargo with the McClure boys to care for. It was just about sun down when we got to the Cat Hole. We were not a night running crew and it was apparent that the water was already too low for safe navigation and would be down in the morning. So we snubbed her in the

Cat Hole. I remember distinctly that in the center of the whirlpoool there was a big peeled. bumped white pine St. Lawrence log standing on end, held without motion by the circling current in the middle or near the middle of the river. We walked back home that night and the second day after that occurred the famous Johnstown flood that tore that raft from its moorings and destroyed it. The loss of the four or five thousand dollars that it represented put that particular firm out of businesss on the river.

I was talking with an old timer that went down to view the activities last week and he said there were still signs of the return current as indicated by the floating flour sacks.

The name Watoga is recent. It was brought here at the time a lumber plant was built by some one who came from or had some knowledge of the Watauga country to the south of us famous in history. The Holston settlements of about the times of the Revolution were first known as the Watauga settlements. The new name suffered in spelling during the transit but that is the place the name came from. Before the activities occasioned by the building of the railroad, this community was a beautiful hollow in the hills of some four or five green farms. It supported a one room school and was known as Riverside, which is still the name of the school. The Smiths, Simmons, McClures and others lived there.

The name Watoga is recent. It was brought here at the time a lumber plant was built by some one who came from or had some knowledge of the Watauga country to the south of us famous in history. The Holston settlements of about the times of the Revolution were first known as the Watauga settlements. The new name suffered in spelling during the transit but that is the place the name came from. Before the activities occasioned by the building of the railroad, this community was a beautiful hollow in the hills of some four or five green farms. It supported a one room school and was known as Riverside, which is still the name of the school. The Smiths, Simmons, McClures and others lived there.

The first time I ever attempted to address the public on the issues of the day was at the Riverside school in the campaign of 1896, during the period of money madness, fiat money, sixteen to one, Bryanites, and gold-bugs.

We Democrats, as usual, too smart for our own good, boldly stole the issue from the Republican party, and the managers of that party, with all the canniness of the true Yankee, coined the phrase of Sound Money, and entered upon a generation of political prosperity that has only been equaled by the kind of Democracy that old Andrew Jackson forged out. I remember that we had a paper backed book written by a Huntington man known as Coin Harvey, and we could prove almost anything we wanted by that book, especially a mysterious charge known as the crime of 1873. But when the votes were counted it was found that the voters had got the figures mixed and they voted on the crime of 1893 that we had been trying to keep cov-

issue from the Republican party, the managers of that party, with all the canniness of the true Yankee, coined the phrase of Sound Money, and entered upon a generation of political prosperity that has only been equaled by the kind of Democracy that old Andrew Jackson forged out. I remember that we had a paper backed book written by a Huntington man known as Coin Harvey, and we could prove almost anything we wanted by that book, especially a mysterious charge known as the crime of 1873. But when the votes were counted it was found that the voters had got the figures mixed and they voted on the crime of 1893 that we had been trying to keep covered up. There was some small satisfaction in knowing however that this county was about the only one in the State where the Democrats held their own that year.

And it so turned out that I was to make one more speech to a sea of upturned faces at that point. I will mention here that while the real name of that community was Riverside, yet some of the envious and ungodly dubbed it Fiddlers Green. And it was more like Fiddlers Green the next appearance that I made there. It was the only time I was ever involved in industrial troubles. The stone work of that bridge had been let to contractors and there had been a failure and a receiver had been appointed by the Circuit Court of Pocahontas County, and I went with him one summer day to break the news to the laborers, and to take charge of the work. I was young and full of beans, and never thought of the personal equation, but when we got there and told the workmen it

And it was more like Fiddlers Green the next appearance that I made there. It was the only time I was ever involved in industrial troubles. The stone work of that bridge had been let to contractors and there had been a failure and a receiver had been appointed by the Circuit Court of Pocahontas County, and I went with him one summer day to break the news to the laborers, and to take charge of the work. I was young and full of beans, and never thought of the personal equation, but when we got there and told the workmen it looked like there was going to be a riot.

I was put up to make a speech to the crowd. They assembled at the river edge at the east pier and I was on the bank in a kind of a natural pulpit. There were a sprinkling of the native born but most of them were hands that followed the public works, and in those days hard rock men were considered the most dangerous of all strong men. I remember the point I made was that while it was extremely doubtful whether the would get anything for the accounts then owing, that the appointment of a receiver insured and guaranteed their wages thereafter, which was good law, and the truth, and finally the force after considerable debate, agreed to go on and work for the re-

riot.

I was put up to make a speech to the crowd. They assembled at the river edge at the east pier and I was on the bank in a kind of a natural pulpit. As I recollect it the abutment at the east side of the river was about half way up, and about the time that it was completed a land owner came to see me and said that he had land that had been taken for the purposes of a right of way by the railroad without compensation. On looking into, I found that it was true. There was a corner on the river bank and the railroad had used a triangular tract of land. It was a very small plat. As I recollect it after all these years it was fifteen feet Not quite big enough to swing a cat upon, but on that tract this great cut stone abutment had been built and it represented an outlay of thousands of dollars. I called the attention of the right of way people to it and they were inclined to be scornful at first. But

The name intrigued me and I inquired about the origin of the name and found that it had a certain and definite history. Something like a hundred years ago, one of the most populous and one of richest sections of the Western Waters was the Little Levels. It was an educational center and students came from many of the nearby counties to the famous academy there. It was also a strict Presbyterian and Methodist center. About that time one of the most popular sports of the country was rooster fighting and it was an ungodly pastime accompanied by profanity, hard drinking, and betting, and it was frowned upon by the righteous.

The irreconcilable conflict between the young and old was in full flower then as always, and the young bloods went across the river into the wilderness and set up a plant for the fighting of game roosters, as part of the sowing of the wild oats of boyhood. They went through this stage of existence of what they considered fun, and in due time married, matured, sobered up, and settled down, and took their places as pillars of the church as such positions became vacant in due course of nature.

Prosperity bloomed on Riverside. It was chosen as the operating place for the timber crop on some twelve or fifteen thousand acres of land lying on the east side of the river. The west side was the Levels side where the fields were as fertile as the land of Egypt, another name for that section of the country. ' The railroad crossing to the east side of the river saved the building of a bridge for the lumber plant, always an expensive proposition over a river as big as the Greenbrier. Then came the big band mill, the company store, the number of planked houses laid off in regular streets surrounding the old farm homestead. It was a regular town and an important place in the county, and one to be reckoned with. This county has seen of these temporary cities sprung up flourish like an

or fifteen thousand acres of land lying on the east side of the river. The west side was the Levels side where the fields were as fertile as the land of Egypt, another name for that section of the country. The railroad crossing to the east side of the river saved the building of a bridge for the lumber plant, always an expensive proposition over a river as big as the Greenbrier. Then came the big band mill, the company store, the number of planked houses laid off in regular streets surrounding the old farm homestead. It was a regular town and an important place in the county, and one to be reckoned with. This county has seen of these temporary cities sprung up, flourish like an eldorado for a time, and then perish.

It looked like Watoga was to be more enduring. For about the time that the sawmill was whirling its finest, a man came here from Jersey City or near by towns with a plan to build a kindling wood factory. It had not occurred to any of us that kindling wood was a staple. It is a problem alright from the cradle to the grave with us country people, but it was always considered to be local issue like the tariff. Each community to furnish itself with its own kindling wood. But at all the big saw mills up and down the valley, there were great refuse heaps that burned day and night at the end of the long conveyors, and it did not

had not occurred to any of us that kindling wood was a staple. It is a problem alright from the cradle to the grave with us country people, but it was always considered to be local issue like the tariff. Each community to furnish itself with its own kindling wood. But at all the big saw mills up and down the valley, there were great refuse heaps that burned day and night at the end of the long conveyors, and it did not appear strange that this refuse could be used to light fires in the cities.

This gentleman formed a company, the name of which I do not at this moment remember, and I cannot recall his name, though I learned about kindling from him. He put thirty odd thousand dollars in the kindling wood plant. He had three miles of iron pipe in the dry kiln part of it. He had a large number of automatic bundling machines and endless elevators and conveyors, and fine engines. He finally got a local loan on a deed of trust for five thousand dollars. The security looked perfect and when it finally went bankrupt it was the first lien but it then appeared that the accepted plan of the kindling wood business was a cut off saw and a horse and wagon and a bundle of twine representing a capital of about a hundred and thirty dollars. The kindling wood world would not be

He had a large number of automatic bundling machines and endless elevators and conveyors, and fine engines. He finally got a local loan on a deed of trust for five thousand dollars. The security looked perfect and when it finally went bankrupt it was the first lien but it then appeared that the accepted plan of the kindling wood business was a cut off saw and a horse and wagon and a bundle of twine representing a capital of about a hundred and thirty dollars. The kindling wood world would not believe that there was such a thing as a thirty thousand dollar kindling wood plant. And it was a white *elephant*. But a great war breaking out about that time, junk got so high that the plant brought the debt as junk, and the sawmill having run its alloted course and finished the harvest of timber, the business activities of the new town bogged down The kindling wood factory was torn down and the sawmill dismantled and taken to some far country to make other hearts glad.

Presently we heard that some West Virginia capitalists were looking for a place and a tract of cut over land to satisfy the land hunger of colored citizens, who had lots of money but no place in the sun. And the great tracts of land that had fed timber into the city were bought and plats of land laid off and a great number sold to colored people, most of whom

elephant. But a great war breaking out about that time, junk got so high that the plant brought the debt as junk, and the sawmill having run its alloted course and finished the harvest of timber, the business activities of the new town bogged down The kindling wood factory was torn down and the sawmill dismantled and taken to some far country to make other hearts glad.

Presently we heard that some West Virginia capitalists were looking for a place and a tract of cut over land to satisfy the land hunger of colored citizens, who had lots of money but no place in the sun. And the great tracts of land that had fed timber into the city were bought and plats of land laid off and a great number sold to colored people, most of whom made their money in coal mining.

It was enough to appeal to people of industrial centers where all is noise and excitement, to come to the pure air and clear waters of an upland country.

A few years ago when work in the mines was to be had by all that were capable of doing it, the miners made princely incomes. They were envied by professional men who were bearing great burdens of responsibility in fear and anxiety. Miners who had nothing much to worry about were drawing big money. And the colored race furnished some of the best workmen. These men could easily afford to buy land in the mountains to become freeholders. One day a laborer got off the train to look at a plat of ground, and the agent for the land

It was enough to appeal to people of industrial centers where all is noise and excitement, to come to the pure air and clear waters of an upland country.

A few years ago when work in the mines was to be had by all that were capable of doing it, the miners made princely incomes. They were envied by professional men who were bearing great burdens of responsibility in fear and anxiety. Miners who had nothing much to worry about were drawing big money. And the colored race furnished some of the best workmen. These men could easily afford to buy land in the mountains to become freeholders. One day a laborer got off the train to look at a plat of ground, and the agent for the land company was trying to find out whether he had any money with him, and it appeared that he had a little stake of seventeen hundred dollars that he was carrying around as petty cash.

About this time an educated colored man showed up at Marlinton for the purpose of starting a paper at Watoga. This office treated him with all the courtesy that is due in the profession. He installed a first rate plant there and got out one issue of the paper, The Associated Voice. That is, it was the only copy of the paper that came to my notice. Pretty soon he was

Student

Virginia Louise Coleman, daughter of Mr. and Mrs. Herman Coleman, of Green Bank, has been accepted for admission to West Virginia Wesleyan College for the 1983 fall term. She plans to major in computer science.

Miss Coleman is a 1983 graduate of Pocahontas County High School, where she was a member of the Gifted Program and the High School Honors Program through Shepherd College. A member of the National Honor Society, she participated in band and student government.

Founded in 1890, West Virginia Wesleyan College is a United Methodist-related four-year college of the liberal arts. A student body of over 1500 can choose majors and career preparation from 40 different fields. Wesleyan confers six academic degrees: Bachelor of Arts, Bachelor of Science, Bachelor of Music Education, Associate of Arts (secretarial science), Master of Arts in Teaching, and Bachelor of Liberal Studies

Deaths

Edwin Carl Rexrode

Edwin Carl Rexrode died Sunday, August 7, 1983, in Port Charlotte, Florida. He was a former resident of Frank.

Born February 25, 1922, at Monterey, Virginia, he was the son of the late Elza and Alma Eagle Rexrode.

He was a retired fireman, with many years of service in Akron, Ohio, and a member of the Baptist Church. He was a World War II Navy veteran.

Mr. Rexrode had lived at Port Charlotte for five years.

Surviving him are his wife, Patricia Slaven Rexrode; two daughters, Patricia Jean Kruger, of Ontario, Canada, and Cindi Reeves, of Port Charlotte; a son, Jeffrey, of Winter Haven, Florida; two sisters, Mrs. Hazel Shrader, of Richmond, Virginia, and Mrs. Irene Rexrode, of Waynesboro, Virginia.

A sister, Audrey "Dot" Brodie, preceded him in death in February, 1979.

Services will be held Friday at 1 p. m. at the Wallace and Wallace Chapel at Arbovale by the Rev. Mark Hickman, with burial in Arbovale Cemetery. Visitation is 6 to 9 Thursday.

Graham -:- Eye

Annette Eye and William E. Graham were married June 25, 1983, at 3:00 p.m. at the home of the bride's aunt and uncle, Mr. and Mrs. W. R. Thomason, in Annapolis, Maryland.

While Gloria Watkins, lead singer in the bluegrass band, "Brandy Station," sang "The Wedding Song," the bride emerged from the house on the arm of her uncle, Dick Thomason. They walked around the pool decorated with hanging baskets of fresh pink and purple flowers and entered the gazebo where the ceremony was performed by the Rev. D. Robert Chance, while both mothers, Wanda Eye and Frances Graham proudly observed.

The bride wore a formal length gown of white tissue taffeta with a chapel length train and a picture hat with matching Chantilly lace. The bride's attendant was her sister, Joan Frye. Joan wore a formal length gown of pink and purple organza with flounced dropped shoulder and hemline. The groom's best man was James Garber and they wore two-tone grey tuxedoes.

After the ceremony the band played an old fashioned hoedown, the bars were open, and the party began with the bride and groom first greeting their guests who lined the pool area. Many hours later many guests were playfully pushed into the pool, preceded by the groom and the finale was the bride, herself, who jumped from the diving board into the pool clad in her wedding dress.

A good time was had by all.

Callison -:- Zucker

Melissa Clair Callison and Jamie Lee Zucker were wed Saturday, August 6 at 7:30 after sundown at the Guyan Country Club, Huntington. The service of Holy Matrimony was performed by the Reverend Dr. Marvin H. Carr, III, a United Methodist minister and professor of religion at W. Va. Wesleyan College.

The bride is the daughter of the Reverend and Mrs. Harper T. Callison, of Huntington. The groom is the son of Mr. and Mrs. Edward Zucker, of South Euclid, Ohio.

Guests were seated by candlelight amidst ferns and urns of rubrum lilies and baroque chamber music was played by a string ensemble led by Ms. Janet Bromley, violin; Daniel Boyer, viola; James McWhorter, cello; and Harriet Tucker, harpsicordist.

The bride, wearing her mother's wedding gown of silk pois d'sois trimmed in Alencon lace and a cathedral length lace mantilla was escorted by her father during the processional. Her attendants were: maid of honor, Ms. Sherry Bennett, of Norman, Oklahoma; a cousin, Mrs. J. B. Simms, of Belleville; and the bride's three sisters, Amy Elizabeth, Jane Cameron, and Rachel Louise Callison, all of Huntington.

Mr. Zucker's groomsmen were: best man, Dr. Scott L. Rose, of South Euclid, Ohio; Dr. Eric Scott Lawrence, of Beechwood, Ohio; Scott Teter, of Parkersburg; and the groom's two brothers-in-law, Scott Brown, of Deerfield, Ill.,

Letter

I've enjoyed reading the "Times" very much over the past year. I've especially enjoyed reading the "old time" articles from the past 100 years, especially any articles that pertain to the village of Clover Lick. Born in Watoga, I first remember being a human being and aware of my surroundings in Clover Lick and they have always been with me.

A couple of years ago I went back over there to look around and there was not very much to see. The depot I found up the road a piece where it had been moved was then newly painted in white and black and very well preserved. The company store and Post Office were not in use and deteriorating badly. I found no person at any of the homes, and I knocked on every door, who could tell me what had happened to a long, white building at the end of the row of houses from the Depot on down. We lived in the back of that building on the first floor and the brush had grown up in the middle of the road so badly that I didn't try to get through to see if the building was still there.

Last year I went back again and a new road had been made and a brand new bridge over the creek had been built—the railroad was much closer than it should have been, as I remembered the place, and the building had been erased completely.

I contacted Mrs. Catherine Shields about the many questions I had regarding the "old Clover Lick" - circa. 1911-1914 - Miller, worked on and she referred me to Mr. Ralph G. Lowe, who lived where the old depot used to sit. I wrote him a long letter of questions last Fall but he never got around to answering my letter. It was with deep regret that I read his obituary in the Times. He passed away at his home in Clover Lick on June 19, 1983, before I could get back over to talk with him.

I've kept every page of the articles from the past that you have published and I still eagerly look through the paper every week to see if you have printed more. When and if you have them, they are most certainly appreciated here. My congratulations on your 100th birthday!

My father, Vaughn J. Bi... there. My very earl... memories are of the life ... had there and they are ... very pleasant ones. If the... is a reader of the Tim... who knew Clover Lick in ... earlier days, I would app... ciate it very much if th... could tell me what the lon... white building was at t... very end of the village. ... seem to remember boar... ers or roomers, and offic... there. I have many pictur... taken there and am enclo... ing one print that I h... made of the village, circ... 1913, but it is rather da... and may not re-print. Th... long building at the e... treme right of the picture ... the one in which we lived.

Sincerely,
Paul B. Mill...

Daetwyler Sees Changes At USC

By RON WENZELL
State Staff Writer

Today's college student is highly motivated and serious, says the retiring senior vice president for business affairs at the University of South Carolina.

F-104s with the 169th Fighter Group in Spain. He retired from the guard in 1972 with the rank of colonel.

Flying is what brought him to South Carolina from his native West Virginia. Enlisting in the Army Air Corps in 1943, Daetwyler was sent to Winthrop College at Rock Hill for ...

"I decided to return to South Carolina to finish my education," he said. "I picked South Carolina because of the air guard."

Shooting Incident

Hazel Vance, of Durbin, is a patient in the Davis Memorial Hospital in Elkins following a shooting incident Saturday. The shooting occurred at 10 p. m. following a family argument, according to State Police. Norman B. Vance is reported to have been in a scuffle with another person when his small handgun accidentally discharged and struck Mrs. Vance.

Mrs. Vance is reported to be in good condition with a wound in her arm.

No charges have been filed yet and the case is still under investigation.

Mistrial

The trial of Verlon Jones under the State's habitual criminal law ended in a mistrial in Pocahontas County Circuit Court Tuesday. After about one and a half hours of attempting to seat a jury with no success, Judge Charles Lobban declared a mistrial.

The case will be set for trial again this term and a new panel of jurors called.

Robert Martin has joined Martin Saffer as a defense attorney in the case.

trucks to carry the men.

One hundred ten men registered Saturday at the Reunion and there were possibly 150 in all.

Luther Mullenax, of Staunton, Virginia, who was at Camp Thornwood, at 91 was the oldest present. He is pictured above. The sun proved to be too hot for him to stay out long and to be in the group picture.

Greetings were brought from officials and an additional one is printed from Senator Jennings Randolph received too late to be read. Attorney General Chauncey Browning spoke a few words at the luncheon and Herb Callicoat read a poem he had written at Camp Price in 1936, "Three Cheers for the CCC," printed in this week's paper.

Homer Jeffrey, of Lynco, asked the blessing.

Ranger Dale Dunshie, of the Monongahela National

Engagement

Mr. and Mrs. Elmer L. Dean, of Huntersville, wish to announce the engagement of their daughter, Debra, to James O. Murphy, Jr., son of Mr. and Mrs. James O. Murphy, of Buckeye.

Debbie is a 1980 graduate of Pocahontas County High School and is a senior at West Virginia Wesleyan College majoring in Biology. Jim will graduate in August from Mars Hill College, Mars Hill, NC, with a Bachelor of Arts degree in English.

The wedding is planned for June of 1984.

Receives MBA

Bernard Smith, R.Ph., graduated from Ohio University, in Athens, Ohio, with a Masters Degree in Business Administration. His son, Andrew, completed the Computer School at Snowshoe the week of July 11.

Mr. and Mrs. Bernard

Open Church Wedding

Mr. Everett W. Dilley, of Dunmore, wishes to announce the engagement and forthcoming marriage of his daughter, Lella Ann, to Andrew R. Morris, of Atlanta, Georgia, son of Mrs. Lillian L. Morris, also of Dunmore.

An open church wedding will be held August 20, 1983, at 2:30 p.m. in the Dunmore United Methodist Church, followed by a reception at the Dunmore Community Center.

IN SERVICE

David Liptak left for the Army, July 5, and is in basic training. His address is:

Open Church Wedding

Terry Jo Hilliard, of Weirton, and Ed Stemple, of Marlinton, will be married Saturday, August 6, at 3:30 p.m. in the Marlinton United Methodist Church. The tradition of open church wedding will be observed.

Ms. Hilliard is the daughter of Mr. and Mrs. Joseph Falianich, of Weirton. Mr. Stemple is the son of Mr. and Mrs. Edward Stemple, of Marlinton.

Friends and relatives welcome.

B.F.D. Fire and Rescue Ladies Auxiliary

The B.F.D. Fire and Rescue Company Ladies Auxiliary met for their bi-weekly meeting Tuesday evening at the Fire Hall. Seven members were present while two new members were welcomed into the auxiliary. New members are: Vicky Barkley and Dee Ulderich.

The purpose of the meeting was reorganization and election of officers. Elected officers are: Virginia Rexrode, president; Virginia Nelson, vice president; Judy Galford, treasurer; Dee Ulderich, secretary; Vicky Barkley, reporter/publicist.

All members are urged to attend the next meeting, July 26, 7:00 p.m., at the Fire Hall.

Deaths

Mrs. Joel Beard

Mrs. Mamie Ruth Cackley Beard, 94, of Hillsboro, died on Saturday, July 9, 1983, in Greenbrier Valley Hospital after a long illness.

She was a homemaker, a member of the Hillsboro Extension Homemakers Club, a member of the Oak Grove Presbyterian Church, and an Honorary Life Member of the Women of the Church.

Born at Mill Point on November 2, 1888, she was the daughter of Franklin Lee and Virginia Nottingham Cackley.

Her husband, Joel Penick Beard, and a brother, William Harvey Cackley, preceded her in death.

Mrs. Beard is survived by two daughters, Mrs. John [Mary Frances] Stulting, of Charlottesville, Virginia, and Mrs. Hubert [Virginia Lee] Callison, of Hillsboro; five grandchildren and three great-grandchildren.

Funeral services were held Tuesday afternoon at 3 p. m. in the Callison home by the Rev. J. D. Arbuckle, with burial in Oak Grove Cemetery.

were sold. Hold on to yours for there won't be many, if any, left over.

It takes lots of people and lots of work, so we express appreciation to all who help make this a community effort.

Mailgram

This Western Union Mailgram came too late to be read at the CCC Reunion.

Greetings to Participants in Pioneer Days!

It is my understanding you have members of the Civilian Conservation Corps serving as honorary parade marshals today. I would like to remind citizens that we are surrounded by enduring testimonials to the significance of the CCC—bridges, lakes, roads and forests which have benefitted all of us. The CCC was indeed a sound investment that contributed to the quality of life in America.

As the only member of the present congress who voted for the legislation that created the Civilian Conservation Corps in 1933, I salute CCC members who are with you this

CCC—bridges, lakes, roads and forests which have benefitted all of us. The CCC was indeed a sound investment that contributed to the quality of life in America.

As the only member of the present congress who voted for the legislation that created the Civilian Conservation Corps in 1933, I salute CCC members who are with you this weekend.

It is my privilege to co-sponsor S.724, a bill which will authorize a job program encompassing features of the CCC. I am hopeful Congress will act favorably on this legislation in the near future.

With best wishes to everyone for an enjoyable festival,

Magistrate Office Ruling

State Supreme Court Administrator Paul Crabtree has issued his rulings concerning satellite magistrate offices in several counties, including the Pocahontas County office at Durbin.

Mr. Crabtree ruled that the Durbin office may be open approximately two days a week provided full-time coverage is ensured for Marlinton and systems for the rotation of both magistrates and cases are adopted. If these conditions are not met, then the Durbin office must be closed.

Not Guilty

Victor D. McKenney was found not guilty by the jury in his trial Tuesday on a charge of unlawful wounding. He was accused of injuring John R. Fitzgerald with a knife.

The alleged wounding took place during a fight at Red's Drive-In on Beard Heights near Marlinton on April 24 of last year. Fitzgerald initially told police he had been injured by falling on a broken bottle but later made the accusation against McKenney.

The State's case was presented by Prosecuting Attorney Steve Hunter. The State only called two witnesses, John Fitzgerald and Dr. Luis Soriano, who gave the wounded man emergency treatment.

Defense attorney was Robert Martin. The defense presented as witnesses Elizabeth Blake, Larry McKenney, George Bennett, Deputy Bill Hall, and the defendant. The defense presented the agreement that the defendant was acting in self-defense

The 19 year-old daughter of Tony and Lynda Ricottilli was a 1983 graduate of Pocahontas County High School. She will attend West Virginia University in the fall. An active student, Miss Ricottilli was varsity cheerleader for three years (head cheerleader her senior year), and was a member of the Future Business Leaders of America, Student Council (treasurer), and school reporter. She was given the honor of being selected to Who's Who, the English Honorary, and Miss Pocahontas First Runner-Up. When not busy with her studies, Miss Ricottilli enjoys playing the piano, cooking and bicycling.

Although the Forest Festival began in 1930 as a homecoming for former residents of Randolph County, it has grown steadily during the intervening years. The festival has been extended to a full week of activities, with young women from all over the state chosen to serve as princesses.

Chamber Works—July 17

Chamber works representing three centuries will be featured on the Summer Chamber Music Festival's third program at Garth Newel Music Center near Hot Springs. The performance will begin at 3:00 p.m. in the Music Shed on Sunday, July 17.

Opening the program will be Sonata No. 1 in G Major for viola da gamba and piano. Other works will be String Quartet No. 4, Op. 83 by Dimitri Shostakovitch and Mendelssohn's Trio in D minor, Op. 49 for violin, violoncello and piano.

Weekly concerts at Garth Newel will continue each Sunday at 3:00 p.m. through Labor Day weekend.

Gypsy Moth

What was once a people problem is becoming an economic problem.

While the gypsy moth was eating its way through New England, New York, and Pennsylvania, it had its major impact in people's

Rebels and Wood Hicks Publicizing Pocahontas County History

First, I would like to thank those who have made my return to Pocahontas County possible, namely the Pocahontas County Historical Society, The Humanities Foundation of West Virginia, and the citizens of Pocahontas County. I am confident that my stay here this summer will be as rewarding and enriching as last summer's stay, with my only regret being that it will be my last. While expressions of gratitude are important, I feel that an explanation of the nature of this summer's project takes precedence over the civilities.

In order to understand the purpose of this project, one has to look at the status of the county. In essence the county has become a center for tourism in the state due to efforts both public and private, and will no doubt continue to exhibit growth in this area. As

state due to efforts both public and private, and will no doubt continue to exhibit growth in this area. As increasing numbers of tourists enter the county, many of whom are unfamiliar with the geography as well as the history of the county, it becomes necessary to increase their understanding of the county. It would be unrealistic to hope that all the visitors to the county are going to stop at the Pocahontas County Historical Society Museum, yet that is not to say that those who don't include the P.C.H.S.'s Museum in their plans don't have an interest in the history of the county. It thus becomes proper to take the history of the county, or in this case, some aspects thereof, to the tourist, wherever they may be. This, then, is the philosophy of this summer's project entitled: "Rebels and Wood Hicks," publicizing the History of Pocahontas County.

What "Rebels and Wood Hicks" will do is publicize the Civil War and the history of the lumbering industry in Pocahontas County through two sets of

mer's project entitled: "Rebels and Wood Hicks," publicizing the History of Pocahontas County.

What "Rebels and Wood Hicks" will do is publicize the Civil War and the history of the lumbering industry in Pocahontas County through two sets of brochures dealing with each of these aspects of Pocahontas County history. These brochures will take the tourist throughout the county on a driving tour, pointing out mill towns, lumbering railroad grades, Civil War encampments, and battlefields. The sets of brochures will allow the tourist to experience the rich history of the area without deviating from their destination, even if it is not within the county (most of the sites are located along most of the major routes in Pocahontas County). Another mode which will be employed is the "mobile exhibit." Once again the purpose here is to take the history of the county to where the audience is located. These small

without deviating from their destination, even if it is not within the county (most of the sites are located along most of the major routes in Pocahontas County). Another mode which will be employed is the "mobile exhibit." Once again the purpose here is to take the history of the county to where the audience is located. These small one or two panel exhibits will deal with a short historical subject, while at the same time publicizing the P.C.H.S.'s museum and its extensive holdings.

As mentioned, each of these methods is designed to reach a wider audience than that which visits the museum, however, the project in no way strives to neglect the P.C.H.S.'s museum. Activities that will be taking place at the museum include not only research on the brochures, but also the arrangement of an exhibit which is to center

Board of Education

The Board of Education met for a regular meeting on Tuesday.

The meeting opened with a discussion of the Douthard's Creek bus run. With the retirement of one driver and the subsequent movement of the driver who has been making the run up the full length of the Douthard's Creek Road as a half-time employee into a full time position, it has been decided to eliminate the trip for the full length of the road. Only two students are involved. In conjunction with this, the Board discussed the need to increase the amount paid to parents for in-lieu-of-transportation which has not been increased for a number of years. A discussion on the new amount and how it will be paid will be made at the next Board meeting.

The resignation, due to retirement, of Nathan J. Fertig, as bus driver, was accepted. Mr. Fertig has been driving for 33 years.

A medical leave of absence for Nellie S. Arbogast to August 26 was approved.

Letter

Dear Editor,

Just a note to let you know that I was one of those fellows who were in the CCC camp back in the 30's, during the Depression, and I loved camp life and met so many nice people. We all did work hard and I know we earned our money.

I went into Camp Seneca on January 6, 1935 and stayed till April 31, 1936. I guess I got tired of camp and came out for a while. Then I guess I got tired of loafing and no money to spend so I decided to go back in camp if I could get in. On October 18, 1937, I went to Camp Black Mountain on the head of Williams River. I stayed there till they closed the camp down and I was transferred to CCC Camp Thornwood, near Durbin from March 15, 1939 to September 28, 1939. I was discharged from there because of expiration of enrollment.

I got along well with people and I had no trouble with anyone all the time I was in the CCC Camp. I learned a lot and it was a

years. A discussion on the new amount and how it will be paid will be made at the next Board meeting.

The resignation, due to retirement, of Nathan J. Fertig, as bus driver, was accepted. Mr. Fertig has been driving for 33 years.

A medical leave of absence for Nellie S. Arbogast to August 26 was approved.

Susan Sharp and Larry Lawson were employed to work the TMR Day Camp, July 18-22.

Larry Lawson was employed to provide extended service to two special education students during the summer. He will be working with the students three days a week in their homes, two hours each per day.

The following were employed as substitute cooks for the 1983-84 school year: Agnes Bennett, Betty Crist, Sally Scott, Vada Wilson, Mae Corbett, Jenny Rose, Clara Simmons, Opal Workman, Connie Walker.

The following were employed as substitute bus drivers for the 1983-84 school year: Archie Carpenter, David Jonese, Jimmie McLaughlin, David Rittenhouse, Sam Hannah, Charles Malcom, Marvin Nisly.

Greg Irving

till they closed the camp down and I was transferred to CCC Camp Thornwood, near Durbin from March 15, 1939 to September 28, 1939. I was discharged from there because of expiration of enrollment.

I got along well with people and I had no trouble with anyone all the time I was in the CCC Camp. I learned a lot and it was a great experience for me.

At Camp Seneca Mr. R. W. Griffith was the work superintendent and James R. Cook was the camp commander.

At Camp Thornwood Mr. Peter Hanlon was the project superintendent and Mr. E. M. Dews was the company commander.

My wife and I came to Florida in 1949 and we have not missed one year of going back to W. Va. for a visit. And since I retired I have been going back in the fall to hunt and I love it. I still love the hills and mountains of W. Va., also all of the friendly people who live there. Who knows, maybe we will move back up there one of these days.

Sir, I hope to read more letters from the ex-CCC fellows as I enjoy reading them, so keep up the good

Letter

Dear Mrs. Sharp,

I am curious about a tombstone on the Paddys Knob CCC Road marked

Peter Pinch
Died Late 1800

I am told that the Knapps Spur Road crossed the mountain top in that area. I found this road mentioned in both Pocahontas histories ... but have never seen the History of Knapps Creek, by Miss Enid Harper. Let me relate the legend as my dad used to tell it:

A man named Peters or Teter had to cross the mountain; perhaps as the new history suggests, he was carrying grain to Harpers Mill. When he didn't return home, someone went to look for him. It was several days before he (or his body) was found. A freak accident, I guess, anyway, a falling tree had swept him from his horse and pinned him to another tree. His horse was also dead or so injured that it was shot. The man's body

thorn trees with white bloom. You think these things are standing still when you look at them, don't you? Well, that's where you are fooled. They are galloping and jumping over thousands of acres of some of the best land in Pocahontas County. And other counties all over the state. They are doing the thing right. They are putting roots in the ground to stay. If your leaders don't get their heads out of the sand piles in Washington and Charleston, in twenty-five years they will have taken 75 to 100 thousand acres of land in the county or more. By that time the Pocahontas Times will have to buy a surplus submarine from the government and bring it here, raise the periscope as high as they can get it to see how much of the county has disappeared to these armies.

Then, as is always the case in the world, people will say, "wonder why

of the county has disappeared to these armies.

Then, as is always the case in the world, people will say, "wonder why someone didn't do something about these armies before they got all this land to operate from?" Just think, one little red berry on a rose bush has 10-12 seeds each. This is like Rev. Howard Cadle was preaching on radio one Sunday about Noah and the Ark. A man called in and said, "I don't believe all those things could be put on that ark." Rev. Cadle said, "Fellow, all things are possible with God. Now, how many bed bugs do you think God could put on an elephant's ear? And so it is today, we don't believe what we see going on right before our very eyes. Ever hear the old saying, "You take care of the land and the land will take care of you"? Sure you have. Is what we are doing the way to do this? Do you not read almost every day where 75% of the world

saying, "You take care of the land and the land will take care of you"? Sure you have. Is what we are doing the way to do this? Do you not read almost every day where 75% of the world population goes to bed hungry every night? Do you think this will keep going on? What will two billion more people on earth eat in the next 20 years? Erosion and these armies work 24 hours per day, 365 days per year, no contract disputes, no fringe benefits—just like the lowly barbarians that took over mighty Rome.

What do you think?

Mrs. Grace Harper and Mrs. Sue Richardson attended a dinner Friday in Hampshire County in honor of Porter Smith, who will be retiring June 30 as Extension Agent in Hampshire and two other counties.

The Town Players

Recently, along with some dozen curiosity seekers, we dropped in on a play rehearsal at the Hillsboro Gym. For the first time, the set was up, and though unpainted, it appeared well-constructed and sturdy.

This week, volunteers, rallied by Phyllis Crickenberger and Charlie McNeel, will be painting the 5-piece set; just as volunteers put it up. As far as we could find out, these set-raisers were: Jan McCoy, Gary Clutter, Sally and Ken Nottingham, Dave Hyer, Linda Simmons, and a flock of kids.

The other night was the second time the cast had gone through their parts without books, and there seemed little to do for the prompter, Nora Lou Workman. Linda Simmons was

Mrs. Grace Harper and Mrs. Sue Richardson attended a dinner Friday in Hampshire County in honor of Porter Smith, who will be retiring June 30 as Extension Agent in Hampshire and two other counties.

—

Tom, Shirley and Wendy Carpenter, of Arbovale, and Don Sharp, of New Carlisle, Ohio, visited Mr. and Mrs. Roy Carpenter and their two sons, Ricky and Kenny, in their nice home in Kettering, Ohio, last weekend. We were treated to a delicious supper of all the pizza and salad we could eat at Godfather's Pizza in Moraine, Ohio, of which Roy is now manager. Roy is enjoying the challenge of the new job and extends an invitation to his friends here to stop by and see him if they are in the area.

of kids.

The other night was the second time the cast had gone through their parts without books, and there seemed little to do for the prompter, Nora Lou Workman. Linda Simmons was out front putting in suggestions here and there, while Baby Dustin was handed round from lap to lap.

It should be a good show, "Hillbilly Weddin," if laughs are what's wanted. Certainly, we all chuckled as it went along.

Already announced are the times and places of the various performances, and where tickets can be bought. It may be mentioned now that, for couples, an extra dollar will buy two helpings of iced Coke and four homemade cookies after the show.

So, let every one come and chuckle along. Laughing, they say, is good for the health.

Tickets for the play are $2.00 each and may be purchased for the Hillsboro performance at Taylor's Service and Grocery Store

Tickets for the Green Bank performance may be purchased at Kane's Store

father's Pizza in Moraine, Ohio, of which Roy is now manager. Roy is enjoying the challenge of the new job and extends an invitation to his friends here to stop by and see him if they are in the area.

Craig Sharp, of Frost, has returned home after two weeks in the Veterans Hospital at Salem, Virginia. On the weekend he visited his sister, Mrs. Opal Dunsford, in Pearisburg, Virginia, and also his brothers, Earl and Beryl.

Dr. and Mrs. Charles Saffer, of Levittown, Pennsylvania, were visiting his son and daughter-in-law, Mr. and Mrs. Martin Saffer, of Hillsboro, this past week.

Crystal Burr is in Arlington, Virginia, this week attending graduation exercises of Thomas Dewey Purdy. His parents are Mr. and Mrs. Donald Purdy and he is the grandson of Crystal Burr. Crystal was accompanied to Arlington by Henry and Margaret Burr and son, Dewey.

Mr. and Mrs. Doug Dunbrack were in York, Penn-

the times and places of the various performances, and where tickets can be bought. It may be mentioned now that, for couples, an extra dollar will buy two helpings of iced Coke and four homemade cookies after the show.

So, let every one come and chuckle along. Laughing, they say, is good for the health.

Tickets for the play are $2.00 each and may be purchased for the Hillsboro performance at Taylor's Service and Grocery Store

Tickets for the Green Bank performance may be purchased at Kane's Store in Cass, Trent's Store in Arbovale, Green Hill Grocery in Dunmore or from Maxine Foe in Cass.

Tickets for the Marlinton performance and Pioneer Days performance may be purchased at the Pocahontas Times.

Earl and Beryl.

Dr. and Mrs. Charles Saffer, of Levittown, Pennsylvania, were visiting his son and daughter-in-law, Mr. and Mrs. Martin Saffer, of Hillsboro, this past week.

Crystal Burr is in Arlington, Virginia, this week attending graduation exercises of Thomas Dewey Purdy. His parents are Mr. and Mrs. Donald Purdy and he is the grandson of Crystal Burr. Crystal was accompanied to Arlington by Henry and Margaret Burr and son, Dewey.

Mr. and Mrs. Doug Dunbrack were in York, Pennsylvania, buying Christmas merchandise for A-Jad's this past week and they also went on to Atlantic City.

THE C. & I. RAILROAD.

August 13, 1903

A STUPENDOUS ENGINEERING FEAT SUCCESSFULLY ACCOMPLISHED.

Nothing Like it East of the Rocky Mountains.

Last week we went to the city of Elkins on the third trip made by the passenger train recently put on the Coal & Iron Railroad

Our friends in Elkins, a city noted for the hospitality and the intelligence of its leading men, exclaimed when they saw the bearded denizen of the wilds of the Greenbrier, "Pocahontas is out of the backwoods?" But we replied, "Nay, nay, we came through the back door for the first time!"

We were properly astonished at the wonders in railroad building accomplished in the C. & I. and it is the purpose of this article, to give an idea, if possible of the magnitude of this undertaking.

The subject is, better worth space in a magazine of national importance than in a county paper.

We had known in a general ft.) is reached. Passing through this tunnel the railway comes out on Cheat River and it is here that the heavy work was done. Cuts several hundred feet deep are common. The road bends around and overcomes the grade in a remarkable manner. Far below and behind us, we saw the road on which we were traveling. The waters of Cheat are black and repellant.

Fishing hawk is quite a large town. It is the most important place on the road. There is a saloon, two houses and a barn, to say nothing of a water-tank.

From there the road winds with Cheat River until it is necessary to cross the divide to Tygart's Valley River. This is done by a 1600 foot tunnel and cunningly devised gradients.

Once in Tygarts Valley the way is smooth and the descent to the city of Elkins easy.

We use the term "City" for the same reason we call 14 year old boys "Mister." It pleases them.

The city is one of the wonders of rapid growth and development. It makes us feel like Grandfather Squeers "who had shot deer where the court house stands now." Twelve years ago Elkins was a

bearded denizen of the wilds of the Greenbrier, "Pocahontas is out of the backwoods?" But we replied, "Nay, nay, we came through the back door for the first time!"

We were properly astonished at the wonders in railroad building accomplished in the C. & I. and it is the purpose of this article, to give an idea, if possible of the magnitude of this undertaking.

The subject is better worth space in a magazine of national importance than in a county paper.

We had known in a general way that the railway had been built but had never realized what an undertaking it was.

The capitalist who pushed the work through exhausted the bonds laid out on the road and finally had to put a mortgage on the family cow.

The road starts from the Union Station at Durbin. Then follows the West Branch of Greenbrier River, or the "Fur" (far) Branch as it was called when all the world lay to the east of it.

Fir River would be a good name for it now. The road climbs steadily until the Summit is reached about 20 miles from Durbin.

The whole of the way is through one of the typical forests of Pocahontas County. Such woods as we who love to wander about in boundless contiguity of shade are so familiar with. For the first time in the history of this

Valley River. This is done by a 1600 foot tunnel and cunningly devised gradients.

Once in Tygarts Valley the way is smooth and the descent to the city of Elkins easy.

We use the term "City" for the same reason we call 14 year old boys "Mister." It pleases them.

The city is one of the wonders of rapid growth and development. It makes us feel like Grandfather Squeers "who had shot deer where the court house stands now." Twelve years ago Elkins was a farm. The walls of the new $200,000 courthouse is up to the second story. The building is of cut stone. It is situated on the site of the famous "round barn" that the older people will remember.

The passenger service instituted by the West Virginia Central is all that could be desired. A fine locomotive and two clean handsome coaches constitute the train. The orders are to run at the rate of ten miles an hour from Durbin to Fishing Hawk and twenty miles an hour from there to Elkins. The road would doubtless permit of greater speed but the rail is newly laid and these orders are cut of abundant caution. Some passengers grumble at the speed, showing that the railway company considers a passenger's safety to a greater degree than he does himself. Even if the passenger wants to take a risk the railway does not propose to pay for it.

The road starts from the Union Station at Durbin. Then follows the West Branch of Greenbrier River, or the "Fur" (far) Branch as it was called when all the world lay to the east of it.

Fir River would be a good name for it now. The road climbs steadily until the Summit is reached about 20 miles from Durbin.

The whole of the way is through one of the typical forests of Pocahontas County. Such woods as we who love to wander about in boundless contiguity of shade are so familiar with. For the first time in the history of this county has been a stretch of woods been given to the public. This timber is going at the rate of $30 per acre with the bark reserved and it will not be long until it will be in slashes. It is a novel sensation to ride through such a woodland on a train. We are used to such scenes, but it is with a trout rod in hand and splashing up and down the stream, which is usually the only thoroughfare. From the car window could be seen splendid pools for trout and the ardent fisherman gazes with a wishful eye at the likely lurking places he sees as the train whizzes by at the rate of six miles an hour.

Many an old log, big boulder, rock heap, bank, and other hiding places, we saw as we passed and we could see the very place we would choose for the first cast, and be rewarded by a long, rakish body darting forth crazy all that could be desired. The orders are to run at the rate of ten miles an hour from Durbin to Fishing Hawk and twenty miles an hour from there to Elkins. The road would doubtless permit of greater speed but the rail is newly laid and these orders are cut of abundant caution. Some passengers grumble at the speed, showing that the railway company considers a passenger's safety to a greater degree than he does himself. Even if the passenger wants to take a risk the railway does not propose to pay for it.

The new road is built in the best of style. The bridges are of iron built on solid masonry. There is a very high bridge across a chasm without piers and probably cost $50,000 to construct.

The road is being ballasted. Three work trains are on the road hauling crushed stone from a rock crusher near the Elkins end of the route.

The twenty miles of railroad in Pocahontas County passes no old settlers house. Kelly's is near the railroad but not in sight.

After Randolph county is reached there are several homes that were established before the railroad was undertaken.

A large number of operations have been commenced. At the mouth of Little River six miles from Durbin The Pocahontas Lumber Company is putting in a large band mill to saw 11,000 acres of timber. This will be one

A large number of operations have been commenced. At the mouth of Little River six miles from Durbin The Pocahontas Lumber Company is putting in a large band mill to saw 11,000 acres of timber. This will be one of the big industries of the county.

At Glady near the Summit is another big plant under way. At Oxley at the extreme head of Greenbrier River the land is being cleared for a saw mill town.

Mohn and Braucher have a big plant just above Durbin on a tract bought of the West Virginia Pulp and Paper Company.

A large number of portable sawmills are being operated along the line. Haymond Poe has a plant near Fishing Hawk.

Pocahontas is now manufacturing more lumber than any county in the state and the output is soon to be largely increased.

TERRIFIC EXPLOSION.

Fourteen Austrians in a Dynamite Explosion.—Six Dead.

Last Thursday thirteen Austrian laborers, working on the Coal & iron Railroad, for Walton, Percell Mooman & Co., sat around a fire near their work eating a lunch. The men were thawing out dynamite and had sixty sticks around the fire.

One of the men remarked, "This fire is not burning well: I will make it burn," and he put on a stick of dynamite. Another one said, "I will make it burn better," and he rammed the dynamite into the fire further, and caused the explosion. Three were killed instantly and three died immediately afterwards. Three of the remaining seven are expected to die. All that were around the fire were either killed or so badly hurt that the above is all the information that can be had of the immediate cause of the explosion.

The scene of the explosion was one and a quarter miles above Durbin on the West Fork of the Greenbrier River. Justice Gillespie held an inquest and the jury rendered a verdict in accordance with the facts. The unfortunate men were buried near Durbin.

The accident recalls the old superstition about 14 persons eating together. January 3, 1901

Iron

I saw iron made under somewhat primitive process in Marlinton one day last week. An iron maker was here to look over the big pile of ore of the Greenbrier Ore Company, on the railroad yards with the view of purchasing. There were analyses by the chemists a plenty, but the final test of the pudding is still chewing the string, as the saying is. So, the crudest of crude smelting furnaces was rigged up

IRON DEVELOPMENT PROPOSED

On last Thursday night at Marlinton and on last Friday night at Lewisburg public meetings were held, in which Rush Meadows, engineer of Charleston, representing the Peerless Coal and Iron Company, the O'Connell heirs and J. E. Woodson, outlined proposed development of the iron ore deposits of Browns and Beaver Lick Mountains. Miss Minnie O'Connell and J. E. Woodson were also present.

The proposition is to open mines and set up two furnaces for smelting the ore. Two sites are under consideration, Marlinton and North Caldwell. The former has the advantage of being nearer the ore deposits; the latter has at this time the advantage in freight rates.

At the outset, Mr Meadows stated that the proposition was not another stock selling scheme; that capital for development to the amount of $250,000 had been assured by mortgage secured by the ore deposits and other property.

The number of men required in the proposed development is estimated at from 150 to 200.

The local committee appointed to work with the promotors are A. H. McFerrin, chairman; J. A. Sydenstricker, J. G. Beard, J. E. Buckley Charles A. Sharp, Judge S. H. Sharp

—

For a century or more, the Alleghany iron ore deposits were the source of profitable local industrial plants for a thousand of miles—from New York to Alabama. With the opening up of the great Mesaba iron range in Minnesota, the Alleghany ores were abandoned, with the exception of the Birmingham mines. With the country being drained of scrap iron by the warring nations of Asia and Europe and the general armament programs of all nations, and and the consequent demand and high price for pig iron, a profit can again be figured out for the working of the high quality iron ore of this region.

—

I was raised on iron development lore. Fifty years ago, Pocahontas County looked forward with confidence to the day when the demand for iron would justify the opening of the deposits in this region. Just when that long looked for day was dawning, the great Mesaba iron range of the lake region came into production, and there was nothing to that line here.

I was raised on iron development lore. Fifty years ago, Pocahontas County looked forward with confidence to the day when the demand for iron would justify the opening of the deposits in this region. Just when that long looked for day was dawning, the great Mesaba iron range of the lake region came into production, and there was nothing in that line here.

The other day I heard a tale about the iron deposits in this valley which illustrates how widely known these ores used to be. A man from West Virginia was presented at the court of then young Emperor of Germany Kaiser Bill asked the West Virginian if he knew anything about Huntersville. He had heard of Huntersville, and the king remarked that around that village was to be found P tts-dam iron ore; the only place outside of Germany.

Iron

I saw iron made under somewhat primitive process in Marlinton one day last week. An iron maker was here to look over the big pile of ore of the Greenbrier Ore Company, on the railroad yards with the view of purchasing. There were analyses by the chemists a plenty, but the final test of the pudding is still chewing the string, as the saying is. So, the crudest of crude smelting furnaces was rigged up in a few hours out of a few sections of twenty-four inch sewer pipe. This stack was insulated with sand and iron stone. The blast was furnished by a modern vacuum floor cleaner. The fuel was kindling wood from a nearby sawmill and coal from a local dealer. The flux was Greenbrier limestone from the convenient dump of the municipal street department.

The stack was filled with kindling wood and set on fire. When this got to going right, a mixture of iron ore, limestone and coal was dumped in, the dose being intermittent.

The little cleaner huffed and puffed manfully. However the little motor could not stand the gaff for the whole twenty-

of iron ore, limestone and coke was dumped in, the dose being intermittent.

The little cleaner huffed and puffed manfully. However the little motor could not stand the gaff for the whole twenty-four hours required for the test. It burned out before the test was finally completed ,but the iron-maker professed himself satisfied with the results. Anyway, there was a pile of iron of varying degrees of perfection and purity when the stack was torn down. The samples brought in to me jump at a magnet in lively fashion.

So well satisfied is the iron maker with the crude first step that he will proceed further with the practical test by the immediate erection of a twenty-foot stack of masonry construction.

The old crooked foot bear killed a sheep for Sherman Curry at his Huntersville farm one night last week. Other farmers from Knapps Creek to Anthonys Creek report losses of sheep by the same old rogue. He has been killing sheep in the Alleghanies, Brushy and Beaver Lick for years, and he has cost many thousand dollars in sheep. His track is not only of unusual size but one hind foot is crooked. It is probable that he has been shot or caught in a trap. He is a great dog fighter, and no hunter has been able to chase him up a tree. He stays on the ground and fights the dogs off. He don't hole up in winter, either. As a general thing he makes his storm bed in sight or hearing of a public road or farm house. For a big bear, he is a powerful hand to play. He will pick up a log and carry and throw it around. He likes to mess around in a polk patch, tearing the plants up and rolling on them. Sometimes in his playful mood he will come on to a bunch of sheep, and then he kills for the love of killing, biting the sheep across the back or hugging them to death, and leaving the dead sheep lying around without eating them. When he kills to eat, he picks out the best; no old and tough sheep for him. Not once in a dozen times will he return to a kill, and he knows about traps too. This bear will cross or tear down a wire fence, but he dislikes barbed wire so much that he has never been known to cross one.

FALL OPENING 1903.

My daughter, Miss Rosa Cooper, has just returned from the Eastarn cities where she purchased a full line of MILLINERY, DRY GOODS, NOTIONS and a general line of LADIES FURNISHING GOODS. I take the pleasure of once again writing my many friends and customers to come and examine my line. price the goods, whether you wish to purchase the goods or not. It is useless for me to speak of the quality. styles and prices of my goods, for all that has ever dealt with me know that I carry nothing but the best. Be sure and give yourself the treat by coming and seeing the latest shades, neatest and most up-to-date goods and things for the coming season.

SAMUEL COOPER.

October 15, 1903

MILLINERY OPENING.

I will have my opening on Saturday September 19, 1903 where I will exhibit the most attractive creation in FALL AND WINTER MILLINERY, all my patterns were copied direct from Parisian models and all my goods are new and up-to-date. I cordially invite my many friends and patrons to come and look through my. Thanking you all for past favors and in advance for the futere.

MISS ROSA COOPER.

Connection made at Ronceverte to and from Washington, Baltimore, Philadelphia, New York, Richmond, Norfolk, Cincinnati, Louisville, St Louis and Chicago.

Barney Oldfield Tires

They fit our roads—Five Hundred Thousand Miles on Automobile Tires! That is the proudest record of Barney Oldfield.

It is also a fair measure of the experience he has put into the development of Oldfield Tires.

No wonder Oldfields are setting new records in this territory, making good the claim of the world's greatest tire man, who designs and builds them.

CAMPBELLS MOUNTAIN

We have had several hard frosts which have about finished the gardens of this section.

Ira P. Keffer has been on the sicklist for a few days.

Both camps are working on Days run and doing fine work.

An empty log truck got loose on Days Run Switch one day last and ran down the track for a mile but no damage was done.

Mrs Perl McCully is spending a few days with her husband who is blacksmith for the Campbell Lumber Co. at the camps.

Petro Costa, an Italian, who has been with the Company for a number of years, was called home by the serious illness of his wife.

Clyde Moore was visiting his sister, Mrs Brill, Friday and Saturday.

Ira D. Brill has resigned his position with the Campbell Lumber Company, to take effect the first of next month. Mr Brill has been in the employ of the Company for more than five years and thinks the confinement is injurious to his health.

School is progressing nicely at Days Run with J. A. Arbogast as teacher.

Robert Thompson spent Sunday with his family at Campbelton.

September 18, 1913

Church Notes for June

Sacramental meeting at Liberty church, 1st Sabbath of June, 11 o'clock, a. m. Preliminary services Saturday night.

Sacramental services at Marlin's Bottom, 3rd Sabbath of June.

Connection made at Ronceverte to and from Washington, Baltimore, Philadelphia, New York, Richmond, Norfolk, Cincinnati, Louisville, St Louis and Chicago.

Barney Oldfield Tires

They fit our roads—Five Hundred Thousand Miles on Automobile Tires! That is the proudest record of Barney Oldfield.

It is also a fair measure of the experience he has put into the development of Oldfield Tires.

No wonder Oldfields are setting new records in this territory, making good the claim of the world's greatest tire uses, who designs and bnilds them.

The Most Trustworthy Tires Built!

It is your fault if you don't cash in on this plain straight forward recommendation by the world's great motorist.

Cords 8000 miles Fabrics 6000 miles a new tube given free with every Oldfield tire purchased here this month. Can you better yourself, No !

GO In Summer Comfort— 25 to 30 Miles on a Gallon!

AT HIGHWAY SPEED

Get in a Conditioned Air Nash and See How Comfortable Winter Driving Can Be—and Count the Dollars You Save as You Go!

HERE are two big motoring miracles in one!

This new Nash in the lowest-price field not only offers you the healthful warmth of Weather Eye Conditioned Air—but actually goes *25 to 30 miles on a gallon . . . over 500 miles on a tankful, too!*

Never before has any car offered you so much for the money!

Soft coil-springs are on *all four wheels* . . . new, easy Two-way Roller Steering makes driving and parking easier than ever before . . . a new kind of one-piece welded body-and-frame construction is rattle-proof, twist-proof. You can even have a "Sedan Sleeper" Bed—for overnight and vacation trips.

And Nash's new "Flying Scot" Engine adds a new thrill—breath-taking pickup at any speed.

Here—at last is the car with everything you ever wanted—and today it's the car that's *more practical to own than any other!* Years ahead in design, in features, in engineering!

See and drive this new kind of car today—the "Million Dollar Beauty" that gives you and saves you most.

Mr. and Mrs. Donald Hill and daughter, Denise, have returned to Marlinton after visiting friends in Summerville, South Carolina, and Myrtle Beach. While there Don went deep sea fishing 70 miles out in the Atlantic Ocean on the Gulf Stream II fishing ship and caught a 38 inch grouper weighing 27 pounds and 4 ounces. He won first prize, among 56 fishermen.

afternoon in October and will feature an all-Brahms Oktoberfest.

The program for Sunday will include Mozart's Quartet in E Flat Major for violin, viola, 'cello and piano, K. 493, performed by the Scott Chamber Players who return to Garth Newel as a guest ensemble.

Members of the Garth Newel Chamber Players and the Scott Chamber Players will then join to perform Quintet in C Major with two violoncelli by Boccherini and Johannes Brahms' Sextet in B Flat Major, Op. 18.

Tickets for all events are available at the door. Garth Newel is located in the scenic Allegheny Mountains of Bath County, between Hot Springs and Warm Springs.

ball team under Head Coach Mike Smith will open the 1983 Season on the road at Nicholas County High School Friday night, September 2.

Nicholas County will be a real threat in the passing game. Their quarterback is a senior and really throws the ball well. His name is Bobby Hughes and we feel that he is one of the top passers in West Virginia. They have two good running backs that are also threats. The tailback is Glen Hypes and the fullback is DeWayne O'Dell.

"We feel that our team is both physically and mentally prepared for the game," said Coach Smith. "Our young men have really worked hard this month to prepare for the season. We fully intend on going to Summersville Friday night and getting the all important win."

The starters:

Offense—QB Kirk Walton, FB Doug McPaters, TB Tim Arbogast and Steve McCloud, TE, Rick Lantz

Lady Warriors Begin Season

The Lady Warriors open their season on Sept. 7th when they play Highland County, Va., at PCHS. The JV game starts at 6:15 with the varsity game following at 8 p.m. The girls have been practicing since the goal of winning the most games in the history of girls basketball at PCHS. To do so they must win 10 games.

Returning to the team are 6 of the top 7 players from last year's squad that went 7-11. They are: Gina Ratliff, Jackie Burks, Kim Arbogast, Ronda Roy, Michelle Withers and Shari Vance. Moving up to the varsity to help provide depth will probably be Melissa Alderman and Mary McCloud. Other girls who are playing this year are: Stacey Miller, Tina Roach, Donna Meadows, Mary Grey, Missy Kidd, Velma Wilfong, Regina Hevener, Philena Shafer and Tonya Dunz.

Back-To-School Dangers

"School's Open—Drive Carefully" is a matter...

Members of Pocahontas County High School Girls Basketball Squad are [L-R]: 1st row—Kim Willis, Philena Shafer, Mary Grey, Velma Wilfong, Missy Kidd; 2nd row—Melissa Alderman, Tina Roach, Shari Vance, Gina Ratliff, Kim Arbogast; 3rd row—Coach Booth, Ronda Roy, Stacey Miller, Jackie Burks, Mary McCloud. Not pictured—Michelle Withers, [illegible] Meadows, Regina Hevener, Tonya Dunz.

Everette Underwood and Marvin Grey Beverage were taken into the 4-H All Stars organization on July 10 at Jackson's Mill State 4-H Camp.

The All Stars is the highest degree of recognition in 4-H and is open to all persons over 18 years old who have been active in 4-H and other community

tas County High School and have been active in 4-H events such as the County 4-H camp, State Dance Week-end, Alpha Camp., Older Youth Camp, County Fair, Leadership Marathon, Weston Area Weekend, 4-H round up and other events.

The quarterback job is a toss-up between Lonnie Ratliff and James Lawrence

The Copperhead's first opponent on September 8 is Glade, on the Marlinton field, 7:30 p. m.

Glade's record last year was 7 and 1, with the only loss to Marlinton by an 8 to 6 score. Glade won their last 7 games in a row; they will be looking to avenge their only loss from last year.

Glade, located in Cowen, had an undefeated midget team last year.

Coach Wilburn has stated that this could be the toughest game of the year for his team. Anyone interested in a good football game should be at the Marlinton field on September 8.

Deaths

Joe McNeel

Joseph Wilson McNeel, 74, of Mill Point, died Wednesday, August 31, 1983, in Denmar Hospital after many years' illness.

Born July 12, 1909, at Mill Point, he was a son of the late John Lanty and Nora Wilson McNeel.

His wife, Linda Jane McFerrin McNeel, and two brothers, Dr. John O. and Richard I. McNeel, preceded him in death.

He was a retired farmer and a member of the Oak Grove Presbyterian Church.

Surviving him are a nephew, Lanty F. McNeel, of Hillsboro; two nieces, Nora Lou Workman of Hillsboro, and Martha McNeel Murdick, of Muncie, Indiana; and a sister-in-law, Mabel White McNeel, of Hillsboro.

Services were held at 2 p. m. Saturday in the Oak Grove Presbyterian Church by his pastor, Rev. J. D. Arbuckle, with burial in the McNeel Cemetery.

FATAL ACCIDENT

Harlan Vandevander, 31, was killed early Sunday morning when he was struck by a car in Durbin. He was crossing Rt. 250 in front of the Moose Hall when he was hit by a 1980 Chevrolet truck, driven by Clifford Townsend, of Frank. The accident occurred at 2:05 a. m. State Police investigated the accident and have charged Townsend with driving while intoxicated.

———

Accidents

The Sheriff's Department investigated two accidents on Sunday, both single vehicle wrecks involving motorcycles.

In the first, James Webb, of Marlinton, was seriously injured. He lost control of his 1974 Harley Davidson cycle on Rt. 219 in a curve just north of the Mill Point post office at 4:30 p. m.

VEPCO Project

As of the end of June this year Pocahontas County still had the highest number of employees at the VEPCO power project in Bath County with 12.8% of the work force, according to a report sent to the County Commission. Total employment was given at 2710.

The percentages for other areas was as follows as of June 30: Bath County, 10.6%; Alleghany County, 9.1%; Highland County, 10.4% Greenbrier County, 11.5% Pendleton County, 5.7%; other Virginians, 17.9%; other West Virginians, 5.2%; other areas, 16.8%.

According to the report the project is about 70% complete and proceeding on schedule.

At this time the employment level is not increasing

According to the report the project is about 70% complete and proceeding on schedule.

At this time the employment level is not increasing and the only hiring being done is to replace workers leaving the job. The report predicts that employment will decline beginning with the ending of certain outside work this fall and that the average employee level in 1984 will be less than this year.

Committee River Study

Monongahela National Forest Supervisor Ralph Wamsley has announced completion of the draft environmental impact statement and study report on the Committee Wild and Scenic River Study.

The Wild and Scenic Rivers System, established through Public Law 90-542, preserves selected free-flowing rivers of the Nation in their natural and free-flowing condition. The Forest Service, U.S. Department of Agriculture, as lead agency for the study is considering a proposed action and alternatives for recommending portions of the Committee River in West Virginia for inclusion in the National System.

The alternatives being considered are: (1) continuation of present management direction, no Wild and Scenic Rivers System designation; (2) full designation of all eligible segments from the headwaters to the mouth, a total of [illegible] miles under federal management; (3) designation

Greenbrier River Study

Monongahela National Forest Supervisor Ralph Mumme has announced completion of the draft environmental impact statement and study report on the Greenbrier Wild and Scenic River Study.

The Wild and Scenic Rivers System, established through Public Law 90-542, preserves selected outstanding rivers of the Nation in their natural and free-flowing condition. The Forest Service-U.S. Department of Agriculture, as lead agency for the study, is considering a proposed action and alternatives for recommending portions of the Greenbrier River in West Virginia for inclusion in the National System.

The alternatives being considered are: (1) continuation of present management direction, no Wild and Scenic Rivers System designation; (2) full designation of all eligible segments from the headwaters to the mouth, a total of 199 miles, under Federal management; (3) designation of all eligible segments, excluding thirteen miles for a proposed dry reservoir, a

Weather

It seems hard for it to rain after a sustained dry period and so it was this past week. A few drops now and then most places with a few scattered showers were all that could be mustered.

Tuesday brought a welcome gentle rain, not much in Marlinton but over an inch of rain over Elk and in the northern parts of the County.

The heat continued through Monday; the thermometer registered 94 on Saturday. Amazingly cool most nights. Much cooler weather is predicted for *Thursday—that will be a shock.*

The Greenbrier can be crossed on rocks in many places but most people agree it isn't as low as in 1930.

Fred Morrison says the river gauge at Buckeye measures 1.66, but it is in a pool of water which doesn't tell the true story of the flow of water when it gets really low. According to the record, it is the lowest now since 1952, lacking less than an inch of beating that year. He says that was the

An Open Letter to Phil McComb

In response to the question you ask at the end of each of your letters to the "Times," I'd like to tell you "what I think."

I think you are a pompous windbag, possessing only a hazy and superficial understanding of some very complex issues. The "solutions" you propose are embarrassingly naive, consisting of a hodgepodge of assorted ideas you've apparently gathered from otherwise reliable sources.

I'm sure the "Times" will receive a modest deluge of mail advising me to keep my opinions in. Colorado, and maybe I will. However, as a proud native of Pocahontas County, I'd like to suggest that your banal ramblings are not representative of the intelligence of the great silent majority of the readers of the "Times," who would consider it a waste of their time to debate with a gadfly.

Edward A. Friel

Mr. and Mrs. John Pritt

Miss Cynthia Lynn Shank and Johnny Allen Pritt were united in marriage Friday, July 8, 1983, at six-thirty in the evening at the Green Bank United Methodist Church.

The bride is the daughter of Mr. and Mrs. William T. Shank, of Green Bank. The groom is the son of Mary Lou Pritt, of Marlinton.

The double ring ceremony was performed by the Rev. Gregory Lewis, of Nestorsville, before an altar accented by two seven-branch candelabra and ferns. Silk flower arrangements matching those of the bridal bouquet decorated the piano and organ while an anniversary celebration candle centerpiece surrounded by matching silk flowers interlaced with baby's breath adorned the altar table.

Wedding music was played by Mrs. Laura Jean Rittenhouse. Mrs. Mellissa Snyder, of Charlottesville, Virginia, sang "Some Day, Some Where" and the "Wedding Prayer."

The bride was escorted to band of silk flowers and seed pearls. The bridal bouquet was of silk ivory roses with burgundy and champagne pink mini-azaleas accented by ivory ribbon and streamers.

Serving as maid-of-honor was Pam Ray, a friend of the bride, from Minnehaha Springs. Pam wore a floor length gown of mauve pink polyester. The crocheted V-neckline and softly draped open sleeved blouson fell to a fitted waist and flowing accordian pleated skirt. She carried a bouquet of burgundy and pink champagne silk roses with ivory stephanotis and baby's breath. Ribbon tufts to match her dress nestled among the flowers and fell into streamers at the base of the bouquet.

The groom wore a navy blue tuxedo and a boutonniere of two small silk rose buds of ivory and champagne pink, backed by baby's breath and fern leaves.

The best man, Bret Withers, of Marlinton, and the

surrounded by matching silk flowers interlaced with baby's breath adorned the altar table.

Wedding music was played by Mrs. Laura Jean Rittenhouse. Mrs. Mellissa Snyder, of Charlottesville, Virginia, sang "Some Day, Some Where" and the "Wedding Prayer."

The bride was escorted to the altar by her father and given in marriage with parental blessings.

The bride wore a formal gown of ivory tulle over taffeta, featuring a V-neckline, net yoke accented with a fleur-de-lis ruffle, with a Victorian collar. The fitted long sleeves featured bands of lace accented with satin ribbons. The full length skirt fell from a fitted bodice into three alternating layers of tulle and fleur-de-lis ruffles accented by satin ribbon. The finger tip triple tiered veil of French illusion was attached to a into streamers at the base of the bouquet.

The groom wore a navy blue tuxedo and a boutonniere of two small silk rose buds of ivory and champagne pink, backed by baby's breath and fern leaves.

The best man, Bret Withers, of Marlinton, and the ushers, Willie Shank and Mike Shank, brothers of the bride, all wore navy blue suits with matching ties and a single silk champagne pink rose boutonniers.

Miss Shari Vance, friend of the bride, presided over the guest book.

A reception was held in the church multi-purpose room following the wedding. The bridal table featured a four tiered wedding cake and reflected the wedding colors of pink, burgundy and ivory. Mrs. Sharon Vance and Miss Virginia Lou Coleman attended the bridal table.

triple tiered veil of French illusion was attached to a

Simmons-:-Smith

Debra Kay Smith and Ronald Ray Simmons were united in marriage on Saturday, August 27, 1983, at one o'clock in the afternoon by the bride's grandfather, Reverend Owen Lee, at the Wesley Chapel United Methodist Church at Hillsboro.

Given in marriage by her father, the bride wore a floor length, off the shoulder gown of satin with a lace bodice and leg-o'-mutton sleeves. The skirt was white chiffon over satin with chiffon ruffling in the back, trimmed with white satin ribbon. The ruffles were layered from the waist to the floor, forming a train. Her fingertip veil was of white chiffon, trimmed with satin ribbon, attached to a halo of pink and white silk rosebuds. She carried a cascading bouquet of pink and white silk rosebuds.

The dress and veil were designed by the bride and made by her mother. They also made the silk rosebud bouquets used in the wedding ceremony.

The maid of honor, Kim Scott, of Hillsboro, wore a pink evening gown with an off-the-shoulder neckline.

Attendants were Sandra Smith, sister of the bride, Rhonda Hunt, of Buckeye, Bonnie Starks, of Hillsboro, and Linda Ramsey, of Marlinton. They wore identical gowns of pink. They all carried bouquets of pink, burgundy, and mauve rosebuds against lace fans.

Amy Smith, sister of the bride, was flower girl, and Timothy Adkins, cousin of the groom, was ringbearer.

Serving as best man was Bobby Simmons, the groom's brother. Ushers were John and Jim Simmons, of Droop, cousins of

Blackhurst-Burner Reunion

The Blackhurst-Burner reunion was held August 7, 1983, at the Cass Community Building. Approximately 130 family members from 10 states attended. Name tags of different colors were worn by various branches of the family tree. Large family tree charts and family pictures were on display

hurst Freeland, of Houston. Bob Sheets then read an excerpt from a story about the Blackhurst reunion written by John O'Brien and published in the September 1983 issue of the Country Journal entitled, "Home to the Heart of Appalachia."

Blackhurst-Burner Reunion

The Blackhurst-Burner reunion was held August 7, 1983, at the Cass Community Building. Approximately 130 family members from 10 states attended. Name tags of different colors were worn by various branches of the family tree. Large family tree charts and family pictures were on display at the Community Building.

The morning program featured a testimony by Polly Fall Boss, of Spring Arbor, Mich. A candlelight memorial service was held for family members deceased since the 1981 reunion: Don Blackhurst, 1982; George Burner, 1983; Wilma Fall, 1982; Ruby Fall Groesser, 1982; Carolyn McLaughlin, 1982; Reta Jane Tripano, 1983. A family history lesson was presented by Mrs. May Blackhurst Freeland, of Houston. Bob Sheets then read an excerpt from a story about the Blackhurst reunion written by John O'Brien and published in the September 1983 issue of the Country Journal entitled, "Home to the Heart of Appalachia."

The Henry Blackhurst family had the largest group present, followed by the Allen Blackhurst family. After a covered dish dinner, group family pictures were taken, and recollections were recorded by the grandchildren of the late Harry and Lula Blackhurst. Trudy Wooddell, Barbara Shaw, Swennie Friel and Becky Judy will be in charge of the next reunion which will be held the first weekend of August in 1985.

Those signing the guest book were: Polly and Dean

Republican Executive Holds Meeting; Fills Vacancies on Ticket

A meeting of the new Republican Executive Committee was held at the Court House Saturday afternoon at one o'clock. C. P. McNeill was elected as chairman and treasurer, and D. C. Adkison, Secretary. Members present were: Geo. S. Graham, S. H. Hiner, Mrs. J. H. Flenner, Greenbank District; J. A. Reed, Huntersville District; Howard McElwee, Edray District; J. M. Workman, Little Levels District and Harold L. Moore, Dr. S. A. Willhide, and D. C. Adkison by proxy.

Five vacancies on the committee were filled: Huntersville District, Mrs. G. O. Wade and Mrs. Alice Sharp; Edray District, W. H. Gilmore and Miss Oleta Gay; Little Levels District, Mrs. J. B. Grimes.

The new committee is now composed of S. H. Hiner, Geo. S. Graham, Mrs. J. H. Flenner, Mrs. H. H. Grimes, Geo. F. Alderman J, A. Reed, Mrs. G. O. Wade, Mrs. Alice Sharp, R. H. McElwee, W. H. Gilmore, Miss Oleta Gay, Mrs. Eva Nelson, J. M. Workman, O. M. Hook, Mrs. Dela Elmore, and Mrs. J. B. Grimes.

The following nominations were made by the Committee, Prosecuting Attorney, J. E. Buckley; County Surveyor, Ira H. Irvine; Greenbank District: Member Board of Education, Mrs. H. M. Widney, Justice of the Peace, Allen Blackhurst. Huntersville District: For Justice of the Peace, J. W. McCarty, and John Perry; for Constable, Mitchell Sharp and Clarence McComb. Edray District: For Member Board of Education, F. D. Moore, for Constable, N. R. May and G. E. Wooddell.

Little Levels: For Member Board of Education, E. H. Waugh; for justice of the Peace, C. W. Kennison and E. P. Hendricks; for Constable, Sol Workman and Chas. Hogsett.

Denmar Hospital had Open House Sunday afternoon for Grandparents Day. It was a lovely day and a nice affair. Many of the patients were able to be outside and they could all hear the musical entertainment by Mark Newkirk, Phyllis McMillion, the McCloud Family, Underwood Sisters, Katherine Beard, and Vonnie Myers O'Brien.

Father Lombard had the invocation.

There was a variety of foods arranged in a pleasing manner for all to partake. Vases of pink snapdragons, pink carnations, and baby's breath were given for the tables and for each floor by Regena Rhea, of the Marlinton Flower Shoppe.

STATE PARK

TO BE DEDICATED ON JULY 4TH

The Droop Mountain Battlefield State Park will be dedicated on Wednesday, July 4th. Hon John D Sutton, chairman of the Droop Mountain Battlefield Commission, will present the Droop Mountain Battlefield State Park to Governor Howard M. Gore, who will accept it for the people of the State of West Virginia. This is a State and County affair. In no sense is it to be commercialized Every man, woman and child in Pocahontas County should be present.

The battle of Droop Mountain was the greatest battle fought on West Virginia soil during the War between the States. It was a battle in which West Virginia soldiers were eugaged on both sides. This battle marked the ascendency of the Union forces in West Virginia.

At the last session of the Legislature Hon John D. Sutton, of Braxton County, introduced a resolution in the Legislature for a Commis ion to be appointed by the Governor to secure the site of the battlefield of Droop Mountain for a State Park as an everlasting memorial, and to mark the positions as far as possible of the various army units which took part in the battle.

The Governor appointed Mr. Sutton the chairman of this Commision As a boy Mr. Sutton fought in this battle as a Union soldier. The other

Sponsored by Pocahontas Democratic Executive Comm.

ture Hon John D. Sutton, of Braxton County, introduced a resolution in the Legislature for a Commission to be appointed by the Governor to secure the site of the battlefield of Droop Mountain for a State Park as an everlasting memorial, and to mark the positions as far as possible of the various army units which took part in the battle.

The Governor appointed Mr. Sutton the chairman of this Commision As a boy Mr. Sutton fought in this battle as a Union soldier. The other members of the Commission are Senators R. F. Kidd and A. L. Helmick; Delegates Norman F. Kendall and M. M. Harrison.

This Commission has done a great constructive work They have purchased the battlefield of more than one hundred acres, and they have marked the positions and movements of the various units engaged. Particularly active has Mr Sutton been in the matter, spending much time on the field; consulting with old soldiers of both armies, and in searching the records and reports of the commanding officers of both the Confederate and Union forces

The Fourth of July has been set as the time for the Battlefield to be formally taken over by the State as a memorial for all time of the men who fought, bled and died for what they believed to be right.

Aside from its historic interest, the Droop Mountain Battlefield State Park is one of the beauty spots of the country. A level plateau overlooking the Little Levels a thousand

Tus Ti

54 SEPTEMBER 22, 1983

ONLY

tains a thousand feet higher.

The Battlefield is on the Seneca Trail, and can be reached from all parts of Pocahontas County on improved highways.

As said above, this is a State and County affair and in no sense a commercial undertaking Come and bring your dinner and something extra for the strangers who will be with us that day.

In preparation for the day the County Committee has made the following appointment of committees to have all things in readiness:

Committee on Provisions—Mrs. U. H. Hannah, Mrs. S. A. Wilhide, B. B. Beard, Mrs. Harry M. Mooore, Mrs. Sherman Gibson, Mrs. Hevener Dilley, H. Lee White, Ira D. Brill, Mrs. Ida McComb, Mrs. A. R Gay Mrs. J. A. Sydenstricker, Mrs. J. G. Hamrick. Mrs. Dakota Kirk Nottingham, Mrs. J. J. Coyner, Mrs. John John Dunlap, L D. Sharp.

Committee on Cleaning up Ground —J. K. Marshall, Chairman, Dr. H. W. McNeel, George P. Edgar, Pierson Hendrick, Wallace Kershner, L W. McCoy, Fred Dean, T. A. Bruffey N. E. Walton. Russell Scott.

Committee on Program—J. W Goodsell, R. S Hickman, J. F. Ashford, Mrs. John Pritchard, John W. Tyler, G. M. Sharp, Col. H. R. Wiley, W. H Grose, Dr. J. M. Cofer, M. J. McNeel.

MISCELLANEOUS SHOWER

Mrs R. H. Auldridge entertained on Friday afternoon at her home in Millpoint with a miscellaneous shower honoring Miss Edith Harper bride elect of Mr. Sammy Burdette whose marriage took plack June 19 at the home of the bride's parents, Mr. and Mrs. Harry Harper

A color scheme of pink and white was effectively carried out in the decorations and refreshments. Master Robert Auldridge dressed as a messenger boy, presented Miss Harper with a telegram from Cupid announcing the arrival of a beautifully decorated basket laden with many gifts The guests were then invited into the dining room to see the bride in minature used as a canter piece over which the date of the wedding was suspended. Delightful refreshments were served to the following guests: Mrs. W. E. Wallace, Mrs H. W. Harper, Mrs. E. L Harrison, Mrs. Wm Cackley, Mrs. Lee Cackley, Mrs. Lanty McNeel, Miss Minnie Wallace, Miss Anna Walloce, Miss Cora Cloonan. Mrs. G. P. Edgar, Mrs. T. L. Beard, Mrs. L. P. McLaughlin, Mrs Henry Beard, Mrs. J. K. Marshall, Mrs. Carl Beard, Miss Dice Smith, Mrs. Joel Beard, Mrs. Effie Auldridge, Mrs. Grey Hamrick, Mrs. Ernest Harper, Mrs Sandy Auldridge Mrs. Lee Moore, Mrs. Frank Harper.

Marlinton Football

Marlinton Coach, John Wilburn, has built an outstanding defense again in the 1983 edition of his Copperhead team. Coach Wilburn said that he needed "every bit of it" in handing Hillsboro their first defeat of the season.

"Our offense was sluggish, but our players have a lot of pride in our defense and really worked hard to keep Hillsboro out of the end zone," commented Coach Wilburn.

The Copperheads really had to work hard against the Red Devils' defense to score 3 touchdowns. One touchdown was scored by Jimmy Pritt and two by Jason Barton. The quarterback, Ronnie Ratliff, threw for one extra point to Allen Grimes.

The next home game will be this Saturday night at 7:30, as the Copperheads go against county rival, the Green Bank Eagles. There will also be a spaghetti dinner before the game in the school cafeteria.

GOVERNOR TAYLOR HERE

Hon. J. Alf Taylor of Fayetteville, Democratic nominee for Governor, was in Marlinton last Saturday. He was returning from a trip to the northern part of the State, in the interest of his campaign for Governor Though the primary election was but a few weeks ago, and the general election is still several months away Mr. Taylor is losing no time in presenting his candidacy to the people of West Virginia and now that his party has made him standard bearer, he is doing all that in him lies to be successful in the election this fall. This is a big state, and while it is a physical impossibility for one man to meet and greet every voter in it, Alf Taylor will come nearer doing it than any man I could name And when he meets people he makes friends and they vote for him. He is that kind of a man. One thing that is greatly in Alf Taylor's favor is the fact that he has a united party behind him. His primary campaign and nomination left no sore spots. He won fairly and squarely and his late opponents and their friends honor him for the plucky and successful fight he waged under such handicaps as a lack of money and no organization would entail.

To be elected Alf Taylor will need Republican votes, but whenever he has run he has been elected by Republican voters. In the legislature he represented the strong Republican county of Fayette. His stand in the legislature for honesty and economy in the administration of the affairs of our State made such an impression on the people of the Sixth Congressional District that for two terms he was sent to the House of Representatives, overcomi

MISCELLANEOUS SHOWER

Mrs R. H. Auldridge entertained on Friday afternoon at her home in Millpoint with a miscellaneous shower honoring Miss Edith Harper bride elect of Mr. Sammy Burdette whose marriage took place June 19 at the home of the bride's parents, Mr. and Mrs. Harry Harper

A color scheme of pink and white was effectively carried out in the decorations and refreshments. Master Robert Auldridge dressed as a messenger boy, presented Miss Harper with a telegram from Cupid announcing the arrival of a beautifully decorated basket laden with many gifts. The guests were then invited into the dining room to see the bride in miniature used as a center piece over which the date of the wedding was suspended. Delightful refreshments were served to the following guests: Mrs. W. E. Wallace, Mrs H. W. Harper, Mrs. E. L Harrison, Mrs. Wm Cackley, Mrs. Lee Cackley, Mrs. Monty McNeel, Miss Minnie Wallace, Miss Anna Wallace, Miss Cora Noonan, Mrs G. P. Edgar, Mrs. T. Beard, Mrs. L. P. McLaughlin, Mrs Henry Beard, Mrs. J. K. Marshall, Mrs. Carl Beard, Miss Dice Keith, Mrs Joel Beard, Mrs. Effie Auldridge, Mrs. Grey Hamrick, Mrs. Ernest Harper, Mrs Sandy Auldridge Mrs Lee Moore, Mrs. Frank Harper.

Born to Mr. and Mrs. Levi Irvine, June 12, a daughter

Warriors Blasted By West

The PCHS Football Warriors fell to 0-3 Friday night as they were blasted by the Greenbrier West Cavaliers 42-0.

West opened the game with a 94 yard kickoff return and got the 2 point conversion. Moments later the Cavs scored again as they scooped up a fumble and raced for a score. For all practical purposes the game was decided by then.

The fumble by Kirk Walton was a terrible mistake by the official, says Coach Mike Smith. Kirk was throwing the ball and he was hit while throwing. The arm motion had been made and the call should have been an incomplete pass. Instead the play was ruled a fumble and we lost a cheap one. Coach Smith says he argued the point with the officials to no avail—the referee said that the ruling would stand—all we could do was see the film. The film showed that he blew the call.

"People may think that I've gone crazy," says Smith, "but I really feel like our program turned the corner in this game. We got beaten 42-0 and we made some bad plays that led to easy scores by West. I feel that these mistakes are things we can and will correct. However, West has an outstanding team, the best we have played, and we hit them pretty well. It was the first time that we were aggressive this year. This young team is improving and we will make everybody proud before the final curtain falls."

Look for a win this Friday night at Homecoming at the expense of the Oakvale Owls. Come out and support the team. They need you and you can help us. Coach Smith says they are ready to break out of the slump.

Lady Warriors Excel

In the past week the PCHS Lady Warriors played and defeated two very tough opponents. On Tuesday, Sept. 13, they traveled to Circleville and defeated the Indians, 44-36. The Warriors, led by Gina Ratliff's 16 points, 7 steals, and Jackie Burks' 12 points and 13 rebounds, outscored Circleville in every quarter as they gradually pulled away. Other Warriors doing well were Michelle Withers with 13 rebounds and 6 points and Ronda

On Thursday, Sept. 15, the Lady Warriors faced an even tougher opponent when they traveled to Lewisburg to play the always tough Greenbrier East Spartanettes. In a game which had to be seen to be believed, the Warriors outhustled and outplayed the Spartans throughout the entire game. The final score was 58-45. The turning point came in the middle of the 4th quarter

Spartanettes. In a game which had to be seen to be believed, the Warriors outhustled and outplayed the Spartans throughout the entire game. The final score was 58-45. The turning point came in the middle of the 4th quarter when East managed to close the gap to 37-36. After a time out 2 baskets by Michelle Withers and 1 basket apiece by Kim Arbogast and Ronda Roy reopened a 7-point lead. In the last two minutes of the game the Spartans began fouling to save time and first Ronda Roy hit 7 out of 8 foul shots and then Kim Arbogast hit 6 out of 6 foul shots to ice the game for PCHS.

Six girls played the majority of the time for PCHS and they all did an excellent job. They were: Kim Arbogast (15 pts.), Michelle Withers (12 rebs., 8 pts.), Shari Vance (8 pts., 7 rebs.), Ronda Roy (15 pts.), Jackie Burks (9 rebs., 4 pts.), and Gina Ratliff (8 pts.).

The JV team also had a

FOREST NEWS LETTER

Under date of Octobe 16, the West Virginia Forest Service of tht Game and Fish have issued volume 1 and number 1 of the "Eastern Greenbrier News Letter." O. O. Nutter, of Lewisburg is Greenbrier District Forester and H. Y. Forsythe, is the Eastern District Forester, with headquarters at Elkins. This news letter will be issued once a month. It is for the personnel of the Forest Fire Control, but it contains matter of general interest.

The following items are about four of the five lookout towers and their observers in Pocahontas County. The other tower is on Black Mountain.

On Briery Monntain: The steel was purchased for a 35 foot tower, the concrete forms were built during August, and the steel is now on the ground ready for erection. The state lines have been repaired, and we plan to erect the tower before the fall fire season. R. N. Williams, observer at this tower, has been busy during the latter part of the summer running a threshing machine and theshing grain for his neighbors, but he plans to again take the place as observer this fall.

In the Beaver Lick Mountain area: Three miles of grounded line was built connecting the tower with the North Fork of Anthony Creek. The line was built under the supervision of J. V. Crigger, Observer at the tower. The completion of this line enables us to give protection to a section of timber lands on Anthonys Creek that has been very hard to give protection to in the past, owing to a lack of telephone communication. Mr. A. G. Dean, our ranger on the Watoga Forest has been very busy for a while back in looking after the interests of the state in cutting telephone poles from the Watoga Forest.

Chas. Root, observer at Bald Knob, reports a very busy season at the Heavener Grove. Mr. Root has a nice grove of trees near his home that has been fitted up as a recreation park with a dance pavilion, lunch room, and other attractions. I recently talked with Mr. and Mrs. Root and they told me they were planning on going back to Bald Knob again this fall. We recently had the telephone lines repaired there, and with our former observer, State Association rangers on duty in that area, we feel that the problem of fire prevention and control is solved for that tower.

Brown Miller, observer on Michael Mountain, has been very busy during the summer months working at the nursery on the Seneca Forest. Damping off fungus got an early start in the nursery beds in the spring, and Mr. Miller has had a continuous fight all summer to hold it in check. However the beds are looking fine now and other beds are planned for planting this fall. With the purchase of two acres additional for transplant beds, a building for tools, equipment and improvements made we will soon have a nice nursery there.

DOUTHARDS CREEK NEWS

The rainy weather has been preventing the farmers from getting their harvesting done.

Paul Crummett and nephew were thrashing on this creek last week.

The oats crop is exceedingly good this year; averaging from 35 to 65 bushels to the acre.

Mrs. Pat Bennett is preparing to move.

Ozalia Alderman is leaving this week for Charleston. She will attend Capitol City Commercial College. Her brother Guy will accompany her there.

Mr. and Mrs. Dempsey Johnson, of Marlinton, were visiting at the home of Mrs. Johnson's parents last week.

Wilbur and Guy Alderman and Elton Wade are cutting timber for the Mountain Timber Corporation.

Mrs. Russell Trainer was visiting her sister-in-law, Mrs. Albert Wade.

Moody Kincaid of this community, who has been at Richmond, Va., for five years is home with his home folks now.

Rev. Tharp, of the M. E. Church, preached a very interesting sermon at the school house last Tuesday night.

Our Sunday School is progressing nicely.

MARIJUANA BUST

Pocahontas County authorities destroyed a well organized marijuana production operation last week and placed three people under arrest. A warrant is out for a fourth person. Marijuana with a value of at least $3,000,000 was burned at the Huntersville Dump Friday evening.

According to the Prosecuting Attorney's office, those arrested were two county residents, Gary Smith Wigal, 36, and his wife, Grace Jane Wigal, 33, and a Warm Springs, Virginia, resident, Jennings Wise Garnett, 23. The two men are charged with the cultivation, manufacture, and possession with intent to deliver a controlled substance. Mrs. Wigal is charged with possession with intent to deliver a controlled substance. All three are out of jail on $15,000 bond each.

A warrant is out for the arrest of James H. P

Pocahontas County Teachers Institute Held in Marlinton 1st of this Week

The Pocahontas County Teachers' Institute convened at the Edray District High School auditorium, this city, September 3, for a three-day session with 171 teachers enrolled. The institute was called to order by County Supt., C. E. Flynn, music led by Mrs. Nan P. Kay; Devotional by Rev. S. R. Neel. The aims of the institute were given by the County Superintendent and the following instructors were introduced for the week:

Dr. W. C. Snow, Bramwell; Mrs. H. R. Manasse, New York; L. T. Tustin, State Superintendent of Rural Schools, Charleston; Mrs. Wayne Welton Gadd, State Department of Health, Charleston; and Dr. Mary R. Fleming.

AIMS OF THE INSTITUTE
C. E. Flynn

Eighteen years ago when I began teaching, there were few high schools and teachers were not required to attend or to get a high school education in order to teach school. On the other hand, the teachers passed the County and later the State Uniform examination and received their certificates in that way. They had no training whatever, and followed the example of the teachers who had taught them.

Institutes, as they were then conducted, filled a useful place. Teachers perhaps got some new ideas in theory and art of teaching and the teaching of the fundamental subjects that helped them in their work. But between that time and this, there has been an upheaval in education in West Virginia. High schools have sprung up, Normal schools have become teacher training institutions. The laws regarding the certification of teachers have changed. Whereas, eighteen years ago, young people from the rural schools passed the State Examinations and began teaching, now not only must they have four years of high school work but beginning with this year, must have completed a full year's work in a school work for the year, all teachers who teach in this County should attend here. The notion that teachers who attended summer school should be excused from attending institute is entirely out of place at the present time, and with the three-day institute, it is necessary that all the teachers work together to make up a definite plan of work for the school year.

The following are the teachers who were enrolled Monday, September 3.

Mrs. Fred J. Hefner, Evalyn K. Coyner, Bonnie B. Brooks, Mack F. Brooks, Georgia M. Shearer, Grace Shearer, George Douglas McNeill, Eric S. Clutter, Anne Correll, Edna McNeill, Virgil Wenger, Olivine McNeill, Estes F. Crist, Elizabeth Frances McNeill, Mary Sue Adkison, Mrs. Roxie Arbogast, Ethel G. Beard, Mrs. W. F. Rexrode, Mrs. Mary Wanless, Charles Spencer, Harry Hollandsworth, Eula Virginia Hill, Wilton C. McMillion, Hallie Siple Buckholt, Anna Howard, Florence Howard, Linnie Thompson Woods, J. K. Arbogast, Mrs. Elva J. Wilson, Helen McElwee, Frankie Lucille White, Clara Palmer Wade, W. A. Hively, E. Ernest White, Mrs. Flora Perry Johnson, Madge Mae Eskridge, Kathleen Taylor, Leta McLaughlin, K. B. Wilmoth, Sam Spencer, Clarence F. Smith, Neff Simpson Morrison, Edgar Arnold Shinnaberry, C. Forrest Hull, Edna Good May, Helen Margueite Kumm, Margaret Hall Wilson, Claire Warwick, Lucille Friel, Mary Edith Newman, Charlcie E. Beverage, Enid E. Harper, Anna Elizabeth Ward, Eva Lucille Bright, Margaret Hope Hull, Beryl Dove Marshall, Ethel Mae Burner, Mary Virginia Ruckman, N. R. Fertig, Edna C. Knapper, Georgiana Hill, Sarah F. stance. Mrs. Wigal is charged with possession with intent to deliver a controlled substance. All three are out of jail on $15,000 bond each.

A warrant is out for the arrest of James H. P. Garnett.

Mrs. Wigal is an English teacher at Pocahontas County High School. She was suspended from her position on Monday pending the outcome of the case. Her husband is presently unemployed. Garnett described himself to authorities as a sculptor.

The affair began on Thursday with the report to State Police by U. S. Forest Service personnel of a possible field of marijuana on Thorny Creek Mountain. Search warrants were obtained and authorities found a 1½ to 2 acre field of cultivated marijuana on an 80 acre tract of land on the mountain. This tract had belonged to the Wigals but

fore, the work that they got in the Institute then, they now get in normal school.

With the coming of the State plan of work, the Pupil's Reading Circle, the Coupons of Credit, a New Course of Study, etc., the Institute has very properly changed from being a teacher training institution, to one where the superintendent and teachers plan out the work for the year. This can be done in three days and thereby does away not only with the teacher training institute, but with the five day institute as well. With a three-day institute, the Superintendent still has two days left with which to met with his teachers during the year and for which they receive pay for attending. This gives the Superintendent a chance to follow up the work that has been planned for the year at the three-day institute, and see that it is being carried out in the school room. For convenience a five-day institute may be preferable, but for the building up of efficiency in our schools, the three-day institute is much better.

Instead of the old institute where instructors got up and lectured to the teachers on almost everything "under the sun" for five days, we are planning this year an entirely new type of institute. In this institute, we hope to work out a definite plan of work for the school year, to call attention to certain state projects in education, to discuss every-day problems in the class room, and inspire the teachers to greater and better things educationally. I give these instructors at this time fair warning that if they get away from the central ideas of this institute and begin on psychology, philosophy or some other unimportant subject that they will likely get in bad before they get through.

Since this institute is primarily for the purpose of planning out our

HOSPITAL NOTES

Mr. W. H. Grose, of Huntersville, who was operated on last week for Appendicitis, and for whom the greatest concern was feared for his recovery, on account of his advanced age, 79 years, we are glad to state that he is making a nice recovery.

Mrs. W. C. Cleek, of Hillsboro, who was in for three weeks treatment for ulcer of stomach, was removed to her home Tuesday, she showed much improvement.

Mrs. Asa Barlow, of Edray, who was admitted to the hospital for treatment for acute intestinal trouble is somewhat improved.

Mrs. Esterline Johnson who has been ill for some time, is no better, her condition is not encouraging.

Mrs. Frank Deputy, of Huntersville, who underwent a very serious operation last week, is improving nicely.

Mr. Preston Rexrode, of Minnehaha Springs, is able to be out on the porch, after a three weeks treatment.

Rosser Wickline, of Spice, W. Va., who was operated on last week for ruptured appendix, is improving nicely.

Mrs. Ira Brill was admitted to the hospital Tuesday A. M. for treatment

There is the inevitable triangle in "The Big Parade," the King Vidor production for Metro-Goldwyn-Mayer coming soon to the Seneca Theatre, but with a difference. The two female angles of this triangle never meet and are for the most part unaware of each other's existence.

The one is the girl John Gilbert leaves behind him when he goes to war, and the other is a peasant girl of France. Claire Adams has the role of the hero's boyhood sweetheart, and Renee Adoree plays Melisande, the young French woman. An exceedingly unusual ending is a feature of the story of "The Big Parade."

Researchers on Chestnut Tree Hold Meeting

A group of scientists involved in research into the Chestnut tree and its possible recovery from the blight gathered at the Allegheny Lodge in Minnehaha Springs last week. Attending the three day meeting were researchers from North Carolina, Georgia, Michigan, Virginia, Connecticut, Kentucky, Minnesota, Canada and West Virginia.

The participants arrived at the Lodge Tuesday morning and spent that afternoon on Brushy Mountain looking at an area with a good growth of native Chestnut trees. Wednesday was spent in meetings with presentations by the various scientists on their research. The meeting came

Locals Outweighed In Thursday's Tilt With Greenbank

Greenbank High School Football Average Weight 4 Pounds More

Greenbank's squad outweighs the Marlinton squad four pounds to the man. The probable lineup for Greenbank Thursday will outweigh Marlinton even more. This fact will figure largely in a defeat for Marlinton Thanksgiving if the field should be muddy.

The fullback positions on both teams will be held down by two stellar performers. Both are triple-threat men and the line plunging of both have been regarded as spectacular throughout the season. Kenney is outweighed by Guthrie thirty pounds but his speed and shiftiness helps to make up for the weight. A great many of the fans will keep their weather eye on both men throughout the contest.

Both lines will be keyed to the highest possible tension for the fray and there will be exceptionally good football played on both sides.

This game bids fair to be the most sensational contest of its kind ever staged in this county. The whole countryside is talking the game up and the largest crowd that ever turned out for any athletic event in these parts is expected. Don't miss the greatest athletic event of the year. Save the turkey and really enjoy it after the game.

Chestnut trees. Wednesday was spent in meetings with presentations by the various scientists on their research. The meeting came to an end Thursday morning and most were on their way home by early afternoon.

The majority of scientists at this gathering work for institutions involved in a five-year study of the Chestnut blight sponsored by the U.S. Department of Agriculture. The institutions and agencies involved in the study are West Virginia University, the University of Kentucky, Virginia Tech, Michigan State University, the University of Tennessee, the Connecticut Agricultural Experiment Station, the U.S. Forest Service and the Science and Education Administration of the U.S. Department of Agriculture.

Interest in a project such as this on the Chestnut blight began in our own state of West Virginia with dis-

HILLSBORO NEWS

Box Supper Held

The Box Supper which was held in the school auditorium November 23, was a howling success. The one-act play and Minstrel show was presented before a very large audience, and the amateurs were highly applauded. The boxes were fixed up very attractively and brought a fair price. Wm. Ruckman, local auctioneer, of Millpoint, sold the pies to the highest bidder.

The entertainment part of the program individually consisted of a vocal solo entitled "My Wild Irish Rose", by Joe Smith, high school youth; a vocal solo by "Bill" Sheets entitled, "Its a Funny Melody."

Redpath Bureau to Present Lyceum

The Redpath Lyceum Bureau will present their second number here December 1, which is the "Schumate Brothers." There are four of the

ment Station, the U.S. Forest Service and the Science and Education Administration of the U.S. Department of Agriculture.

Interest in a project such as this on the Chestnut tree began in our own state of West Virginia with discussions in the W. Va. Legislature several years ago. These discussions led to a symposium at W. Va. University in 1978 which was sponsored by the U.S. Forest Service and attended by researchers from this country and Europe.

The present project is in its second year. The meeting at Allegheny Lodge is the second annual gathering of the people involved in the project. The one last year was held in Michigan. Those attending the meeting are specialists in various fields, including plant pathology, genetics and

expected

Nimrod Notes

More bear have been killed in the West Virginia mountains this season than for several years past.

Mr. Joe Rexrode reports shooting a monstrous bear above Thornwood on Saturday, and another one was killed near the Clelland Mullenax place in the Sinks, on the same day.

The most redoubtable hunter we have in this section, though, is Crede Morris who choked a wild cat to death, while hunting with Glenn Gragg on Cheat Mountain.

Young Gragg had shot a cat when they ran onto a large one in the brush.

It showed fight and Crede grasped it about the neck choking the breath out of it while the animal clawed the bark from a nearby tree.

Fire Near Dunmore

Mr. Frank Taylor had the misfor-

year was held in Michigan. Those attending the meeting are specialists in various fields, including plant pathology, genetics and biochemistry.

The chairman of the meeting this year was Dr. Jack Elliston, of New Haven, Connecticut. Organizer of the meeting was Dr. William MacDonald, of W. Va. University.

Those involved in research in the Chestnut blight have been given hope in recent years that the blight might be overcome and the Chestnut once again become an important tree in our forests. This hope comes from Mother Nature herself. First observed in Italy in the 1960's and now observed in several places in this country is a situation where the fungus that

be going for this is not our resting place."

LIQUOR AND CAR ARE CONFISCATED

On November 18th, Officers L. S. Cochran, J. L. Warwick, J. H. Rose and G. M. Brice searched the John Reda Garage in Cass and found seven gallons of moonshine stored in a five passenger Dodge sedan. Wm. Benson, John Siler, and a man giving the name of W. L. Cooper, were arrested and taken before U. S. Commissioner A. E. Smith and were held for U. S. Court at Charleston. The car was confiscated. The man giving the name of Cooper is from Crozet, Va., and is thought by officers to have been operating in this county for more than two years.

Magistrate Courts

Judge Charles Lobban met with Magistrates Sue Hollandworth and Robert Gilmore last week and outlined the arrangement he believes will meet the requirements of the State Supreme Court concerning magistrate services in the County. The magistrate systems in Pocahontas and a number of other counties were the subject of hearings in June to determine if adequate service was being provided at the county seat and if cases were being properly rotated among magistrates. At issue in Pocahontas County was the future of the satellite magistrate office at Durbin. In July a ruling came from the State Supreme Court Administrator Paul Crabtree that the Durbin office could remain open on a part-time basis providing 24 hour, 7 day a week service is provided at Marlinton.

As outlined by Judge Lobban, Magistrate Gilmore is to spend ten days a

Edray High
- :- *History of its Growth* -:- -

From The Spotlight

About 1780, some twenty years after Marlin and Sewell reached the Greenbrier, at the mouth of Knapp's Creek, the Iroquois raided the Greenbrier settlements in what is now Edray District. Moving swiftly southward over the Seneca Trail the red warriors from the Great Lakes reached the Marlinton settlement in the night time. The Drinnen cabin was located just beyond the present town limits and near the Pocahontas County Fairgrounds. At dawn, Richard Hill and Henry Baker left the cabin to wash at the river. As Baker climbed the fence by the river's bank he was shot from ambush. Hill escaped to the cabin, and careful watch was kept in order that any Indians attempting to scalp Baker might be shot. But the wiley Indians lifted the corner of the fence and, after pulling Baker's head through beneath the rails, scalped him [illegible] their place of security below the level of the bank.

So far as history records, this Henry Baker who died by the Greenbrier's edge in 1780, was the first teacher to cross the Alleghanies, and the school, taught in the Drinnen Cabin, was the pioneer among pioneer schools.

Following the Drinnen raid, the school was taken to a point near Campbelltown. In 1880 Marlinton's first public school was established in a one room building near the west end of the old wooden bridge. Among the teachers who taught in this building may be mentioned William T. Price, D. D., and George W. McClintic, L. L. D., now Federal Court Judge.

In 1907 a brick building was erected and a combined high and graded school established under the direction of Professor L. W. Burns.

In 1916 the Board of Education found it necessary to enlarge the school plant, and a ten-room brick building was erected for high school purposes. The high school enrollment increased steadily and in 1926 [illegible] addition containing a gym, laboratory, library, and six class rooms were erected.

The Senior high school now has an enrollment of 217 and if the present growth of the school continues, another addition to the building will be required by 1930.

State Supreme Court Administrator Paul Crabtree that the Durbin office could remain open on a part-time basis providing 24 hour, 7 day a week service is provided at Marlinton.

As outlined by Judge Lobban, Magistrate Gilmore is to spend ten days a month in Marlinton. The ten days are to consist of two five day weeks (Monday-Friday), either consecutive or alternating. During each of the two weeks Mr. Gilmore is in Marlinton, Magistrate Hollandsworth is to go to Durbin two days and have the other three days off as compensation for having more work while on night duty. During the two weeks Mr. Gilmore is in Durbin, the office there is to be open four days a week.

The Judge also directed that cases be put on a strict rotation basis between the two magistrates.

The Judge did not require that Mr. Gilmore be at Marlinton when he is on night duty. It is not known if the State Supreme Court will agree to this.

Editorial from Greenbank High School "Broadcaster."

Some will be surprised to find that Greenbank and Marlinton have resumed relations in athletics. To my mind it is the only thing to do, for the three schools of Pocahontas need each other, and must work for the County's good and must teach a wider citizenship than of districts. Misunderstandings occur when we are ignorant of others motives or intolerant of their ideas. This seems to be the trouble between us and we are to test our forbearance, our sportsmanship and our loyalty in the Thanksgiving game. We know that our students have good sportsmanship; we know that they are loyal, but in case we do not attain the highest mark in sportsmanship, let us not forget our loyalty. While we want our team to play its hardest and our

DOUBLE KILLING

Theodore Carr Shoots and Kills His Wife and her Brother-in-law, Lock Sharp

On Tuesday afternoon, Theodore Carr shot and instantly killed his wife, Lydia Houdyshell Carr, and her brother-in-law, Lock Sharp, at the Carr farm a mile east of Edray, on the Clover Lick Road. Carr also shot two or three times at his step son, Thilbert Houdyshell. He got some small shot in his leg, but is not much hurt. Squire Uriah Bird witnessed the killing. Carr is in jail.

Mrs. Carr, Lock Sharp and Squire Bird and young Houdyshell were engaged in surveying some land at Warwick, which Sharp was preparing to buy from his sister-in-law Mrs. Carr. About four o'clock just as the last stakes were being set, Theodore Carr came up, and without a word to anyone shot Sharp dead; the charge from a sixteen guage shot gun striking him below the heart. He then turned the gun on Thilbert Houdyshell, shooting at him two or three times, knocking his hat off and wounding him slightly in the legs as he ran behind a straw stack. Then Carr shot at his wife as she was making off, striking her in the hand. She turned back toward him, asking for mercy, and Carr shot her in the breast She died almost instantly.

Carr then went to his house, put up the gun, and awaited the arrival of the officers. State Trooper Jack Tidd was soon notified and in a few minutes he was on the scene. He arrested Carr, who said he had done "a terrible thing."

The Carrs have been having family trouble. Carr's farm was re sold for debt; and Mrs. Carr t it in. To help meet the pu price she was preparing to se of the land to Lock Sharp. objected to the sale, and it is ed that he had made threats t would kill Mrs. Carr and Sh they tried to put through the

Carr is fifty years old. He of the late Peter Carr of Claws is the father of two children Carr, and a number of childr former marriage.

Mrs. Carr was around forty age; she was a daughter of Wi Sharp of Woodrow. She is s by six children, four of the former marriage. On Thursda ing her body was taken to M graveyard in the Huntersville and buried beside the grave first husband, Ervine Houdys

Lock Sharp was 30 years son of the late David Sharp Marlinton. He was a blacks trade. He is survived by h and their three children. On day his body was buried at th yard on the Sharp homeste the Greenhill school house Creek.

FOOTBALL

(Lloyd Vaughan)

Marlinton High School Eleven defeated the Lewisburg High Eleven to the tune of 18-00 at the Fair Ground field last Friday. The game was one of the most colorful, and most exciting ever witnessed in Pocahontas county.. Intercepted passes, line plunges, and long runs gave thrills aplenty to one of the largest crowds ever assembled on Fair field.

The game started with a thrill when Marlinton's full-back Kenney ripped through the Lewisburg line gaining sixteen yards in two consecutive line plunges. It was ha.d for Lewisburg to check Marlinton's severe attacks with the terrorizing full back, Kenney hitting their line so hard that the end of the line would come together. The sideline went wild with admiration and cheers as Marlinton's full-back, Kenney went through Lewisburg's line twenty yards for a touchdown. Lewisburg rallied and came back in the game with renewed courage at the beginning of the second period of the game. They made several spectucular gains adopting aerial foot-ball. Miles, Marlinton's Left Guard, brought the Marlinton fans to their feet when he he intercepted one of Lewisburg's long aerials and sped forty yards for a touchdown. Lewisburg's Eleven wavered under this blow but never gave up fighting, and at the beginning of the last period they seemed to be a new eleven. Fighting mad they tore down through the field with the spirit of '76 in the veins. Marlinton faltered under their deadly attacks as Lewisburg's Quarterback

Marijuana Case

The fourth suspect in the Thorny Creek Mountain marijuana case, James H. P. Garnett, surrendered to County authorities last Wednesday. He was released under $15,000 bond.

He is a brother to Jennings W. Garnett, who was arrested the day of the raid on the marijuana field.

The investigation continues into the case, by both local authorities and the FBI.

Lewisburg's Eleven wavered under this blow but never gave up fighting, and at the beginning of the last period they seemed to be a new eleven. Fighting mad they tore down through the field with the spirit of '76 in the veins. Marlinton faltered under their deadly attacks as Lewisburg's Quarterback handled the ball. First downs were made consecutively by Lewisburg's spectacular line bucks, passes and sweeping end runs. Marlinton fans stood breathless, and spell bound, as Lewisburg steadily threatened Marlinton goal line, but the Marlinton Eleven came back with such fighting resistance as to hold Lewisburg for a fourth down, and again regaining the ball on their fifteen yard line. Lewisburg again regained the ball and again went sweeping down the field with spectacular line plunges, and long passes, shattering Marlinton's defense. Lewisburg succeeded in coming within four yards of Marlinton's goal line, but the Orange and Black held them for a fourth down. Regaining the ball and with their ferocious attack they threatened Lewisburg's defense causing them to loose ground heavily. They were within twenty yards of Lewisburg's goal when Kenney, Marlinton's fullback, ripped through the line for another touchdown during the last minute of the game.

Marlinton made their touchdowns during first, second, and fourth quarters of the game. Kenney, and Miles starred for Marlinton

Continued Rail Service to Durbin?

As we have reported, the Chessie System is in the process of seeking permission to abandon the Western Maryland Railway line from Greenbrier Junction to Durbin and the Chesapeake & Ohio Ry. line from Durbin to Bartow, a total of 29 miles. Closing of this line will leave the WM line through Spruce and Slatyfork as the only commercial rail line in the County.

Permission to carry out the abandonment must come from the Interstate Commerce Commission. However, due to the lack of traffic on the lines and the reduced regulation of railroads in recent years, the chances of the ICC refusing to allow the abandonment are slim. Permission could well be received before the end of the year.

At the present time the only major customer on the line is the Howes Leather

chances of the ICC refusing to allow the abandonment are slim. Permission could well be received before the end of the year.

At the present time the only major customer on the line is the Howes Leather Company tannery, which received shipments of hides from the mid-west. The only outbound traffic are occasional loads from Howes and chips from Interstate Lumber Company. The tannery traffic consisted of 321 cars in 1981 and 263 cars in 1982. Chessie does not consider this sufficient traffic to continue the line, particularly since the tunnel at Glady needs considerable rehabilitation, according to the railroad.

The abandonment of this line will also leave the Cass Scenic Railroad without a connection to the national rail network. This would eliminate the possibility of the railroad making special runs to things such as the

Scenic Railroad without a connection to the national rail network. This would eliminate the possibility of the railroad making special runs to things such as the Forest Festival as has been done in the past. It will also make it much more difficult to receive additional railroad equipment and, in some cases due to weight, impossible. Without a rail connection future development of Cass as a tourist railroad and railroad loggin museum will be severely limited.

However, two ways are possible to retain both service to the tannery and a rail connection for Cass. Both involve the Cass Railroad providing the final portion of the movement of the cars to the tannery.

One way involves the rebuilding the one mile connection on Cheat Mountain between the Western Maryland Ry. at Spruce and the Cass Railroad at Old Spruce. The cars for

to the tannery.

One way involves the rebuilding the one mile connection on Cheat Mountain between the Western Maryland Ry. at Spruce and the Cass Railroad at Old Spruce. The cars for the tannery would be brought to Spruce by Chessie for pickup by Cass.

The other method is for the State to acquire the line from Greenbrier Junction to Durbin. Traffic to the tannery would follow its normal route with Cass providing the handling from the junction south.

The Cass Railroad would, of course, receive payment for providing this service. According to Chessie official Barry H. Blank, Assistant to Vice-president, at Baltimore, Chessie is willing to make the Cass Railroad's share of revenue from the tannery traffic at least $200 per car.

ONE KILLED AND ONE INJURED IN AUTO ACCIDENT

Accident Occurs Sunday on Durbin-Bartow Road; The Car Crashes Into Fence as Driver Loses Control.

Richard Parmley, age 40, a temporary resident of Durbin, was instantly killed, and Miss Helen Kumm, daughter of Mr. and Mrs. H. M. Kumm, of Durbin, was injured when the automobile in which they were riding skidded from the road into a barbed wire fence early Sunday afternoon. The only other occupant of the car, a Buick Master Six, at the time of the accident was Mr. Kumm, who was at the wheel. He escaped uninjured.

According to the details of the accident reaching here, Parmley had called at the Kumms and had suggested a ride. Mr. Kumm and his daughter accepted the invitation. After having been out on the road a short while, Parmley invited Mr. Kumm to slide under the wheel and note the ease with which the car could be handled. With Mr. Kumm at the wheel, and probably talking the running qualities of the car, it is said that Parmley urged the driver to "step on it." They were now on the good stretch of road between Bartow and Durbin. The car, it is said, was doing about forty, when of a sudden a snow-drift came into view. It is claimed that Mr. Kumm applied the cold brakes, only one catching, causing the car to skid into the ditch beside the road. As the wheels on one side settled into the ditch, the top of the sedan came in contact with the posts of the wire fence, stripping the top from the car. In so doing Parmley was caught in the wreckage, and his head crushed. Miss Kumm suffered a broken arm, sprained ankle, and bruises about the body, while Mr. Kumm escaped uninjured. The car belonged to Parmley.

Mr. Parmley had been in Durbin only one week. He was installing an automatic sprinkler in the Durbin Tannery. During his short stay no one had been able to glean from him his permanent residence. Once when ask he replied that he had been with the same company twenty-seven years and as he had never remained in

SPECIALISTS TALK ON FARM TOPICS

Six specialists from the West Virginia College of Agriculture are included in the program of agricultural talks to be broadcast from the Stockman-Farmer studio of the Westinghouse Radio station, KDKA, Pittsburgh, each Wednesday afternoon at 5:15 until March 4.

There are twelve programs in all, six of which will be furnished by agricultural specialists from Pennsylvania State College.

The programs presented by West Virginia specialists are: January 11, "Some Things to Look for in Selecting Farm Seeds," by H. K. Rowlee, seed expert for the College and the State Department of Agriculture; January 18, "Care of Ewe and Lamb," by E. L. Shaw, sheep specialist.

February 1, "Caring for Young Chicks," by R. L. Mason, extension poultry specialist; February 15, "Feeding Lambs for Market," by B. Creech, extension animals husbandman; March 7, "Taking Care of the Mexican Bean Beetle," by E. Sherwood, plant disease and insect specialist.

Penn State specialists will speak as follows: December 28, "The Use of Specimen Plants in the Home Grounds;" January 11, "Managing Swine for Profit;" January 25, "Fruits of Four-H Club Work;" February 8, "More Milk from Better Cows;" February 29, "Feeding for Dairy Profits;" and March 14, "Stop the European Corn Borer."

CHEVROLET DEALER CHANGES FIRM NAME

Expects The Bigger and Better Chevrolet to Break all Sales Records For Year of 1928.

Early in 1922, S. J. Rexrode and F. M. Brill, under the name of Marlinton Motor Company, started to sell Chevrolet cars in Pocahontas County. At the time, there was only a very few Chevrolet cars in the County and the first year resulted in the sale of thirty-five cars. Since that time Mr.

for providing this service. According to Chessie official Barry H. Blank, Assistant to Vice-president, at Baltimore, Chessie is willing to make the Cass Railroad's share of revenue from the tannery traffic at least $200 per car.

Mr. Blank indicated the Chessie System is willing to assist the State in getting the Cass rail connection and taking over the tannery traffic. The Railroad has made seveal proposals to the State.

On the Spruce to Old Spruce connection project, Mr. Blank said Chessie is willing to donate the tract material needed to re-lay the track and provide any needed technical assistance. Chessie will also donate the track from Durbin to the tannery at Frank.

Concerning the Durbin to Greenbrier Junction line, the Chessie System has

he had none. After the accident, search was started for relatives, and according to the latest reports, one sister was found to be living in Texas, and a later report is to the effect that one has been found in Illinois. The body is lying in state at Durbin awaiting their arrival.

BECKLEY TO GET NEW SANITARIUM

Beckley was chosen Thursday as the site of the proposed Rutherford tuberculosis sanitarium by the state board of control and the state health department.

The new institution will be built on "Gray flats," adjoining Beckley, on the following conditions:

That Beckley present 30 acres of land, of which 5 acres will include the mineral rights; that the Raleigh County court build a hard-surfaced road to the tract; and that the Beckley Electric Light and Power Company build a water main and electric power line to the site.

A committee of the Beckley Chamber of Commerce has already informally agreed to meet these conditions.

The state will pay $15,000 for all coal and other minerals and rights under the 50 acres of land to be conveyed in fee.

Advising the Beckley Chamber of Commerce of

material needed to re-lay the track and provide any needed technical assistance. Chessie will also donate the track from Durbin to the tannery at Frank.

Concerning the Durbin to Greenbrier Junction line, the Chessie System has offered to sell it to the State for $300,000, which is half of the estimated scrap value of $600,000.

A number of problems are involved with either proposal. According to Department of Natural Resources District Administrator Robert Mathis, Jr., there is the question of whether the DNR can legally go into the freight railroad business at all. There is also the question of how much ICC regulations the Cass Railroad might have to come under if it begins to handle interstate commerce. Also the employees

LUMBER COMPANY TRANSFERS CENTERS

Transfer of the centers of operations of the Pardee-Curtin Lumber company from Curtin to Bergoo, Webster County, has been announced by George D. Curtin. A large mill is being erected at Bergoo.

The West Virginia Midland Railroad, owned by the lumber company, will be extended from Webster Springs to Cheat Junction where it will connect with the Greenbrier, Cheat and Elk River road, recently acquired by the Western Maryland.

The mill will begin June 1, 1928, cutting approximately 100,000 feet of lumber daily. It was estimated that the vast stand of timber now to be cut would last 15 years. Bergoo is 12 miles from Webster Spgs. **The new mill will employ 300 men.**

might have to go under the railroad retirement system, which would cost both the State and the employees.

Each of the alternatives also have problems. The Spruce to Old Spruce connection would cost the State little to begin with and would not add much track to maintain, but would present operational problems. Modern day freight cars are longer and heavier than those in use when the line up Leatherbark Creek was built. Winter time operations would present serious problems. With service probably no more than once a week it would be difficult to keep the line free of snow and ice. Also

MRS. M'NEEL DIES FROM PNEUMONIA

Was Active Member of The Presbyterian Church, and Took Much Interest In Civic Affairs.

Mrs. Summers McNeel died at her home here Saturday about noon, the cause of her death being pneumonia. She had taken ill early in the week, and her condition was regarded as serious since Tuesday.

Mary Frances McNulty, daughter of Frank and Frances McNulty, was born near Meadow Dale, Highland County, Va., July 11, 1876. She was married to Thomas Summers McNeel in the old Presbyterian Church at Marlinton, July 8, 1903, by Rev. William T. Price, the first pastor of the church.

She united with the church of her father and mother, the Pisgah Presbyterian, at Meadow Dale, in early childhood, upon her confession of faith in Christ, and never, during the years to come, did her love for and devotion to the faith of her fathers lose its vigor or cease to be the chosen field of her chief activities. When she came to Marlinton to make her home, she transferred her membership to the Marlinton Church and has been a hard-working member ever since, except for five years when she lived at Hillsboro, where she took her letter to the Oak Grove Presbyterian Church. She loved her church and her chief delight was to labor for it.

However, her activities were by no means confined to the church. She was broad in her sympathies and was interested in every movement that had for its object the improvement of life and the circumstances of living. She was for some years a much-loved school teacher, first in her native county of Highland, Virginia, and later in Marlinton. She was at the time of her death, President of the Woman's Federated Club, of Marlinton and was virtually interested in other movements and organizations. Naturally active, she loved to be in the currents of life moving about her, and her counsel was constantly being called for by her fellow-workers. Yet her great love, outside [illegible] was for her church and [illegible]

tourist trains.

From an operational point of view, the Greenbrier Junction-Durbin line presents no major problems. The Cass Railroad has a small diesel locomotive and is to be getting a larger one, so the freight service on this line could be maintained without an add-

Presbyterian? If it does it's ... chairman of the ... committee of Greenbrier Presbyterial, had made arrangements for a meeting of the committee within a few days, a gathering which she will not be permitted to attend in the flesh. Thus it be seen that her mind and hands were busy in the interests of her Lord almost to the very end. A woman of pronounced principle, her idels found their best exemplifications in those channels.

July 8th, of this year, would have been the twenty-fifth anniversary of her wedding. She was looking forward to the occasion with peculiar interest. The entire wedding party, some twelve in number, were to have been present. Now she has been the first of the group to hear the call of the Savior to come up higher. Married at the hour of noon, the final, somewhat sudden call came, near the noon hour, December 31, 1927.

Mrs. McNeel is survived by her husband, Thomas Summers McNeel; one daughter, Nancy, now a student in West Virginia University, to graduate in February; one sister, Mrs. Annie L. Arbogast, now of Los Angeles, California; and one brother, Charles S. McNulty, attorney, of Roanoke, Va. Friends innumerable mourn her departure, but bless her memory.

Funeral services were conducted at the Presbyterian Church Monday afternoon by Rev. J. C. Johnson, Rev. K. V. Bowen and Rev. S. R. Neel, and interment made in Mt. View Cemetery.

lar problems in winter. However, the initial $300,000 may be hard to obtain from the Legislature without a lot of public support. Also, Cass would have another thirty miles of track to maintain, including the tunnel.

Time is running short for the State to come up with possible answers to these questions and problems and accept or reject the proposals made by the Chessie System. Although Chessie may have permission from the ICC to abandon the Durbin line by the end of the year, Mr. Blank indicated the railroad

ing conditions force greater efficiency.

MARRIED

Mr. Roscoe Lee Galford and Miss Carrie Atlanta Sutton, both of near Cass, were married early Wednesday morning at the Methodist Parsonage by Rev. S. R. Neel.

Mr. James Sterl McLaughlin, of Pittsburg, and Miss Janet Margurite Bantom, of Durbin, were united in marriage by Rev. S. R. Neel, at the Methodist parsonage here Monday. **They will make their home in Pittsburg.**

HILL—DARNELL

Miss Alvirgie Leora Mondiene Darnell and Mr. Ralph Joseph Hill were quietly united in marriage Dec. 10, in Cumberland, Md., by Rev. C. R. Strausburg of that city. The bride is a promising young lady of Marlinton, W. Va., and graduated from the Edray District High School of that city with honors in the class of '27. She is the daughter of Mrs. F. W. Sizemore, of Marlinton. The bridegroom is the son of F. T. Hill of 2103 Third Avenue, and a prominent young business man of this city. The couple was accompanied from Cumberland to Altoona by the bride's mother and a dinner was served at the home of the brides aunt, Mrs. H. C. Shope of 1311 Sixth Avenue, Juniata. Mr. and Mrs. Hill will make their home in Altoona.—Altoona Mirror.

Eulogy to a Dog

WARRENSBURG, MISSOURI, April 27, 1870 — One of the most famous murder cases in American history came to its conclusion in the Johnson County courthouse this week in 1870, and it involved the death not of a man but of a dog. A black and tan hound dog with loose hanging jowls and dark, sad-looking eyes whom everyone knew as "Old Drum."

When Old Drum's body was pulled out of Big Creek with a bullet in his brain, people knew there was going to be trouble. Charlie Burden, the dog's owner, loved Old Drum. As a pup, the dog had been the runt of the litter. The vet told Charlie he could never raise him. But Charlie, a big six-footer with fair hair and blue eyes, sat up with the sickly pup night

REUNION OF COUSINS AT MINNEHAHA SPGS.

Within the last week there has been a reunion of cousins at Minnehaha Springs Hotel.

Mrs. F. O. Leonard, and Miss Mathilde Leonard of Buckhannon, W. Va., Mr. and Mrs. W. T. McCullough, Mr. Robert M., Miss Mildred and Miss Edna L. of Lynchburg, Va.; Mr. and Mrs. T. A. Wise, Columbus, Ohio. Also Miss Thelma Light, Miss Nell Love, Miss Madeline Sims and Miss Lilly Duncan, of Fayettesville, W. Va., were spending several days vacation here.

Mr. and Mrs. Wm. S. Hobbs and son Milton, stopped a few days on their way to Philadelphia Pa., from Miami, Fla. Mr. Hobbs has been appointed General Superintendent for two large ice and cold storage plants near Philadelphia.

He has been an engineer in the Royal Pal mIce Co., operating plants in and near Miami, Fla, for nearly two years. He specialized in Deisel Engines and Refrigeration in his last year in Carnegie Tech, Pittsburgh, Pa. and has been getting rapid promotions since. He is the youngest of three sons of Mr. and Mrs. W. A. H. Hobbs, all of which are Technical graduate engineers.

CROP Committee

— — —

after night and nursed him to strength and health. To everyone's surprise, Old Drum grew up to be the best deer hound in the county.

Only one man didn't like Old Drum, and that was Lon Hornsby, who raised sheep. Something had been killing his lambs, and he had sworn that if he ever caught a dog near his place he would kill it. On an October night in 1869, he and a friend returned home to see a shadowy form near the sheepfold. No sheep had been killed, but Lon and his friend got their rifles and took after the animal. Next morning Old Drum's body was found in the creek where he had died trying to get home.

Charlie Burden was furious. Hired a lawyer and sued. Won the case, but it was reversed in a higher court. Charlie sued again, claiming new evidence. This time he hired a young lawyer named George Vest who

HUNTERSVILLE CHATTER BOX

We are having quite a bit of wet weather but hope to have a good week for the fair.

Mr. Flynn, our County Superintendant was in this section Monday.

Mr. Harry Cochran and Mr. Harper Barrett were visiting their aunt Mrs. Ida B. McComb here Sunday.

Miss Evelyn Ginger, who has been attending school at Montgomery has returned to her home here.

Miss Evaleigh Harper spent the week end with Miss Gweneviere Jordan at this place.

Miss Reta Moore who is employed at Charleston is visiting her parents, Mr. and Mrs. Peyton Moore.

Mr. and Mrs. Grey Loury, of Elkins, are visiting the former's father, Mr. J. C. Loury.

Miss Helen Barlow is visiting friends in New York at this writing.

Miss Madeline Barlow who is employed at Marlinton spent Sunday with home folks.

Miss Anna Price Sheets who has been nursing at Huntington has returned to her home here.

Mr. Blake Shrader, Miss Nellie Barlow and others motored to Elkins Sunday.

Red Wing.

Miss Mae Necessary, of Hunting-

got their rifles and took after the animal. Next morning Old Drum's body was found in the creek where he had died trying to get home.

Charlie Burden was furious. Hired a lawyer and sued. Won the case, but it was reversed in a higher court. Charlie sued again, claiming new evidence. This time he hired a young lawyer named George Vest who loved dogs as much as he did.

For two days the defense produced witnesses, but Vest didn't examine a one. Finally, in the last ten minutes of the trial, he got up, ambled over to the jury box, and made this speech:

"Gentlemen of the Jury: the best friend a man has in the world may turn against him and become his enemy. His son or daughter that he

attractions going on, there are many people who would rather listen to a good political speech than eat when hungry. With this fact having been heretofore demonstrated, officials of the fair have come to the conclusion that this is one more free added attraction.

CUMMINGS CREEK NEWS BUDGET

Our farmers are very busy with their hay in spite of the wet weather.

All of our young folks are getting ready for the fair.

Mr. A. B. McComb was visiting at the home of Mr. and Mrs. A. H. McComb Sunday.

Miss Leona Madison who has been employed in a hospital in New Jersey is at her home here.

Mr. and Mrs. Clarence McComb and little son, Edgar was visiting the former's mother at Huntersville Sunday.

Mr. and Mrs. J. S. Lee made a flying trip to Marlinton one day last week. They were accompanied by Mrs. Florence Ramsey.

Mr. and Mrs. Rodney Buzzard and family were visiting near Rimel Sunday.

Mrs. Esco Alderman and little son Harry were visiting her parents, Mr. and Mrs. I. P. Dean near Minnehaha, Sunday.

Misses Mary and Carrie Alderman spent Sunday with friends near Marlinton.

Rev. and Mrs. Howard Underwood spent a few days here last week.

Mrs. Eli Gaynor of Clarksburg is visiting her parents, Mr. and Mrs. C. H. Kellison at this place.

DURBIN CHARGE

M. E. Church, South
L. S. Shires, Pastor

"And when the last scene of all comes, and death takes the master in its embrace and his body is laid away in the ground, there by the graveside will his dog be found, his head between his paws, his eyes sad but open in watchfulness, faithful and true even in death.

"Gentlemen of the Jury: the defendant killed my client's dog. Is there anything more I need to say?"

There wasn't. The jury never even left the box. The foreman polled them where they sat, and in less than two minutes' time a judgment was brought in that was for five times as much as Charlie Burden had asked.

George Vest became so famous that he was elected to the United States Senate, where he served for many years. His speech to the Warrensburg jury had been, without question, the most stirring tribute to an animal that anyone had ever delivered.

GREENBANK

We are having a fine season and while crops are later than common, prospects are for a bumper crop of corn and oats. Hay crops, which are mostly harvested, were good; the wheat crop is fine but not enough wheat was sown last fall. The potato crop bids fair to be fine; gardens are fine but late. Milk cows are selling close around $100 a head, calves selling around fifty dollars Fall pasture good; apples and peaches are scarce.

Grady H' Arbogast and wife of Elkins, took dinner with J. H. Curry and wife last Sunday.

A. W. Curry and faminy of Richmond, Virginia, are visiting his parents, Mr. and Mrs E N. Curry.

Mrs. W. E. Henderson and children of Richmond, are the guests of Mr and Mrs W. W. Arbogast.

Rev. J. W. Rosenberger and family of Cumberland, were visitors at the home of James Stretch a few days last week.

Wm, Geiger has sold his garage to Lightner & Dean, and will make his home at Dunmore.

J. H. Curry is slowly recovering from an attack of flu.

The Past 100 Years

A Disastrous Day

AUGUST 17, 1905

For Pocahontas County, Twelve Persons Meet Violent Deaths.

Dynamite Explosion, Railroad Wreck Runaway Fatality, Suicide, Lumbering Accident

TERRIBLE EXPLOSION.

KILLS EIHGT ITALIAN LABORERS AT DUNLEVIE.

Dynamite Placed Under Dago Shanty Explodes with Awful Effect.

Last Monday night at 1:12 a. m., eight Italian laborers were killed by an explosion of dynamite under their camp at Dunlevie a new town on the East Branch of Greenbrier River in the Upper End of Pocahontas County, three miles above Bartow.

All that is known certainly concerning the terrible catastrophe is that the shanty in which ten Italians lived was blown up with a charge that must have contained a hundred sticks of dynamite.

Not only was the house blown into small particles but a hole was left in the ground ten feet

Prosecuting Attorney McNeill went up to the scene Tuesday to investigate the matter.

Not a man in the house escaped.

It is near the scene of the explosion several years ago when eight Austrian laborers were killed by dynamite while eating a lunch around a fire thawing out frozen sticks of dynamite.

An inquest was held by Justice Oliver which rendered a verdict of death from an explosion at the hands of parties unknown. The jury was composed of C. O. Arbogast, foreman, Markwood Herold, T. H. Rollins, A. J. Porter, John Rhodes, A. N. Canard.

The shanty was the old school house a building 12 feet square.

The explosion was from one edge of the building exerting the force toward the river, not a particle of the building was left standing. Nearly all the men had their brains blown out.

Three bodies were found seven-

TRAIN RUNS AWAY.

Engineer Loses Control of [illegible] Train.

Train No. 1, on the Marlinton & Camden Railway, H. Mc[illegible]nick, conductor and Snyder, engineer, made up of three C. & O. flat cars loaded with bark, got beyond the control of the engineer on the heavy grade near the top of Stoney Creek mountain, Monday evening, and ran to the old church on Stoney Creek, a distance of over four miles before it could be stopped.

On the train were a number of women and children, beside the crew. They had been picking berries on Williams River and were returning home.

When the engineer deserted the engine, all jumped off the [illegible] with the exception of Frank Reynolds, who set the brakes and eventually stopped the train. He exhibited nerve of a high order, crawling from car to car on his stomach. When he reached the engine he did not know what to do, but fumbled with the levers and valves until he closed the throttle and reversed the engine.

All who jumped were [illegible] less injured. The most seriously hurt was Clarence McCl[illegible], 9, who was thrown from [illegible] by his father. His head

The box supper at the Draft was a success.

Lake McClure, of Charleston, has been spending a few days with his parents, Mr. and Mrs. Wm. McClure.

Mr. and Mrs. Ross Haddix and lit tle daughter Ardell, have returned to their home at Mill Creek, after spend ing the past two weeks at the home of E B. VanReenan.

Mrs. Guy Faulknier of Marlinton, spent the week end with Mrs. Jake Sharp.

E. B. Var Reenan and family were visiting at the home of Ed Cogar at Campbelltewn, recently.

John Wes Irvine was up at Big Run Sunday to see his sister, Mrs. Mary Dominick.

Mrs Joe Woods of Mill Creek, is visiting her daughter, Mrs E. B. VanReenan.

Mr and Mrs Ira Fortune and Rev. Hogsett of Millpoint, were visitors at Wallace Dilley's, Sunday.

Altoona, Penn. Augustt.—Miss Alvirgia Darnell Hill, who has been very ill in a hospital in Philadelphia, is able to return to her home in Perth Amboy, New Jersey.

Born, to Mr. and Mrs. Samuel Barlow, of Dunmore, August 6 a son.

Dynamite Placed Under Dago Shanty Explodes with Awful Effect.

Last Monday night at 1:12 a. m., eight Italian laborers were killed by an explosion of dynamite under their camp at Dunlevie a new town on the East Branch of Greenbrier River in the Upper End of Pocahontas County, three miles above Bartow.

All that is known certainly concerning the terrible catastrophe is that the shanty in which ten Italians lived was blown up with a charge that must have contained a hundred sticks of dynamite.

Not only was the house blown into small particles but a hole was left in the ground ten feet long, 6 feet wide and three feet deep.

The Italians were employed on the lumber railway being built by E. V. Dunlevie, of New York City. He has purchased the Davis timber tract and was building a road to connect with the C. & O. extension. He is putting in large works to operate a $200,000 tract of timber.

There are two theories connected with the explosion. The generally accepted one is that it was murder caused by the feeling that exists in some quarters against the importation of Italian labor into this county. That such feeling exists is indicated by the attack on the Italian camp near Glady two weeks ago which seemed to be caused purely by race prejudice.

Also by an attempt that was made some weeks ago to blow up an Italian shanty on Cheat Mountain. In this instance ten sticks of dynamite were placed under the camp and a fuse thirty-five feet long attached to it. When discovered there was evidence that fuse had been fired and had become extinguished within a few inches of the deto-

eight Austrian laborers were killed by dynamite while eating a lunch around a fire thawing out frozen sticks of dynamite.

An inquest was held by Justice Oliver which rendered a verdict of death from an explosion at the hands of parties unknown. The jury was composed of C. O. Arbogast, foreman, Markwood Herold, T. H. Rollins, A. J. Porter, John Rhodes, A. N. Canard.

The shanty was the old school house a building 12 feet square.

The explosion was from one edge of the building exerting the force toward the river, not a particle of the building was left standing. Nearly all the men had their brains blown out.

Three bodies were found seventy-five feet from the house. Two men and two boys were blown seventy-five yards into and across the river. A ten year old boy was blown across the river and found on a large rock, without a bone broken in his body.

Another man was blown to pieces all that was found was his legs in about 100 yards away in Granville Keller's front yard.

The list of the dead are as follows:

JAS. LUCA,
JOS. RACBELO,
ANTONIA LAMARO.
JOS. SOLDONIRA,
BASTINO SOLDONIRA,
PASQUALE SOLDONIRA,
SALVITORE ———
FRANK STELLO.

The bodies were buried on A. M. V. Arbogast's farm about 100 yards from the scene of the explosion.

Editor R. A. Kramer went to Dunlevie Tuesday and very kindly furnished us the details.

Nobody reached the scene until daylight. No money was found until 4 p. m., when a pair of pants were found containing $252 in currency and about $56 in checks.

women and children, besides the crew. They had been [illegible] Lerrick on Williams River and were returning home.

When the engineer deserted the engine, all jumped off the [illegible] with the exception of [illegible] Reynolds, who set the brakes and eventually stopped the train. He exhibited nerve of a high order, crawling from car to car on his stomach. When he reached the engine he did not know what to do, but fumbled with the levers and valves until he closed the throttle and reversed the engine.

All who jumped were more or less injured. The most seriously hurt was Clarence McCully, aged 9, who was thrown from the car by his father. His head struck a stone and he sustained a fracture of the skull, concussion of the brain and a broken arm. Dr. Guilford rendered prompt and skilful attention and the chances for his ultimate recovery are [illegible]

The other injured were Mrs. McCully, bruised back.

Letitia Robb, aged 15, bruised back and head.

Mrs. Wallace Humphries, bruised arm and cut on head.

Myrtle Pogue, bruised face and head.

Mrs. E. H. Gilmore bruised body.

BREAKDOWN

Big Log Goes Amuck in the Mill at Campbelltown.

The big band mill at Campbelltown has shut down to repair the damage caused by a big log smashing through the mill Tuesday evening. A big crooked log was brought up from the pond by the endless chain arrangement, but it missed the carriage, and instead being caught and held by the "nigger," struck that guide and was upended and burst through the filing room above, breaking saws and smashing a

series of special services at the Huntersville Presbyterian church on Sunday, August 26 Preaching every night for two weeks. The public generally is invited.

There will be a song service at the Fair Ground Sunday afternoon, beginning promptly at two o'clock. An address by some public speaker is also expected As it is not possible to supply a crowd with book, the people are asked to bring a song book of some kind with them A C. Barlow, county chairman of the community song service, will be in charge All leaders and singers and the public is invited to this song service.

By order of the Committee.

A Community Supper will be held at Union Central Church Suturday evening, August 18th. Proceeds for church. Everybody invited.

Mrs. Oley Jackson.

$200,000 tract of timber.

There are two theories connected with the explosion. The generally accepted one is that it was murder caused by the feeling that exists in some quarters against the importation of Italian labor into this county. That such feeling exists is indicated by the attack on the Italian camp near Glady two weeks ago which seemed to be caused purely by race prejudice.

Also by an attempt that was made some weeks ago to blow up an Italian shanty on Cheat Mountain. In this instance ten sticks of dynamite were placed under the camp and a fuse thirty-five feet long attached to it. When discovered there was evidence that fuse had been fired and had become extinguished within a few inches of the detonator.

Another theory which seems more plausible is that the killing was accidental. Those familiar with this class of labor say that nothing is more common than for Italian laborers to abstract from the supplies of dynamite furnished by the contractors and hoard under the floors of their camps until they can sell the supply accumulated. They also use it for killing fish.

The explosion occurred on the night of the 14th on the eve of the feast day commemorating the Ascension of the Virgin Mary. This is one of the great days of the year with the Italians and much beer had been imported to celebrate the day. Some think that on this occasion that they had been drinking beer and that

They also use it for killing fish.

The explosion occurred on the night of the 14th on the eve of the feast day coommenmorating the Ascension of the Virgin Mary. This is one of the great days of the year with the Italians and much beer had been imported to celebrate the day. Some think that on this occasion that they had been drinking beer and that after they had become hilarious some member of the gang who did not know that there was any dynamite under the camp shot through the floor in exurberance of spirits and caused the explosion. The fact that such a great quantity of dynamite exploded lends color to this theory.

Suicide Near Durbin.

Last Tuesday an unkdown man was killed above Durbin by a freight train on the C. & I. Railroad. He was observed standing on the track and after repeated signals failed to get off. With much difficulty the train was stopped and it was seem that he did not intend to get off. The train men went forward and pulled him off the track and started the train. As the train passed him he threw himself under the train and received a severe blow on the head fracturing the skull and from which he died in the Elkins hospital that night.

Fatal Accident at Fishing Hawk.

One of the employees of the Coketon Lumber Company at Fishing Hawk was killed on Monday the day of so many fatalities in this county. He was braking out a load of lumber on a car and lost control of the brake. As he was trying to brake the car which had attained great speed he fell from the car in front of it and was run over by the train.

The Big Snow!

The twenty inch snow of last Monday, December 11, and the snow of almost every day since are preserving for another generation the traditional hard winters of every man's childhood.

There have been other twenty inch snows in my recollection, but this one seems to have tied things up more completely than any of the others. First there was the unusually heavy fall on Monday. Then came the wind on Tuesday, piling up the snow in great drifts. The road people did their utmost to keep the high ways open, but the machinery available was just too light for the work. It was bulldozer work and bulldozers are few.

Schools were closed on Monday and will not open again until Monday, January 1st.

The first bus on the Clarksburg -Bluefield run made it into Marlinton on Monday December 18.

The first gasoline tank truck in a week also made it here on Monday. A week's supply of Charleston Gazettes were delivered in this town in bundles to carrier patrons.

A young lady, who works in Baltimore, came to spend a surprise week-end with her widowed mother, who lives about ten miles west of Marlinton. She could neither go nor send word and had to return to the city without seeing or hearing from her mother.

On last Tuesday the log camps

never one as cruel and mean as this one whose snapping teeth and ill sing food keeps the boys moving rapidly and causes shrieks of peo hinged laughter on the part of the audience.

Big Timber Deal Closed

Last Friday, Robert H. Gordon, of Cumberland, Md., attorney for Wilmoth & McCullough, and W. A. Beatton, of this place, attorney for M. P. Bock Lumber Company and the Pocahontas Railroad Company, closed a deal at this place whereby Wilmoth & McCullough purchased all the stock of the Pocahontas Railroad Company. The total consideration was $230,000. Negotiations for this sale have been pending for some time.

By this purchase Henry J. Wilmoth, of Meyersdale, Pa., and John W. McCullough, of Friendsville, Md., obtain one of the best lumber plants in this county, now in operation at Boyer, including all stock on hands, store goods, and so forth as well as the ownership of the Pocahontas railroad which extends from the C. & O. to the timber and plant of the lumber company at Boyer.

February 22, 1906

The plant and entire holdings of the Thornwood Lumber Company sold by the Special Receivers, Messrs. Cunningham and Fling, on Wednesday, was bid in by W

BIG FIRE

Marlinton suffered a ... disastrous fire early Sunday morning when the big stores of H. Kelmenson and A. Klein were destroyed. The fire was first discovered in a warehouse in the rear of H. Kelmenson's store about two o'clock. It was so far advanced that Mr. Kelmenson, sleeping in his apartment over the store, was pretty well overcome by the smoke and had to be assisted from the building.

The fire department responded promptly, but the best that could be done was to prevent the fire spreading to adjoining buildings. The wall of the brick building of the Bank of Marlinton was damaged somewhat from the intense heat.

Three large store-rooms with living apartments on the second floor were burned down. The store occupied by H. Kelmenson belonged to Mrs. Bertie Hunter Traynham, of Sweet Chalybeate. Her loss was partially covered by $1750 insurance. The adjoining store room was owned by Hunter & Echols; their insurance was $2000. This and the larger building owned by the bank of Marlinton was occupied by the department store of A. Klein; the loss here is partly covered by $4200 on the building and $300 on the fixtures.

The stores were two of the largest and best in Marlinton. Spring stocks were being received. Mr. Kelmenson had $17,000 insurance and Mr. Klein

Relief From Curse of Constipation

A Battle Creek physician says, "Constipation is responsible for more misery than any other cause."

But immediate relief has been found. A tablet called Rexall Orderlies has been discovered. This tablet attracts water from the system into the lazy, dry, evacuating bowel called the colon. The water loosens the dry food waste and causes a gentle, thorough, natural movement without forming a habit or ever increasing the dose.

Stop suffering from constipation. Chew a Rexall Orderlie at night. Next day bright. Get 24 for 25c today at the nearest Rexall Drug Store.

DROOP

Hills, blue and silent
Behind this old battleground;
Hills that once rang with cries of dying men,
And with the gun's resound.

Once on this cool mountain slope,
Where grasses green, and trees now wave,
Brothers were enemies, friends were foes,
Who now sleep here in one great, silent grave.

Dusk—falling o'er the battle field.
Shadows lengthening o'er the hill-tops, night—
Sleep on, oh gallant men, both blue and gray,
You gave your all for what you thought was right.

Louise McNeill, 17 years of age

This writer attended the song service at the Park on Droop Mountain Sunday, August 5 and enjoyed same. Quite a few persons were in attendance. Some good music led by Mor-

sold by the Special Receivers, Messrs. Cunningham and Fling, on Wednesday, was bid in by W. S. Linderman, vice president of the Duquesne National Bank, of Pittsburg, for $85,000, the purchaser assuming the liens against the property. This is one of lhe large operations on the Greenbrier. At present there is about seven million feet of lumber on the yard.

and best in Marlinton. Spring stocks were being received. Mr. Kelmenson had $17,000 insurance and Mr. Klein $13,500. In addition, Mr. Kelmenson lost ten or twelve tons of wool, which he had stored in his ware room.

The property loss can easily go to $70,000 or better, with about sixty per cent coverage by insurance.

REUNION OF THE BRILL FAMILY

An all day meeting in the nature of a memorial service was advertised and held at Shiloh church, fifteen miles northwest of Wardensville, last Sunday, and Rev J. W. Brill, who formerly resided in that section of Hampshire County, and who is well known to our people, having served the United Brethren congregations of Smith's Creek, Dry Run and North Fork several years ago, and is now stationed at Singers Glen, Virginia, was invited to return and take part in the services.

Mr. Brill wrote to several members of his family suggesting it would be nice for them all to meet there near the old home and as a result the entire family, with the exception of one son, who is a minister in Colorado, adopted the suggestion and joined in the splendid services that were held.

Three daughters and three sons, with members of their families, were present as follows, Mr. and Mrs. S. J. Rexrode, of Marlinton; Mr. and Mrs W. L. Davis, formerly of Franklin, but now of Marlinton; Mrs. Jetson Crider, of Elkton; Mr Ira Brill, two daughters and a friend, Miss Clara Bush, of Marlinton, Mr W. O. Brill, wife and two sons of Elkton, and Mr. and Mrs. Floyd Brill of Lewisburg.

All members of the family are known as church workers and one of the striking features of the occasion was the splendid vocal music they rendered and which, along with the timely sermon and spiritual talks of Mr. Brill, as well as the very excellent speech of Mr. Ira Brill added greatly to the occasion.

Rev W. P Good and Rev. Mr. Anderson, ministers of the community, were in charge of the meeting, and Judge G. K. Kump and Senator H H Hiner both made adresses.—Pendleton Times.

BEE ASSOCIATION WILL MEET

Editor Pocahontas Times:

The West Virginia State Beekeepers Association will hold its annual meeting at Ronceverte on August 22. The officers are preparing a very interesting and instructive program.

We will greatly appreciate the favor if you will make a note of this in the next issue of your paper.

Sincerely yours,
T. K. Massie, Vice pres

BEE STINGS

Kansas City, Mo.—For some years it had been maintained by the oldest resident of Olathe, Kansas, that nothing was quite so effective for rheumatism as bee stings. Of course the younger generation scoffed at this remedy and suggested medicine and trips to health resorts.

However, F. B. Haskin, President of the Patrons Bank and Secretary of the State Grange, had suffered for six weeks enough rheumatism to test all of the accepted good luck charms—a potato, jackrabbit ears and snake rattles. The bee sting was at least different, and although he did not class himself as a believer, when his son called to him that bees were swarming on his farm, he hobbled out.

With a turkey wing he attempted to "hive" the swarm. The medically inclined bees believed he had come for treatment. They stung him twice on the face, once on the arm, once on the back and once elsewhere. The day after his experience Mr. Haskin attached this note to the hive:

"Since taking your Little Buzzer Sure Cure Treatment I have been completely relieved from my rheumatism. I may not be a new man but I certainly am a repaired one. I recommend your treatments to all who have hardihood, fortitude and rheumatism. The marks of the five stings have all but cleared away. Little Buzzers do the work."—New York Times.

LEE BURNER KILLED

In a Runaway at Durbin on Last Monday.

Lee Burner, a much respected citizen of Travelers Repose vicinity was killed at Durbin Monday, by being thrown from his buggy. He and his daughter Maud had driven to Durbin, and he was holding his horse opposite the depot when the train pulled in. The horse frightened at the train and started to run, threw Mr. Burner from the buggy, injuring him about the head and hips. He never recovered consciousness and died in about two hours.

Mr. Burner was in his 69th year, and leaves a wife and thirteen children. His daughter Mrs Grant Johnson lives near Marlinton. He was a consistant member of the Methodist church and a brave Confederate soldier.

and Judge G. K. Kump and Senator B H Hiner both made adreesses — Pendleton Times.

GENTRY BROS. CIRCUS

With the arrival here this week of J. C. Admire, contracting agent of the Gentry Bros. Circus, preparations were actively started for the showing of this big Circus in Marlinton on Monday, September 3rd Mr. Admire is traveling about one month in advance of the show and will be followed by scores of advertising men in the near future

The Gentry Bros Circus, now on its 41st annual tour, is said to be presenting a program of merit this season. Always known for its high class, clean and thrilling performances the Gentry Bros. Circus has added new features this season that will give this circus a predominant position in the circus world.

Although most of the big circuses have discarded the traditional noon day parade the Gentry Bros. Circus still retains this supurb feature, Mr. Admire stated Leaving the show grounds promptly at 11 a. m. the gorgeous pageant will wend its way over the principal streets. This will be one of the big features of the holi day for the circus loving public.

Among the big features in the stupendous program will be the Dare Devil Pacheco troupe of six, direct from Argentina, on their first tour of America; the famous Davenport family of riders; the O'neal Trio, intrepid gymnasts; the Perez LaFlor troupe of aerialists; Arthur Borella, the world's highest salaried clown and 30 assisting famous funsters; the Cottrell-Powell troupe of equestrian artists; Royal Koban troupe of Japanese acrobats and thrilling ground tumblers; Prof. John Griffin's Military band of 28 musicians; Miss Jane Ilinton one of the greatest girl bare back riders the world has ever known the six Nevvarros; Tommy and Peggy Holman, wire walkers; in addition the big show is augmented with the Gentry Bros. Wild Animal exhibition hundreds of wild animals lions, leopards, tigers, pumas, jaguers, elephants, monkeys, etc. will constitute that department.

Performances will be given at 2 and 8 p. m. The doors to the Gentry Bros. menagerie will be opened an hour earlier.

commend your treatments to all who have hardihood, fortitude and rheumatism. The marks of the five stings have all but cleared away. Little Bezzers do the work."—New York Times.

BREAKDOWN

Big Log Goes Amuck in the Mill at Campbeltown.

The big band mill at Campbeltown has shut down to repair the damage caused by a big log smashing through the mill Tuesday evening. A big crooked log was brought up from the pond by the endless chain arrangement, but it missed the carriage, and, instead being caught and held by the "nigger," struck that gripper and was upended and hurled through the filing room above, breaking saws and smashing a lot of fine machinery. Providentially no one was hurt. The damage is estimated at $5,000. Repairs will occasion a four week's shut down.

Investigators hope clay model leads to identification of body

by Pamela Pritt

The Greenbrier County Prosecuting Attorney's office has released pictures of a clay model they hope resembles one of three female homicide victims found in the area in the last three years.

Kevin Hanson said Thursday he hoped widespread regional publicity would aid investigators in identifying the body found at Alta last year.

Forensic anthropologists at the Smithsonian Institute found this data from the skeletal remains:

- Age 37-47
- White female
- Borne at least one child
- May be left-handed
- Approximately 5 feet tall
- Quality professional dental care
- May have been a smoker
- Probably been deceased since May, 1998—three years before the body was discovered
- Chip in the lower tooth was present during her life

The media release said her eye and hair color were unknown.

Hanson said that there is no known connection between the three women.

"Right now we don't have any evidence to relate any of them," Hanson said. "It obviously raises suspicion."

The most recent body, found at Hart's Run last month, and the body found at Alta last year were both found off I-64 exits in illegal trash dumps.

Two years ago, a woman's body was found on Cold Knob, a remote area of Greenbrier County.

The homicides all bear one striking similarity.

"We don't have a clue who any of them are," Hanson said.

Investigators have run each woman's available description through NCIC (National Crime Information Center) to no avail.

"Maybe they haven't been reported missing," Hanson speculated.

The prosecutor said investigators "don't have any real way of knowing" whether the women were killed where they were found or at some other location. Hanson said that information was tied to the causes of death, which investigators know in the Cold Knob and Alta Mountain cases, but are not releasing.

The prosecutor said he believes the clay model is 70-80% accurate in likeness to the victim found at Alta.

Information on the identity of the victim or any other information concerning this body or crime may be sent to the West Virginia State Police, Lewisburg Detachment, at 304-647-7600.

INVESTIGATORS SAY THE victim's lower tooth was chipped while she was alive.

TERRIBLE EXPLOSION.

KILLS EIHGT ITALIAN LABORERS AT DUNLEVIE.

Dynamite Placed Under Dago Shanty Explodes with Awful Effect.

Last Monday night at 1:12 a. m., eight Italian laborers were killed by an explosion of dynamite under their camp at Dunlevie a new town on the East Branch of Greenbrier River in the Upper End of Pocahontas County, three miles above Bartow.

All that is known certainly concerning the terrible catastrophe is that the shanty in which ten Italians lived was blown up with a charge that must have contained a hundred sticks of dynamite.

ten Italians lived was blown up with a charge that must have contained a hundred sticks of dynamite.

Not only was the house blown into small particles but a hole was left in the ground ten feet long, 6 feet wide and three feet deep.

The Italians were employed on the lumber railway being built by E. V. Dunlevie, of New York City. He has purchased the Davis timber tract and was building a road to connect with the C. & O. extension. He is putting in large works to operate a $200,000 tract of timber.

There are two theories connected with the explosion. The generally accepted one is that it was murder caused by the feeling that exists in some quarters against the importation of Italian labor into this county. That such feeling exists is indicated by the at-

hoist them into position. A trolley was rigged from the valley up the mountainside and by this means the concrete sections of canal lining molded down below, were hoisted in to place.

Radium in All Springs

Not only is there radium in spring water, but all spring water is radio active to some degree, reports W. D Collins of the United States geological survey. After three days, however the water loses half of its radio-active "kick," and in thirty days practically none remains. At all times, the quantity of radium in the water is so smal that only the most delicate tests enable chemists to detect its presence In order to have any effect on the human body it would be necessary to drink at least 400 quarts a day.—Popular Science Monthly.

No end in sight to BOE hearings

by Pamela Prim

Hours of negotiation and testimony led to a conclusion Friday when a three-judge panel heard the initial complaints of Norman Lee Alderman, who has alleged that three board of education members and the superintendent of schools are not eligible to serve in their elected and appointed positions.

Alderman, the data management facilitator at the board office in Marlinton, claimed that board president Kermit Friel and members Kenneth Vance and Ruth Taylor all have other public offices or capacities in which they serve and are thus not legally sitting on the board of education.

He also claims Dr. James Phares, Pocahontas County Superintendent of Schools, is not a resident of Pocahontas County, and therefore is not legitimately hired by the BOE.

Alderman is asking the panel to interpret the West Virginia Code that states "No member or member-elect of any board shall be eligible for nomination, election or appointment to any public office..."

Friel sits on both the Board of Public Health and the three member County-wide Public Service District board.

Vance is a part-time field data collector for the Pocahontas County Assessor's Office.

Taylor was once a member of the Mountain Resource Conservation Development Board, but has said she tendered a verbal resignation in 1996.

A Fayette County case decided this year by Hatcher removed two board of education members who were serving on public service district boards.

Phares, who was living in Bedford, Virginia, when he was hired, now lives in Slaty Fork. His wife and son reside in Elkins.

Judges John Hatcher, Ed Eaglos-ki, and Jennifer Bailey Walker urged attorneys and Alderman and compatriot Jerome Heinemann to spend some time and effort agreeing to some of the issues at hand, thus saving the court some time.

Hatcher assured the parties that the facts in the case could be "easily reduced to written stipulations."

After nearly 40 minutes, the attorneys, Alderman and Heinemann emerged from the jury room to declare that no such time-saving stipulations would be forthcoming.

Phares, Friel and Vance all took the stand during the afternoon.

Phares testified that he is a resident of Slaty Fork, although he visits his wife and son in Elkins on weekends.

"The general rule is I sleep in Slaty Fork on Sunday, Monday, Tuesday, Wednesday and Thursday," Phares said. "I sleep in Elkins on Friday and Saturday."

The superintendent said there were some, but few, variations to that rule depending on schedule and weather. He noted that the reason he returns to Slaty Fork on Sunday evening is so that he is available to make decisions about school closings during inclement weather.

Phares said he does not have call forwarding. He also testified that he is neither divorced nor separated from his wife.

Phares has been Superintendent of Schools since December, 1998.

The board president said that his appointment to the Board of Health occurred in 1991 during his first term on the BOE.

Alderman was the Southern District Representative on the Pocahontas County Commission at the time and moved for Friel's appointment to that board. Friel receives no pay for his service on the Board of Health.

Friel testified that he attends regular meetings of the PSD for a stipend of $50 per meeting. He was appointed to the PSD 18 months ago, he said.

"I volunteer my time in Pocahontas County," Friel said. "I believe we're obligated to do that as a citizen."

Friel said he had visited Phares' Slaty Fork home.

Former PCHS principal Kenneth Vance, now in his second term on the BOE, testified that he has taken no oath in order to serve in the assessor's office.

"I wasn't asked to give one," he noted.

Vance said he collected dog tax money from county residents and initials a data form for deputy assessors in the office.

He testified that he didn't know the difference between a data collector and a deputy assessor.

Vance was principal at PCHS when Alderman taught there.

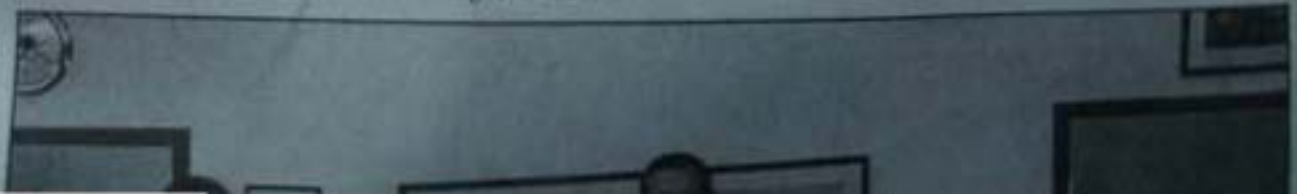
Although both sides had called nearly 25 witnesses between them, Alderman said he would question only one more witness. Defense attorneys said they would each call three witnesses.

About a dozen people were sequestered Friday afternoon for several hours.

The hearing will continue at 8:30 a.m. on November 11, a legal, but non-judicial holiday.

...

...ators hope clay model ...identification of body



erally accepted one is that it was murder caused by the feeling that exists in some quarters against the importation of Italian labor into this county. That such feeling exists is indicated by the attack on the Italian camp near Glady two weeks ago which seemed to be caused purely by race prejudice.

Also by an attempt that was made some weeks ago to blow up an Italian shanty on Cheat Mountaian. In this instance ten sticks of dynamite were placed under the camp and a fuse thirty-five feet long attached to it. When discovered there was evidence that fuse had been fired and had become extinguished within a few inches of the detonator.

Another theory which seems

CRANBERRY

This once upon a time was early in the fall. The trees were decked in all the splendor of autumn colors The shadows of the evening lengthened over the valley of Cranberry. As the shades of night settled over the earth, a ruddy glow brightened the sky above the mountain Soon it looked as if a great conflagration was devastating the country back and below. Presently the firey disc if the full moon climbed higher and higher into the sky First the long shadows of trees and mountains were cast over the valley, and then the long rays of light were cast over the beautiful lake which nestled in the mountains. The waters glowed like a mass of moulton silver amid the black setting of mountains clothed with the dark evergreen of spruce and hemlock.

The quiet of night was broken by a party of barred owls that hooted and sawed and laughed with and to each other A panther screamed from the Black Mountain. The browsing deer stood motionless, for death itself stalked abroad for some of their number. A beaver splashed his warning call to his mate. The law of the jungle prevailed—those took who had the power, and those kept who could

A geological period has passed. The full moon is again above the crest of the Cranberry Mountain. Its beams and shadows are again cast across the valley. But the silvery bosom of the lake no longer gleams amid the mountains Change has taken place. In t

Candidate for County Commission

Hello! I'm John Simmons. When you elected me as one of your Commissioners four years ago I promised to do two things. First, to reform the way the Commission was operated. Second, to help strengthen the county's economy. In four years we've made real progress on both fronts.

Remember when the Commission worked in secret, ignored the people and raised such a ruckus of bickering and back-stabbing that Pocahontas County was laughed at by our neighbors. Those days are gone.

With the support and coopera-

our unemployment

within a few inches of the detonator.

Another theory which seems more plausible is that the killing was accidental. Those familiar with this class of labor say that nothing is more common than for Italian laborers to abstract from the supplies of dynamite furnished by the contractors and hoard under the floors of their camps until they can sell the supply accumulated. They also use it for killing fish.

The explosion occurred on the night of the 14th on the eve of the feast day coommenmorating the Ascension of the Virgin Mary. This is one of the great days of the year with the Italians and much beer had been imported to celebrate the day. Some think

taken place. In these thousands of years, the lake has been partly filled —erosion, transportaion and deposit. Water plants gradually covered the surface of the water. The quaking glade was just beginning its life.

Year followed year. Young glades became old glades. Plant succession showed tendency toward higher degree of hydrophytism.* Alder established itself on the borders of glade, and gradually working toward dominant association until the present condition has developed Still a quaking bog, but with islands of more or less solid ground The forest encroaching—slowly, surely. An inch a year? A hand's breath in a century? It makes no difference. the forest comes.

First the lake; now the bog; next the forest.

"Thus times do shift—each thing his turn does hold:
New things succeed as former things grow old."

W. S

*This word buffaloed your editor all right. The dictionary says that a hydrophyte is a plant which grows in water of saturated soil.

by our neighbors. Those days are gone.

With the support and cooperation of my fellow Commissioners, Joel Callison and Reta Griffith, the Commission is now operated like a professional business. After all, don't the taxpayers deserve professional, experienced Commissioners? Isn't that the way that tax money should be managed?

Sure, there are times when we don't agree on every issue. But we know how to disagree and we respect each other. More importantly, we now treat the citizens who appear before us with the respect they deserve. Now the people, not special interest, have the greatest influence on county policy.

On the economy, we've replaced hollow promises with solid progress. There are now three industrial parks being formed in Edray, Green Bank and Frank. We are close to solving and completing one of the most expensive problems in the county—the clean up of the lime sludge at the East Fork Park. When I was given the responsibility to help oversee the cleanup things looked grim. Engineers estimated that the clean-up would cost well over a million dollars. Money we did not have. I've worked hundreds of hours on

The explosion occurred on the night of the 14th on the eve of the feast day coommenmorating the Ascension of the Virgin Mary. This is one of the great days of the year with the Italians and much beer had been imported to celebrate the day. Some think that on this occasion that they had been drinking beer and that after they had become hilarious some member of the gang who did not know that there was any dynamite under the camp shot through the floor in exurberance of spirits and caused the explosion. The fact that such a great quantity of dynamite exploded lends color to this theory.

on the 14th day of August, 1928.

Given under my hand this 14th day of August, 1928.

G. M. Brice, Mayor of the Municipality of Cass, W. Va.

HOSPITAL NOTES

Rev. K. V. Bowen, the much loved minister of the Presbyterian Church, of Marlinton is improving after an operation last week.

Mrs. Paul Mason, formerly Miss Katherine Clark, and young son, are getting along splendidly.

Mrs. Sam, Barlow, of Dunmore formerly Miss Mary Margaret Price, became the mother of a son August 8th. Mother and son are very comfortable.

Mrs. Emily Wells, of Beard, continues to improve after an operation for Gall-stones.

Miss Hazel White of Minnehaha Springs, was admitted to the hospital August 10th, very sick with fever, she is some better today, Wednesday.

Mr. Floyd Meadows who has been in the hospital for several weeks with fracture of the left leg, is allowed to get up on crutches, and go home Friday.

Miss Mea Waugh, of Hillsboro, who underwent a serious abdominal operation is improving nicely.

Miss Lillian Hannah, of Edray, underwent an abdominal operation, Monday. Her condition is satisfactory.

Sheridan Moatz, of Cass, who was sent to the State prison for eight years for robbery of the Postoffice at Raywood, was admitted to the hospital suffering with heart complications, his physical condition made it necessary for him to be removed fro mPrison, for medical attention.

Mr. Lanty Hogsett of Marlinton, is able to sit up in chair.

CONTRACT LET FOR COVING

The contract for on

cleanup will be finished and we now have a great location for new businesses. Two are already operating on site and others are in the works. Those are real businesses with real jobs.

And we've done the job for a half million dollars less than the estimate! When's the last time you've heard of a government project being completed for less than two thirds of the estimate? Good county government doesn't just happen. It takes concerned citizens and a lot of dedication and hard work by the Commissioners and by everyone in public service.

Being an effective commissioner demands a lot more than most people realize. Over the past four years, I've studied budgets, the state code and countless other laws that shape our operations and I've attended many other very useful training sessions. It is clear that the more someone knows about

Prosecuting Attorney McNeill went up to the scene Tuesday to investigate the matter.

Not a man in the house escaped.

It is near the scene of the explosion several years ago when eight Austrian laborers were killed by dynamite while eating a lunch around a fire thawing out frozen sticks of dynamite.

An inquest was held by Justice Oliver which rendered a verdict of death from an explosion at the hands of parties unknown. The jury was composed of C. O. Arbogast, foreman, Markwood Herold, T. H. Rollins, A. J. Porter, John Rhodes, A. N. Canard.

The shanty was the old school house a building 12 feet square.

The explosion was from one edge of the building exerting the

its poles, conduits, cables, wires and fixtures.

The Community Song Service at Linwood was attended by a large crowd on last Sunday evening. The County Chairman, Mr. A. C. Barlow, was present and organized a class at that place. County Agent, Mr. Miller, and O. W. Kellison, the Edray District Committeeman were present also, while Mr. S. B. Moore, of Edray with a number of other leaders were present.

WANTED—A lady between the age of 35 and 50 years. To help 5 motherless girls between the ages of

these complex subjects the more effective he or she can be as a commissioner. To think that a new commissioner with no experience and no training could do the same job just does not make sense. A novice commissioner would have to start from scratch. This would certainly slow the forward movement of the Commission and the whole county.

Another thing that does not make much sense is trying to insert "party politics" into local matters. In our county, it's the individual that matters, not the national party.

In summary, I think you'll agree that county government is a lot better than it was four years ago. And we've just begun to make progress in a number of important areas.

I learned a long time ago that "if it ain't broke, don't fix it." Right now the commission is working better than it has in a long

hands of parties unknown. The jury was composed of C. O. Arbogast, foreman, Markwood Herold, T. H. Rollins, A. J. Porter, John Rhodes, A. N. Canard.

The shanty was the old school house a building 12 feet square.

The explosion was from one edge of the building exerting the force toward the river, not a particle of the building was left standing. Nearly all the men had their brains blown out.

Three bodies were found seventy-five feet from the house. Two men and two boys were blown seventy-five yards into and across the river. A ten year old boy was blown across the river and found on a large rock, without a bone broken in his body.

Another man was blown to pieces all that was found was his legs in about 100 yards away in Granville Keller's front yard.

The list of the dead are as follows:

Committee.

CONTRACT LET FOR COVINGTON PLANT

The contract for one unity of the new rayon plant at Covington, Va., has been let to the Fiske-Carter Construction Company, of Worchester, Mass., and construction will begin immediately, it was announced recently. It is hoped to have the unit completed by spring. It is claimed that more than 2000 people will be employed in the one unit.

---

ago. And we've just begun to make progress in a number of important areas.

I learned a long time ago that "if it ain't broke, don't fix it." Right now the commission is working better than it has in a long time. This is no time to fix something that "ain't broke." In the past four years, I've had the chance to see how we compare with other counties and found that we are better off than many. For example, our unemployment rate is lower than many counties. The main reason is our involved citizens and our present commissioners' willingness to serve the people's interest.

I will be honored if you reelect me to the County Commission. If you do I will work hard to keep us moving at all levels. Above all, no matter who you vote for, please get out and vote for your choice. A lot of folks in the world wish they had our opportunity. Thank you and may God bless us all.

John R. Simmons

Another man was blown to pieces all that was found was his legs in about 100 yards away in Granville Keller's front yard.

Marlinton, West Virginia

MRS. FANNIE E. GREATHOUSE

Durbin and Bartow lost a valuable and influential member of the community in the death of Mrs. Fannie E. Greathouse on July 24, 1928.

Mrs. Greathouse had not enjoyed good health for several months, but in June she became seriously ill. She was taken to the University of Virginia Hospital where her daughter, Miss Hazel, had recently graduated as a trained nurse. Everything that medical skill and constant care could do to allay her suffering and for her recovery was done, but her condition gradually grew worse. On July 24th, surrounded by the members of her family, the end came.

Mrs. Greathouse was born in Virginia, February 13, 1874. On July 7, 1891, she was united in marriage to C. M. Greathouse. To this union were born five children.

Religious from childhood, she was devoted and consecrated. She seemed to have a premonition of the nearness of the end but she did not falter Her trust in her Savior was firm and strong.

She was consistent and loyal in home life, in social relationships, and in church worship and service. For several years she was teacher of the Bible class in her Sunday school. Her exposition of the lesson was enriched by the testimony she always bore of her own definite Christian experience. Her modest but true and practical devotion to Christ and his cause was an outstanding characteristic of her life. In all manner of service she was diligent and faithful The influence of her life will abide through the years.

She leaves to mourn her loss three daughters, Mrs. Vera McCrawley, Miss Mary and Miss Hazel and one son Guy. She has one living sister, Mrs. Susie Nottingham of Beyer, and four brothers, Lanty Ryder of Greenbank; Robert Ryder, of Huntersville; Daniel Ryder of [illegible]

The many beautiful floral tributes was an evidence of the deep affection in which she was held by all who knew her. S.

Tour, WV Pre-Schools Tour, Rape and Domestic Violence Center benefits, and the Pocahontas County Sheriff's Department benefit for the Needy Children's Christmas Fund.

Currently Kimberly is a widow and single parent raising two small children. When she moved back to Pocahontas County she was confronted, on a personal level, with more 'violence, crime, and trouble' here than ever while living and travelling all over the world. She realized a big change was needed in her hometown if she and her children were going to survive. As a result of her late husband's involvement in the 'timber-business,' her interest in politics stemmed from what she learned of the inner-workings of the 'good-old-boy' system which is still in place in many areas of WV, particularly in Pocahontas County. The social injustices experienced by folks taken unfair advantage of due to low-income, or from the lack of education and little knowledge of their Civil Liberties, is just as bad now as it was during the 'Coal Field Wars' in which coal Operators took unfair advantage of far too many Mountaineers!

Oil and Gas

We have received a copy of a report from the West Virginia Geological and Economic Survey on oil and gas developments in the State in 1982.

No acivity was reported in Pocahontas County in 1982 (nor has there been any to date this year).

Adjoining Randolph County, however, was one of the most active counties in the State for gas wells, with 140 completed. Nine gas wells were drilled in Webster County and six in Nicholas. None were reported in Greenbrier and Pendleton Counties.

The 1982 report classifies as an exploratory success a well drilled by Union Drill-

still in place in many areas of WV, particularly in Pocahontas County. The social injustices experienced by folks taken unfair advantage of due to low-income, or from the lack of education and little knowledge of their Civil Liberties, is just as bad now as it was during the 'Coal Field Wars' in which coal Operators took unfair advantage of far too many Mountaineers!

Kim has a well-rounded background, the knowledge, the determination, the dedication, and the courage to step forward and offer to make things better! Nothing will change for the better unless each voter decides they want a better future—this time "If you want reform—then Vote Reform!"

(Kimberly Susan Nottingham can be reached at 1-304-456-5354, or Email at wvreformparty@excite.com)

Lumber Company land on the Shavers Fork. This well was drilled to a depth of 8,555 feet into the Oriskany Formation and had an initial daily production of 531 million cubic feet. The well was actually drilled in 1981.

However, a nearby well on Forest Service land on the Shavers Fork is listed among the important exploratory failures. This well was also drilled by Union Drilling Company and went to 4,234 feet in the Benson Formation.

Another exploratory well that was considered a success was one on Mower land in Webster County, also drilled by Union. This one went to 4582 feet and had initial daily production of 289 million cubic feet.

visiting at the home of L V. Ruckman.

Miss Greta Blume and Mrs. Sylvia H. Page, members of last year's High School faculty, have returned and entered upon their duties for another year.

A. C. Barlow is the champion grower of oats so far as reported. He threshed 245 bushels of oats from three acres of ground, nearly 82 bushels to the acre. A. N. Barlow is right at his heels with 328 bushels from four and a half acres.

C. R. Rankin of Williams River, was before Squire Smith last Saturday and he drew a fine for fishing for trout out of season and fishing without a license, amounting to $27 50.

Miss Alice McClintic has gone to Charleston where she will teach in the city schools.

Durbin Line Abandonment

We have received a copy of the Chessie System's application to the State Commerce Commission seeking permission to abandon the Western Maryland Ry. line to Durbin and will pass along some of the data contained in it.

We were wrong last week in our figures on the traffic to the tannery at Frank. The figures given, 321 cars in 1981 and 263 cars in 1982, were the total traffic on the line for the year and not just the tannery business. In the first three months of this year traffic on the line consisted of 55 cars.

In 1981 the line's users were: Howes Leather Company, 234 cars; Westvaco Pulpyard, 74 cars; and miscellaneous users, 13 cars.

In 1982 the figures are: Howes, 189 cars; Westvaco 71 cars; and others, 3 cars.

The 55 cars for the first three months of this year

Come On In

THE MILEAGE IS FINE

If you really want to get low cost tire mileage, let us fix you up now with a set of new Goodyears.

Quality considered Goodyears are the lowest-cost equipment you can buy, and you will have the satisfaction of kuouing that no one gets a better tire or a better price than you do.

No "special deals," no "extra discounts," no "long trade" line of taffy here – just "The World's Greatest Tire" at as low a price as quality can be sold.

You'll save a lot—we'll make a little—and we'll both be happy. Come on in—the mileage is fine.

Howes, 189 cars; Westvaco 71 cars; and others, 3 cars.

The 55 cars for the first three months of this year were divided between Howes, 30, and Westvaco, 25.

The SM ran 44 trains to Durbin in 1981, 40 in 1982, and 11 in the first three months of 1983.

Chessie claims that the line needs rehabilitation in the amount of $1,151,320. This figure included $565,000 to replace 200 feet of the concrete liner in the tunnel near Glady.

Data is given in the application giving revenue to the Western Maryland for operating the Durbin line for 1981, 1982, and the first three months of 1983 as $167,054, $138,268, and $35,994, respectively. What are called the "avoidable costs" for operating the line for the above three periods are $202,124, $181,362, and $46,901 respectively.

Anyone interested is welcome to inspect our copy of the application.

It seems to me that I did not have a normal youth, having taken charge of a helpless and indignant family at the age of fourteen years. But there was plenty of amusement. It took the form of hunting and fishing and horses and reading. There were no cards, no theaters, no automobiles, no travel, no games. It was a pleasure and an intellectual treat to go to Sunday school and church. The boy scout had not been invented. Camping took on a sterner aspect in those days. There was a definite goal to be acquired. It was to be able to sleep under a tree in the rain the whole night through without any covering of any kind, oblivious to the rain on the face and soaking through the clothes. It seems almost incredible but the old timers could do it.

The first real expedition for trout that I ever made was in 1886, when three of us undertook to go to Williams river to fish for them in a primitive style. Three brothers, The plan was to travel light, follow the stream from its head fountain to the Deadwater, spending three days and two nights and to bring home for the family a load of mountain trout, the greatest table delicacy in the world. None of us had ever been there. We got our instructions as to distance and direction from our Uncle Jeemes We were to take to the mountain that rose from our home on the Green brier river and walk west over the

crests until we came to the waters of Gauley River. Then we were to fish down from the headwaters of Williams River, one of the four forks of the Gauley River, until we arrived at a clearing in the woods known as the Dutch Bottom. This was a deserted bit of blue grass sod. The next day we were to fish down the river to the Penick Meadows in the prehistoric lake bottom above the Dead Water or Watering Ponds, where we were to sleep out the second night. The third day we would fish in the meadows and in the dead water for a while and then fish up Big Laurel creek until we came to the Stony Creek gap and walk home. In this kind of a trip we would make a circle of about thirty miles in circumference, one half of which would be the beds of trout streams. With ordinary luck we would not only take enough trout to sustain us in the way of food but should have a substantial load of fish to bring home to insure a welcome change in the menu None of us had fished for trout but each of us belonged to a day when every boy in this county was raised to fish and to hunt, and to ride a horse.

ALLEGHENY LODGE BURNS

The County lost one of its landmark buildings this week with the total destruction of the Allegheny Lodge at Minnehaha Springs by fire.

The call to the Marlinton and Frost Fire Departments came about 11:45 p. m. on Monday. As the first fire truck entered Minnehaha Springs firemen could see that the fire had a good start on the upper floors of the building.

Firemen entered the four story structure and were making good progress in getting the blaze under control when a shortage of water allowed the fire to begin to gain the upper hand.

The firefighters first hoped to be able to supply water by arranging trucks in a line from Knapps Creek to the Lodge. However the distance was too great and water had to be obtained by sending the fire and tanker trucks to the creek to fill. The Hillsboro Fire Department sent men and a tanker truck to assist.

While firemen were making their futile effort to get the blaze under control, a number of local citizens were able to remove most of the furniture and other property and they ran to warn the two inside.

It is thought that the fire escaped from the flue on the east side of the building. The fireplace on this flue had been in use. The fire was first observed in a closet area at this flue, but must have already made headway in the attic by the time it was discovered.

No exact figure on the amount of the loss is available, but the loss will certainly exceed a half million dollars.

Firemen were on the scene until almost 5 a. m. Marlinton sent 5 pieces of equipment and 24 men, Frost sent their truck and 8 men, and Hillsboro furnished their tanker truck and 4 men. It is estimated that about 27,000 gallons of water were used.

The Lodge was built by the Allegheny Sportmens Association as their club house. The contractor was Winston Herold and the building was completed in 1913 at a cost of 120,000. In addition to the property around the Lodge, the Association owned 4400 acres as a hunting preserve. Well known is the herd of elk that was brought to the property by the Sports-

insure a welcome change in the menu None of us had fished for trout but each of us belonged to a day when every boy in this county was raised to fish and to hunt, and to ride a horse.

The expedition was in June, and was set by a heavy rain that rendered the fields too damp to work corn The mountains were at their best The green of summer time had arrived. In these confines our mountains have three sets of clothes. The sombre hue of winter; the verdure of summer; and the many colored covering of the fall. The brilliant sight that caused the French voyageurs to call them the Montagnes aux Arces, or the mountains of the rainbow, which has clung to a range of mountains known now as the Ozarks.

In preparing for this trip we took matches, some biscuit baked in the big flat cake style, some salt and a frying pan. The only fishing tackle we ad were hooks and lines. The bait was the fishing worm, the annelid of a Paleozoic world.

We were impressed with the fact that we were to cut poles and start fishing as soon as we came to the head of Williams River called Beaver Dam creek and to keep on fishing

Vice Chairman. Recently, he was re-elected to a second term and is seeing the WV Reform Party growing in popularity as more and more citizens get tired of the same faces and same broken promises from the monopoly parties!

Jerome 'Jerry' Heinemann is running for the County Commission in Pocahontas County, Northern District, because he believes that 'Reform' is necessary at the local level—and that the civil liberties and social justice of all citizens must be upheld! This time everyone can make a difference—this time: ONLY — REFORM!

(Jerry Heinemann can be reached at 1-304-456-4565 or -3282 (also fax) or Email at jerryh15@juno.com or wvreformparty@excite.com)

water by arranging trucks in a line from Knapps Creek to the Lodge. However the distance was too great and water had to be obtained by sending the fire and tanker trucks to the creek to fill. The Hillsboro Fire Department sent men and a tanker truck to assist.

While firemen were making their futile effort to get the blaze under control, a number of local citizens were able to remove most of the furniture and other items from the main (second) floor of the building.

By 1 a. m. it was obvious that it would not be possible to bring the fire under control due to the lack of water and firemen concentrated their efforts in protecting the adjoining buildings.

By 4 a. m. the once magnificent structure was nothing but a pile of burning embers, with only the foundation and the two tall chimneys remaining.

Fortunately only two people were in the building at the time of the fire. Garnie Stidham, the owner of the Lodge, was on the main floor, while Jim Lipscomb was asleep in his room on the third floor.

The fire was first observed by several men who live in one of the cabins on the

about 27,000 gallons of water were used.

The Lodge was built by the Allegheny Sportmens Association as their club house. The contractor was Winston Herold and the building was completed in 1913 at a cost of 120,000. In addition to the property around the Lodge, the Association owned 4400 acres as a hunting preserve. Well known is the herd of elk that was brought to the property by the Sportsmen's Association. A small herd is still on the property today.

After being sold by the Association in 1926, the Lodge and surrounding property has had a number of owners and a large tract was sold to the Monongahela National Forest. Mr. Stidham purchased it in 1972. He opened the Lodge for public use again only last fall and it was enjoying an increasing reputation as an ideal spot for a relaxing vacation and meeting location.

The Allegheny Lodge will be sorely missed by all those who knew of it—its employees, guests, casual visitors, and those who may have never been there but yet knew that it was a special place. Pocahontas County has suffered a big loss.

we had were hooks and lines. The bait was the fishing worm, the annelid of a Paleozoic world.

We were impressed with the fact that we were to cut poles and start fishing as soon as we came to the head of Williams River called Beaver Dam creek and to keep on fishing and easing down the river until we came to an opening in the forest formed by the Dutch Bottom. There would be a good place to build a comforting fire and to cook trout supper and breakfast and to sleep on the sod.

The Dutch Bottom was so called from the fact that certain stout hearted immigrants from Holland had been thrown by adverse fortunes on the banks of a mountain stream in a heavy spruce and hemlock forest with the gardening tools that they had brought from their intensive cultivated home fields, and had endured the hardships of an unsuitable place in the mountains long enough to have reclaimed a small field from the hostile soil, before they gave up the fight and moved to the warm, fertile fields of the Little Levels where they prospered and founded an important family in West Virginia. There are hundreds of persons who trace their ancestry to the family who attacked the great forest with their dimin-

son, Warren, who is currently a college student.

I've had diversified employment over the years, including boilermaker, merchant marine, corrections officer and laborer, but I have primarily earned my living as a subcontract house painter and/or an independent truck driver. I know what it's like to sweat for a living, to live from paycheck to paycheck and see the fruits of my labor go to banks, insurance companies and taxes. I'm running for office because I've had enough with 'slick politicians'! I believe if working West Virginians care about our common future, then "WE'RE ON OUR OWN TO FIX THINGS OURSELVES!"

Whether they call themselves Democrats or Republicans, the politicians seem inefficient and corrupt. Everyone knows they don't care about we the people, they only care about staying in office and gorging themselves on corporate bribes and kickbacks. Everyone knows it—but no one does anything about it. We just keep voting for the same 'old crooks' over and over again, re-electing the same fake smiles, the same fake hairpieces, the same fake promises!

Compare the campaign slogans of the past 25 years with the actual

cont'd. to page 7

ting, aged five years, arrived at the port of New York, with a brother, Nicholas Stulting, aged 22 years. They immediately fell into the hands of John F. Schemmerhorn, who claimed a large number of surveys in this part of Virginia, aggregating many thousands acres. He sold the family 600 acres of land on Williams River, a part of a survey made for Henry Banks of 32,300 acres. in 1797. For this 600 acres he received $500 00 The deed was made to young Cornelius, and the whole bears the appearance of a fraud on the immigrants that would have proved fatal except for the fact that this Dutch family belonged to a breed that could not be beaten. They built a log cabin at the mouth of a little run and faced it towards Black Mountain. This in the old days when it was covered with a marvelous stand of black spruce, running up to a hundred thousand feet to the acre was one of the most awe inspiring mountains on earth. At the time I speak of this little patch of grass land was our objective for the first night in camp. What happened when we boy scouts set out in search for the river over the divide was that we walked around the head of the stream and continuing on our course came to Williams River at the Dutch Bottom, not being aware that we were starting the fishing at the place we were to wind up the first day.

The stream at this place was flush from the recent rains and was a stream the width of a street. Above us a number of little streams had united to form the head of Williams River. The main one known as Beaver Dam Creek, from the fact that the early settlers had found there an

immense dam built by beavers, and the area of the pond is plain to be seen to this day. I have talked with men who remember the stumps of trees cut off by beaver at the time that the animal was common in this country.

A little run coming in at Dutch Bottom had trout in it, and I remember taking a small plump trout at the first try. The trout were scattered all over the main river. The water was slightly discolored and the day warm and bright. A trout could be taken anywhere, and without any previous exderience we commenced to pull them out from the little eddies and swirls, and it was apparent that the fish would soon become a burden.

It was just about noon when we commenced, and we edged down the stream, filling our haversecks with trout and looking for our camping place, and before night we were loaded down with fish. I have no recollection of counting that catch. We came after a while to the Red Hole

SHOOTING DEATH

Ronald Lee Martin, 39, of Lockbridge, Summers County, was killed in a shooting incident at the home of Joseph Cain in the Hill Country Friday evening. Cain, 44, was arrested and has been charged with first degree murder. He is presently in the county jail in lieu of $50,000 bond.

According to the Prosecuting Attorney's office, the shooting occurred about 9 p.m. The Sheriff's Department was notified about 9:20 by the Marlinton Rescue Squad that a request for an ambulance for a shooting victim had been received. Mr. Martin was found at the Cain home with a gunshot wound to the back. He was dead when authorities arrived. The suspected weapon is a

It was just about noon when we commenced, and we edged down the stream, filling our haversecks with trout and looking for our camping place, and before night we were loaded down with fish. I have no recollection of counting that catch. We came after a while to the Red Hole. This is the deepest water in that stretch of the river and gets its name from the exposure of the great stratas of red Mauch Chunk shale which the erosion causod by the river has uncovered at that place. The river here encircles two tall mountains, known as Big Spruce Knob and Little Spruce Knob, and hugs the foot of Black Mountain, which makes a bend.

The cutting of the timber has greatly changed the appearance of the stream. Then the big trees completely arched the water and it flowed through this green tunnel. It seemed to us that we had travelled a great distance wading the water, but in after years I found that we had

found at the Cain home with a gunshot wound to the back. He was dead when authorities arrived. The suspected weapon is a rifle.

Cain remained at the home and was arrested without incident.

The motive for the shooting is not known at this time and the investigation into the shooting continues. The body was taken to the Medical Examiner's Office in Charleston for an autopsy. The report from the Examiner's was not back at press time.

Mr. Martin and two friends had come to Cain's home earlier in the day for a weekend of hunting. At least four people were at the house at the time of the shooting. The house is located off of the Gordon Dilley Road.

Mr. Martin was a lifetime resident of Lockbridge. Survivors include his wife, five children, two stepchildren, parents, a brother, a sister, and one grandchild. Services were held on Tuesday in Rainelle with burial at Clintonville.

The cutting of the tr... ly changed the appearance of the stream. Then the big trees com pletely arched the water and it flow. ed through this green tunnel. It seemed to us that we had travelled a great distance wading the water, but in after years I found that we had not fished over a mile. The weight of the fish and the wilderness caused us to debate the question of a camp, and we chose a place where there was a great pile of driftwood near a broad patch of shingle. We eviscerated the trout and had our first experience with the black gnats that swarm and bite at dusk on those waters.

We made a good fire and the night was clear and bright and we rested tolerably well until after midnight when a colony of great barred owls gathered nearby in the trees and carried on something awful. Their loud unearthly shrieks were meant to drive the strangers out of those particular woods. I have often heard them in the spruce forests since then

ters.

We made a good fire and the night was clear and bright and we rested tolerably well until after midnight when a colony of great barred owls gathered nearby in the trees and carried on something awful. Their loud unearthly shrieks were meant to drive the strangers out of those particular woods. I have often heard them in the spruce forests since then but never before or since have I heard anything like the concert that they set up that night. They were still there when it got to be daylight and we could see them gathered in the trees about a hundred steps up stream, hopping about and screaming. These owls are the ones that have been so often mistaken for panthers on account of the terrible note. They are the most active and destructive of all the owl family and a part of their raptorial habits is to terrify with their screams. I have no doubt that they had staged the demonstration for our especial benefit, and it had some effect upon us, but as we had no where to go we waited for daylight.

"A savage spot as holy and enchanted

"A savage spot as holy and enchanted
As e'er beneath a waning moon was haunted,
By woman wailing for her demon lover"

Dawn brought us more confidence on that desolato river, and we got breakfast and took up our way down the river. We had heard the intensified roar of the river all night and in short distance we came to the falls of the river. This is a fall about twenty feet over which the river in time of flood dashes, and makes a wild dashing. Soon after negotiating the falls we came to the end of the timber and found that the river flowed through pasture and hay land for some miles, before it again entered the primeval forest for many miles. I never did come to the end of the woods after the river left this sod, though I fished and hunted on the river more times than I can count in after years.

Freshman class representatives will be Brandy Sharp and Clay Baxter, both of Marlinton. Brandy is the daughter of Michael and Denise Sharp, and Clay's parents are Jeff and Michelle Baxter.

Reunion

PCHS Class of 1973 had their 10-year reunion over Labor Day weekend. A nice social hour was held at the Marlinton Motor Inn on Sept. 3 with a picnic on Sept. 4 at the Buckskin Scout Reservation. A good time was had by all with lots of good food and company that even rain sprinkles couldn't dampen. Graduates traveled from near and far to spend two days visiting, reminiscing about high school, and catching up on goings on over the last 10 years.

Awards given at the picnic were as follows: graduate with the most children: Cindy Hall McLaughlin; graduate married longest: Kathleen Hevener Gladwell; graduate most fulfilling senior prophecy: Mark Wagner; graduate traveling farthest: Irene Mont-

The 32nd annual Pocahontas County High School Homecoming will be held this Friday, October 18, beginning at 7 p.m. Throughout "Spirit Week," students will be participating in activities centered around the theme: "Unlock Warrior Spirit."

Whatever your favorite sport, you will find it at P.C.H.S. this week. There was a volleyball game Tuesday against both Tygarts Valley and Moorefield. Thursday will feature both Girls and Boys Soccer against Petersburg, starting at 5 p.m. Being the final regular-season home soccer contests, Senior Night will be held between the two games. Friday Night Football will have the Warriors hosting the Tygarts Valley Bulldogs. Rounding out the week, on Saturday the Potomac Valley Conference Volleyball Tournament will be held at P.C.H.S. for the first time. The Lady Warriors will play host to six other teams Pawpaw, West Virginia School for the Deaf, Moorefield, Pendleton County, Tygarts Valley and East Hardy, beginning at noon.

The Annual Homecoming dance will be held in the gymnasium at the conclusion of the game until 11:30 p.m. It is open to anyone high-school age and up. Alumni are welcome. Alumni registration will be held during the game, with prizes to be awarded at halftime.

Come out and support the Warriors and Lady Warriors throughout Homecoming week. Unlock Your Warrior Spirit!

Wooddell Miller; next reunion date has been tentatively set up for Labor Day Weekend, 1988, for our 15-year reunion. Make your plans early to attend. Any questions can be addressed to Cathy Cosner Rowles, Box 3A, Dunmore, WV 24934.

Everyone attending expressed comments on what a good time they had. Many grads were heard from in our reunion efforts but for various reasons did not attend. Hope we see you at the next one.

Marlinton Motor Inn, Kentucky Fried Chicken, Marlinton Coca Cola Bottling Co., and the Buckskin Scout Reservation were responsible for the success of this reunion.

The Past 100 Years

The Greenbrier Railroad.

The incorporation of the Greenbrier Railroad Company of West Virginia, has brought to light the plans of an enterprise organized by New York capitalists, which has for its object the development of the coal fields of that state. The capitalists interested have purchased from John T. McGraw of Grafton a tract of 300,000 acres of wild land in the northeastern part of West Virginia, for which they paid $520,000.

In addition to this tract, they have obtained control of some smaller ones, making their total holdings nearly a half-million acres. Rich beds of coal underlie these lands, and the mining of this coal will soon begin.

The Greenbrier Railroad Company capital stock is $100,000, and the incorporators are M. E. Ingalls Decatur Axtell, H. C. Simms, F. B. Enslow, and J. M. Gill. The Greenbrier road is to run from the Chesapeake and Ohio road at the mouth of Greenbrier river to a point within ten miles of the lands recently purchased.

The purchasers of the lands are to take the bonds issued for the construction of the road. It is also announced that the New York syndicate has obtained control of the Dry Fork Railroad, which runs through a portion of the recently purchased lands.

The connexion of Mr Ingalls with the project shows that the Chesapeake and Ohio Railway Co. is to profit by it. Mr Ingalls himself announced a few weeks ago that he would soon be in position to make rates on Kanawha coal to Duluth and St. Paul, which would shut Pittsburg and Eastern Ohio coal out of those markets.

Mining engineers report that the coal in the recently acquired lands is the finest in the State. Baltimore Sun. December 10, 1897

A VERY PRACTICABLE ROUTE.

A Railroad could be Built on a Uniform Grade of Eight Feet to the Mile.

THE DECISIVE MOMENT.

The fate of the Greenbrier Valley hangs to a certain extent upon the action of the C. & O. magnates who were to meet in New York on the 24th inst., to determine whether the new railroad is to branch out from the main line at Covington, or Caldwell. At that meeting the capitalists who comprise the Greenbrier River Lumber Company will be present to fight for the river route as that route will mean so much to the development of Pocahontas in which they are directly interested. The invested interests of the county generally favor the river route as it splits the county into half, giving a down hill drive from every point. A road on this route would cross the mouth of every water course in the county.

Combatting this influence is Mr Axtell who is looking forward to a through line to the north and who desires to shorten the distance to Newport News from Pittsburg, and to whom the development of the Greenbrier Valley seems a minor matter.

Of one thing we can be assured. The road is to be built this year on one or the other of the routes.

Every thing that is said is to the effect that the road is to be built to Marlinton as an objective point, as there is a contract to that effect with the Greenbrier Lumber Company. They have some thing like 50,000 acres of land below the mouth of Sitlington's Creek, where Knapp's Creek Valley route reaches the river. But with the road at Driscol there is the same incentive to miss Marlinton that there is to abandon the Caldwell extension, and therefore we fear. We learned long ago, however, that it is not what you want in this world, but what you get, and so we will be content with our depot at Driscol

ber any such weight of mountain trout as we three boys dumped out at the house on that occasion.

The rule has changed now and twenty-five trout is the limit of a day's catch, and I heard a good deal of grumbling about it this year when so many men found their day's sport halted on the threshold by the limit being reached.

It was some years before I was able to figure out what had become of the Dutch Bottom. But I came to know the river as well as I knew our own farm, and to fish and hunt there was one of the great resources of my life. Then came the timbermen and spoiled the sport, but the time will soon be here when it will be here when it will be given back to the Red Gods and the ravages of man will be covered and restored by nature, and there will be once more a perfect retreat. Nature alone is permanent. And maybe the time may come when I can go there and cast off my years and fish for trout again.

his

state tourney.

It's the first time PCHS has sent a golfer to the State Championships in over 20 years.

And it was the first time 15-year-old Cutlip had played the course at Bridge Haven Country Club.

But he's been golfing since before he started to Kindergarten, more in recent years than ever before.

In matches this year, PCHS came out on top sometimes, sometimes not.

"I thought I played all right," Cutlip said. "Pretty good in some, not so well in others.

"I hadn't played all that much until the last three years."

He played a great deal this summer, though, sometimes from early morning until the threat of darkness drove him off the Pocahontas County Country Club course in Marlinton.

Cutlip placed fourth out of 15 golfers in his age group this summer at the Junior Amateur Tournament in Wheeling.

The championship is a 36-hole tourney, 18 holes each day.

It's a great start for a young golfer; but will he continue to play?

"Oh, yeah," he said. "I'll be on the team for the next three years."

The PCHS Golf Team's home course is The Raven at Snowshoe.

Western Auto

is the finest in the State. Baltimore Sun. December 10, 1897

A VERY PRACTICABLE ROUTE.

A Railroad could be Built on a Uniform Grade of Eight Feet to the Mile.

The result of the inspection of the Greenbrier River route was most satisfactory to those wishing to see a railroad built along the valley of the Greenbrier. As was reported in rhis paper last week, Captain Bartholemew and Mr Hays, two experienced engineerss, and B. M. Yeager and Captain Smith of this place had a boat built and spent four days on the river. The result of the examination was that the distance was about from fifty to fifty-four miles and that a uniform grade of seven or eight feet to the mile could be had. The character of the hillside on which the road would be built was most satisfactory. The roadbed could be easily made into it, and the soil is such that there will be no danger of slips, which is a question of great importance in building a road on sidling ground.

The party spent one day on Spice Run. A railroad could be built up that run from the Greenbrier River side, but the land rises too suddenly from the waters of Anthony's Creek, and that route is now out of the question.

It will make it clear to the minds of many to state that a railroad

Spice Run. A railroad could be built up that run from the Greenbrier River side, but the land rises too suddenly from the waters of Anthony's Creek, and that route is now out of the question.

It will make it clear to the minds of many to state that a railroad could be built as cheaply from Marlinton to Ronceverte, per mile, as from Marlinton to Traveler's Repose.

Comparing the cost of the route from Ronceverte to Marlinton, and from White Sulphur by way of Driscol to Marlinton, the first route would be the longer by several miles. The cost of building would be less, owing to heavy grades, tunnels, bridges, and fills. But if the cost of construction was the same per mile on both routes, the saving in the cost of maintaining the road on the longer route would in a very few years pay for the additional expenditure. By this we mean the river route would be free from heavy grades. That the whole distance would be on a uniform grade of not exceeding 15 feet to the mile, and the hauling would of course be cheaper than upon a road where there are many up grades, in either direction, anywhere from fifty to eighty feet to the mile.

A railroad built along the west bank of the river which faces the morning sun, and where

Board of Education.

NOTICE

The Board of Education of Huntersville District will receive bids until noon

September 15th, 1928,

for the cutting and furnishing wood, including a sufficient amount of kindling for starting and keeping up fires for the following schools in said district for the term of eight months —Thorny Creek, Mt. Zion, Browns Mtn., Clawson, Beaver Creek 2 rooms Cummings Creek, North Fork, Rimel Douthards Creek, Bethel.

Send all bids to the undersigned secretary or any member of said Board.

By order of the Board:

G. M. SHARP, Secretary,
Board of Education.

House and Lot for Sale At Auction

On Saturday, September 15, 1928, at 2 o'clock p. m, I will offer for sale at public auction my house and

uniform grade of not exceeding 15 feet to the mile, and the hauling would of course be cheaper than upon a road where there are many up grades, in either direction, anywhere from fifty to eighty feet to the mile.

A railroad built along the west bank of the river which faces the morning sun, and where we see the first bare ground after a snowfall, would, it is said, have less filling and trestling to do than any road that has ever been built in these mountains. Almost the entire roadbed would be taken from a hill-side, and a wheel-barrow would not have to make a trip of more than ten feet to get rid of all the dirt of the excavation. We venture to say that there is more timber on this sunny eastern exposure along which the railroad would run than would be in sight of a road built over the backbones of Alleghany spurs.

All the traffic of both sides of the river would be accommodated. The result would be that from Marluton down twenty times the amount of trade would come from the west side of the river than would come from the east, and yet

HOSTERMAN

Miss Mabel Collins is home after a week's stay with her cousin, Mrs. Harvey Michael at Bartow.

Parker Gragg has moved into Harrison Wright's house on Back Mountain.

Mrs. Arthur Kendall and family of Fredericksburg, Virginia, spent the week end with her father, Henry Harding.

Born, to Mr. and Mrs. W. C Bostic July 23, a daughter, Merle Irene.

Born, to Mr. and Mrs. Glenn Tracy of Boyer, August 9, a daughter, Marion Romana. Mother and baby are both doing well Mrs. Tracy was formerly Miss Vera Moore, of Hosterman.

Roughly estimating it over 200 gallons of huckelberries have been picked in our vicinity. Something like 200 gallons of blackberries were picked in one day at Trout Run.

Mrs. Verdie Collins was bitten by a vellow rattlesnake while picking huckelberies. She is doing nicely, and will soon be able to do her work.

Our school starts Monday with Miss Marie Parg as teacher.

The Brethren Church has organiz- a Young Peoples Christian Endeavor society. It meets every Sunday and is progressing nicely.

Miss Vola Moore spent a few days at Rev. Arthurs at Arbovale, and attended the revival that was conducted by Miss Minnie Keim.

Miss Jean Hevener has returned Glenville where she attended the summer normal school.

THE DECISIVE MOMENT.

The fate of the Greenbrier Valley hangs to a certain extent upon the action of the C. & O. magnates who were to meet in New York on the 24th inst., to determine whether the new railroad is to branch out from the main line at Covington, or Caldwell. At that meeting the capitalists who comprise the Greenbrier River Lumber Company will be present to fight for the river route as that route will mean so much to the development of Pocahontas in which they are directly interested. The invested interests of the county generally favor the river route as it splits the county into half, giving a down hill drive from every point. A road on this route would cross the mouth of every water course in the county.

Combatting this influence is Mr Axtell who is looking forward to a through line to the north and who desires to shorten the distance to Newport News from Pittsburg, and to whom the development of

HERMAN C. RODGERS

Herman C. Rodgers, aged 21 years, son of T. H. and A. A. Rodgers, of near Hillsboro, died in the Pocahontas Memorial Hospital, August 23, 1928. His death was caused by auto mobile wreck on Droop Mountain on August 22nd.

Mr. Rodgers had been working on the road near Renick for three months and on Wednesday morning he started home to go to the fair, and as he got to the second turn his car went over the hill and landed about 200 yards down the side of Droop. The cause has not been discovered, although it is believed he was hit by a big car. He was found in a few minutes with his head between two large rocks. He was taken to Marlinton as quickly as he could be gotten there. No one knew him, he was so badly hurt. His right arm was broken above the elbow and his head was crushed. A letter was found in his pocket giving his name and address and they let his family know he was hurt.

He was operated on at the hospital but nothing could be done. God was calling him home.

Herman was a jolly, honest young man and was liked by all who knew him. He never spoke an angry or cross word to anyone. He was always happy and singing. Just a week before his death he burned his arm and almost caused blood poison and at the time of the accident he was not working but was on the job.

He went to church and believed in his Savior. This is the first time the death angel ever visited this happy home, and it claimed the promising young man and took him to that home where no pain or sorrow shall ever reach him again.

Herman leaves to mourn his loss his father and mother, four sisters, Mrs. L. R. Blake of Richlands, Gladys, Nelle and Edith at home, and three brothers, Giles, of Grassy Meadows, and Hickman and Holt at home; besides a host of relatives and friends of his parents.

His body was taken back to his old home in Richlands for burial on Friday. The pall bearers were Clinton, Lloyd and Tommy Smith, Welford and Ivan Bruffey and Walter Hardman. Misses Gladys and Nela Bruffey and Grace Kinnison of Lobelia, were flower girls. His grave was covered with flowers. He is gone but not forgotten.

So sad, so sudden was the call,
His death was such a shock to all,
God in his wisdom knew the best
And took our loved one home to rest.
Dear Herman thou hast left us,
We thy loss most deeply feel
But it's God who has bereft us,
He can all our sorrows heal.

A Friend.

Fiduciary Notice

The accounts of the following fiduciaries are before the undersigned commissioner of accounts of Pocahontas county for adjudication, to-wit:

The final settlement of L. N. Beverage, executor of the last will and testament of Uriah W. Beverage, deceased.

The final settlement of M. W. Underwood, administrator of the estate of Mrs. C. E. Underwood, deceased.

All persons interested will please take notice.

Combatting this influence is Mr Axtell who is looking forward to a through line to the north and who desires to shorten the distance to Newport News from Pittsburg, and to whom the development of the Greenbrier Valley seems a minor matter.

Of one thing we can be assured. The road is to be built this year on one or the other of the routes.

Every thing that is said is to the effect that the road is to be built to Marlinton as an objective point, as there is a contract to that effect with the Greenbrier Lumber Company. They have some thing like 50,000 acres of land below the mouth of Sitlington's Creek, where Knapp's Creek Valley route reaches the river. But with the road at Driscol there is the same incentive to miss Marlinton that there is to abandon the Caldwell extension, and therefore we fear. We learned long ago, however, that it is not what you want in this world, but what you get, and so we will be content with our depot at Driscol

selections. Everyone welcome.

what you get, and so we will be content with our depot at Driscol if that section is to be the lucky choice.

May 25, 1899

It is the impression of those in a position to judge that we will know this week what is to be done.

Col. McGraw attended the meeting though he had had to miss a meeting of the National Democratic Committee, of which he is a member, to do so.

The engineering corps has finished its work and is waiting in camp at Hick's during the absence of the chief engineer, Mr. Hankins, who left for New York last Monday. He will make a more favorable report on the Alleghany route than did Mr. Weir, having found a better route, but at the best it is a gigantic undertaking to build a road across the mountain.

Know Him?

He's just one of our big congenial, Pocahontas County twins, whose fame extends to the far corners of the state and beyond—No! don't be fooled. It isn't George. It's the one who is candidate for re-election for Judge of the Eleventh Judicial District, comprising Pocahontas, Greenbrier, and Monroe, and whose past record merits the vote of all the people.

Road Commission Gives Infor

Community Meetings

WARRIORS
33

eastern side the same trade on either route. A road twenty-five miles long if built up the river from Ronceverte would be a paying property and would be operated. Ten thousand people live between Marlinton and Ronceverte, on a low estimate, in ten miles of the river on either side. At least nineteen out of twenty live on the west side of the river, and the proportion of the wealth and resources equally as great.

The hopes of our people for a railroad centre in Colonel McGraw, who has already done more for our county than any man who ever lived. He is a member of the Greenbrier Valley Construction Company, which is to build the road. The universal feeling of the people here, without taking into account their own interests, is the wish that he will realize on his investments in this county. We hear that he is now personally interesting himself to build the road, and with his known qualities as a hustler we may look for some developments soon.

In our temporary disappointment over the failure of the road to be under contract, it does our heart good to see a certain gang working as hard for the White Sulphur, Driscol, and Marlinton route as they were working against it a short time ago. The unbiased citizen of Pocahontas, familiar with this vast county, knows that there is but one real route for a railroad and that is up and down the river.

March 11, 1898

FEVER SUNDAY

Was President W. C. T. U. Four Years. and Active Church Worker; Funeral Held Tuesday.

Funeral services for Mrs. Myrtle Good May, age 44, wife of R. C. May, prominent business man of this city, were held at the Methodist Episcopal Church, South, Tuesday afternoon, following her death from typhoid fever Sunday at 2:00 p. m.

Mrs. Myrtle Good May, a daughter of Noah and Susan Good, was born in Broadway, Va., on January 7, 1884, was one of thirteen children, and the first to be taken by death. Her parents died some years ago.

On July 28, 1906, she was united in marriage to R. C. May, and to this union was born three children, namely Edna Good May, Edith Elizabeth and Clarence Washington.

Mrs. May united with the United Brethren Church at the age of thirteen, and after moving to Marlinton transferred her membership to the Marlinton Methodist Church. She was a very active church worker; being a member of the various church organization, and was especially devoted to her Sunday School Class. At the time of her death she was president of the local unit of the Woman's Christian Temperance Union, having served four years in that capacity. This organization attended the funeral in a body.

Her Sunday School class were the flower girls. The palbearers were C. A. Wade, E. H. Williams, F. M. Sydnor, Ira D. Brill, S. J. Rexrode, and Fred Gehauf. The funeral services were conducted by Rev. S. R. Neel, her pastor, assisted by Rev. K. V. Bowen, pastor of the Presbyterian Church.

High School Students Offered Prize for Essay

Students of Every High School In State Eligible to Compete for Prizee.

Morgantown, Oct. 10—A contest for high school students in West Virginia for the writing of a scientific essay on "Out of Doors Where I Live" has been announced by the West Virginia Academy of Science. A prize of $25 for the best essay will be awarded and the essay will be published in the booklet giving the proceedings of the Academy. Prof. John L. Tilton, of the geology department of the State University, is president of the Academy. Prof. P. D. Strausbaugh, of the botany department, is secretary and has charge of correspondence relating to the contest.

The contest is open to "any student in West Virginia in a school of high school grade." The essay is to be between 2,000 and 3,000 words in length. The prize is to be awarded at the next annual meeting of the Academy which will be held in Charleston in April.

The plan for conducting the contest follows. The subject is to be "Out of Doors Where I Live." On February 1 the high school principal is requested to have a local committee select the two best essays submitted by the students in his school, ranking subject matter 75 per cent, and expression (including spelling) 25 percent. On March 1,

THE PCHS BAND takes the field at Woodrow Wilson High School in the Raleigh County Marching Band Invitational. PCHS was second place overall.

BUILDING RAILROAD.

The First Work in Pocahontas, Opposite Academy.

The firm of Julian, Carzza & Co. commenced work on their section of the Greenbrier Railway last Saturday. It is said they would have begun Friday but for the wholesome superstition against beginning an undertaking on a Friday.

Saturday the writer went down to the river at Burnsides to see what was going on. Just where the road crosses the river the first camp is situated. It is a building 60 x 16 and separated into two compartments, one for white men and the other for negroes.

The contractors are natives of Italy, and Mr Julian was found at the camp. He said he wanted teams and hands from this section if he could get them. It is a pretty expensive business transporting

band Invitational. PCHS was second place overall.

Pride of Pocahontas County competes statewide because... It's a band thing

Three school buses bounding out of the county early on Saturday mornings can mean just one thing.

The Pride of Pocahontas is on its way to compete in another festival or parade somewhere in West Virginia.

It's not your parents' PCHS band.

Director Ron Hall comes up with a show. He springs all the marching on his 60-member band in camp in early August. Upperclassmen get the music after the annual spring concert.

Band members must memorize music for the show and for parades, as well as learn not-so-simple field routines.

While some other bands' members are not involved in any other activities, PCHS band members have a more well-rounded extra-curricular schedule.

It's not unusual to see football players take their half-times to play with the band or cheerleaders take the field with the flag corps and play instruments, as well. In addition, the band has other athletes, both boys and girls soccer players and volleyball team members, too.

The flag corps aren't the only ones dancing, either. Percussion shows off some fancy footwork, as well. And band members are all over the field as they get jiggy with this year's show selections "Irish Celebration," "Irish Party in Third Class," "An Irish Jig," and "Danny Boy."

PCHS rollicked into first place in their division and in each category, field conductor, flag corps, horn line, drum line and overall band at the Lewis County Competition September 28.

At the Forest Festival's Spectacle of Bands October 5, PCHS placed third in field conductor, auxiliary and percussion categories and third overall.

The Warriors brought home a first place for its drum line, second place for its flag corps and horn line from the Raleigh County Marching Band Festival October 12. Senior Allison Norrod tied with Woodrow Wilson's two field conductors for second place and the band placed second overall.

Norrod is costumed as a leprechaun and salutes the audience with Irish dance steps to begin the show.

Sophomore Jillian Weiford is the mellophone soloist on "Danny Boy."

Senior Kristen Irvine is this year's flag corps leader.

The band's parade music is an updated version of "When Johnny Comes Marching Home."

PCHS placed first in parades at the Highland County Fair in August and Treasure Mountain Festival last month. The band placed second at the Forest Festival parade, just 8/10 of a point behind Greenbrier East.

The band director is Ron Hall, assisted by Maria Hall.

compartments, one for white men and the other for negroes.

The contractors are natives of Italy, and Mr Julian was found at the camp. He said he wanted teams and hands from this section if he could get them. It is a pretty expensive business transporting hands so far. The wages they offer are $1.25 for ten hours' work. They can afford employment for from two to three hundred hands as soon as they get well under way. The plan they work on is for the hand to find board for himself. If he chooses he has free shelter at the camp, and can buy his subsistance at the store. They are preparing to build brick ovens to bake bread by the wholesale. The firm also want 50 teams and scrapers, agreeing to pay what the team is worth, to be determined when they see what it can do.

They are preparing to build another camp or two on their section. The firm belongs to Baltimore and another Baltimore firm, J. Levizi & Co have two miles above their work. The seven miles extends from Isaac McNeel's land to above the mouth of Stamping Creek.

On this seven miles Capt Peters has the contract for removing the

property tax.

WHY TARIFF IS NECESSARY

In an editorial on the tariff, the McDowell Recorder, Welch, West Virginia shows the industrial difficulties that have resulted from low duties. Commenting on the Underwood Tariff Law that severely cut prospective duties on all iron and steel products, it says:

"In the spring of 1914, Belgian iron bars and Belgian tin plate were sold successfully in Pittsburgh in competition with American made bars and American plate. In other words it was possible for Belgian, German and English iron and steel makers to produce their goods, ship them across the ocean and pay the railroad freight from Boston, Baltimore or New York City to Pittsburgh and sell them in competition with American made goods.

"Why?

"Simply because the iron makers of those countries live on a lower plane, have fewer comforts of life than the American, and practically none of the luxuries.

"No man, who has travelled in Europe, to say nothing of Asia, fails to come back with a heightened appreciation of American institutions, and American social life. The protective tariff is the bulwark of these institutions industrially."

Girls and Boys Soccer Teams traveled to Petersburg Tuesday, where they played Hampshire County.

The Lady Warriors played first in what proved to be a very exciting game. Pocahontas Got things underway with a very nice goal from Danielle Holstine. Hampshire struck back not long after with their first and what would be the last goal of the 1-1 tie.

In the second game, the boy's team came out strong and never let up. Jonathon Burns scored the first goal of the match, followed by goals from Ben Jewell, (2), Brian Norrod, Nathan Rittenhouse and Micah Johnson.

Pocahontas 6 - Hampshire County 0

The girls volleyball team traveled to Petersburg Thursday for matches against Petersburg and West Virginia School for the Deaf. In the first game, despite their best effort, the girls were defeated by Petersburg; however, the girls got it together and won the next two matches against WVSD.

Thursday was senior night for Warrior Soccer. The boys and girls teams hosted the Petersburg Vikings.

The girls team got things off to a good start when Rachel Wayn scored the first of her two goals early in the game, followed by goals from Danielle Holstine, Molly Must, Laura Brandt and Cessie Shears, making the final score, Pocahontas, 6, Petersburg, 0.

Seniors on the girls team, are Angel Auldridge and Molly Must.

The boys team finished off the evening with another win.

Despite getting off to a slow start, the shots finally started to make their way into the goal.

After four quarters of entertaining soccer, the score was Pocahontas, 5, Petersburg, 0.

Captains Quinn Hutchins and Graham Bell, Nick Blackman, Micah Johnson, Mathias Callison, Olin Heinemann and Patrick Brandt are PCHS' senior soccer players.

The Warrior Football Team picked up its first win of the season with a 29-7 score against longtime rival, Tygarts Valley.

Corey McNabb scored the first touchdown on a quarterback sneak, followed by a Devin McCoy rushing TD and a nice pass to Jonathan Taylor, good for six more.

Thurston Willis added six points from field goals and three more extra points, along with a Tygarts Valley safety.

The Potomac Valley Conference Volleyball Tournament was held Saturday at PCHS.

The Warriors first opponent was Tygarts Valley. The girls played very well and defeated the Lady Bulldogs in both matches.

In their second game of the afternoon, the Lady Warriors were pitted against the extremely talented [illegible] Unfortunately, the Lady Warriors were defeated by the Lady Wildcats. [illegible] become the tournament champs.

other camp or two on their sections. The firm belongs to Baltimore and another Baltimore firm, J. Levizi & Co have two miles above their work. The seven miles extends from Isaac McNeel's land to above the mouth of Stamping Creek.

On this seven miles Capt Peters has the contract for removing the timber and he was at work on that day cutting the trees, big and little, and piling them below the right of way.

While at the camp a big West Virginian from Renicks Valley came up and engaged to bring in recruits from Droop, Renicks Valley and Spring Creek, out of which he was to have a bossship of 15 men.

At the camp lay a sick negro, who had been transported from Baltimore, who was suffering from two terrible abcesses.

There were three gangs of men at work above the Kinnison land. The first gang consisted of eleven laborers and a boss. There were three white men and eight negroes. They stood up in a line within a few feet of each other and dug and shoveled

according to Dr. T. A. Reed, the department of journalism and chairman of the general committee.

TEACHERS SHOULD READ THIS

The Secretary of the West Virginia State Education Association has made application to the proper railroad officials for identification certificates to entitle all teachers, attending the annual meeting at Wheeling, to reduced railroad fares.

Superintendents and principals or teachers should let the Secretary, J. H. Hickman at Charleston, know how many identification certificates they need, just as soon as possible.

There will be a supper and entertainment at West Union School, Friday, October 19, 1928.

The public is welcome.

BOE discusses PCHS alleged "impaired" status

The Board of Education met for regular meeting on Monday of last week at Marlinton Elementary School.

The first item on the agenda was the recognition of PCHS band director Ron Hall as County Teacher of the Year and school-based Teachers of the Year, Linda Wilfong, Green Bank, Mary McCutcheon, Hillsboro, Virginia Shaw, Marlinton Elementary, and Cynthia Morrison, Marlinton Middle.

Pocahontas County High School Principal Tom Sanders and Daniel Zirkle met with the Board concerning the high school's designation by the state Board of Education as being "severely impaired." The school has failed to meet three standards required by the state board to be fully certified.

Following its action concerning PCHS, the state BOE appointed Mr. Zirkle, a retired educator, to head a team to recommend ways the school can come back into compliance with the standards. The other members are Jimmy Wyatt, a principal from Tyler County, and Lavada Shrewsbury, an assistant principal from Fayette County.

Mr. Zirkle and Mr. Sanders explained that the areas where PCHS is not meeting standards are test scores, attendance rate, and vocational programs at PCHS and many of its students were noted by several people.

Board member Kenneth Vance expressed disbelief that a school can be judged on a test taken one time by students. He noted that in any other area where testing is required, multiple opportunities to take a test is offered.

Ted Zachwieja, with ZDS Design/Consulting Services, met with the Board on the geo-thermal heating and air conditioning project at PCHS.

Dr. Phares reported that he had gotten some bad news for the project from the state School Building Authority about the project only a few hours before the meeting. He said Bill Ratliff had called from the SBA and said the estimated cost of the project is beyond the amount allocated and due to cash-flow problems at the agency, because of actions by the Legislature, there will probably not be additional money available. The estimated cost of the work is $2.1 to $2.2 million and the SBA grant for the project is $1.9 million.

Dr. Phares noted that the SBA had done a walk-through review of the project only three weeks ago, and he was told putting out a deficit bid would be fine.

at work above the camp on the Kinnison land. The first gang consisted of eleven laborers and a boss. There were three white men and eight negroes. They stood up in a line within a few feet of each other and dug and shoveled away at the mountain side.

Above them on the bank stood an Italian boss and directed their movements. The men seemed terribly tired, it being their first days hard labor, but they all said they would get used to it. The darkies were the most interesting. They ranged from the darkey in a plug hat and tan shoes to the plain, blunt nigger digging stolidly away with his shirt on the outside of his trousers. When the boss would sternly order one of them to do the work differently, he would comply with alacrity, but grumble while doing it: "That's all right, you've got us a —— of a way from home." Now and then a darkey would strike up a tune which would be carried down the line, but they were working too hard to have much breath for music.

And what work it was! With

Pocahontas County High School Principal Tom Sanders and Daniel Zirkle met with the Board concerning the high school's designation by the state Board of Education as being "severely impaired." The school has failed to meet three standards required by the state board to be fully certified.

Following its action concerning PCHS, the state BOE appointed Mr. Zirkle, a retired educator, to head a team to recommend ways the school can come back into compliance with the standards. The other members are Jimmy Wyatt, a principal from Tyler County, and Lavada Shrewsbury, an assistant principal from Fayette County.

Mr. Zirkle and Mr. Sanders explained that the areas where PCHS is not meeting standards are test scores, attendance rate, and dropout rate.

The state mandates that a school have no more that 15% of its students scoring in the 4th quartile on the tests given state-wide each year. For the past two years, PCHS has had 17.9% (2000-01) and 16.5% (2001-02) of its students in this quartile. (It was noted that this involves only about three students.)

For the last school year the attendance rate at PCHS dropped from 93.1% to 91.5.

The school is also not meeting the 95% graduation rate that is now required.

Mr. Zirkle said PCHS is an exception to the rule among most schools he has worked with that do not meet standards. He said most have poor leadership, staff members fighting among themselves, and unruly students. This is not the case at PCHS, he stressed. Mr. Zirkle said bringing the school off of impaired status is a "doable task and [illegible]

at PCHS.

Dr. Phares reported that he had gotten some bad news for the project from the state School Building Authority about the project only a few hours before the meeting. He said Bill Ratliff had called from the SBA and said the estimated cost of the project is beyond the amount allocated and due to cash-flow problems at the agency, because of actions by the Legislature, there will probably not be additional money available. The estimated cost of the work is $2.1 to $2.2 million and the SBA grant for the project is $1.9 million.

Dr. Phares noted that the SBA had done a walk-through review of the project only three weeks ago, and he was told putting out a deficit bid would be fine.

Mr. Zachwieja said company will have to "go back to the drawing board. We are going to make the project work."

He suggested several items that could made as "add/deducts" in the bidding process.

The Board discussed whether to go ahead and put the project out for bid. Dr. Phares said he could not recommend that local money be added to the SBA grant. He said the school system needs to build up a contingency fund for possible future state budget cuts.

Board President Kermit Friel noted that until bids are received, the actual cost of the work is not known. It might come in under the estimated cost and within the SBA grant amount, he pointed out.

The Board voted to seek bids on the project by a 4-1 margin. Mr. Vance voted no.

Marlinton Elementary School Principal Wilma Dale reported to the Board on discussion at her [illegible]

doing it: "That's all right, you've got us a —— of a way from home." Now and then a darkey would strike up a tune which would be carried down the line, but they were working too hard to have much breath for music.

And what work it was! With pick and shovel they were taking out loose rock from the roots of trees. Under a boiling hot sun they worked with a steady swing all day. One young mulatto remarked: "If I ever does get home, I'm going to tell them that I worked in a stone mine.

One coal-black fellow said: "If I got to stay up in dis country I'se bound to get maself a wife."

"I'se gwine to get maself a wife for Christmas," remarked another.

"Well, I'se gwine to get maself a wife from somebody, dat's settled."

One of the white boy's remarked that they never could do much with these old mountains at $1.25 per day.

A darkey reasoned with himself in this fashion: "When I come

upheaval as a rule to bring them to the light.

Uncle Joe Buzzard was in this office on Monday morning He has come through another hard winter. He remarked to us that the ground hog had held full sway for 26 days in February and seventeen days in March, which was four days more than his allotment of forty days. He did not say what he was going to do about it.

Mrs. J. J. Crickenberger, of Lewisburg, widow of the late minister Crickenberger, celebrated her nineti-

have poor leadership, staff members fighting among themselves, and unruly students. This is not the case at PCHS, he stressed. Mr. Zirkle said bringing the school off of impaired status is a "double task and within three years the school can be applying for exemplary school status.

Mr. Zirkle was asked how many schools state-wide are in the impaired category. He said 15 are in the impaired category with about 80 "on the edge." There are 850 schools in the state.

School Superintendent James Phares reported on information he received at a recent meeting of school superintendents on the new federal No Child Left Behind Act. He once the standards of this act are in force, it is estimated that about 600 of the state's schools will not be able to meet them.

Dr. Phares noted that under the federal act, students will have the right to move from an impaired school one that is not.

There was discussion on the ways PCHS can be removed from impaired status. The need for more parent involvement was noted as well as the need to work with the students with reading problems.

However, there was a great amount of doubt among the people at the meeting that the high school is an "impaired" school. PCHS teacher Denise McNeel said considering the school impaired is "absolute rubbish." The achievements of various academic and

The Board voted to seek bids on the project by a 4-1 margin. Mr. Vance voted no.

Marlinton Elementary School Principal Wilma Dale reported to the Board on discussion at her school's Local School Improvement Council meeting in September on the request that the MES athletic field be name in honor in of Bob Dunz. She said the LSIC endorsed the concept that the field at MES is a community field and does not recommend naming it after any one person. Council members decided, Ms. Dale said, after hearing input from those at the meeting, that they would like for the field to be n known as the Marlinton Community Athletic Field.

She said the LSIC also would like to commemorate those people who have helped with athletics in the Marlinton area over the years by having a stone marker with their names engraved on it placed at the field. The Council requests the Board to donate $1500 to help with costs of this community project, Ms. Dale said.

She also told the Board that the Dunz family is interested in installing a water fountain on the field in honor of Bob Dunz.

The Board gave its approval for the field to be named the Marlinton Community Athletic Field. However, the request for the donation of $1500 was not approved.

Approval was given to the county's 2002-03 Needs Project submission to the School Building

Water and sewer problems on

A darkey reasoned with himself in this fashion: "When I come down har I thought I'd gamble! I aint gwine to gamble away any money I make this way. I would n't risk five cen's of this money on four aces!"

Where the road leaves the mountain side and enters the Kinnison fields the work of throwing up the road bed was going on. The resident engineer, who by the way, is a Mr Hunter, had marked off the width with three stakes. On the outside of these stakes was another line of stakes and on the outside of these the sod was plowed to the width of the full hundred feet. There was nothing left of that particular field to speak of.

The earth that was plowed up was being hauled and dumped to form the roadbed. The height of the fill gradually rose to make the roadbed perfectly level, the centre line of stakes gradually rising in height to indicate the height of the fill.

When one sees a gang of men

THE ENDLESS MOUNTAINS

Correspondence with United States Geographic Board

West Virginia
Allegheny Mountains
Hon. Thomas Ray Dille,
Secretary, West Virginia State Board
Morganton, West Virgina.

Dear Mr. Dille:

I am enclosing herewith a memorandum covering the question of the proper names of certain mountain ranges in your states and also adjoining states, known variously as Alleghenies, Blue Ridge, Blue Mountains and other names.

For some time past the state of Pennsylvania, through its geographic board has been urging the U. S. Geographic Board to take hold of these names and endeavor to reach and render a decision which will delineate as nearly as that may be possible these several mountain chains. The State Geographic Board of New York has also asked for such a decision.

The Secretary of the board in connection with one or two other members has put in considerable time in research on this subject. I am sure you will agree with me that it is a somewhat complicated affair which makes it all the more necessary that some central authority, such as this board, determine if that be humanly possible, just what range shall be called the Allegheny Mountains and what the Blue Ridge Mountains.

With these papers I submit a rough sketch map which I have drawn up myself taken from the various authorities consulted. It is, of course, not drawn to scale, and merely an effort to delineate what might be called the backbone of each chain. Also, it has been impossible for want of room on the map to follow the line with exactness. It will, however, give you a birdseye view of the situation.

The board feels very clearly that the long range extending from northern North Carolina, clear across the state of Virginia, across the Panhandle of Maryland, and into Pennsylvania, as far to the northeast as Monroe County and the western boundary of the state of New Jersey, should be called the Blue Ridge Mountains. This name is so tied up with history and sentiment of that range that it

suggestions and criticisms which will unquestionably follow. When everything has been assimilated, the whole subject will be again referred to you gentlemen for final decision and we hope, approval.

Very sincerely yours,
Will C. Barnes, Secretary.

MEMORANDUM

Some time ago the Secretary of the Pennsylvania Geographic Board asked the U. S. Geographic Board to make a decision as to the use of the singular or plural for a range of mountains in Pennsylvania and adjoining states. Should it be "Allegheny Mountain" or mountains?

The Pennsylvania Board is inclined to use the singular, basing it on very early usage. The only decision this Board has ever made on this name was as to its spelling. This was on June 12, 1897, and "Allegheny" was adopted.

It now seems advisable for the U. S. Geographic Board to reach a decision on the request of the Pennsylvania Geographic Board and establish the proper name. Also, while we are doing it, we should definitely determine the location of these mountains. There are many varieties of statements about their location.

A review of available maps, atlases etc., show the following facts:

Allegheny Mountains

Gordan's Gazatteer of Pennsylvania, 1883, refers to them as the "Allegheny Chain" or "Allegheny Range"

Tregas' Geography of Pennsylvania 1842, speaks of the "Great Allegheny Mountains" and "Little Allegheny Mountains." But in the map with his work he shows them as "Allegheny Mountain."

Martin's Gazetteer of Virginia, 1837. He used the word "chain" in referring to them.

Goode's Physical Map of the World 1912.

U. S. G. S. Windber Quadrangle, 1925.

Lewis' History of West Virginia, 1869. He uses the plural in his text but has it indexed as "mountain."

Lippincott's Gazetteer, 1927.

Webster's Dictionary, 1927.

Rand McNally Atlas, 1928.

Century Dictionary, 1912.

Practically all maps, county, state and general give it as Alleghenies or mountains.

I am unable to find any map or atlas in which this name is used in the singular. I believe Daniel

Letter to the Editor

Dear Editor:

Thank God for Clark Galford and his reminisces of years gone by. He mentioned a chewing tobacco named "Picnic Twist." At our old Sharp's country store at Slatyfork, established in 1884, we have a Picnic Twist hanging in the store's museum's front window. It was twisted in the early 1920's and is about 7 inches long. It may be the only one in existence. It is one of the many extinct products of long ago displayed in the combined country store and museum of local and Pocahontas county's artifacts.

Speaking of tobacco, in the early 20's unwrapped plug chewing tobacco came in small wooden boxes. Some people couldn't afford a whole 50c or $1 plug. We used an iron bladed plug cutter with a long handle. The plug cutter is on display. One of the brands was "Brown's Mule" and another was "Red Juice," as I recall. Each plug had a metal name tag-plate with sharp points on the ends and pushed into the plugs. A local man tacked hundreds of them in rows on his porch wall. Probably worth a mint today!

In the late 1920's there was a [illegible] cigarette and was call "Cubebs." No tobacco tax. It didn't kill people so they quit.

On the subject of extinct products, another interesting item was "Squaw Wild Vine Compound," a medicine as stated on the paper box, "Exclusive for ailments of women" by "Dr." Simmons, about 1915. We have one or two on display.

Unrelated to tobacco, but displayed is one huge gate hinge that L. D. Sharp's blacksmith made by shaping the ends of two horseshoes to create the hinge for a large swinging wooden gate, in the early 1920's.

Those were the good ole days at Slatyfork! We didn't have to worry about electric bills; toasters burning our bread; refrigerators freezing up; cancelled plane flights; patching potholes, or suffer the mysteries of computers. My philosophy is you don't miss anything you've never had. I don't have a computer.

A parting thought: The greatest future memories of the present require us to foster the best in us and our friends.

Dave Sharp
Slatyfork/Cincinnati

suggestions and criticisms which will unquestionably follow. When everything has been assimilated, the whole subject will be again referred to you gentlemen for final decision and we hope, approval.

Very sincerely yours,
Will C. Barnes, Secretary.

MEMORANDUM

Some time ago the Secretary of the Pennsylvania Geographic Board asked the U. S. Geographic Board to make a decision as to the use of the singular or plural for a range of mountains in Pennsylvania and adjoining states. Should it be "Allegheny Mountain" or mountains?

The Pennsylvania Board is inclined to use the singular, basing it on very early usage. The only decision this Board has ever made on this name was as to its spelling. This was on June 12, 1897, and "Allegheny" was adopted.

It now seems advisable for the U. S. Geographic Board to reach a decision on the request of the Pennsylvania Geographic Board and establish the proper name. Also, while we are doing it, we should definitely determine the location of these mountains. There are many varieties of statements about their location.

A review of available maps, atlases etc., show the following facts:

Allegheny Mountains

Gordan's Gazatteer of Pennsylvania, 1883, refers to them as the "Allegheny Chain" or "Allegheny Range"

Tregas' Geography of Pennsylvania 1842, speaks of the "Great Allegheny Mountains" and "Little Allegheny Mountains." But in the map with his work he shows them as "Allegheny Mountain."

Martin's Gazetteer of Virginia, 1837. He used the word "chain" in referring to them.

Goode's Physical Map of the World 1912.

U. S. G. S. Windber Quadrangle, 1925.

Lewis' History of West Virginia, 1889. He uses the plural in his text but has it indexed as "mountain."

Lippincott's Gazetteer, 1927.

Webster's Dictionary, 1927.

Rand McNally Atlas, 1928.

Century Dictionary, 1912.

Practically all maps, county, state

Kittating and South Mountains in Pennsylvania and the Blue Ridge in Virginia. Their general direction is nearly parallel with the Atlantic Coast."

Mr. Dille referred the question to me and below is the reply:

March 8, 1929
Marlinton, W. Va.

Mr. Will C. Barnes,
Secretary,
Washington, D. C.
Dear Mr. Barnes:

Your letter of February 26th, to Mr. Dille was referred to me to answer:

The following comments and suggestions are submitted:

I agree with you about the Blue Ridge but I do not like the combination of "Blue Ridge Mountains," as that is a contradiction of terms like calling a stream "Knapps Creek River." I think that Blue Ridge Range would be more appropriate.

In the matter of the Allegheny Mountains that is a case of confusion and it will be a hard task to get it straightened out. There is one long unbroken divide that we know as the Main Allegheny.. Back Allegheny is a name that is going out. It has come to mean a bench of farming land on the eastern front of the Cheat Plateau.

The local interpretation of the word mountain here is long elevation of land cut off from other such elevations by flowing streams. The mountain to which the name of Back Allegheny is sometimes given is a continous divide called Shaver Mountain to the Staunton and Parkersburg Turnpike, Back Allegheny or Cheat to the head of the Dry Branch of Elk River, and Middle Mountain to the Elk River.

As a matter of fact what should be known as the Allegheny Mountain is the escarpment forming the eastern boundary of the Allegheny Plateau and if any change in the name occurs it should extend the whole length of that plateau reaching from Montreal to Alabama. It should identify the Adirondacks and the Catskills with the rest of the escarpment.

At this point (near Marlinton) the crest of the Main Allegheny is reached without perceptible grade

of '77 that the fill was begun with the intention of making it very high. One foot makes a very material difference. It will still be difficult to make a grade crossing to the various streets.

Knapp's Creek will be bridged by a bridge 200 feet long. There will be one pier in the middle. It will require about 3000 cubic yards of masonry. The Greenbrier River bridge is 300 feet from abutment to abutment, and the water even in the highest floods practically all passes under it, so the fears that 200 feet will not be throat enough to empty the waters of Knapp's Creek are not very well founded.

The Knapp's creek bridge will be built across what was 20 years ago the back channel of the creek. The creek originally passed to the right of the large island which has been taken for filling purposes and threatened the fields. The property was owned by A. M. McLaughlin and he turned the creek to the left and now that the original channel has been filled across the old channel is practically obliterated.

October 5, 1899

The work of laying the railroad track has progressed until the trains are running near the mouth of Locust Creek. The farmers of the Levels will have their fertilizer delivered at Locust Creek this week. Some stock has been loaded at Falling Spring. So far no freight has been delivered on the new railroad except in quantities of carload lots. The question of when a regular train service will be put on the road is perplexing the citizens of the county. We are reliably informed that as soon as the track is pushed on as far as Marlinton regular trains will run. It is said that when the track was completed to Falling Spring the Company was willing to accede to the requests of the citizens for a regular train service, but that the engineer in charge of the track laying, to have a better opportunity for putting down the track in good order, prevailed upon the company not to encumber the line with regular traffic. Since leaving that point the track has not been laid any faster than the ballast was put in. We are informed that within a week from the time the track reaches Marlinton we will have regular trains.

Patchwork Films documentaries shown at state library conference

WV Library Commission film consultant, Steve Fesenmaier, presented two Pocahontas County documentaries at the West Virginia Library Association's Annual Conference last week at Pipestem.

Librarians from around the state viewed excerpts of "Out of the Storm" and "An Evening with Cal Price" and were briefed on ways that these and other WV films could be obtained for their library patrons.

B.J. Gudmundsson, presenter for Patchwork Films of Pocahontas County, explained the importance of documenting local history and making it available to the public. She told the crowd, "We are doing a good job of encouraging our young people to read. But they will never read as much as our parents or grandparents did. If we can give them pieces of their history in an entertaining way, we will have given them a gift that they can treasure for a lifetime. Film is a perfect way to do that."

"With the support of local groups such as our county's Historical Society, our Arts Council, our Dramas, Fairs and Festivals Committee, and our Opera House Foundation we have been able to bring two important historical pieces to the public," she said. "Through the efforts of our local library, we will continue to bring our stories to the public."

Patchwork is presently working with various libraries in West Virginia to show Pocahontas County films to their patrons. News and updates are available on their website at www.PatchworkFilms.com

City National contributes to Mountain Waters Byway project for GBT improvement

Last year Marlinton Business Association made a grant application to the Federal Highways Scenic Byway program via The WVDOT for an improvement project along Route 39, now designated as The Mountain Waters Scenic Byway. The two matching funds partners in this project are the City National Bank and the Marlinton Rotary Club.

the project entails improvements and landscaping along the Greenbrier River Trail between Eighth and Ninth Streets, and will include an information kiosk, benches, bike racks, and period lighting along the trail. The kiosk will feature maps and pamphlet information on local services for Trail users, points of interest, historic buildings and sites in Marlinton and along the Byway.

The total amount of the grant is $28,000.

Public Service Commission investigating grass-roots alternative power generation pilot program

How would you like to make your electric meter run backwards?

The state Public Service Commission has launched a general investigation into "Net metering," a concept that would change PSC rules and allow homeowners to be reimbursed for any excess electric they may generate from alternative sources like solar, wind and other means. As part of the effort, the Commission has asked the state's electric companies to develop a suggested system for reimbursing the homeowner and handling the additional power.

"In essence, net metering allows a homeowner to generate power for the home and to supply any excess electricity to the power company," explained PSC Chairman James D. Williams. "This power moving onto the grid has a value, but there's also a cost for the company to maintain the lines and to safely move that power. So, we've asked the companies to suggest what they think would be a fair way to compensate the supplier, how that compensation for the new power could be efficiently tracked, and what other considerations they think would be prudent to make sure such a program would work."

All states that have deregulated their power industries have allowed some form of net metering, but the concept is rather unusual in regulated states, Williams said. So far, only seven of 33 states without deregulation—Colorado, Idaho, Indiana, Iowa, North Dakota, Oklahoma and Wisconsin—offer net metering, according to the American Wind Energy Association (AWEA) website (http://www.awea.org/default.htm). Kentucky recently instituted a pilot program to test the concept, and, like West Virginia, is a regulated state, the Chairman noted.

The methodology of reimbursing the generator differs in each state, according to AWEA, and in some cases includes provisions that allow a homeowner's generated power to actually feed back through the electric meter, reversing its readings.

But Williams cautioned that "the issue is more complicated than it may first appear, so we will move judiciously in determining whether net metering can be of benefit to all West Virginians." This investigation, he said, "is geared to the future when the cost of alternative power is more in line with present costs of generating power from more traditional means."

The Commission has asked the utilities to provide their suggested plans on or before January 2, and for Commission Staff to provide an evaluation of those proposals by April 2 of next year.

The PSC investigation, he said, will also require a thorough examination of net metering laws in other states, and will result in detailed discussions with energy companies, consumer groups and others interested in the subject.

"Our goals in looking at net metering are to encourage private investment in renewable energy sources, promote the diversification of energy resources to assure reliable and economical power to West Virginia customers, and to do what we can to help protect the environment," the Chairman said.

and Beauty were Messers Clark, McLaughlin, Dr Marshall, Galford King and Smith.

W. D. Clark won the first prize Will Clark owing to an infringement of the rules in carrying his lance was given second prize.

The football game was won by Marlinton by a score of 2—0 in one of the most stubbornly contested battles ever waged on the local gridiron. The addresses delivered at the coronation ball were most suitible for the occasion, "bright the lamps shown o'er fair women and brave men." Miss Daisy Mann was crowned queen. The dancing was continued ur til an early hour. So closed one of the most eventful days in Marlinton history. The crowd is estimated from 1200 to 3000. Good order was mantained and all committees and participants in the exerdises are to be congratulated on the success of the occasion.

Regular Traffic Begins.

Monday regular trains began to run on the new railroad. A train consisting of Engine 98 and two cars, a passenger coach and a combination passenger and baggage coach came up the line slightly behind time, having been delayed at Beaver Creek where a siding is being put in.

The depot agent for Marlinton, S. I. Fleshman, came up on the the train and immediately took charge of the affairs. He set up a temporary office in postoffice. By the aid of box cars he expects to handle the freight at this point to the best possible advantage. Passenger rates are four cents a mile, a ticket from Marlinton to Ronceverte being $2.35.

The following schedule went into effect Monday:

Daily, Except Sunday.

during Nation-wide CHALLENGER WEEK

Dunmore Garage

Dunmore, W. Va.

Above we show some of the local records, officially observed by newspaper men, which Essex the Challenger established during Nationwide Challenger Week. Owners here, and owners by thousands all over the country, have duplicated these tests, or, at least, verified the capacity of their own Essex the Challenger to reproduce any or all of these proofs.

IN FAST GET-AWAY—no car is excepted. IN SPEED—anything the road offers up to 70 miles an hour. IN HILL CLIMBING—against any car you choose. IN APPEARANCE—match it for smartness with costlier cars. IN EASE OF DRIVING—note smoothness of motor—ease of steering—roadability and effectiveness of brakes. IN ENDURANCE—60 miles an hour all day long is well within its range.

One million owners know the special advantages of the Super-Six. They are best qualified to compare the Essex the Challenger. To them we offer first opportunity to test the most powerful, the largest, roomiest, smoothest, easiest riding—most complete Essex ever built. But all motordom must be astounded that even with seventy-six notable improvements, the price is the lowest in Essex history—a price but little above the lowest-priced car on the market.

Watch ESSEX the CHALLENGER

verte being $2.35.

A Bit Of Ancient History About The Radabaughs and Buzzards

I have long known in a general way, mainly from talks with my grandmother, Susannah Radabaugh Ewing, that the Radabaughs were from Germany, and first settled in Pennsylvania when they came to America. I also knew that they must have come long before the Revolution. It is a well known historical fact that for fifty years preceding the Revolution there was a steady influx of Germans, transported on English ships, to Pennsylvania. There were so many of them that they made up a large German settlement near Philadeldhia. A large colony of them moved from Pennsylvania down into Virginia, most likely in search of more and better lands and greater freedom.

While I do not yet know the year of the Radabaugh removal to Virginia, I believe it was before the Revolution.

My grandmother related that her father was Henry Radabaugh and her grandfather was Adam Radabaugh; that her mother's maiden name was Catherine Buzzard, and that Catherine's father was Henry Buzzard and her mother's maiden name was Elizabeth Alt. I cannot help thinking that my grandmother took a good deal of interest in her ancestors to find out and remember the facts she so related.

Today I went to our public libeary and got hold of a book containing

name was Catherine Buzzard, and that Catherine's father was Henry Buzzard and her mother's maiden name was Elizabeth Alt. I cannot help thinking that my grandmother took a good deal of interest in her ancestors to find out and remember the facts she so related.

Today I went to our public libeary and got hold of a book containing lists of names of Germans who came to Pennsylvania during the perioc 1727 to 1776. I found that most of those who came over during that period were called "Palatines" because they came from the region o the Rhine.

I turned through the book page by page, looking for the names Radabaugh, Buzzard and Alt. Here is what I found:

Hans Jerrz Roadebas came over in 1727.

Peter Raudenbusch came over in 1732.

Johannes Reichenbach came over in 1733.

Heinrich Radabaugh came over September 9, 1738, with passengers numbering 349, from Rotterdam, in the ship Glasgow.

Christian Rodenbach came over in 1739.

Joht Adam Radebusch came over in 1744.

John Peter Rodebagh came over in 1752.

Johann Nickel Reidenbach came over in 1764.

Terry

Ju

Joht Adam Radebusch came over in 1744.

John Peter Rodebagh came over in 1752.

Johann Nickel Reidenbach came over in 1764.

I took down any name that looked a bit like Radabaugh.

In looking for the name "Buzzard" the nearest to it I could find was:

Mattheus, Matheis, Jr, and Christian Bausser came over in 1733.

Felix and Jacob Bossert came over in 1739.

Andreas Bussart came over Sept. 27, 1749, in the ship "Isaac."

I could not find any such name as "Alt," but I found that:

Johann Henrich Ahl came over in 1742.

Johann Ohl came over in 1752.

While it is impossible to make complete identification, I am quite of the belief that our German ancestors are within the above lists. The most plausible Radabaugh is "Heinrich Radebaugh" who came over in 1738. He could easily have had a son Adam who could bave been the father of our Henry of Virginia. Our "Buzzards" most likely came from one of the Bosserts of 1739, or Andreas Bussart of 1748. In Virginia the name Buzzard is also spelled Bussard, and I believe it was either Bos-

by Lisa Kane

My mission for this project was to raise awareness of how life is so precious to all of us.

I chose to travel to California to see the "Price Is Right" with host Bob Barker because Mr. Barker is an avid animal rights activist and raises awareness of pet overpopulation problems. He strives to save animal lives by giving his own income and time to support spaying and neutering of pets in which saves countless lives of animals and makes their lives healthier and happier.

In 1995, Mr. Barker's spay and neuter grant foundation was established and named in memory of his wife, Dorothy Jo, and his mother, Tilly. The DJ & T Foundation provides grant money to Humane Societies and other animal rescue shelters and animal welfare organizations throughout the country, giving them the ability to distribute grant money fairly to low income pet owners in the community.

I figured if we could save lives of animals, we certainly could save human lives as well, with the same determination. St. Francis of Assisi, the Patron Saint of Animals and All Living Things, preached about humility, poverty, simplicity and prayer to everyone, even the birds, whom he thought of as God's special creations, and he included everything from the tiniest insect to the tallest tree.

Fighting for both human rights and animal rights by attempting to raise money and awareness of life itself was just what this project was

Lisa Kane

tographed picture of Mr. Barker and his dog Federico. It read "To Lisa-Federico and I congratulate you on your splendid work on behalf of animals."

Tears rolled down my cheek. The time was drawing near to be seated in the studio. About halfway through the show I knew I had little time left to hold up my hand to ask Mr. Barker a question during commercial break, but I was not brave enough and I turned and asked the people beside me, whom I had gotten to know very well over the entire day, and asked them if they would ask for me and they did.

The question was "Bob, Lisa has has been a very loyal fan of yours and has been coming here every year since 1995 and she wanted to know if she could give you a kiss." And the answer was "Yes."

While I was on my way up to the stage, Mr. Barker told the audience about what a loyal fan I am to him and the show. He leaned over

June 29, 1899

While it is impossible to make complete identification, I am quite of the belief that our German ancestors are within the above lists. The most plausible Radabaugh is "Heinrich Radebaugh" who came over in 1738. He could easily have had a son Adam who could bave been the father of our Henry of Virginia. Our "Buzzards" most likely came from one of the Bosserts of 1789, or Andreas Bussart of 1748. In Virginia the name Buzzard is also spelled Bussard, and I believe it was either Bossert or Bussart. What I understood from grandmouter to be "Alt," may have been "Ahl" or "Ohl," but it is all guess work. I spelled it "Alt" as that is the way I understood grand mother to pronounce it. Either one of us might have been "off" on both spelling and pronounciation. Anyway, this makes a nice little study for those interested.

All Living Things, preached about humility, poverty, simplicity and prayer to everyone, even the birds, whom he thought of as God's special creations, and he included everything from the tiniest insect to the tallest tree.

Fighting for both human rights and animal rights by attempting to raise money and awareness of life itself was just what this project was about.

The trip to California to see the "Price Is Right" was successfully completed and it proved to be a very enjoyable trip for me. I never made it on stage nor did I make it to contestants row.

For the last three of the four days of taping the show, I was in the front row of the middle section of the audience. I would get up by 3 a.m. and be out in line by 4 a.m. at the CBS Studio in Hollywood. Mr. Barker recognized me in the audience and welcomed me back to the show. I had the chance to give him a sweatshirt I made and an article by Cathy Grimes about him. On the following day, Mr. Barker thanked me for the sweatshirt and the article which was about how he had inspired me over the years.

On the last day before we were to be seated in the studio for the show, a page who assists and seats people for the show walked over to me while I was standing in line and said "Are you Lisa Kane?" and I responded, "Yes."

The page handed me a manila envelope and whispered to me that it was from Mr. Barker. People were standing all around me by that time staring while I opened the envelope. In the envelope was an au-

The question was "Bob, Lisa has has been a very loyal fan of yours and has been coming here every year since 1995 and she wanted to know if she could give you a kiss." And the answer was "Yes."

While I was on my way up to the stage, Mr. Barker told the audience about what a loyal fan I am to him and the show. He leaned over and I planted a kiss on his cheek. He asked me if that was my dog in the picture on my sweatshirt.

I said, "No, but Raini is our church dog and I help take care of her during church." Mr. Barker remarked that he thought that was a kind thing for me to be doing and thanked me for all the work I have done on behalf of the animals and the work I have done as a member of the Humane Society, which he learned about in the article I gave

him the previous day.

Before leaving the stage, I turned around one more time and hugged Mr. Barker and then walked back down the steps from the stage area. By now I was shaking from head to toe. That was my five minutes of fame.

The fundraiser involved only one individual, such as myself, who was a part of the important event. It worked similarly to a walkathon. The people walking will be sponsored by the public with donations or pledges per mile walked.

In my case, I did the traveling alone and the public sponsored me by giving donations or pledges per mile I traveled by air, in which 100% raised will go directly to the Pro-Life Organization. The trip to California in air miles was approximately 5000 miles roundtrip, for each 500 miles, I was asking for sponsorship in any amount.

For example, if someone wanted to sponsor me for $1 per 500 miles, the total amount to be donated would be $10 for the roundtrip. Sponsors could also simply make a donation.

I have enjoyed carrying out my work on this project and I hope others will understand what I was attempting to do. To those who participated in Pro-Life Fundraiser I am happy that you did. Those who have not turned in their pledges may do so at any time. The deadline is October 8 and anyone who feels they want to may donate. Please call Lisa at 456-4580 for information. We appreciate everyone's participation and hope we can do it again in the future.

Shinaberry Selected for U. S. Women's Lacrosse Team

Brooke Barlow Shinaberry, daughter of Henry and Vicki Shinaberry, from Millersville, Maryland, and granddaughter of Iva Shinaberry, of Marlinton, was selected out of 100 players in a three-day tryout for the 2003 U. S. Women's Under 19 lacrosse training team by the US Lacrosse. Brooke was one of three goalkeepers named to the training team. A two-year starter at the Severna Park High School, Brooke has recently committed to Vanderbilt for the 2003 Fall Freshman term. The IFWLA World Cup will be held June 26 - July 6 at Towson University next year.

- - -

May Graduates from Army ROTC

Michael L. May has graduated from the Army ROTC (Reserve Officer Training Corps) Leader's Training Course at Fort Knox Kentucky.

The four-week course is world class leadership development experience that qualifies and motivates ROTC cadets for enrollment in the Senior ROTC Advance Course at their host college campuses. The course is designed to improve leadership potential, build self-confidence and develop initiative through hands-on learning, allowing the Army to observe and evaluate the cadets' officer potential and leadership attributes.

May is a student at Valley Forge Military College, Philadelphia, Pennsylvania.

He is a 2002 graduate of Pocahontas County High School.

Deaths

Jack D. Armstrong

Jack D. Armstrong, 57, of Buckeye, died Saturday, October 22, 1983, at home of an apparent heart attack.

A veteran of World War II, he was a mechanic and a member of the Swago United Methodist Church and Pocahontas County Gun Club.

He was born September 3, 1926, at Marlinton, the son of the late Lloyd H. and Lizzie Dulaney Armstrong.

A brother, John C. Armstrong, and a sister, Hester O. Garsteck, preceded him in death.

Surviving him are his wife, Betty C. Mace Armstrong; two daughters, Roseanna L. Groves of Hillsboro, and Marilyn A. Armstrong, of Buckeye; a brother, Dale C. Armstrong, of Marlinton, and two sisters, Thelma A. Connors, of Hartford, Connecticut, and Helen F. Gilliam, of Morrow, Georgia, and one grandchild.

Services were held Monday afternoon at 2 p. m. in the Swago United Methodist Church by the Rev. B. B. Mitcham and the Rev. Sanford Boggs, with burial in the Armstrong Cemetery.

THE FOOTBALL SEASON

(From The Little Levels Reflector)

The Little Levels District High School football team was undefeated during the 1928 season. Our team scored seventy points and their goal line was crossed but twice by their opponent, for a total of twelve points, Cowen securing one touchdown and Marlinton one.

However, score and points are soon forgotten and are not used altogether as a major success. One of the means of counting our football a success, by some at least, is the manner in which our team played and conducted themselves on the field. The boys played fairly and cleanly and to our knowledge never used unfair means nor took advantage of an opponent. The boys of the team deserve much credit for the hard work and sacrifices they made in order to play ball. It is not easy work to learn to play football and it takes determination and 'fight' to practice an hour and a half every day and then walk three miles or drive ten before supper. It is comparatively easy to play your best before an audience and your best girl to what it is to play with no one to watch you but your team mates and your coach. But players are made during the long, grinding practices and not in the short games on Saturday afternoon.

There must be some way of honoring the boys who do their best and bear the shock of battle. This is done by giving to every boy who plays in a majority of the quarters of games played a letter which is emblematic of his school. The letters are earned and are not complimentary and to receive one should be counted an honor for it denotes achievement.

The following are letter men of our squad for the past season:

Elmer Grimes, Center, who never missed a game, nor made a bad pass

...ritt was utility man until he settled at the end position. Merritt understands the value of team work and demonstrated this by learning the plays from every position on the team.

Thomas Alderman, Right Tackle, was always 'there' and played the game hard but probably did not stand the wear and tear as well as he did in the 1927 games. However, the tackles who played opposite Tom did not fair as well either. Line plays are mostly off-tackle plays and a player in that position must be a shock absorber.

John Grimes, at Left Tackle, was a pretty good shock absorber too, as well as quick in getting through the opponents line. He followed the ball closely and discouraged Cowen by turning one of their fumbles into six points.

Roy Workman, Left End. It does not pay to drop any loose balls around Roy either. His playing was better on the defense than on the offense this year, but just wait until 1929.

George Thomas Clark, who earned his letter at Right Guard, developed into a quick hard-hitting guard and was strong on defense.

Frank Beard, at Left Half, developed into a fast back and we are sorry to lose him this year. He was a constant threat to the enemy and all he needed in order to make the game was a little interference.

Summers Burr, Full Back. Summers was kept out of the Marlinton and the first Greenbank game because of injuries but won his letter in the end. We are expecting 'Fuzzy' to be a triple threat man next year.

Miri Simmons, Manager. Miri was not an able manager but practiced with the team and did his part in helping to make it.

Verle Pyles, End. 'Pig' a strong ...sive defense, won his letter but

Rainbow Indictment Dismissed

The indictment against Gerald Brown on two counts of first degree murder in the Rainbow Case was dismissed Tuesday by Judge Frank Jolliffe at the request of the State.

According to the Prosecuting Attorney's office, the decision to request the dismissal of the indictment was made as a result of a statement made under oath at a pre-trial conference on October 18 by Bobby Lee Morrison, who is a material witness in the case, recanting a previous statement on which the State had relied very heavily. As a result of this it was determined by the Prosecuting Attorney's office that Gerald Brown's involvment in the case, if any, is not capable of the required proof at this time.

The bodies of Nancy Santomero and Victoria Ann Durian were found on June 25, 1980, on the Briery Knob Road. It is believed the two were on their way to the Rainbow Festival being held on Williams River. Investigation into the case seemed to go nowhere until the arrests of Brown and Morrison

Board of Education

The Board of Educa
met Monday for a reg
meeting at the Arbo
Community Center. Al
sixty area residents wer
attendance to hear,

ernization." Mr. Fl

tion).

Earl Kellison, Halfback. Earl Earl played end last season (1927) and can appreciate what the line has to do. He knows how to make use of a line as shown when he scored the touchdown against Marlinton.

The next one, Wyatt Jones Quarter. Jones was scared into playing. He had to play to keep from getting hurt although he received a serious injury during the last minute of the Marlinton game after having guided the team to its most notable victory. Jones expects to quit smoking and 'flunk' chemistry so he can play next year.

Merritt Kellison, Right End. Mer-

and quit school.

The rest of the squad in a part of the games, but due to injuries and inexperience were unable to win a letter. Every man but one got into the game at some time during the season. Captain Hook, and Claude Bruffey each lacked a half of a game of winning a letter. The rest of the squad who gave able and consistent support are Joe Kramer, Dick McNeel, Fred Burr, Marvin Wymer, Argil Arbogast, Henry Harper, William Browning, Rodney Siple and Nat Kennison. These boys all deserve much credit and can be depended upon to help make the team next year.

Waco permit appeal denied by WV Surface Mine Board

By Hank Zemack
Contributing Writer

The West Virginia Surface Mine Board has unanimously voted to uphold the denial of Waco Oil and Gas Company's proposed permit for a sandstone quarry near Hunnewille.

The permit would have allowed the company to mine a 76-acre quarry along West Virginia Rt. 39 along Beacon Mountain. This means a July 16 decision by WV Department of Environmental Protection to deny the permit stands.

But the decision still may be appealed to the local circuit court within 30 days.

The ruling was announced last Tuesday in the Pocahontas County Courthouse, following nearly 11 hours of testimony by witnesses on both sides of the issue.

Dawson Michael, chair of the appeals court board, said the board based its ruling mainly on concern over the aesthetic values of the area, and the quarry's impact on the tourism industry. Michael emphasized that the board did not mean to imply that the area is unsuitable for mining operations, however. Testimony by witnesses concerning the proposed quarry's potential for negative impacts to surrounding areas, such as increased dust, noise or declining property values, were not a factor in the decision, he said.

In its appeal, Waco's key witnesses testified that the mining company had worked closely with DEP officials in filing the application over the last five years, and had made all the modifications recommended by the state agency.

One Waco witness said the appeal permit was "technically complete" and another said that a top DEP permitting official had led Waco to believe that the permit would easily be approved. Waco attorney Leonard Knee said DEP's decision to deny the permit was based on emotional testimony by Pocahontas County residents during a public hearing last March.

"It was a subjective, rather than an objective decision," Knee said.

Three people spoke at the public hearing in March, and many others sent letters-all in opposition to the proposed quarry. They spoke of the scenic beauty of the area, and how it also could be affected by noise and dust, and would increase truck traffic in the area. It also could be detrimental to Knapp Creek's pristine fishing spot, and would hurt the area's tourism trade.

Waco attorneys questioned those people, the DEP permit engineer who led the public hearing and other witnesses in opposition to the proposed quarry. They tried to show that the permit was denied after the agency considered stated public concerns that a quarry would infringe on property rights, decrease property values and that the dust, noise and hauling trucks would hurt the aesthetic value of the area.

It also could impact the local tourist industry, he said. Stern said Waco made no changes in its permit application in response to the citizens' concerns, although he forwarded their letters to the company.

Waco attorneys also questioned Mathew Crum, the new director of DEP's Division of Mining and Reclamation. Through questioning they established that Crum has only inspected half a dozen quarries, and that the public hearing had been the first one he had ever attended. Crum testified he was impressed by the thoughtful and specific concerns of the speakers, in what he considered a "well run" public hearing. Crum said resident's comments were "earnest and heart felt."

> "If I end up with this property, you can guarantee I'll do something with it"- Ike Morris, Waco

But he repeatedly denied Waco claims that DEP's decision was based on public sentiment, or that the agency considered the quantity of people opposed to the quarry in making its decision.

Next, they questioned Stephen Holloway, a land manager for Waco. Holloway described an April 11 meeting at the quarry site with Stern, in which Stern allegedly assured him that the permit would "breeze through." Holloway said he therefore didn't believe any changes were needed in the permit application, or that any responses to the public concerns were necessary.

Holloway had taken 10 photographs depicting timber clear-cuts and sawmill sites in the area, which were entered into evidence.

Would you characterize this area as "pristine?" asked Waco attorney Eric Calvert, afterward.

"No," Holloway said.

Waco's star witness however, was Hugh Hefner, a prospector and expert in geology and hydrology, who found the quarry site for Waco. Hefner purchased the 250-acre site [illegible] for $[illegible] before selling it to Waco. [illegible] was interested in finding a limestone quarry at the time, so he bought it himself, believing he could test the soil for sandstone, and later convince Waco to buy it.

Hefner also gave detailed testimony about how he designed the quarry site to minimize its impact on surrounding areas. The quarry area and further away from the nearest houses than required, he said. Hefner explained how reclamation would take place in stages, as soon as a particular area had been mined.

Fast growing shrubs would be used, which would grow in just 18 days, he said. Surface vegetation also would be removed only a month or two before a new area was opened to extraction, Hefner said.

The quarry would only be visible from two of the 14 properties within 1,500' of the quarry, he said. It also would only be visible from a few locations along the nearby roads. Only 19 trucks a day would be used during the peak summer season, increasing traffic along Rt. 39 by merely 1.25%, he said. The dust levels also would be lower than at a typical limestone quarry, due to the rock's hard make up Hefner said.

Using a semi-log graph on industrial noise, and how it decreases over distances, Hefner said nearby property owners or people fishing in the creek would hardly hear the rock crusher. He said from a distance, it would sound like standing next to a refrigerator.

"You're saying that at 250 feet from the crusher, the noise would be less than a refrigerator?" commented Michael. "I find that hard to believe!"

"We've all heard a chain saw from 1000 feet," chimed in Paul Nay, another state board member.

DEP attorney Tom Clarke cross-examined Hefner, and asked him to recalculate the number of trucks that would be used to transport 300,000 tons of sandstone a year to a purchaser.

Dividing the number of days the company would be in production each year by the amount of load the trucks could carry, Hefner came up with a new figure of 167 truckloads per day, on average, rather than the 19 trucks at peak season that he had earlier testified.

Addressing another of Clarke's questions, Hefner admitted that he had asked DEP inspectors to visit the site with vehicles without government license plates for their security. He said he had previously "received [illegible]"

[illegible] any excessive price to applying for a permit in order not to generate adverse public opinion. They say Waco published its 30-day public hearing notice for its permit application just before Christmas weekend, for example, when it might have been overlooked.

Testimony also revealed that Hefner that it had already made an $1.3 million agreement with West Virginia Paving to transfer the quarry property by May, 2003, upon approval of the permit.

Clarke then called Waco owner Ike Morris to the stand. Morris confirmed that Waco contracted to transfer the quarry permit to the paving company just 20 days prior to applying for the permit. Morris said he couldn't remember the exact figure, but agreed that Waco did stand to "lose a sizable sum" if the deal didn't go through.

"If I end up with this property, you can guarantee I'll do something with it," Morris added.

DEP had a host of local witnesses on hand to testify that they believed the quarry would hurt their quality of life, their businesses and the tourism industry.

These included County Commission President Joel Calhoun, and Gail Lowry, executive director of the Pocahontas County Convention and Visitors Bureau.

Calhoun testified that tourism is the only growing industry growing in the county, and the only industry with real promise of growth in the future. The county commission supported Waco's "pretty" quarry at Snowshoe and a recent expansion of an existing quarry at Hillsboro, he said. It wasn't easy to oppose another quarry, which might provide local jobs, Calhoun explained, but tourism growth benefits the entire county.

Lowry told the board Pocahontas County is considered among the most pristine areas in West Virginia. An estimated 900,000 people visit Pocahontas County each year, she said. Last year tourism generated $20 million in lodging dollars plus $1.2 million in sales taxes on those dollars, and $600,000 in hotel, motel taxes for the county.

Rt. 39, which runs past Browns Mountain, has been given a state "Scenic Byway" designation for its very appealing qualities, which includes undeveloped mountain views, creeks, and historical places of interest, she said. Virginia and West Virginia also have agreed to jointly establish the "Mountain Water Scenic Byway" for Rt.39, which extends into Back and Rockbridge counties in Virginia.

The additional trucks along 39 and the unsightly scenes of a quarry, [illegible] claims about its pristine quality untrue, she said.

"Those of us in the tourism industry would hate to see that quarry put in," Lowry added.

Waco officials did not return phone calls inquiring about the company's intent to appeal the board's decision to circuit court.

Waco permit appeal denied by WV Surface Mine Board

by Heidi Zumbach
Contributing Writer

The West Virginia Surface Mine Board has unanimously voted to uphold the denial of Waco Oil and Gas Company's proposed permit for a sandstone quarry near Huntersville.

The permit would have allowed the company to mine a 76-acre quarry along West Virginia Rt. 39 along Brown Mountain. This means a July 18 decision by WV Department of Environmental Protection to deny the permit stands.

But the decision still may be appealed to the local circuit court within 30 days.

The ruling was announced last Tuesday in the Pocahontas County Courthouse, following nearly 11 hours of testimony by witnesses on both sides of the issue.

Thomas Michael, chair of the appeals court board, said the board based its ruling mainly on concern over the aesthetic values of the area, and the quarry's impact on the tourism industry. Michael emphasized that the board did not mean to imply that the area is unsuitable for mining operations, however. Testimony by witnesses concerning the proposed quarry's potential for negative impacts to surrounding areas, such as increased dust, noise or declining property values, were not a factor in the decision, he said.

In its appeal, Waco's key witnesses testified that the mining company had worked closely with DEP officials in filing the application over the last few years, and had made all changes requested by the agency before denying the permit. Sturm said the permit was denied after the agency considered stated public concerns that a quarry would infringe on property rights, decrease property values and that the dust, noise and hauling trucks would hurt the aesthetic value of the area.

It also could impact the local tourist industry, he said. Sturm said Waco made no changes in its permit application in response to the citizens' concerns, althoug he forwarded their letters to the company.

Waco attorneys also questioned Matthew Crum, the new director of DEP's Division of Mining and Reclamation. Through questioning they established that Crum has only inspected half-a-dozen quarries, and that the public hearing had been the first one he had ever attended. Crum testified he was impressed by the thoughtful and specific concerns of the speakers, in what he considered a "well run" public hearing. Crum said resident's comments were "earnest and heart felt."

But he repeatedly denied Waco claims that DEP's decision was based on public sentiment, or that the agency considered the quantity of people opposed to the quarry in making its decision.

Next, they questioned Stephen Holloway, a land manager for Waco. Holloway described an April 11 meeting at the quarry site with Stern, in which Stern allegedly assured him that...

> "If I end up with this property, you can guarantee I'll do something with it"- Ike Morris, Waco

and farther away from the nearest stream than required, he said. Hefner explained how reclamation would take place in stages, as soon as a particular area had been mined.

Fast-growing seeds would be used, which would grow in just 14 days, he said. Surface vegetation also would be removed only a month or two before a new area was opened to extraction, Hefner said.

The quarry would only be visible from two of the 14 properties within 1500' of the quarry, he said. It also would only be visible from a few locations along the nearby roads. Only 19 trucks a day would be used during the peak summer season, increasing traffic along Rt. 39 by merely 1.25%, he said. The dust levels also would be lower than at a typical limestone quarry, due to the rock's hard make-up Hefner said

Using a textbook graph on industrial noise, and how it decreases over distances, Hefner said nearby property owners or people fishing in the creek would hardly hear the rock crusher. He said from a distance, it would sound like standing next to a refrigerator.

"You're saying that at 250 feet from the crusher, the noise would be less than a refrigerator?" commented Michael. "I find that hard to believe!"

"We've all heard a chain saw from 1000 feet," chimed in Paul Nay, another mine board member.

Hefner that it had already made an $1.3 million agreement with West Virginia Paving to transfer the quarry property by May, 2003, upon approval of the permit.

Clarke then called Waco owner Ike Morris to the stand. Morris confirmed that Waco contracted to transfer the quarry permit to the paving company just 20 days prior to applying for the permit. Morris said he couldn't remember the exact figure, but agreed that Waco did stand to "lose a sizable sum" if the deal didn't go through.

"If I end up with this property, you can guarantee I'll do something with it," Morris added.

DEP had a host of local witnesses on hand to testify that they believed the quarry would hurt their quality of life, their businesses and the tourism industry.

These included County Commission President Joel Callison, and Gail Lowry, executive director of the Pocahontas County Convention and Visitors Bureau.

Callison testified that tourism is the only growing industry growing in the county, and the only industry with real promise of growth in the future. The county commission supported Waco's "pretty" quarry at Snowshoe and a recent expansion of an existing quarry at Hillsboro, he said. It wasn't easy to oppose another quarry, which might provide local jobs, Callison explained, but tourism growth benefits the entire county.

Lowry told the board Pocahontas County is considered amoeg the most pristine areas in West Virginia. An estimated 900,000

Engagement

The Reverend and Mrs. Harper T. Callison, of Huntington, have announced the engagement of their daughter, Amy Elizabeth, to Kenneth Scott Teter, son of Mr. and Mrs. Lloyd Teter, Jr., of Elkins.

An open church wedding is planned for December 30 at 6:30 p.m. at the First United Methodist Church in Elkins.

Miss Callison is a gradu-

The Marlinton Grades and High School, as well as all the schools in the districts will be open to visiting teachers. Teachers may make their own selection as to the school they prefer to visit, but to receive full credit for Friday they must be at the school building not later than ten o'clock and remain until 3:30 in the afternoon.

On Saturday, beginning at 10 o'clock, all the teachers of the District and those from other districts who have not attended their own district meetings, will meet in the High School building at Marlinton. A Special Session of Institute for High School teachers of the County, who have not attended five days elsewhere will be held in the afternoon, in the same building.

In order that teachers may be familiar with the law governing Institute and the necessity for attending, I quote the following from Section 114 of the West Virginia School Law:

"Every person employed as a teacher in the schools of this state shall be required to attend a county teachers' institute, or such other

"Every person employed as a teacher in the schools of this state shall be required to attend a county teachers' institute, or such other teachers' meeting as the state superintendent of schools shall prescribe for his group of teachers or kind of work, for at least five days in each year, or for the number of days more or less than five, that may be prescribed by the said superintendent.

It shall be the duty of the county superintendent to see that teachers who do not attend institute or who have not been legally excused are not allowed to teach in his county during any year in which such failure occurs."

I trust all the teachers of one and two-room schools of Edray District will find it convenient to visit some school of their choice on Friday, and on Saturday, all the teachers of the district, and those who did not attend Institute in their own districts, will find it possible to be at the meeting in the Edray District High School.

C. E. Flynn, Superintendent.

Commission's insurance costs rise as claims increase

By Pamela Pratt

The Pocahontas County Commission spent some of its time Friday discussing ways to curtail rising insurance premiums, because 23 claims since 1998 have resulted in costs of over $1.5 million.

Although several lawsuits, including one filed against several county officials by Jacob Bean the man once convicted and once acquitted of the 1990 Rainbow Murders, have no resolution yet, attorney fees have propelled the Board of Risk's costs and in turn, the commission's premiums.

With those premiums in an upward spiral from $45,000, the commission saw a 16% increase last year and will see at least that much again this year.

The Board of Risk covers fires, vehicles, property damage and wrongful acts, but does not include costs for employee health benefits and flood insurance.

In order to keep the county's costs as low as possible, the commission will establish a policy and procedure manual that will be reviewed and revised annually and set law enforcement standards that will include employee procedure.

Sheriff Bob Alkire told the commission he already has those manuals for the tax office, law enforcement and the jail.

Alkire said he could not put those policies out for public comment at that time because of safety issues for the deputies.

Alkire and Commissioner Ron Griffith will work on the manuals and present them to the commission at a later date.

Heffner also gave detailed testimony about how he designed the quarry site to minimize its impact on surrounding areas. The quarry areas were placed far back, out of sight, for example, when it might have been overlooked.

Testimony also revealed that Waco apparently did not inform Waco officials did not return phone calls inquiring about the company's intent to appeal the board's decision to circuit court.

vehicles, a Chevrolet S-10 Blazer and a 1996 Pontiac.

Cain said the Jattzr vehicle was worth more than $4,000, according to a print out he obtained from the assessor's office. The car was sold to a county employee for $800.

He asked the commission what safeguards were in place to prevent that happening again, since, Cain said, "it looks to the public like you're cheating the public out of its money."

Commission President Joel Callison said that, from now on, the commission will sell property at auction on the court house steps.

The commission can sell property worth less than $1000 without an auction.

Alkire noted that the last five vehicles, three of them from the previous sheriff's administration, were sold to county employees.

"The [Pontiac] was not worth $4000, I can tell you that," the sheriff said.

The sheriff said the car had more than 130,000 miles on it when it was sold.

Alkire told the commission a car dealer offered him $800 for the car as a trade-in. A county employee paid that amount.

Humane Society member Leslee McCarty followed up on the idea of a task force to study animal control problems and animal welfare issues in Pocahontas County.

McCarty suggested the task force include a representative from the county commission, municipalities, the task force. Stewart has a background in personnel management and has facilitated team-building groups. She will not be a voting member of the task force.

The humane treatment of animals topic continued as Chief Deputy Craig Doss told the commission he would be going out on a "horse complaint."

Doss asked the commission for direction, since the county is involved in a law suit concerning confiscated horses.

A veterinarian will accompany Doss to the site and the deputy said he plans to leave the horse where it is if it can be treated.

McCarty said one horse has already died there.

"I believe it starved to death," she said. "It's not like this horse may not be in danger."

The humane society has received many complaints, she said.

Griffith told Doss to document the visit and make sure the owner receives written notice of a timeline before confiscating the horse.

Doss and the commission will seek the advice of Prosecuting Attorney Walt Weiford before removing the horse.

The commission transferred two parcels of land at East Fork Industrial Park to the Greenbrier Valley Economic Development Corporation. The parcels are .61 and 1.1 acres, respectively, and will be used by Sun Propane and possibly

HOSPITAL NOTES

Miss Nellie Beard, of Hillsboro, who was operated on a month ago was able to return to her home for Christmas.

Earl Galford, of Dunmore, the lad fourteen years old who had lock-jaw from an infected finger, was able to go home Monday.

Mr. Wm. Bowers, of Huntersville, who was operated on two weeks ago for gall-stones is improving slowly.

Miss Grace Dilley, of Cloverlick, continues to improve from an operation for abscess of the liver.

Mrs. Pearl Shifflette, of Raywood, is able to be up after an operation.

Mr. Thos. Sullivan, of Frost, who was operated on two weeks ago, is improving nicely.

Mrs. Arthur McFadden, of Onoto, was brought to the hospital Monday for operation.

Mr. Brady Spencer, of Durbin, who was operated on two weeks ago for appendicitis is able to sit up.

Harry Walker, a colored man, was brought to the hospital Saturday night, horribly cut about the head and neck, the result of a fight. His wounds were attended to by Drs. J. W. and Norman Price. The patient is resting comfortably Tuesday night.

Moody Johnson, who drives a truck for McKinley Waugh, had the misfortune to turn over on Slippery Hill, injuring his back. He was brought to the hospital and examinations made by Drs. Howard and Yeager who could not find any serious

The commission can sell property worth less than $1000 without an auction.

Alkire noted that the last five vehicles, three of them from the previous sheriff's administration, were sold to county employees.

"The [Pontiac] was not worth $4000, I can tell you that," the sheriff said.

The sheriff said the car had more than 130,000 miles on it when it was sold.

Alkire told the commission a car dealer offered him $800 for the car as a trade-in. A county employee paid that amount.

Humane Society member Leslee McCarty followed up on the idea of a task force to study animal control problems and animal welfare issues in Pocahontas County.

McCarty suggested the task force include a representative from the county commission, municipalities of Marlinton, Hillsboro and Durbin, sheriff's department, prosecuting attorney's office, humane society, animal control officer, Farm Bureau, assessor's office and the Board of Health.

McCarty said she wanted the task force to be an arm of the county commission, but Callison said he'd like for the humane society to take the lead.

The commission appointed John Simmons to be its representative on the task force.

Vivian Stewart will help convene

point in public education.

ADVERTISING BRINGS NEW CUSTOMERS

Into your store. New customers increase the volume of business and increased volume brings increased profits. The following story is told of the Fort Smith Garment Co., by its vice president, Leo Fleming:

"We manufacture overalls and work pants. It took us 12 years to build a business from a scratch to a certain volume without advertising. With advertising the volume increased 500 per cent in two years. In our first twelve years we built our production up to 1000 dozens a month and our overhead and selling cost was $4000 a month.

"That made a selling cost of four dollars a dozen. Two years after becoming advertisers our volume increased to 5000 dozens a month. The overhead and selling cost increased 100 percent to $8000 a month. As a result the overhead and selling cost was reduced from four dollars a dozen to one dollar and sixty cents a dozen. We reduced the price a dollar a dozen to the retailer, paid 50c a dozen to the advertising appropriation and had 90c a dozen extra profit as a result of the advertising."

Waco permit appeal denied by V

by Heidi Zemach
Contributing Writer

The West Virginia Surface Mine Board has unanimously voted to uphold the denial of Waco Oil and Gas Company's proposed permit for a sandstone quarry near Huntersville.

The permit would have allowed the company to mine a 76-acre quarry along West Virginia Rt. 39 along Browns Mountain. This means a July 16 decision by WV Department of Environmental Protection to deny the permit stands.

But the decision still may be appealed to the local circuit court within 30 days.

The ruling was announced last Tuesday in the Pocahontas County Courthouse, following nearly 11 hours of testimony by witnesses on both sides of the issue.

Thomas Michael, chair of the appeals court board, said the board based its ruling mainly on concern over the aesthetic values of the area, and the quarry's impact on the tourism industry. Michael emphasized that the board did not mean to imply that the area is unsuitable for mining operations, however. Testimony by witnesses concerning the proposed quarry's potential for negative impacts to surrounding areas, such as increased dust, noise or declining property values, were not a

denying the permit. Sturm said the permit was denied after the agency considered stated public concerns that a quarry would infringe on property rights, decrease property values and that the dust, noise and hauling trucks would hurt the aesthetic value of the area.

It also could impact the local tourist industry, he said. Sturm said Waco made no changes in its permit application in response to the citizens' concerns, althoug he forwarded their letters to the company.

Waco attorneys also questioned Matthew Crum, the new director of DEP's Division of Mining and Reclamation. Through questioning they established that Crum has only inspected half-a-dozen quarries, and that the public hearing had been the first one he had ever attended. Crum testified he was impressed by the thoughtful and specific concerns of the speakers, in what he considered a "well run" public hearing. Crum said resident's comments were "earnest and heart felt."

But he repeatedly denied Waco claims that DEP's decision was based on public sentiment, or that the agency considered the quantity of people opposed to the quarry in making its decision.

"If I end up with property, you guarantee I'll something with Ike Morris, Wac

McMann -:- Miller

Terry Lynn Miller and William McMann were married April 2, 1983, at 2 o'clock in the afternoon in a double ring ceremony at the Cummings Creek Victory Chapel on Watoga Road.

The bride is the daughter of Mr. and Mrs. William Buzzard, of Huntersville, and the bridegroom's parents are Mr. and Mrs. Lee McMann, of Marlinton.

The Rev. Norman Alderman performed the ceremony. Wedding music was provided by Mrs. Norman Alderman.

The bride wore a formal gown of blue silk trimmed with lace. She carried a bouquet of blue flowers with baby's breath.

Kathleen Gladwell, of Trout, sister of the bride, served as matron of honor. She was attired in a peach full length silk gown and carried a white carnation. The bridesmaid was Dorothy Morgan, of Hillsboro. She wore a lavender full length silk gown and carried a white carnation.

Flower girls were Pamela

W. H. BARLOW,

Sheriff Pocahontas County

The ruling was announced last Tuesday in the Pocahontas County Courthouse, following nearly 11 hours of testimony by witnesses on both sides of the issue.

Thomas Michael, chair of the appeals court board, said the board based its ruling mainly on concern over the aesthetic values of the area, and the quarry's impact on the tourism industry. Michael emphasized that the board did not mean to imply that the area is unsuitable for mining operations, however. Testimony by witnesses concerning the proposed quarry's potential for negative impacts to surrounding areas, such as increased dust, noise or declining property values, were not a factor in the decision, he said.

In its appeal, Waco's key witnesses testified that the mining company had worked closely with DEP officials in filing the application over the last few years, and had made all the modifications recommended by the state agency.

One Waco witness said the appeal permit was "technically complete" and another said that a top DEP permitting official had led Waco to believe that the permit would easily be approved. Waco attorney, Leonard Knee said DEP's decision to deny the permit was based on emotional testimony by Pocahontas County residents during a public hearing last March.

"It was a subjective, rather than an objective decision," Knee said.

Thirty people spoke at the public hearing in March, and many submitted letters—all in opposition to the proposed quarry. They said a 30-year [illegible] noise and dust, and would bring increased truck traffic to the [illegible]

[illegible] that the public hearing had been the first one he had ever attended. Crum testified he was impressed by the thoughtful and specific concerns of the speakers, in what he considered a "well run" public hearing. Crum said resident's comments were "earnest and heart felt."

"If I end up with property, you guarantee I'll something with Ike Morris, Wa

But he repeatedly denied Waco claims that DEP's decision was based on public sentiment, or that the agency considered the quantity of people opposed to the quarry in making its decision.

Next, they questioned Stephen Holloway, a land manager for Waco. Holloway described an April 11 meeting at the quarry site with Stern, in which Stern allegedly assured him that the permit would "breeze through." Holloway said he therefore didn't believe any changes were needed in the permit application, or that any responses to the public concerns were necessary.

Holloway had taken 10 photographs depicting timber clear-cuts and sawmill sites in the area, which were entered into evidence.

Would you characterize this area as "pristine?" asked Waco attorney Eric Calvert, afterward.

"No," Holloway said.

Waco's star witness however, was Hugh Hefner, a prospector and expert in geology and hydrology, who found the quarry site for Waco. Hefner purchased the 250-acre site himself in May, 2000, before selling it to Waco a month later. Hefner said he purchased it because Waco was more interested in finding a limestone quarry at the time, so he bought

bouquet of blue flowers with baby's breath.

Kathleen Gladwell, of Trout, sister of the bride, served as matron of honor. She was attired in a peach full length silk gown and carried a white carnation. The bridesmaid was Dorothy Morgan, of Hillsboro. She wore a lavender full length silk gown and carried a white carnation.

Flower girls were Pamela Miller, daughter of the bride, and Lisa Gladwell, niece of the bride.

Best man was Paul Poage, of Marlinton. Usher was Jess Heavner, of Trout.

After the ceremony a reception was held at the church. The couple now resides in Hillsboro.

Birthday

Tamara Sue McLaughlin celebrated her first birthday on October 20, 1983. She is the daughter of Mr. and Mrs. David McLaughlin, of Jamestown, Pa. Tammy has two brothers, Jeffrey and Kenny. The grandparents are Mr. and Mrs. Clifford Ralston, Jamestown, Pa., and Mr. and Mrs. Lynn McLaughlin, of Dunmore.

VOLUME XI

MARLI

Last week was a busy one for the basketball teams of the local high school. Three games, two by the boys and one by the girls, featured the weeks docket.

On Thursday the lads from Mill Creek came down and succeeded in taking the local boys into camp by a 32 to 17 score. Up to the final period the game was a "nip and tuck" affair with the visitors leading throughout by a scant margin of points. The score at the end of the first quarter stood 6 to 5; at the half 13 to 11; and at the close of the third period 18 to 15. But at the beginning of the final canto, Don Carr, the big gun of the visitors cut loose and a regular scoring melee ensued. Before the dazzling attack of the visiting quintet could be stopped they had gained sufficient margin to win by the apparently seemingly easy score. The home boys were not able to register a single field goal in thsi period.

Carr was the individual high point scorer with six double deckers and two single tallies from the charity zone, for a total of fourteen points. Close behind him was his team mate Ickes, with five field goals to his credit for a total of ten.

"Bus" Edgar, of the local quint, garnered second honors with four baskets from the field and one foul toss for a total of nine points.

BIRTHDAY PARTY

Misses Edith and Ethel Smith celebrated their sixteenth birthday at their home on Lower Camden last Friday night, February 17th. Those present were: Misses Edith and Ethel Smith, Ruby Withrow, Maudeline Moses, Orda and Leila Hill, Annas Cole, Mary Richardson, Ethel and Mildred Cunningham, Gwenivere Jordan, Thelma Holesapple and Messrs. Paul and Silas Sharp, "Fatty" Dilley, Forrest Moss and Robert Barlow. Games were played, after which delicious refreshments were served. A good time was had by all.

The huge edifice which will house the operations of the local plant of the United States Leather Company is rapidly nearing completion. In many respects the new structure will outclass the old plant in both size and convenience to the personnel.

"Time and progress changeth the order of all things", an old adze of long standing has again been proven in the assembling of the equipment. The new tannery when complete will be equipped with the most modern machinery which has been developed by the tanning industry. The previous steam driven engines which furnished power to drive the machines have been abandoned for the new powerful electric engines. The new plant is arranged so as to secure the maximum production at the minimum expenditure of human energy. The machinery is being received every day and practically all of it is on the road headed for its destination.

According to the statement issued by Mr. S. N. Heuch, the plant will begin actual production of leather April 1st. Whether an increase personnel and production will made is unethentic.

concerning
the proposed quarry's potential for negative impacts to surrounding areas, such as increased dust, noise or declining property values, were not a factor in the decision, he said.

In its appeal, Waco's key witnesses testified that the mining company had worked closely with DEP officials in filing the application over the last few years, and had made all the modifications recommended by the state agency.

One Waco witness said the appeal permit was "technically complete" and another said that a top DEP permitting official had led Waco to believe that the permit would easily be approved. Waco attorney, Leonard Knee said DEP's decision to deny the permit was based on emotional testimony by Pocahontas County residents during a public hearing last March.

"It was a subjective, rather than an objective decision," Knee said.

Thirty people spoke at the public hearing in March, and many submitted letters—all in opposition to the proposed quarry. They said a 30-year quarry operation would decrease resident's property values, would create noise and dust, and would bring increased truck traffic to the pristine, rural area. It also could be detrimental to Knapps Creek, a popular fishing spot, and would hurt tourism, residents said.

Waco attorneys questioned Ron Sturm, the DEP permit supervisor who ran the public hearing last March, about the state's reason for decision was based on public sentiment, or that the agency considered the quantity of people opposed to the quarry in making its decision.

Next, they questioned Stephen Holloway, a land manager for Waco. Holloway described an April 11 meeting at the quarry site with Stern, in which Stern allegedly assured him that the permit would "breeze through." Holloway said he therefore didn't believe any changes were needed in the permit application, or that any responses to the public concerns were necessary.

Holloway had taken 10 photographs depicting timber clear-cuts and sawmill sites in the area, which were entered into evidence.

Would you characterize this area as "pristine?" asked Waco attorney Eric Calvert, afterward.

"No," Holloway said.

Waco's star witness however, was Hugh Hefner, a prospector and expert in geology and hydrology, who found the quarry site for Waco. Hefner purchased the 250-acre site himself in May, 2000, before selling it to Waco a month later. Hefner said he purchased it because Waco was more interested in finding a limestone quarry at the time, so he bought it himself, believing he could test the soil for sandstone, and later convince Waco to buy it.

Hefner also gave detailed testimony about how he designed the quarry site to minimize its impact on surrounding areas. The quarry areas were placed far back, out of sight,

and farther away from the nearest stream than required, he said. Hefner explained how reclamation would take place in stages, as soon as a particular area had been mined.

Fast-growing seeds would be used, which would grow in just 14 days, he said. Surface vegetation also would be removed only a month or two before a new area was opened to extraction, Hefner said.

The quarry would only be visible from two of the 14 properties within 1500' of the quarry, he said. It also would only be visible from a few locations along the nearby roads. Only 19 trucks a day would be used during the peak summer season, increasing traffic along Rt. 39 by merely 1.25%, he said. The dust levels also would be lower than at a typical limestone quarry, due to the rock's hard make-up Hefner said

Using a textbook graph on industrial noise, and how it decreases over distances, Hefner said nearby property owners or people fishing in the creek would hardly hear the rock crusher. He said from a distance, it would sound like standing next to a refrigerator.

"You're saying that at 250 feet

the

Hefner that it had already made an $1.3 million agreement with West Virginia Paving to transfer the quarry property by May, 2003, upon approval of the permit.

Clarke then called Waco owner Ike Morris to the stand. Morris confirmed that Waco contracted to transfer the quarry permit to the paving company just 20 days prior to applying for the permit. Morris said he couldn't remember the exact figure, but agreed that Waco did stand to "lose a sizable sum" if the deal didn't go through.

"If I end up with this property, you can guarantee I'll do something with it," Morris added.

DEP had a host of local witnesses on hand to testify that they believed the quarry would hurt their quality of life, their businesses and the tourism industry.

These included County Commission President Joel Callison, and Gail Lowry, executive director of the Pocahontas County Convention and Visitors Bureau.

Callison testified that tourism is the only growing industry growing in the county, and the only industry with real promise of growth in the future. The county commission supported Waco's "pretty" quarry at Snowshoe and a recent expansion of an existing quarry at Hillsboro, he said. It wasn't easy to oppose anoth-

Rifleman Medal at the ceremony. David is now in Airborne School at Ft. Benning. Georgia. After his leave, he will be serving on an 18-month tour of duty in Vicenza, Italy, with the 325th Airborne Unit. David is the son of George and Diane Liptak, of Arbovale.

Men's Bowling

The Marlinton Mavericks bowled on Tuesday night against the Zu Lose team. Marlinton had a new sub that bowled, George Broce. The Mavericks split for the night, 2 wins, 2 losses, which was once again good, as the opponent was a good team. Bev Kenney came through with a game of 236 and a set of 568. Jay Kniceley had a set of 373. Reid Mitchell had a set of 403. George Broce had a set of 380 and Jim Mason had a set of 488.

For the benefit of those who may not know what a

to 7 in the visitors favor. Marlinton came back strong in the third period to tie the score and gained a two point lead. In the final minutes of play Ronceverte registered again from the field to deadlock the score at 20 all, and coupled with a toss gave them the winning tally. Both teams performed stellarly on the defense.

"Bunny" Hill, Marlinton forward, was the outstanding luminary of the fray by reason of her deadly accuracy in tossing baskets. She was the high scorer of the game, making 15 of the 20 points scored.

Chandler was the outstanding star for the Greenbrier bevy, scoring 4 goals from the field in addition to 3 foul tosses.

Our boys were decidely "off color" that night and were trampled rather heavily; they were able to gather only seven points to the invader's thirty-six. The Ronceverte took the lead at the very start of the game and had it prety much their way throughout.

One of the largest wildcats seen in this part of the country for a number of years was brought in last week by French Moore. The big cat was caught in a trap on the back of Mar- Mountain, on Knapps Creek. The intention was to bring it in alive; but finding it so as to transport it with safety the cords were apparently drawn too tight and the cat was strangled to death. The pads of the feet were exceedingly large; leaving a track in the snow as large as those of a fair size dog. The pelt was purchased by Dempsey Johnson who intends to have it worked into a rug.

025 over the corresponding fiscal period the year before.

POCAHONTAS MEMORIAL HOSPITAL

Mrs. Mollie Ruckman of Millpoint, who has been confined to hospital for two months with fracture of hip is able to be up and walk some by help of crutches. She expects to leave the hospital Wednesday.

James East, small son of Everett East of Durbin, who underwent an operation following pneumonia was able to be removed to his home Tuesday.

Arnol Sheets, young son of G. A. Sheets of Cass, who was operated on for empyema was discharged from hospital Tuesday.

Mrs. Hannah Dolan of Millpoint, was re-admitted to hospital Monday for treatment.

Miss Grace Waugh of Marlinton, was operated on Thurday for appendicitis. She is getting along nicely.

Silas Kennedy of Marlinton continues to improve. Will soon be able to leave hospital.

Mr. Wooddell of Marlinton, who sustained compound fracture of left leg is making a nice recovery.

Mrs. John T. Nelson who underwent an operation for appendicitis two weeks ago, will soon be able to go home.

Mrs L. C. McCutcheon, wife of Fr. McCutcheon. of Greenbank, was admitted to hospital Sunday for treatment.

Miss Mabel Lang, of Marlinton, who was operated on for appendicitis last Wednesday is making a nice recovery.

Mrs. Geo. Geiger of Marlinton was admitted to hospital last Wednesday for treatment and possibly an operation.

Miss Bessie Hefner of Hillsboro, who is recovering from operation for appendicitis will soon be able to sit up.

Mrs. Quincy Scott of Hillsboro was sent to hospital by Dr. McNeel Tuesday to be operated on for appendicitis

---

At the Kiwanis Club last Friday night, the speaker was Prof. G. D. McNeill. He entertained by telling some experiences and exploits of his service in the United States Navy.

County, willow baskets from Wayne hooked rugs from Barbour and Mon ongalia, needlework rugs from Braxton, jams, jellies and pickles from Harrison and Barbour, weaving from Randolph, Preston and Jackson's Hill, fireside stools from Lewis, maple sugar and syrups from Pocahontas and walnut kernels from Webster.

The students kept the shop open a week prior to the Christmas holidays during hours when not in class and it has been well patronized by faculty and students.—Farm Bureau News.

MACHINISTS WANTED

The Recorder-Labor Board, Navy Yard, Washington, D. C., is receiving applications for the position of machinists, the rate of pay for the position being $6.08, $6.48, $6.88 per diem, depending upon the qualifications of the appointee. Persons interested in the examination should at once apply for Form 1800, stating the title of the examination desired, to the Recorder at the above address. Applications should be properly executed and promptly filed with the Labor Board. Applicants are not required to report for examination at any place, the examination being rated on physical ability and training experience.

B. B. Williams,
Sec. Local Board Civil Service.

PRICE IS DELEGATE-AT-LARGE

Dr. Norman R. Price filed his declaration with the Secretary of State last week as Delegate-at-Large to the Democrat National Convention, and in filing he gave as his choice for the Presidential nomination Governor Al Smith, of New York.

Miss Leone Oliver, of Greenbank, and Miss Jessie Brown Beard, of Bartow, were guests at the home of Mr. and Mrs. Tate Hiner over the weekend.

Mrs. James Holesapple and son, Ralph, have returned to their home at Woodman after spending some time here at the home of Mr. and Mrs. E. G. Holesapple.

1500' of the quarry, he said. It also would only be visible from a few locations along the nearby roads. Only 19 trucks a day would be used during the peak summer season, increasing traffic along Rt. 39 by merely 1.25%, he said. The dust levels also would be lower than at a typical limestone quarry, due to the rock's hard make-up Hefner said

> end up with this erty, you can antee I'll do ething with it"- lorris, Waco

Using a textbook graph on industrial noise, and how it decreases over distances, Hefner said nearby property owners or people fishing in the creek would hardly hear the rock crusher. He said from a distance, it would sound like standing next to a refrigerator.

"You're saying that at 250 feet from the crusher, the noise would be less than a refrigerator?" commented Michael. "I find that hard to believe!"

"We've all heard a chain saw from 1000 feet," chimed in Paul Nay, another mine board member.

DEP attorney Tom Clarke cross-examined Hefner, and asked him to recalculate the number of trucks that would be used to transport 300,000 tons of sandstone a year to a purchaser.

Dividing the number of days the company would be in production each year by the amount of load the trucks could carry, Hefner came up with a new figure of 167 truckloads per day, on average, rather than the 19 trucks at peak season that he had earlier testified.

go through.

"If I end up with this property, you can guarantee I'll do something with it," Morris added.

DEP had a host of local witnesses on hand to testify that they believed the quarry would hurt their quality of life, their businesses and the tourism industry.

These included County Commission President Joel Callison, and Gail Lowry, executive director of the Pocahontas County Convention and Visitors Bureau.

Callison testified that tourism is the only growing industry growing in the county, and the only industry with real promise of growth in the future. The county commission supported Waco's "pretty" quarry at Snowshoe and a recent expansion of an existing quarry at Hillsboro, he said. It wasn't easy to oppose another quarry, which might provide local jobs, Callison explained, but tourism growth benefits the entire county.

Lowry told the board Pocahontas County is considered among the most pristine areas in West Virginia. An estimated 900,000 people visit Pocahontas County each year, she said. Last year tourism generated $20 million in lodging dollars plus $1.2 million in sales taxes on those dollars; and $600,000 in hotel, motel taxes for the county.

Rt. 39, which runs past Browns Mountain, has been given a state "Scenic Byway" designation for its very appealing qualities, which includes undeveloped mountain views, creeks, and historical places of interest, she said. Virginia and West Virginia also have agreed to

LAME PAW

This photo is of the bear, "Lame Paw," and the group of bear hunters who killed him in June 1924. The bear was a noted sheep killer in the Elk River Country until shot. The story of Lame Paw and the final hunt was in the Hunting Supplement to this paper, October 14, 1982, issue.

The picture was sent in by Dorothy Tacy, of Cass.

Front row, Charlie Tacy; back row, Dallas Tacy, Charlie Sheets [fourth one on back row]; man with long white beard, Old Man Gibson.

POCAHONTAS GIRL LEADS

Montgomery, W. Va.—Miss Reta Rexrode of Minnehaha Springs, Pocahontas county, a student in New River State School has the unique distinction of having made 5 A's on her first semester examination at that institution. Miss Rexrode's record is without parallel at that school. She is the first student to make "A" grade on five subjects This is all she is carrying. She is a graduate of the Edray District High School, Class of 1927. She has also the further distinction of having graduated at the head of her class.

In addition to the above mentioned honors the current edition of The New River State Collegian mentions Miss Rexrode as having been awarded second honor prize for having the second best theme paper in the English Composition course during the first semester. The prize was offered by Dr. House, Professor of English, at New River State College.

SLIDELL BROWN GONE WRONG

All our life we have poked fun at

ing next to a refrigerator.

"You're saying that at 250 feet from the crusher, the noise would be less than a refrigerator?" commented Michael. "I find that hard to believe!"

"We've all heard a chain saw from 1000 feet," chimed in Paul Nay, another mine board member.

DEP attorney Tom Clarke cross-examined Hefner, and asked him to recalculate the number of trucks that would be used to transport 300,000 tons of sandstone a year to a purchaser.

Dividing the number of days the company would be in production each year by the amount of load the trucks could carry, Hefner came up with a new figure of 167 truckloads per day, on average, rather than the 19 trucks at peak season that he had earlier testified.

Addressing another of Clarke's questions, Hefner admitted that he had asked DEP inspectors to visit the site with vehicles without government license plates for their security. He said he had previously "encountered hostility" by protesters.

Residents say Waco was deliberately secretive prior to applying for a permit in order not to generate adverse public opinion. They say Waco published its 30-day public hearing notice for its permit application just before Christmas weekend, for example, when it might have been overlooked.

Testimony also revealed that Waco apparently did not inform

an existing quarry at Hillsboro, he said. It wasn't easy to oppose another quarry, which might provide local jobs, Callison explained, but tourism growth benefits the entire county.

Lowry told the board Pocahontas County is considered among the most pristine areas in West Virginia. An estimated 900,000 people visit Pocahontas County each year, she said. Last year tourism generated $20 million in lodging dollars plus $1.2 million in sales taxes on those dollars; and $600,000 in hotel, motel taxes for the county.

Rt. 39, which runs past Browns Mountain, has been given a state "Scenic Byway" designation for its very appealing qualities, which includes undeveloped mountain views, creeks, and historical places of interest, she said. Virginia and West Virginia also have agreed to jointly establish the "Mountain Water Scenic Byway" for Rt.39, which extends into Bath and Rockbridge counties in Virginia.

The additional trucks along 39 and the unsightly nature of a quarry, visible from the road, would ruin the aesthetic quality of the route, making claims about its pristine quality untrue, she said.

"Those of us in the tourism industry would hate to see that quarry put in," Lowry added.

Waco officials did not return phone calls inquiring about the company's intent to appeal the board's decision to circuit court.

costs rise as claims increase

ADKISON DELEGATE-AT-LARGE

D. C. Adkison, clerk of the Pocahontas County Circuit Court, filed his declaration of candidacy for Delegate-at-Large to the Republican National Convention from the 6th congressional district Monday. Mr. Adkison is a well-known member in the Republican camp in this section, and is the first to announce his aspirations. It was not learned whether or not he filed for any particular candidate for President.

Magistrate Court

John M. Cahill, of Milton, was arrested on Monday of last week by Deputy Darrell S. C. Tatum and charged with reckless driving. He was released the next day on $500 bond.

Jerry L. Kee, Sr., of Marlinton, appeared before Magistrate Kathy Beverage on Tuesday on a charge of possession/delivery of a controlled substance and entered a plea of no contest. He was sentenced to six months in jail and fined $100 with $125 in court costs. The jail time was suspended and Kee was placed on probation for six months. The charge was filed by Prosecuting Attorney Walt Watson.

Arnold R. Schoenrath, of Marlinton, was found guilty of public intoxication and consuming alcohol under age 21 by Magistrate Beverage following a hearing on Wednesday. He was sentenced to 48 hours in jail on the consuming offense. Fines came to $60 with $250 in court costs. He was found not guilty of possessing a controlled substance.

Carl C. Pyle, Jr. and Lucas M. Warner, both of Rupert, were arrested on Thursday by Conservation Officer M. E. Shinaberry on game violation charges. Pyle was charged with killing a deer out of season. He entered a no contest plea to the offense in Magistrate Beverage's court and was sentenced to ten days in jail with a fine of $100, court costs of $115, and replacement fee of $200. Warner was charged with spotlighting with a firearm. He pled guilty and was also sentenced to ten days in jail and fined $100 with $115 in court costs.

King E. Thayer, of Abingdon, Virginia, appeared before Magistrate William Hevener on Monday and pled guilty to the possession of less than 15 grams of marijuana. He was placed on probation for six months and assessed $115 in court costs. The charge was filed by Conservation officer D. J. Webb.

Commission's insurance costs rise as claims increase

By Pamela Pyle

The Pocahontas County Commission spent most of its time Friday discussing ways to curtail rising insurance premiums, having 21 claims since 1994 have resulted in costs of over $1.5 million.

Although several lawsuits, including one filed against several county officials by Sarah Boyd, the most ever contested and won decision of the 1983 Rainbow Hardware, have no conclusion yet, premium hikes have propelled the Board of Risk's costs and in turn, the commission's premiums.

With those premiums up to $97,000 from $45,000, the commission saw a 16% increase last year and will see at least that much again this year.

The Board of Risk covers fire, vehicles, property damage and wrongful acts, but does not include costs for employee health benefits and flood insurance.

In order to keep the county's costs as low as possible, the commission will establish a policy and procedure manual that will be reviewed and revised annually and set law enforcement standards that will include employee procedure.

Sheriff Bob Alkire told the commission he already has these manuals for the tax office, law enforcement and the jail.

Alkire said he could not put these policies out for public comment in total because of safety issues involved.

Alkire and Commissioner Ken Griffith will work together to develop a manual for the county.

Griffith noted that most of the cost the Board of Risk had involved was attorney fees.

The sheriff stated that all accidents involving law enforcement vehicles, with one exception, she involved deer.

Sheriff's department vehicles were the topic of another item on the commission's agenda.

Local businessman David Cox complained to the commission about the disposal of two Sheriff's vehicles, a Chevrolet S-10 Blazer and a 1990 Pontiac.

Cox said the latter vehicle was worth more than $4,000, according to a price cut he obtained from the assessor's office. The car was sold to a county employee for $800.

He asked the commission what safeguards were in place to prevent this happening again, since, Cox said, "it looks to the public like you're cheating the public out of its money."

Commission President Joel Callison said that, from now on, the commission will sell property at auction on the court house steps.

The commission can sell property worth less than $1000 without an auction.

Alkire noted that the last five vehicles, three of them from the previous sheriff's administration, were sold to county employees.

"The [Pontiac] was not worth $4000, I can tell you that," the sheriff said.

The sheriff said the car had more than 130,000 miles on it when it was sold.

Alkire told the commission a car dealer offered him $800 for the car as a trade-in. A county employee paid that amount.

Humane Society member Lesley McCarty followed up on the idea of a task force to study animal control problems and animal welfare issues in Pocahontas County.

McCarty suggested the task force include a representative from the county commission, mayors/police of Marlinton, Hillsboro and Durbin, sheriff's department, prosecuting attorney's office, humane society, animal control officer, Farm Bureau, assessor's office and the Board of Health.

McCarty said she wanted the task force to be an arm of the county commission, but Callison said he'd like for the humane society to take the lead.

The commission appointed John Simmons to be its representative on the task force.

Vivian Stewart will help convene the task force. Stewart has a background in personnel management and has facilitated team-building groups. She will not be a voting member of the task force.

The humane treatment of animals topic continued as Chief Deputy Craig Doss told the commission he would be going out on a "horse complaint."

Doss asked the commission for direction, since the county is involved in a law suit concerning confiscated horses.

A veterinarian will accompany Doss to the site and the deputy said he plans to leave the horse where it is if it can be treated.

McCarty said one horse has already died there.

"I believe it starved to death," she said. "It's not like this horse was out to be in danger."

The humane society has received many complaints, she said.

Griffith told Doss to document the visit and make sure the owner receives written notice of a seizure before confiscating the horse.

Doss and the commission will seek the advice of Prosecuting Attorney Walt Watson before removing the horse.

The commission transferred two parcels of land at East Fork Industrial Park to the Greenbrier Valley Economic Development Corporation. The parcels are .61 and 1.1 acres, respectively, and will be used by Sun Propane and possibly

Commission's insurance costs rise as cl

by Pamela Pritt

The Pocahontas County Commission spent some of its time Friday discussing ways to curtail rising insurance premiums, because 23 claims since 1998 have resulted in costs of over $1.5 million.

Although several lawsuits, including one filed against several county officials by Jacob Beard, the man once convicted and once acquitted of the 1980 Rainbow Murders, have no resolution yet, attorney fees have propelled the Board of Risk's costs and in turn, the commission's premiums.

With those premiums in an upward spiral from $45,000, the commission saw a 16% increase last year and will see at least that much again this year.

The Board of Risk covers fires, vehicles, property damage and wrongful acts, but does not include costs for employee health benefits and flood insurance.

In order to keep the county's costs as low as possible, the commission will establish a policy and procedure manual that will be reviewed and revised annually and set law enforcement standards that will include employee procedure.

Sheriff Bob Alkire told the commission he already has those manuals for the tax office, law enforcement and the jail.

Alkire said he could not put those policies out for public comment in total because of safety issues for the deputies.

Alkire and Commissioner Reta Griffith will work together to develop a manual for the county.

Griffith noted that most of the cost the Board of Risk had assumed was attorney fees.

The sheriff noted that all accidents involving law enforcement vehicles, with one exception, also involved deer.

Sheriff's department vehicles were the topic of another item on the commission's agenda.

Local businessman David Cain complained to the commission about the disposal of two Sheriff's vehicles, a Chevrolet S-10 Blazer and a 1996 Pontiac.

Cain said the latter vehicle was worth more than $4,000, according to a print out he obtained from the assessor's office. The car was sold to a county employee for $800.

He asked the commission what safeguards were in place to prevent that happening again, since, Cain said, "it looks to the public like you're cheating the public out of its money."

Commission President Joel Callison said that, from now on, the commission will sell property at auction on the court house steps.

The commission can sell property worth less than $1000 without an auction.

Alkire noted that the last five vehicles, three of them from the previous sheriff's administration, were sold to county employees.

"The [Pontiac] was not worth $4000, I can tell you that," the sheriff said.

The sheriff said the car had more than 130,000 miles on it when it was sold.

Alkire told the commission a car dealer offered him $800 for the car as a trade-in. A county employee paid that amount.

Humane Society member Leslee McCarty followed up on the idea of a task force to study animal control problems and animal welfare issues in Pocahontas County.

McCarty suggested the task force include a representative from the county commission, municipalities of Marlinton, Hillsboro and Durbin, sheriff's department, prosecuting attorney's office, humane society, animal control officer, Farm Bureau, assessor's office and the Board of Health.

McCarty said she wanted the task force to be an arm of the county commission, but Callison said he'd like for the humane society to take the lead.

The commission appointed John Simmons to be its representative on the task force.

Vivian Stewart will help convene the task force. Stewart has a back ground in personnel manageme and has facilitated team-buildi groups. She will not be a voti member of the task force.

The humane treatment of anima topic continued as Chief Depu Craig Doss told the commission h would be going out on a "hors complaint."

Doss asked the commission fo direction, since the county is in volved in a law suit concernin confiscated horses.

A veterinarian will accompany Doss to the site and the deputy sai he plans to leave the horse where is if it can be treated.

Durbin Rail Line

No major developments have occurred concerning the future of rail service to Durbin in the past several weeks that we are aware of. As reported previously, the Chessie System has applied to the Interstate Commerce Commission for authority to abandon West Maryland Ry. line into Durbin. It is expected that the ICC will grant the railroad's request due to the low level of traffic. As we outlined several weeks ago, Chessie has made two proposals to the West Virginia Department of Natural Resources on ways to maintain a rail link for the Cass Scenic Railroad as well as service to the customers at Durbin.

A talk with a DNR official last week indicated the Department has not decided how to respond to the offers made by Chessie.

The Board of Directors of the W. Va. Railroad Maintenance Authority met last Saturday and voted to support the DNR's position in the matter, whatever that may turn out to be, according to Don Baker, Executive Director of the department habitually inflates repair costs by "gold plating," or designing the repair as if a state-of-the-art new structure was required. I do not know precisely what is needed there, but an independent assessment should be made.

DNR would NOT need to go into the "railroad business" legally to operate that line and move the tannery traffic. They would not need to come under ICC rules, and they can easily avoid problems with railroad retirement rules. This is simply achieved by being a "contract" carrier terminal property, not a common carrier. There are dozens, even hundreds, of examples of this nationwide. In fact, when West Virginia purchased the 17 miles from Cass to Durbin in 1978 (for $600,000 which was the appraised value of the track material alone), DNR agreed and it is in the ICC records as confirmation, that they would haul any freight from Durbin to Cass for a fixed charge.

✳Citizens National Bank
Veterans' Day
Monday,

Department has not decided how to respond to the offers made by Chessie.

The Board of Directors of the W. Va. Railroad Maintenance Authority met last Saturday and voted to support the DNR's position in the matter, whatever that may turn out to be, according to Don Baker, Executive Director of the WVRMA.

Tom Morrison, Superintendent of the Howes Leather Company tannery at Frank, reports that the company is concerned about the loss of rail service although it should not affect the future of the plant. He said the company is considering unloading rail cars of hides at either White Sulphur or Cheat Bridge, if the line to Durbin goes out. The tannery is presently receiving a little less than half of its hides by rail.

The following letter has been received concerning the Durbin line from John Killoran, former Executive Director of the WVRMA:

I have followed with interest the progress of the abandonment action by the Chessie System regarding the Durbin Branch of Western Maryland, and the C&O tracks from Durbin to Bartow.

In the October 6 issue of the "Times" (which takes two weeks to reach Alaska by U.S. Mail!!) your article

wide. In fact, when West Virginia purchased the 17 miles from Cass to Durbin in 1978 (for $600,000 which was the appraised value of the track material alone), DNR agreed and it is in the ICC records as confirmation, that they would haul any freight from Durbin to Cass for a fixed charge. This is precisely what Barry Blank and Chessie envision for the Durbin branch. There is no way, properly executed, that DNR would become exposed to any of the pitfalls you noted in your paper. The state railroad authority has competent legal counsel available, expert in federal transportation law, to assist DNR in insuring this.

The matter is more precisely the fact that DNR, unless they have undergone a major policy level change since early June, does not want any more railroad tracks. They have a logical case in noting that they are a resource agency, not a rail agency. The rail authority, however, could arrange to assist them in operations, or in finding a third party carrier who could pull the trains as necessary.

The costs in this project are long term, not immediate. I would caution you that in time (perhaps after five years) the tracks will need substantial maintenance attention, and the

SPECIAL PRESBYTERIAN SERVICE

On next Sunday evening, the service at the Presbyterian Church will vary considerably from the usual program. It will be a song service, primarily, interspersed with scripture texts, both together depicting the life and experience of the Christian from the time of conviction of sin until he is face to face with his reward. Most of the hymns used will be familiar and the congregation will be called upon to assist in their singing. There will also be a variety of hymn singing by the choir. The public is cordially invited to attend and participate in the service.

To the Voters of Pocahontas Co.:

I hereby announce myself a candidate for the office of Sheriff of Pocahontas County, subject to the action of the Democratic party in the Primary election. The support of the voters will be appreciated.

J .ELMER MOORE.

Commission, from page 2

the Northern Pocahontas County Health Clinic.

PEPCO has decided not to pursue a power project at East Fork Industrial Park; however, one of its former engineers now in business for himself will take on an energy project there.

Bill Rexrode was appointed to the County-wide Public Service District. Commissioners will ask boards to send reappointment recommendations well in advance of an expiration date. The commissioner will no longer make retroactive reappointments.

Rexrode's term expires December 31, 2005.

The commission met Friday because its regular meeting date, Tuesday, was election day. It meets again in regular session November 19 at 9 a.m. in the courthouse.

ponsor a big
from October
ary 31, 1984,

with interest the progress of the abandonment action by the Chessie System regarding the Durbin Branch of Western Maryland, and the C&O tracks from Durbin to Bartow.

In the October 6 issue of the "Times" (which takes two weeks to reach Alaska by U.S. Mail!) your article details possible options and actions which Chessie System and/or the State of West Virginia might consider in order to retain service to northern Pocahontas County.

From 1975 until June of this year I was the Executive Director of the West Virginia Railroad Maintenance Authority, which is charged with state government assistance in abandonment cases. As such the potential abandonment of this line was a major topic as early as last winter. From this perspective, I might add some information which you and the citizens of Pocahontas County might wish to consider.

First, the Chessie System is concerned about the loss of service to the county, and particularly to the Cass Scenic Railroad. The fact that freight traffic on this 25+ mile branch line has dropped so drastically left them no choice. Their offer

operations, or a leasing to a third party carrier who could pull the trains as necessary.

The costs in this project are long term, not immediate. I would caution you that in time (perhaps after five years) the tracks will need substantial maintenance attention, and the tunnel should require work. Proof that it can be postponed is that DNR—except for work occasioned by rock slides or washouts—has done almost no repair work at all on the 17 miles from Cass to Durbin since they began operating over it five years ago.

As in any public issue there is no clear right or wrong and both sides have merit. Yet, the fact that West Virginia has almost 23 years of support behind it in acquiring the Cass Railroad and operating it leaves many millions of tax dollars exposed to slow, certain atrophy; this is an incontrovertible fact which cannnot be ignored.

Because of a lack of public funding to improve the Cass Railroad, it is only a fragment of what it could be as an historical attraction and as a keystone of tourism in the state. As an orphan of the DNR because it is not a traditional outdoor recreation facility, it suffers from a double stan-

Commissioner of School Lands' Sale of Real Estate

Pursuant to authority vested in the undersigned by a decree of the Circuit Court of Pocahontas County, West Virginia, entered at the October term, 1927, in the chancery cause of State of West Virginia vs. John H. Cobb and others and 25 tracts of land, the undersigned Commissioner of School Lands for Pocahontas County, on

Tuesday, March 13, 1928,

commencing at 1 o'clock p. m. at the front door of the court house of said county in the Town of Marlinton, will sell at public auction to the highest bidder the following real estate, to-wit:

The mineral rights under and in 8032 acres of land situate in Little Levels district on the east side of the river, known at one time as the Maryland Lumber Company tract, which mineral rights were forfeited in the name of John T. McGraw estate.

The mineral rights in 2619 acres less 405 acres mineral rights prev iously sold in this suit, on the east side of the said Greenbrier river, in the Little Levels district, forfeited in the names of A. D. Williams and John Alexander.

A tract of 130 acres in the Huntersville district on top of the Allegheny mountain described in a deed of record in said county from P. L. Cleek and others to H. A. Holt and others, as 3128 acres, of which 3013 acres lie in Virginia, and 115 acres lie in West Virginia. The West Virginia part carried on the land books as 130 acres is the portion to be sold.

Terms of Sale: One third cash, and the residue on credit in two equal payments, due in two and four months, with interest, the purchaser executing notes with good personal security.

W. G. Lancaster,
Commissioner of School Lands.

SECRETARY OF STAT Joe Manchin rallies midd school students' interest voting Thursday at Mart ton. He also visited PC and Green Bank.

Unlike Democrats elsewhere in country, all the Democrats on Pocahontas County ballot for General Election came in as winners On Tuesday. The same cannot be said for the two proposed amendments to the state constitution - both were defeated by big margins by county voters. However, they both passed statewide.

In the only race at the county level for County Commission, James Spencer defeated the incumbent, Joe Taylorson. The Reform Party candidate for the Commission, Jerry Beverlin was a distant third. Also the federal officials up for election, Senator Jay Rockefeller and Randolph County to earn the other delegate position.

David Arrington was unopposed for Family Court Judge.

The 2464 voters who cast ballots make up about 47% of those registered.

The results given above are unofficial. The County Commission will meet on Tuesday of next week to canvas the ballots.

AIDS MONTH

From this perspecti... might add some infor... tion which you and the citizens of Pocahontas County might wish to consider.

First, the Chessie System is concerned about the loss of service to the county, and particularly to the Cass Scenic Railroad. The fact that freight traffic on this 25+ mile branch line has dropped so drastically left them no choice. Their offer of track materials to build a Spruce connection; or to sell the Durbin line at half-price to the state, is a fair one. I can tell you from experience that it is an unusual offer in this day and age.

I agree with you that the Spruce connection would be difficult to maintain. In addition, the right of way belongs to the Mower Lumber Company. That firm was approached by the Department of Natural Resources on several occasions while I was with DNR in the late 1960's and early 1970's with precisely this proposal. They were not interested because a) the old track roadbed is a logging road (and now part of the "Silver Creek" ski project area), and b) Mower has been less than eager to

dollars exposed to ... certain atrophy; this is an incontrovertible fact which cannnot be ignored.

Because of a lack of public funding to improve the Cass Railroad, it is only a fragment of what it could be as an historical attraction and as a keystone of tourism in the state. As an orphan of the DNR because it is not a traditional outdoor recreation facility, it suffers from a double standard that has consistently condemned it to a "half life." I fear that this trend has accelerated in recent years, due in part to the state's overall fiscal woes, and in part because of the failure of state government, DNR, and the general public to recognize that Cass is a genuine national treasure which should be carefully nurtured and preserved.

I hope that you, the citizens of Pocahontas County, and all who support Cass will heed this call to action and work to achieve a viable solution to retaining a rail connection, to serve the needs of the Durbin area, and to hopefully get Cass "back on track."

Sincerely,
John P. Killoran

uthority vested in me

N. C. McNEIL,
Special Commissioner.

I, D. C. Adkison, Clerk of the Circuit Court of Pocahontas County do certify that N. C. McNeil, special commissioner, has executed bond as required in the decree in this cause.
D. C. ADKISON, Clerk.

In the matter of water system bonds for the Town of Durbin, Pocahontas County, West Virginia:

At a meeting of the Council of the Town of Durbin, West Virginia, held on the 3rd day of November, 1927, an order was made and entered on record authorizing a vote to be taken by the legal voters of the Town of Durbin, upon the issuance and sale of Eighteen Thousand Five Hundred ($18,500.00) Dollars of bonds of said Town for Water system purposes, and directing that an election be held therein on the 17th day of December, 1927, for the purpose of determining whether or not said bonds should be issued.

The returns of said election held on that date, show that one hundred and fifty-one (151) votes were cast for, and sixteen (16) votes were cast against issuing said bonds: so that not less than three-fifths (3-5) of the voters voting in said election voted in favor of their issuance.

The Council of said Town of Durbin has caused to be transmitted to me a duly certified copy of all orders, proclamations, notices, advertisements, affidavits, and a record of all the proceedings connected with or pertaining to said bond issue. I have examined the same and it is my opinion that the said bond issue is regular, and all the proceedings in compliance with the law. I therefore approve the validity of said bonds as provided by Chapter 14 Acts of the Legislature, 1923 session.

HOWARD B. LEE,

CUT ACREAGE; FERTILIZE TO MAKE PROFIT

AMANDA ROSE GALFORD donated her long blonde hair to Locks of Love, an organization that makes wigs for patients who have lost their hair. It was 10-year-old Amanda's first-ever hair cut.

Lovely locks sent to Locks of Love

by Melanie Kimble

A 10-year-old with a lot of heart and a lot of hair made a donation to help someone else who is not so lucky.

Amanda Rose Galford has given the gift of self-esteem to a child that has lost her hair due to health problems.

"I decided to do this because I want to be able to make a sick little girl be able to smile when she looks into the mirror. I want to make her feel better," she said.

Amanda Rose found out about Locks of Love through a family friend.

Through Locks of Love a person can donate his or her hair to make wigs for people who have lost their hair due to health problems.

Locks of Love needs at least 10 inches of hair in order to make a wig.

Amanda Rose has never had her hair cut in her life. Her hair was past her waist. Karen Collins, of Karen's Snip and Curl in Bartow, measured a 12 inch ponytail to cut off and mail to the Locks of Love Organization.

She styled Amanda Rose's hair into a very attractive long bob.

Amanda Rose hopes to be able to find out which child has received the wig made from her hair and be able to contact her so they can become pen pals.

Amanda is the daughter of Mike and Rose Galford, of Frank, and the granddaughter of Ada Galford of Bartow, and Betty Defibaugh, of Durbin.

To get more information about Locks of Love you can visit their website at www.locksoflove.com or call their toll free number, 1-888-896-1588.

The Past 100 Years fro

THE GREENBRIER TANNERY.

—March 30, 1905

PREPARATIONS FOR TANNING

On a Large Scale—One of the Largest Plants in the Valley.

The United States Leather Company's tanning plant at Marlinton, the Greenbrier Tannery, is at last in operation; grinding bark, making liquors, and putting hides in soak preparatory to the making of leather some months hence.

Through the kindness of the efficient and ever accomodating book - keeper, Mr. J. W. Baxter we were shown through that part of the plant now in operation. Though the heat in the engine, drying and leaching rooms makes one perspire enough to cause the dust from the bark carriers to form a tan colored paste that is anything but agreeable and the odors of the hide

VARMENT WEEK

The following were awarded prizes as the high point men in the varment killing contest in Pocahontas County the week of February 10 to 15 by the Marlinton Rod and Gun Club at the Kiwanis Club last Friday night.

1. Robert Cromer, of Durbin, 1220 points—6 weasels and 2 red squirrels; Winchester shot gun by Rod and Gun Club.

2. Cliff I. Sharp, of Harter, 1185 points—6 foxes, 1 crow, 1 mink, 2 weasels, 2 hunting house cats, 1 red squirrel. Kamp stove by. Peoples' Store.

3. John Kelley, of Huntersville, 930 points—1 fox, 3 weasels, 1 hoot-owl, 13 red squirrels. Fishing rod by Kee's Drug Store.

4. W. L. Hogsett, of Seebert, 700 points—5 foxes, 1 mink, 1 owl. Hunting coat by Men's Shop.

5. Boyd Rexrode, of Durbin, 700 points—3 weasels and 1 mink. Automatic reel and line by Royal Drug Stores.

6. Willie Ruckman, of Millpoint, 475 points—1 fox, 1 weasel 1 owl, 5 hunting house cats. Hunting coat by C. J. Richardson.

7. Asa Wright, of Durbin, 410 points—2 weasels, and 1 red squirrel. Riding pants by H. Kelmenson.

8. Joe Halterman, of Greenbank, 400 points—2 weasels. Box cigars by Sharp & McLaughlin.

9. C. H. Simmons, of Slaty Fork, 300 points, 1 weasel and 1 mink. Two pair of heavy wool socks by Schuchat's Department Store.

Tolbert Carpenter, of Frost, 7 red squirrels, 1 weasel, 1 crow.

R. O. Hamrick, of Linwood, 1 weasel and 1 crow.

Howard Meeks, of Edray, 1 fox, 3 crows.

Joe Sheets, of Buckeye, 1 owl, 11 red squirrels.

Forest Burner, of Durbin, 1 weasel

Alfred Gay, of Edray, 1 fox, 2 hawks.

Floyd Baxter, of Cloverlick, 1 weasel.

Fred Beale, of Mace, 1 fox, 3 red squirrels, 1 hunting house cat.

The total number of varments reported were 134. Among these were 34 weasels, 25 foxes, 6 hawks, 4 owls. 7 minks, 9 hunting house cats and 39 red squirrels.

There were others killed that were not reported. This writer knows of one man who got two wild cats. It is thought that 200 would not be too high an estimate for the number put

MANGANESE

Nothing new to report this week about manganese. There have been no experts from a distance here that we have heard of. Manganese has been reported so often from so many states in the Union, that another field more or less does not cause a ripple of excitement.

It is just as well to wait awhile and see what time brings about. As soon as good touring days come, some of us want to go to the Valley of Virginia and see what the ore looks like there. About the richest ore found in the United States comes from there.

Augusta county was the most important manganese county in the United States according to Professor Watson's book dated in 1907. This was due largely, he says, to the Crimora mine, located two and a half miles from the town of Crimora. It was first worked in 1867. It had a bed of ore about 500 feet wide and 900 feet long. The ore was found like nuggets in a clay of the Cambrian era, which is below any exposure in Pocahontas County The ore is in lumps varying from the size of a pebble to chuncks weighing as much as 500 pounds each. It has been worked by digging through the clay and examining it for the nodules. At the time the book was printed there was a milling plant that looked like a coal tipple.

The latest feature of the output of Virginia is a government publication of the Bureau of Mines. It states that the entire shipments from Virginia for the year 1927 of manganese ore containing over 37 percent of manganese were 3212 long tons, which came from three counties, Bland, Frederick and Smyth.

Minnesota shipped near a million tons of ore that was above seven per cent manganese. This was manganiferous iron ore. Wisconsin shipped this kind of ore containing between five and six percent 284,470 long tons. These figures for 1927, the latest available.

In 1826, the world's production of manganese was 3,300,000 long tons of which Russia produced 40 per cent, India 31 per cent, Africa (Gold Coast) 11 percent. Russian ore is mostly pyrolusite having an ore that yields 45 to 50 per cent manganese. This compares in richness with the Michaels-Brown Mountain samples.

We have come to the conclusion that manganese ore is like sang, all to the good if you can get enough of

AMANDA ROSE GALFORD donated her long blonde hair to Locks of Love, an organization that makes wigs for patients who have lost their hair. It was 10-year-old Amanda's first-ever hair cut.

Lovely locks sent to Locks of Love

By Melanie Kimble

A 10-year-old with a lot of heart and a lot of hair made a donation to help someone else who is not so lucky.

Amanda Rose Galford has given the gift of self-esteem to a child that has lost her hair due to health problems.

"I decided to do this because I want to be able to make a sick little girl be able to smile when she looks into the mirror. I want to make her feel better," she said.

Amanda Rose found out about Locks of Love through a family friend.

Through Locks of Love a person can donate his or her hair to make wigs for people who have lost their hair due to health problems.

Locks of Love needs at least 10 inches of hair in order to make a wig.

Amanda Rose has never had her hair cut in her life. Her hair was past her waist. Karen Collins, of Karen's Snip and Curl in Bartow, measured a 12 inch ponytail to cut off and mail to the Locks of Love Organization.

She styled Amanda Rose's hair into a very attractive long bob.

Amanda Rose hopes to be able to find out which child has received the wig made from her hair and be able to contact her so they can become pen pals.

Amanda is the daughter of Mike and Rose Galford, of Frank, and the granddaughter of Ada Galford of Bartow, and Betty Defibaugh, of Durbin.

To get more information about Locks of Love you can visit their website at www.locksoflove.com or call their toll free number, 1-888-896-1588.

FIELD NOTES

James W. Workman, of Burnside, brought in six inches of a five/eighths augur bit. It was found in the middle of an immense sugar maple on the Sherman Clark farm near Hillsboro. The piece of steel just about ruined the power saw being used to cut down the tree. The stump was five feet five inches across. The butt log of 16 feet scaled 1,300 feet. As near as Mr. Workman could count, there have been around 120 annual growths since the augur was broken in boring the tree for sugar water. The tree was not much more than a foot in diameter at that now far distant day. Mr. Workman said it was interesting to check off the annual growth rings of this big old tree. Some years the ring would be wide, showing a fine growing season. Other rings would be crowded close together recording a series of bad years.

Talking about sugar trees, neighbor Burt Smith, the lumberman, was looking at the fine big maple sugar tree which stands in the street between his house and ours. It was planted forty odd years since. Two feet in diameter there is a lot of good, high value lumber in the butt cut. As for the top, it is so wide spread there are only cords of pulp and stove wood in the many long branches. This practical lumberman was moved to remark that if he and I had bought us some hundred or so acres of good sugar ground land on the rich Back Alleghanies a generation ago, and planted it in hard maple trees, thin enough to grow thrifty and thick

Though the heat in the engine, drying and leaching rooms makes one perspire enough to cause the dust from the bark carriers to form a tan colored paste that is anything but agreeable and the odors of the hide house and vat room are not anybody's geranium, a visit is well worth the time of those fortunate enough to secure a pass.

Two years ago the piling of bark was begun, and about eighteen months have elapsed since ground was broken for the immense buildings which are now such a feature of our landscape.

The capacity of the tannery is three hundred hides a day. The enormity of this output was discredited by a citizen of Greenbrier county, who asked the pertinent question where all these hides were to come from.

They are coming from somewhere at the rate of car loads daily and the large hide house, built entirely of concrete, with walls two feet thick, shelters thousands of them already. The

GAME NOTES

R. Ernest White and Hanson Moore, of Minnehaha Springs, were trailing a gray fox one day last week. Before they got him up they found where he had dug up and eaten a pheasant and a rabbit, and later they found where he had killed and buried up another pheasant and another rabbit. The fox hunts about every night of the year, and his yearly kill of game birds and animals run literally into the hundreds. A half dozen foxes can easily account for more game than is killed by all the hunters.

Alfred Gay, of near Edray, fetched in a fox and two big chicken hawks in the varment killing contest. The fox had been run to hole, and a trap set. The fox stayed in so long that it was thought he never would come out but finally he had to come out and was caught. The hawks were caught in traps set at the carcass of a polecat. The tracks of the big birds were seen in the snow around their kill. The tracks were so large that it was thought they were those of an eagle. Traps were set, and it was not long before two big hawks were caught.

Ellis Dean was in from Anthonys Creek last Saturday, and he told this editor that the big crooked foot bear had again made his appearance this winter in the Alleghanies on this side of the State line. This is an old sheep killer who does not den up in the winter. His left hind foot makes a crooked track. He has been hanging out on the Virginia side, as his sign was not seen on this side until the big snow of the first week of February. Some one had stirred him out on the southside of the mountain and his fresh track was seen coming into the head of Anthonys Creek. He went into a thicket and bedded down as there were no tracks coming out. A hunt was organized, and the thicket surrounded. The bear was not sleepy enough to let anyone creep up and shoot him in his bed. Neither would he go through a stand occupied by a hunter. The result was a long chase, and the bear escaped through Thackers Draft back to the Southside of the mountain, where there was no snow.

The hunters figure out that this bear's crooked foot was hurt by being caught in a trap, because he is trap proof. Last summer a farmer found out where the bear was using and began to bait him with honey. Then a trap was set. The bear came

DR. MARK TUBEROSO heads for Green Bank with his wife, Gwen, and family of three. Tuberoso will practice dentistry with Dr. George Harper.

New dentist in Green Bank

Mark Tuberoso, DMD, and his family will be relocating from Ormond Beach, Florida, to Green Bank to associate with George T. Harper, DDS, at the Deer Creek Clinic. Dr. Tuberoso is a graduate of Temple University School of Dentistry and has been practicing dentistry in Florida for two and a half years. He is a member of the American Dental Association and the Academy of General Dentistry. His hobbies include bike riding, swimming, learning how to snow ski, and spending time with his family.

His wife, Gwen, worked as a financial analyst/planner for nine years with A. G. Edwards & Sons before becoming a full-time mother to their three children, Morgan (9), Matthew (10 months), and London (2 months). Gwen enjoys Cajun cooking (she hails from Louisiana), violin, piano, art, and volunteering at school. She was involved in fund raising for the Make a Wish Foundation and the Daytona Rescue Mission.

They are looking forward to making the move to Green Bank to enjoy small-town living, and all it has to offer, and are anxiously awaiting the first snow fall. Dr. Tuberoso is now accepting patients and will begin work on November 18.

Thursday: Roast beef, mashed

From these machines the hide goes into water preparatory to being put in the tanning liquor, and the hair and fleshings go to the drying room where the former is dryed and put in bails and the latter is made ready for the soap manufacturer.

After the lime has soaked from the hides they go to an immense room where are literally acres of vats filled with the pungent, aromatic smelling tanning liquor. They are strung on a rack fifty strong and kept moving the whole three months required for the hide to soak sufficient liquor to make it leather.

The power for this part of the plant is from a 150 horse power engine, whose balance wheel has a diameter of fourteen feet. The other engines are as near automatic as has been possible to make machinery. The bark grinder

Ellis Dean was in from Anthonys Creek last Saturday, and he told this editor that the big crooked foot bear had again made his appearance this winter in the Alleghanies on this side of the State line. This is an old sheep killer who does not den up in the winter. His left hind foot makes a crooked track. He has been hanging out on the Virginia side, as his sign was not seen on this side until the big snow of the first week of February. Some one had stirred him out on the southside of the mountain and his fresh track was seen coming into the head of Anthonys Creek. He went into a thicket and bedded down as there were no tracks coming out. A hunt was organized, and the thicket surrounded. The bear was not sleepy enough to let anyone creep up and shoot him in his bed. Neither would he go through a stand occupied by a hunter. The result was a long chase, and the bear escaped through Thackers Draft back to the southside of the mountain, where there was no snow.

The hunters figure out that this bear's crooked foot was hurt by being caught in a trap, because he is trap proof Last summer a farmer found out where the bear was using and began to bait him with honey.

concealed with the utmost care, the bear left without touching the bait. He never came back to that place. It is a common saying that if a bear ever gets so much as a toe pinched in a trap, his education is complete and he never can be caught again. The crooked foot bear is an old one and a big one. He has killed thousands of dollars worth of sheep. For years past, he winters during the winter time. During storms he lays up, but during open spells he kills and eats.

Burton Jones, of Seebert, was in town Saturday. As a side line he bought some fur this year. So far he has handled 22 mink skin's 24 gray foxes, 1 red fox, 2 wild cats, 3 bears, and muskrats, skunks and possums by the hundred. Also numerous coons. Mr. Jones called attention to the fact that because the trapping season came in November 1, a greater part of the skunk fur crop was considerable of a waste as the fur of this animal was not prime until almost a month later.

Improvements to begin on GRT

The Marlinton Business Association Byway Committee has received the Letter To Proceed with their improvement project along a section of The Greenbrier Trail in Marlinton. The grant of $28,700 was approved in the spring and has two matching fund partners, The City National Bank and the Marlinton Rotary Club, each contributing $1,000.

Marlinton is the only municipality through which the Trail passes and is the only paved section for wheelchair accessibility. The project is located along the Greenbrier River Trail between Eighth and Ninth Streets. The grant includes an information kiosk that will have a map of Marlinton marked with pertinent information for visitors and trail users, a Mountain Waters Scenic Byway map, and other informational brochures. Also included along the Trail are a minimum of four cement benches, two bike racks, trash receptacles, and five lights, as well as landscaping with native plantings of trees, shrubbery and flowers. The goal is to improve this section so visible in the town to be more convenient and pleasant for local folk to use and to make it more attractive and useful for the trail users who visit our town. Work will soon begin on preparations for the period lighting as well as the knee wall, back filling and grading that will be the first steps of the project.

The groundbreaking ceremony is scheduled for Sunday, November 17, at 1 p.m. A brief groundbreaking ceremony will be held at the site, followed by a light luncheon at the Opera House. Senator Rahall will be with us as well as State Highway officials and State Park representatives. Our Governor and Senators have also been invited.

ponds of the Marlinton Rod and Gun Club at Edray and at James Sharp's. At Edray a few dozen rainbow trout has escaped when the trout were distributed last July. These had lived off the country since then. They had not grown much, but they were fine and lively. In the big pond at the Sharp Spring, the ones that were left had grown amazingly and are now a fair size to catch. The hatch is now on at the Government fish hatchery at White Sulphur Springs, and in a few weeks the fry will be ready for distribution. Tens of thousands of little trout will be brought to these ponds to be raised to a proper size and then be put out in the streams of Pocahontas county.

J. Haynes Miller, county agent, leaves March 1, to go to Fayette county to take a like position. He was down to Fayetteville last week and secured a residence. Mr. Miller will be succeeded by C. P. Dorsey, who comes here from Fayette county.

Deaths

Mary Olive Grace Cook

Mary Olive Grace Cook, age 89, of Cleveland, Georgia, formerly of Cass, died Friday, November 8, 2002, at Gateway Nursing Home in Cleveland, Georgia.

Mrs. Cook was born March 20, 1913, at Cass, the daughter of the late Strickler and Bessie Ann Cassell McLaughlin.

She was a resident of Gateway Nursing Home in Cleveland. She was a member of Green Bank Church of God.

Preceding her in death were her husband, Luke Cecil Cook, on May 5, 1962; a son, Harry Leonard McLaughlin; a sister, Annie Varner; and two brothers, Ira and Harmon McLaughlin.

Survivors include two daughters, Mary Ellen Prater, of Clermont, Georgia, and Estelle McLaughlin, of Lancaster, Pennsylvania; three sons, Larry Cook, of Clermont, Georgia, Monroe Cook and Roger Cook, both of Fredericksburg, Virginia; a brother, Norman McLaughlin, of Pinehurst, North Carolina; sixteen grandchildren and ten great-grandchildren.

Services will be held at 11 a.m. November 14, at Green Bank Church of God by the Rev. Toney Samons. Burial will be in the Wanless Cemetery at Cass.

Visitation Wednesday from 6 to 8 at the Wallace and Wallace Funeral Home in Arbovale.

THE WALLACES

Dear Mr. Price:

Having read in your paper of January 30 the articles on the Wallaces I am sending you a copy of a paper that belonged to my grandfather, John Wallace. He at one time lived at Callahan, Va., and drove stage coach on the James River and Kanawha turnpike. I am also sending you an article printed in the Rockbridge News about Big Foot Wallace. I have often heard my father and uncle say we were of the same family as Big Foot Wallace.

Very truly,

W. E. Wallace.

Hillsboro, W. Va.

Ohio May 14th, 1837.

A memorandum of the ages of Samuel Wallace's children:

Margaret Wallace was born February the 4th, 1805.

John Wallace was born February 4th, 1807.

Malinda Wallace was born May 11, 1809.

Comment

As reported in adjoining columns on this page, the hearing on the effort by Norman Alderman to have Superintendent of Schools James Phares and Board of Education members Kermit Friel, Ruth Taylor, and Kenneth Vance removed from office concluded on Monday. The issue is now in the hands of the three-judge panel selected by the Supreme Court to hear the case.

I can think of a number of words to describe Mr. Alderman's actions in this situation. Many of them are not suitable to be printed in this newspaper. Let me settle for despicable.

That Dr. Phares and the three Board members (and their families) should be forced to go through this painful and expensive process is inexcusable. Being a school official or a board of education member has its rewarding moments, but there is enough grief that normally goes with such positions, without the added burden of spiteful lawsuits. I can give personal testimony to the pleasure and grief from my own experience as a board member.

If the chance for being harassed with meaningless lawsuits, such as the one filed by Mr. Alderman, becomes an increased hazard associated with the position, then I fear it will be impossible to get qualified citizens to consider running for the board of education (or other similar positions).

People who are willing to put themselves forward for important community services should not be subjected to this type of meanness.

The time that the superintendent and three board members have had to spend defending themselves in this matter would have much better been used on issues directly facing the county's schools.

I am at a loss to decide what Mr. Alderman's motive is in this situation. It started when Mr. Alderman was threatened with the loss of the cushy job he has in the central office, Data Management Facilitator. Last spring the superintendent indicated to the Board that he was going to recommend that Mr. Alderman be placed on the transfer list for the 2002-03 school year and to eliminate his position.

Although he won that fight - the Board voted not to place him on the transfer list - Mr. Alderman has continued with his lawsuit.

(Data Management Facilitator - with ever declining enrollment in the county's schools and the resulting loss of teachers and other personnel, is that a position our school system really needs?)

The Pocahontas County School System has been very good to Mr. Alderman over the years, as have the very people he is now attacking. The school system has provided him and his wife with good jobs, enabling them to enjoy a higher income than the majority of the people in Pocahontas County and to give their children a good education.

In the 2001-02 school year when a part-time teaching position became stressful for him, the Board and Dr. Phares agreed to help him by moving him full-time to the central office.

Yet he proceeds with an action that, if fully successful, could throw the school system into utter confusion. He will harm not only the people in the lawsuit, but also the students and his fellow staff members.

Are the people being attacked a perfect school superintendent and perfect board members. Of course not. There are no such animals. Heck, when I was on the Board of

about anything they have done.

darkness, the steam from the leaches making you sweat and the dust from tan carriers settling on you and adding to the discomfort. It is in here somewhere that there is a belt that if you pass too near you feel your hair raise the hat from your head, and if you put your hand close the semi-darkness lighted by blue flames spurting from every one of your fingers and burning with a phosphorescent glare. You are sure it is a consuming fire, but does no damage.

About three carloads of bark are put in each tank and boiling water squirted on it by means of a quadruple barreled, repeating squirt gun.

When all the strength has been extracted from the bark the leaches have to be cleaned out. This is about the only thing done

Margaret Wallace was born February the 4th, 1805.

John Wallace was born February 4th, 1807.

Malinda Wallace was born May 11, 1809.

Hannah Wallace was born July 23, 1812.

Samuel Wallace was born November the 7th, 1814.

This is a true statement of our ages.

Hannah Wallace died May the 6th, 1833.

Dr. Thornton Whaling, former pastor of the Presbyterian church of Lexington, Va., and immediately afterwards pastor of the First Presbyterian church of Dallas, Texas, for five years, is a great admirer of Big Foot Wallace, the Texas ranger. His birthplace is about a mile south of the courthouse at Lexington. The career of Big Foot Wallace deeply interested him, and he fully informed himself of his history by records within his reach when a Dallas, Texas pastor. He thinks Virginia should

tion. It started when Mr. Alderman was threatened with the loss of the cushy job he has in the central office, Data Management Facilitator. (Data Management Facilitator - with ever declining enrollment in the county's schools and the resulting loss of teachers and other personnel, is that a position our school system really needs?)

The Pocahontas County School System has been very good to Mr. Alderman over the years, as have the very people he is now attacking. The school system has provided him and his wife with good jobs, enabling them to enjoy a higher income than the majority of the people in Pocahontas County and to give their children a good education.

In the 2001-02 school year when a part-time teaching position became stressful for him, the Board and Dr. Phares agreed to help him by moving him full-time to the central office.

Yet he proceeds with an action that, if fully successful, could throw the school system into utter confusion. He will harm not only the people in the lawsuit, but also the students and his fellow staff members.

Are the people being attacked a perfect school superintendent and perfect board members. Of course not. There are no such animals. Heck, when I was on the Board of Education, I even managed to get the State Board of Education upset with me. (That's several steps above a data management facilitator.)

Does his case have some merit? Although I do not think so, only the three judges can decide. They do not read *The Pocahontas Times* and I suppose judges are not supposed read editorials on cases before them. However, I will go ahead and urge them to throw the lawsuit where it belongs - in the nearest trash basket.

In the case of Dr. Phares, the issue raised concerns being a resident of the county, as required by law. The days are long gone when the average school superintendent was a local boy who came up through the county's school system. Superintendents generally now come from other areas and will be moving on elsewhere when their work as a county's school chief is finished.

I imagine that there are some superintendents around the state who would have real problems if challenged on the residency issue. Dr. Phares is not one of them. He cast his vote at Slaty Fork on Tuesday of last week.

Concerning the three board members, the lawsuit is based on the meaning of "public office." The law prohibits board of education members from holding any other public office. Back in the old days, as when I was a board member, it was understood that public office in this case meant an elected political position, not doing additional service to the community on any number of appointed boards and agencies.

Now, in a legal case coming out of Fayette County, the [illegible] decided that the meaning [illegible]

is a consuming fire, but does no damage.

About three carloads of bark are put in each tank and boiling water squirted on it by means of a quadruple barreled, repeating squirt gun.

When all the strength has been extracted from the bark the leaches have to be cleaned out. This is about the only thing done by hand. A man takes off his clothes, puts on a pair of wooden shoes and gets down in the tank and goes to work at a temperature something over 160 degrees.

The way everything is saved and all waste products utilized impressed us. The bark after having all its tanning properties extracted is used for fuel and the ashes sold. The hair and waste products of the hide are shipped to the city, where they are utilized for different purposes. After the hides have absorbed all that

the courthouse at Lexington. The career of Big Foot Wallace deeply interested him, and he fully informed himself of his history by records within his reach when a Dallas, Texas pastor. He thinks Virginia should honor him as one of her great sons. Under date of January 19, he therefore writes Dr. Emmett W. McCorkle of Rockbridge, now residing temporarily at Ashland, Ky., a letter on the subject, which the latter has kindly handed the County News for publication. The letter follows:

I spent some years in Texas as pastor of First Presbyterian church, Dallas (1905-1910). I learned many lessons, for which I am devoutly thankful, one of them is to evaluate justly and highly the ideals and standards of the great West and the "Lone Star" state in particular.

The supreme questions asked in reference to any man is "What can he do?" and "Can he do it well?" Preachers, politician, bankers, merchants, engineers, carpenters, soldiers

was on the Board of Education, I even managed to get the State Board of Education upset with me. (That's several steps above a data management facilitator.)

Does his case have some merit? Although I do not think so, only the three judges can decide. They do not read *The Pocahontas Times* and I suppose judges are not supposed read editorials on cases before them. However, I will go ahead and urge them to throw the lawsuit where it belongs - in the nearest trash basket.

In the case of Dr. Phares, the issue raised concerns being a resident of the county, as required by law. The days are long gone when the average school superintendent was a local boy who came up through the county's school system. Superintendents generally now come from other areas and will be moving on elsewhere when their work as a county's school chief is finished.

I imagine that there are some superintendents around the state who would have real problems if challenged on the residency issue. Dr. Phares is not one of them. He cast his vote at Slaty Fork on Tuesday of last week.

Concerning the three board members, the lawsuit is based on the meaning of "public office." The law prohibits board of education members from holding any other public office. Back in the old days, as when I was a board member, it was understood that public office in this case meant an elected, political position, not doing additional service to the community on any number of appointed boards and agencies.

Now, in a legal case coming out of Fayette County, the courts have decided that the meaning of public office does include non-elected, non-political positions. Board of education members being on the board of a public service district was the issue in that case.

It is not fair to change the interpretation of a law in midstream. If now public office is to mean more than an elected, political position, then that should be a decision of the Legislature, not the courts. Before the new meaning of public office creates problems all over the State, I hope the Legislature will take action to define what is meant by a public office.

I urge that the meaning go back to what has been in the past. The expanded meaning will cause particular problems in counties with small populations. As is well known, in these counties the same people often serve in many roles (by necessity). To force a person to decide not to run for a board position because they do not want to give up another service to their community, could be a major loss to the local schools.

The whole thing may have gone too far to stop, but I will urge Mr. Alderman to consider how cruel this matter is the defendants and their families and the potential damage it might do to the education of our students. I ask him to have the court dismiss his lawsuit. He must also consider the financial burden he has placed on the defendants and be willing to reimburse the expenses to them he has caused.

After the hides have absorbed all that is possible from the ooze the weakened liquor is strengthened by the addition of new, and even the exhaust steam from the engines is condensed and is returned to the boilers after it has heated the water in the tank from which the boilers are supplied.

We are told that when the tannery is complete it will embrace every modern appliance known to the art of making leather which

Presbyterian church, Dallas (1905-1910). I learned many lessons, for which I am devoutly thankful, one of them is to evaluate justly and highly the ideals and standards of the great West and the "Lone Star" state in particular.

The supreme questions asked in reference to any man is "What can he do?" and "Can he do it well?" Preachers, politician, bankers, merchants, engineers, carpenters, soldiers all must meet these searching questions and tests.

Judged from this point of view Rockbridge county in "Old Virginia" furnished to Texas the two men who did more for that mighty and imperial state than any other two in its wonderful and dramatic history. The service rendered by Sam Houston is universally and justly recognized and monuments enshrine his name for all succeeding generations.

But for some reason the unique and invaluable service given to Texas by "Big Foot" Wallace, while appreciated there is not fully known and valued in his native state as it deserves. Wallace was in

No decision rendered

Board of Education hearing over

by Pamela Pritt

At the end of the day Monday three board of education members and the Pocahontas County Superintendent of Schools still didn't know whether or not they are eligible to serve in their elected capacities.

And they won't know until sometime next month.

It's been a seven-month battle between the BOE members and Dr. James Phares and board employee Norman Alderman along with his compatriot, Jerome Heinemann, a twice-failed county commission candidate and a one-time board of education candidate.

Alderman has accused board of education president Kermit Friel and members Kenneth Vance and Ruth Taylor of holding more than one public office.

Alderman, a Data Management Facilitator, is asking the panel to interpret the West Virginia Code that states "No member or member-elect of any board shall be eligible for nomination, election or appointment to any public office..."

Friel sits on both the Board of Public Health and the three-member Countywide Public Service District board.

Vance is a part-time field data collector for the Pocahontas County Assessor's Office.

Taylor was once a member of the Mountain Resource Conservation Development Board, but testified she tendered a verbal resignation in 1997. Her written resignation to the county commission was accepted February 13, after the MRCD board requested a formal letter in January.

Taylor also testified that she was not an actual member of the MRCD board, but the chair of the recreation and tourism committee. She said she has had no other communication whatsoever with MRCD since 1997.

She said she was never formally appointed to the MRCD board by

"Yes," Friel answered.

"Why have you not resigned?"

"I haven't a need to," Friel replied.

The judges hamstrung both the plaintiffs and the respondents, holding them to more narrow confines of evidence presentation than either side desired.

Alderman and Heinemann were curtailed from entering any evidence that pertained to terms or contracts other than the current ones held by Friel, Vance, Taylor or Phares.

"Not this body or even the U. S. Supreme Court of Appeals can remove someone from a term that has expired," said Judge John Hatcher.

That ruling prohibited Alderman and Heinemann from questioning witnesses about Phares' move from Virginia after he was hired in 1998 and Taylor's involvement in the MRCD board prior to 1997.

The judges restricted the board members' attorney, Harry Rubenstein, as well.

Rubenstein called Heinemann to the stand and inquired about his criminal record.

Heinemann responded that he was involved in a case challenging the Internal Revenue Service 20 years ago. He testified that he was convicted of felony conspiracy to impede, impair, obstruct and defeat the IRS. He served time in Petersburg, Virginia, he said.

Phares' attorney, Steve Jory, asked that Heinemann be removed from counsel table since, as a convicted felon, he has lost his civil rights.

Hatcher dismissed Jory's request with a wave and a headshake before allowing Heinemann to return to his seat next to Alderman.

Rubenstein's move to enter the Signal Fires of West Virginia, a publication of the Reform Party, fell on deaf ears, as well.

"The motive of the petitioners is

did not own firearms and was not a member of the National Alliance, a white supremacist group based in Mill Point.

Alderman also got to take the stand. He spoke in rapid monotone throughout the duration of his testimony.

The Data Management Facilitator said he believed he was going to be transferred this fall and asked for a grievance hearing.

"I won that hearing," he testified. The board later voted 3-2 to leave Alderman in the board office. Friel and Vance cast the dissenting votes.

Alderman said he hadn't ever used either school time or school property to prepare documents.

He agreed with Jory that he had made an "exhaustive" study of the law concerning the superintendent's residency.

"For the last six months I've devoted my life to it," Alderman said.

Along with Richard Thompson, a former teacher who challenged Vance for his board seat, and Richard Johnson, he "scouted" Phares' condominium at Slaty Fork and took photographs at Phares' house in Elkins.

At the board office, Alderman said, he enters data, is the BOE's webmaster, helps with special education and sets up computers. His employment is 200 days from 8 a.m.-3:30 p.m., he testified.

Both Alderman and Heinemann testified none of the respondents had ever done anything to harm them personally.

At least, "not that I know of or could prove," Alderman qualified.

Associate Superintendent of Schools Alice Irvine testified that she nearly always calls Phares at his Slaty Fork residence. Irvine said she may have called him in Elkins once or twice.

heated. The water in the tank from which the boilers are supplied.

We are told that when the tannery is complete it will embrace every modern appliance known to the art of making leather which has been tried and found to be a labor saver. Of the 107 tanning plants now owned and operated by the United States Leather Company the Greenbrier Tannery is equipped with the most up-to-date machinery. There is an unconfirmed rumor to the effect that the plant will be enlarged and its capacity nearly doubled, but whether this is done or not the plant is an industry of no small proportions and the weekly disbursements for labor and material are a large item of the town and county's business.

and invaluable service given to Texas by "Big Foot" Wallace, while appreciated there is not fully known and valued in his native state as it deserves. Wallace was in no sense a raw adventurer or a savage warrior of gigantic strength and brutal fierceness. But in two fields he was a strong, intelligent and successful leader, using of course the methods which the circumstances of his day and the frontier region demanded, as any intelligent man would have done, and as Houston did.

First, he was the leader of the armed forces which in the earlier decades of the nineteenth century delivered Texas from Indian domination, as John Smith and his followers did in Virginia in the seventeenth century. Vast hosts of Indians were driven West and fought for that vast region which now constitutes Oklahoma and the northern section of Texas. Wallace was the man who countered this Indian domination in the only way possible by battle and unceasing war which drove the barbarians into a section afterward known as "Indian Territory." Captain (for that was his title, as in the case of Captain John Smith) Wallace conquered more Indians and secured

between the BOE members and Dr. James Phares and board employee Norman Alderman along with his compatriot, Jerome Heinemann, a twice-failed county commission candidate and a one-time board of education candidate.

Alderman has accused board of education president Kermit Friel and members Kenneth Vance and Ruth Taylor of holding more than one public office.

Alderman, a Data Management Facilitator, is asking the panel to interpret the West Virginia Code that states "No member or member-elect of any board shall be eligible for nomination, election or appointment to any public office..."

Friel sits on both the Board of Public Health and the three-member Countywide Public Service District board.

Vance is a part-time field data collector for the Pocahontas County Assessor's Office.

Taylor was once a member of the Mountain Resource Conservation Development Board, but testified she tendered a verbal resignation in 1997. Her written resignation to the county commission was accepted February 13, after the MRCD board requested a formal letter in January.

Taylor also testified that she was not an actual member of the MRCD board, but the chair of the recreation and tourism committee. She said she has had no other communication whatsoever with MRCD since 1997.

She said she was never formally appointed to the MRCD board by the county commission, as evidenced by a search of that body's minutes.

Taylor was appointed to the board of education in 2000 to fill the unexpired term of Bruce McKean, who resigned. She was reelected to the seat this year.

County Commissioner Reta Griffith also testified about the lack

Taylor's ap-

that they were not [illegible] and were not aware of any restriction on dual office-holding until a training session in June.

"Do you currently hold three offices?" Alderman asked Friel.

curtailed from entering any evidence that pertained to terms or contracts other than the current ones held by Friel, Vance, Taylor or Phares.

"Not this body or even the U. S. Supreme Court of Appeals can remove someone from a term that has expired," said Judge John Hatcher.

That ruling prohibited Alderman and Heinemann from questioning witnesses about Phares' move from Virginia after he was hired in 1998 and Taylor's involvement in the MRCD board prior to 1997.

The judges restricted the board members' attorney, Harry Rubenstein, as well.

Rubenstein called Heinemann to the stand and inquired about his criminal record.

Heinemann responded that he was involved in a case challenging the Internal Revenue Service 20 years ago. He testified that he was convicted of felony conspiracy to impede, impair, obstruct and defeat the IRS. He served time in Petersburg, Virginia, he said.

Phares' attorney, Steve Jory, asked that Heinemann be removed from counsel table since, as a convicted felon, he has lost his civil rights.

Hatcher dismissed Jory's request with a wave and a headshake before allowing Heinemann to return to his seat next to Alderman.

Rubenstein's move to enter the Signal Fires of West Virginia, a publication of the Reform Party, fell on deaf ears, as well.

"The motive of the petitioners is not relevant," Hatcher ruled.

Signal Fires included Alderman's and Heinemann's version of this case, calling Phares' Elkins house a 'mansion'.

Heinemann testified that the quotation marks meant the house was larger than the one-bedroom condo Phares lives in in Slaty Fork.

Rubenstein asked Heinemann if he considered his participation in this proceeding an exercise of his civil rights, to which Heinemann answered in the affirmative.

Heinemann now does legal research for attorneys in Charleston and Morgantown, he said.

He said he paid the dog tax and property tax on his wife's vehicle.

to be transferred this fall and asked for a grievance hearing.

"I won that hearing," he testified. The board later voted 3-2 to leave Alderman in the board office. Friel and Vance cast the dissenting votes.

Alderman said he hadn't ever used either school time or school property to prepare documents.

He agreed with Jory that he had made an "exhaustive" study of the law concerning the superintendent's residency.

"For the last six months I've devoted my life to it," Alderman said.

Along with Richard Thompson, a former teacher who challenged Vance for his board seat, and Richard Johnson, he "scouted" Phares' condominium at Slaty Fork and took photographs at Phares' house in Elkins.

At the board office, Alderman said, he enters data, is the BOE's webmaster, helps with special education and sets up computers. His employment is 200 days from 8 a.m.-3:30 p.m., he testified.

Both Alderman and Heinemann testified none of the respondents had ever done anything to harm them personally.

At least, "not that I know of or could prove," Alderman qualified.

Associate Superintendent of Schools Alice Irvine testified that she nearly always calls Phares at his Slaty Fork residence. Irvine said she may have called him in Elkins once or twice.

Assessor Dolan Irvine took the stand to talk about Vance's position in his office.

Vance is a data collector, not a field deputy, Irvine said.

"I don't know as we have field deputies this day and time in my office," the assessor said.

Vance did not take an oath of office, Irvine testified. He did, however, take courses to be able to establish a property's value, Irvine said.

Vance, a former principal in Pocahontas County and worked mainly between July and October.

A Fayette County case decided this year by Hatcher removed two board of education members who were serving on public service district boards.

TANNERY TO RE-BUILD

Last Friday was a day of joy in this town of Marlinton when telegrams came announcing the decision of the United States Leather Company to rebuild their tannery.

Work will begin at once and it is expected that a few months will again see this great industry in operation

On the night of September 21, the Greenbrier Tannery was destroyed by fire. For twenty-three years this plant had run winter and summer day in and day out, giving employment at good money to several hundred men. It was an institution in this community and our greatest industry. Like so many other blessings, its real value to us was brought home only by its loss.

The new plant will be about the same capacity of the one that was burned. It will be modern in every particular. Wherever possible, electricity will be used.

It is really hard to express our feelings of thankfulness over the rebuilding of this plant. It means so much in every phase of our community life. So entricately are its affairs and its people interwoven into the religious, business, school, social and other activities of the life of this town, that its failure to be rebuild would have been the kind of a calamity one hates to think on.

This is the annual Thanksgiving season and it is truly thanksgiving time in Marlinton. November 24, 1927

TANNERY STARTS

On Monday, Superintendent S. N. Heech began to lay down hides preliminary to making them into leath

the only way possible by battle and unceasing war which drove the barbarians into a section afterward known as "Indian Territory." Captain (for that was his title, as in the case of Captain John Smith) Wallace conquered more Indians and secured more territory with less bloodshed than any other man ever did in American history. This statement is sufficient vindication for his methods.

His second contribution was as leader of Texas Rangers preventing the incoming of vast hosts of Mexicans who otherwise would have flooded the state and changed its entire character and history. The Rangers protected hundreds of miles of border lines to cross which was the desire of untold thousands of Mexicans, and if there had been no Rangers there never would have been either the Republic or afterwards the state of Texas.

Rockbridge and Lexington and Virginia ought to mark the birthplace and early home of Wallace, as a true and worthy representative of the valiant Scotch-Irish stock, to whom our whole country is so great a debtor. Cordially,

THORNTON WHALING.

LLOYD KISNER, LEFT, stands with his certificate and his flag recently. Above, Kisner, back row right, poses with his WWII air crew.

prisoners into a truck to be taken to a prison work camp, a girl suddenly [illegible] down in the middle of the

family whose father had ties to the underground, and shot the children. The mother jumped out of an upper window to her death, with a baby in her arms, Kisner said. Another prayer service at the Barb's house took

trying to get him to stand up. Amazingly, "Chief," an underground leader accompanying the escapees, got the German to back off.

The American soldiers were hid-

Endless Joy

TANNERY STARTS

On Monday, Superintendent S. N. Hench began to lay down hides preliminary to making them into leather some months from now. Each day sees hides going into sork. About fifty percent of the tannery's daily capacity for hides is now being laid down. On last Thursday morning, one of the two units of the tannery's power plant was started. Mr. Hench made it a considerable occasion, marked with due and proper circumstance ceremony. Word was given out that Engineer Miner would have all his fittings and connections complete and ready Thursday morning to turn the steam into one of the big engines. Little Miss Pollyanna Herold was asked to be the sponsor and to turn on the steam. The Superintendent had the heads of the various departments and foremen present and a picture was taken. Then the little lady, her hands guided by those of the engineer, turned the valve and the big wheels of the immense machine moved like a thing alive.

Some six months ago the Greenbrier Tannery was burned, destroying the chief industry of the town, and one of the big plants of this part of the state. Things were pretty blue. There could be no assurance that the industry would be replaced. Everyone wrote to the company's office in New York, asking for the rebuilding of the Tannery. One who wrote was Pollyanna, the little daughter of Mr. and Mrs. Wise Herold. She was sick at that time. One of her regular visitors was Superintendent Hench. The little girl asked the great company to rebuild the tannery so Mister Hench could

Heidi Zemach
Contributing Writer

Lloyd "Dabney" Kisner, of Durbin, is best known in his town as an avid bear hunter and fly fisherman, with stories to tell about the bear that attacked his beehives, or the fish that almost got away.

But his experiences almost 60 years ago as a bombardier-navigator in WWII, and his many close brushes with death at the hands of Nazi soldiers, make a story that beats them all.

On September 11, 2001, the day the World Trade Center buildings were attacked, a Belgian government official signed certificates on behalf of his people, honoring Kisner and other American veterans for helping to liberate their country almost 60 years earlier.

In particular, the certificates named those who defeated the Nazis' final major European offensive-the Battle of the Bulge. Although Kisner never actually fought in that battle, that part of Belgium was a place he knew well. Kisner had hidden there for five months during Nazi occupation, protected by a vast local underground network.

Allied liberation forces in tanks and armored vehicles arrived in Liege, Belgium, September 11, 1944 to a hero's welcome.

The framed Belgian certificate, and two small Caterpillar Association buttons, recognizing Kisner for escaping from a downed plane in a parachute, are on display in his back-country trailer home in Durbin, along with an overflowing collection of black bear memorabilia.

On December 13, 1943, four Marauder bomber groups dispatched 216 aircraft in a series of flying formations over Holland to deliver 400 tons of bombs on a key Luftwaffe facility, the Amsterdam-Shiphol air-

Whenever a soldier was killed in action, he explained, the government gave their families $10,000— about enough to buy a farm in those days.

The bombing runs had by now become terrifying, and some airmen refused to go on any more runs, he said. A few times, Kisner flew in the place of a young "boy" who was scared. One day, a plane he was thought to have been on was shot down. His parents in Elkins received a false "missing in action" telegram for the second time, before the truth was sorted out.

"I was scared all the time," he said. "If you weren't drinking, you were scared," Kisner said, and plenty of drinking and bar fights took place every night following a bad bombing mission.

Five months later, on May 25, 1944, Kisner again escaped from a burning plane by parachute near Leige, Belgium. The B26 bomber, the Dragon Wagon, was on its 57th bombing mission when it was hit by German antiaircraft flak. Both engines were knocked out and the plane was "ripped all to pieces" when the crew bailed out, Kisner said.

As he drifted over small country towns and villages, Kisner watched the people below, pointing up and following the parachuting airmen on their bicycles. The rest of his crew were all caught and taken to a German prisoner of war camp, where they remained for the duration of the war, Kisner later discovered.

Hundreds of Belgians saw Kisner land in the middle of the street, and some ran to his parachute and started fighting over it, he said. But a few helpful villagers pointed toward a field on the edge of town, where he could escape. As the frightened American flyer approached a fence around the town, a pretty girl

brier Tannery was burned, destroying the chief industry of the town, and one of the big plants of this part of the state. Things were pretty blue. There could be no assurance that the industry would be replaced. Everyone wrote to the company's office in New York, asking for the rebuilding of the Tannery. One who wrote was Pollyanna, the little daughter of Mr. and Mrs. Wise Herold. She was sick at that time. One of her regular visitors was Superintendent Hench. The little girl asked the great company to rebuild the tannery so Mister Hench could stay in town and come to see her when she was sick. When the United States Leather Company decided to rebuild the Greenbrier Tannery. President Brown notified the Marlinton people by a telegram directed to Miss Pollyanna. And of course no one else could turn on the first steam so well as Pollyanna, who brought the tannery back to Marlinton.

Beginning next Monday morning the tannery whistle will blow at five o'clock.

munity, and the mildest mannered man is ready to shoot him to death. It is pretty hard to tell whether all the sheep that are charged to the bear are its victims. The dog may be responsible for some of the damage.

All city students of natural history are friends of the bear. They do not seem to be able to grasp a simple fact that where persons are dependent upon a black bear running at large will depopulate a whole community. There is a wonderful lack of comprehension of the rights of the country people under the magna charter and the charter of the forest; it was preserved to us for centuries, and we have lost it all, in the last thirty years. That is forest rights of those who do not own the land. And they have begun a nibbling on the jury system. It is true that we can waive a jury but no one can waive it for us.

The bear has every requirement for big game thrills. Naturally a vegetarian it is not necessary that any life die that it may live. It is a bug and worm destroyer. It eats nettles and all sorts of weeds. It glories in the berry crop that is produced in such lavishness in these mountains. And all kinds of nuts form its natural food. It is as harmless to the woods as a deer. Its courage is great. Its cunning unexcelled. Its flesh the finest sort of food. Its fur stands at the top of the list. It is modest and

of his people, honoring Kisner and other American veterans for helping to liberate their country almost 60 years earlier.

In particular, the certificates named those who defeated the Nazis' final major European offensive-the Battle of the Bulge. Although Kisner never actually fought in that battle, that part of Belgium was a place he knew well. Kisner had hidden there for five months during Nazi occupation, protected by a vast local underground network.

Allied liberation forces in tanks and armored vehicles arrived in Liege, Belgium, September 11, 1944 to a hero's welcome.

The framed Belgian certificate, and two small Caterpillar Association buttons, recognizing Kisner for escaping from a downed plane in a parachute, are on display in his back-country trailer home in Durbin, along with an overflowing collection of black bear memorabilia.

On December 13, 1943, four Marauder bomber groups dispatched 216 aircraft in a series of flying formations over Holland to deliver 400 tons of bombs on a key Luftwaffe facility, the Amsterdam-Shipol airdrome.

The 323rd Group was on its thirteenth bombing mission, and Lt. Kisner was camped out in the nose of the plane as it flew straight into a large, black cloud of anti-aircraft barrage. The exploding flak penetrated the plane, hit Kisner in the face, stomach and privates and knocked out one of the planes' engines.

Thanks to his bulletproof flak suit, Plexiglas safety glasses, and a plucky pilot, who flew the damaged plane to safety, Kisner survived to tell the tale.

As the crippled plane burned, the crew dropped its bombs, then the pilot turned around and flew it back over the North Sea toward England, where Kisner and the rest of the crew bailed out in parachutes. Kisner landed in the middle of a minefield. Luckily, he remained unconscious and unaware of the danger while

of drinking and bar fights took place every night following a bad bombing mission.

Five months later, on May 25, 1944, Kisner again escaped from a burning plane by parachute near Leige, Belgium. The B26 bomber, the Dragon Wagon, was on its 57th bombing mission when it was hit by German antiaircraft flak. Both engines were knocked out and the plane was "ripped all to pieces" when the crew bailed out, Kisner said.

As he drifted over small country towns and villages, Kisner watched the people below, pointing up and following the parachuting airmen on their bicycles. The rest of his crew were all caught and taken to a German prisoner of war camp, where they remained for the duration of the war, Kisner later discovered.

Hundreds of Belgians saw Kisner land in the middle of the street, and some ran to his parachute and started fighting over it, he said. But a few helpful villagers pointed toward a field on the edge of town, where he could escape. As the frightened American flyer approached a fence around the town, a pretty girl grabbed and kissed him, leaving a lipstick smear that he later thought was blood, Kisner said.

He climbed the fence, then ran through the high wheat, until he found an abandoned mine where he could safely hide, pointed out to him by sympathetic farmers. Some children soon found him in the darkness, and fed him bread and drink. He waited there until the Belgian underground arrived.

Later, Kisner was moved to a barn to hide, along with another rescued American flyer, an engineer on a downed B17 named Andy Morrison. They were given fake papers, new identities, and fake working documents. Kisner was named Andre Kercovon, and he and Morrison were dressed in a tweed suit, knickers, white socks, and shoes with painful nails sticking into them. If asked, they were to be Flemish coal miners.

Yet there is nothing harder to see in woods than a bear. Many a mountaineer has roamed the woods during the course of a long life and never laid his eyes on a bear in the woods. At the same time, others may happen on a bear anytime. More are killed in these accidental encounters than in any other way.

A large book has recently been issued by Lewis Preston Summers, Annals of Southwestern Virginia. In it he incorporates the history of Wellman Waters, who lived the life of a mountaineer and hunter in the White Top Mountain country in South West Virginia. We will know more about that delightful region so much like ours, when the Seneca Trail is finished, this year. Waters

prisoners into a truck to be taken to a prison work camp, a girl suddenly kneeled down in the middle of the street to pray. As she knelt, a Gestapo soldier took the butt of his rifle and bashed in her head. They left the girl lying there dead in the street, Kisner said. That day, friends in the Belgian underground held a prayer service in her honor in the Barb's home.

Another time, the Americans were sent up into the attic to hide, as German soldiers filled the streets below. As they listened to the din and wondered, German soldiers broke into the home of a nearby Belgian family whose father had ties to the underground, and shot the children. The mother jumped out of an upper window to her death, with a baby in her arms, Kisner said. Another prayer service at the Barb's house took place.

The atrocities greatly scared the Barbs, and soon after, the American GIs were moved to another safe house.

Their trip was a harrowing bus ride toward Germany, a direction that, the underground felt, would be safer for the Americans, who would not be suspected as escapees. Nazi soldiers, returning home, packed the seats and the isles. One badgered [illegible], sticking his gun muzzle into [illegible] frightened American's nose, and

was born in 1812, and before he was grown lived in the mountains where he took up land, and he had to his score a great many wolves, bears, panthers, and deer, and small game. He seems to give the name varment the same meaning that I detailed above. He includes the bear as a varment.

The death of every bear is a major tragedy. Very few have been listed in literature, but they are preserved by word of mouth, but the intimate details are lost at the death of the hunter. Waters by writing a short book has preserved many of his encounters, and though he has been dead many years, the classics of the time have been enriched by his work.

On one occasion in early winter, a tracking snow having fallen, Waters found the track of a very large bear and decided to walk it down. He followed it all day and when darkness came on he camped on the trail During the night a heavy snow fell. As he stood in the snow in the gray of the morning thinking what course to pursue, he saw a raccoon track, and being hungry he followed the track for a short distance, when he saw the hide of a bear sticking up from the snow. Having a mountain rifle with but one shot, he hesitated to shoot thinking that it might be

the track for a short distance, when he saw the hide of a bear sticking up from the snow. Having a mountain rifle with but one shot, he hesitated to shoot thinking that it might be the big bear and knowing that if he did not give it a fatal shot it would charge him. But being hungry and some what desperate he fired at the pile, and the big bear that he had been following, sprang up and ran towards him. Waters leaped and caught a lower limb on a tree and the bear ran under his feet and commenced to fight a big boulder. Waters loaded his gun in haste and spoke to the bear which turned its head and was shot and killed.

On another occasion he was on the top of a high mountain. On one side was rim rock over a hundred feet high. The bear was wounded and commenced to carry on something terrible and Waters drew his iron tomahawk and fought the bear for a few minutes. The bear then started to flee and Waters jumped on its back and just as they reached the precipice, he hit it a blow on the head and jumped off, and the bear went over the precipice and was found dead at the bottom.

Waters says too that on one occas-

VET, cont'd. from page 5

den in a restaurant basement until a new safe house could be found. One day, Kisner was given a cow to drive, and the two airmen drove it to a nearby slaughterhouse, straight under the noses of two German guards, he said. The slaughterhouse, meat market, and adjoining farmhouse would be their hideout for several months. The farmhouse belonged to Louis Fechir, who had a wife and three children, and needed the kind of extra help that only Kisner, a rural West Virginian, could provide. Kisner said he became the "main gear" in the slaughtering and butchering operation, but steered clear of places where he could be seen.

"I lived in that house three months and never saw the front of it till I rode up in a tank," he said.

When not working in the slaughterhouse, the airmen hid up in the attic. But at night, the Fechirs closed their shutters, and let the GIs come down and eat dinner with the family and socialize, Kisner said. A particularly bright spot in his life was getting to know the pretty and fiery underground activist Marguerite "Mimi" Brixko, who lived next door.

Brixko played cards and entertained the American GIs with stories, and taught Kisner to speak French.

But danger was never far away.

One day a local villager tipped off the Germans that someone was hiding in the Fechir's house. Before the German soldiers arrived, Brixko took Kisner to her own house next door and hid him in a small closet under the stairs. Kisner remembers underground, who were elated.

But what happened next is difficult for Kisner to recount, even today. He still chokes up upon telling it.

Rather than taking him back home, the underground took him along to watch them execute two Belgians who had squealed on some of the underground rescuers. The bloody sight of the men, shot dead in holes they had dug, haunted Kisner, causing more than a few sleepless days and nights, he said.

The last time the German soldiers came searching for hidden Americans, Kisner was taken to a bakery, about six miles away, where he stayed and worked, baking in the kitchen, until the American soldiers finally arrived.

On September 11, 1944, as American soldiers approached the village in tanks and armored vehicles, they were amazed to find Kisner, running toward them on the road, calling for them to stop.

The older he becomes, the more Kisner ponders why the Belgians would risk their lives to save others. He has never asked his rescuers, Kisner said, but he thinks he knows why.

Not only did they like and admire the Americans, who they hoped would one day rescue them, but they terribly despised the ugly German occupiers, who didn't think twice about killing citizens and innocent children, he said. Hiding an American was a good way of fighting back, Kisner said.

Unlike the other Americans in hiding, Kisner also believes that his

top of a high mountain. On one side was rim rock over a hundred feet high. The bear was wounded and commenced to carry on something terrible and Waters drew his iron tomahawk and fought the bear for a few minutes. The bear then started to flee and Waters jumped on its back and just as they reached the precipice, he hit it a blow on the head and jumped off, and the bear went over the precipice and was found dead at the bottom.

Waters says too that on one occasion he treed a half grown bear and that he needed it alive, so he instructed his dog to hold it in the tree until he could get help. He went to a house about a mile away and found there no men folks, but two able women, who said that they would come at daylight to help him tie the game. He knew the bear would leave at dawn. The women came and he supplied them with thongs and then built a fire on one side of the tree. Day was breaking and the bear came down the tree backward. The tree stood on the brow of a high mountain. Waters laid low until the bear was reaching for the ground with its hind feet. Then Waters grabbed both hind feet. The bear proved to be stronger than he had thought and it pulled hard to get away and just as it got to the

attic. But at night, the Fechirs closed their shutters, and let the GIs come down and eat dinner with the family and socialize, Kisner said. A particularly bright spot in his life was getting to know the pretty and fiery underground activist Marguerite "Mimi" Brixko, who lived next door.

Brixko played cards and entertained the American GIs with stories, and taught Kisner to speak French.

But danger was never far away.

One day a local villager tipped off the Germans that someone was hiding in the Fechir's house. Before the German soldiers arrived, Brixko took Kisner to her own house next door and hid him in a small closet under the stairs. Kisner remembers his heart beating loudly as the soldiers opened doors and closets, searching the house and as their feet walked up the stairs, right over him. He was relieved when they came back down and left.

Another time, men broke into the Fechir's house and stole things. Kisner thought the burglars were German soldiers, so he ran downstairs, through the meat market, slaughterhouse and barn, finally hiding in the doghouse, until the danger had passed.

One night as German planes flew overhead, the underground recruited Kisner to signal to an American plane using Morse Code and lights from the middle of a dark field. The plane mysteriously arrived, dropping off men, radios, guns, ammunition and other badly needed supplies to the Belgian

ning toward them on the road, calling for them to stop.

The older he becomes, the more Kisner ponders why the Belgians would risk their lives to save others. He has never asked his rescuers, Kisner said, but he thinks he knows why.

Not only did they like and admire the Americans, who they hoped would one day rescue them, but they terribly despised the ugly German occupiers, who didn't think twice about killing citizens and innocent children, he said. Hiding an American was a good way of fighting back, Kisner said.

Unlike the other Americans in hiding, Kisner also believes that his own rural Pocahontas County background in particular came in handy. It helped him to become useful to rescuers living in rural farm areas of Belgium, he said. It also helped him to remain anonymous, and ultimately to survive.

After the death of his wife, Kisner learned of "Mimi" Brixko's address in Belgium, and they have been writing lengthy letters to one another overseas.

Last month, on her 80th birthday, Kisner phoned Brixko and spoke with her for the first time since the war. Communication, in halting French and English mixed with tears, was difficult, he said. But being remembered and thanked obviously meant a lot to Brixko, according to Kisner. It also means a lot to him, he said.

and the bear came down the tree backward. The tree stood on the brow of a high mountain. Waters laid low until the bear was reaching for the ground with its hind feet. Then Waters grabbed both hind feet. The bear proved to be stronger than he had thought and it pulled hard to get away and just as it got to the [illegible] of the flat. Waters found himself he rode it clear to the foot of the mountain, where they landed in a laurel patch, and Waters got the bear down and was holding it.

The women followed on down and when they got in speaking distance Waters called to them and requested them to go on home. He said he had on as clothes, one sock, the waistband of his pants and his suspenders. The women had noticed the clothing as they came down the mountain and were surprised to hear that he had anything on. After they were gone he tied the bear with his gallows and brought it in.

Waters says that he was a young boy when he killed his first deer. He was given a kind of a swivel shot gun barrel six feet long, which he loaded with a handful of powder and twenty four big buckshot. He was given a stand on the bank of a river about one hundred and fity steps across. He stood with his back to a double tree with a fork in it. Presently, a big buck jumped into the river opposite him and came steadily across and when the deer was climbing out

Waters says that he was a young boy when he killed his first deer. He was given a kind of a swivel shot gun barrel six feet long, which he loaded with a handful of powder and twenty four big buckshot. He was given a stand on the bank of a river about one hundred and fity steps across. He stood with his back to a double tree with a fork in it. Presently, a big buck jumped into the river opposite him and came steadily across and when the deer was climbing out of the water within a few feet of him he fired full in its face. The deer went into a flurry and the boy was kicked back by the gun and landed in the fork of the tree so that he could not get out for a considerable length of time. He could hear the deer charging around but after a while he got loose and found that he had riddled the beast's head. Seventeen of the twenty-four buckshot had taken effect.

He had a good deal to do with fighting the wolves of his region. He was able to trap them and that made him an important man in his county, for wolves held back the raising of sheep many weary years in these mountains. On one occasion, snow on the ground, he came to a trap and

EAKING GROUND FOR an improvement project to the Greenbrier River Trail in arlinton are, l-r, Robin Mutscheller, U. S. Congressman Nick Rahall, Rich Hartman from W. Va. Department of Highways, Robert Beanblossem, District Administrator for the Park System, Marlinton Mayor Doug Dunbrack, Fred C. Burns, Jr., County ommissioner Reta Griffith, and Luther Crouthamel, Project Manager.

Groundbreaking ceremony held for Mountain Waters Byway project

Even though it was a cold and owy day, the Sunday, November ', ground breaking ceremony was ended by about 50 people who ard remarks from Rich Hartman, presenting the West Virginia vision of Highways from Charston, Robert Beanblossom, Dis-ct Administrator West Virginia partment of Natural Resources, Congressman Nick Rahall, who me in from DC for the event. so on the program were Jody ncer, Superintendent of the enbrier River Trail State Park; yor Doug Dunbrack; Fred C. rns, Jr., Luther Crouthamel, and sa Mutscheller.

Senator Helmick also stopped to offer his congratulations and port before returning to Charles-. Pocahontas County Conven-and Visitors Bureau was repre-ted by Gail Lowry. The Rich-d sector of the Mountain n Byway was represented by a ber of the Richwood Chamber ommerce.

Ms. Mutscheller opened the fes-ies by welcoming all guests speakers in the Opera House. Rev. Stanley Clark, pastor of Marlinton United Methodist rch, gave the invocation, and followed by County Commis-er Reta Griffith, who sang *The Spangled Banner*.

The groundbreaking ceremony was held under cover of the twin canopies of the PCCVB set midway between 8th and 9th Streets, where the improvements will be made along the Greenbrier River Trail, including benches, bicycle stands, lighting, information kiosk, landscaping etc. Participants received the six ceremonial shovels as a memento of the day. Kelly Potter, of The Hollow Tree, designed and decorated the keepsake cards/ribbons accompanying the shovels. Following the ceremony on site, a light buffet lunch was served at the Opera House, organized by Loretta Malcomb and Leslie Cain, with others helping them.

The Marlinton Business Association appreciates all its members and the community members who attended and helped make the day a success.

LESLIE CAIN, ROBIN Mutscheller, Carolyn Burns, and Loretta Malcomb enjoy the refreshments served during the groundbreaking ceremony for the Greenbrier River Trail improvement project.

Magistrate Court

ass O. Debolt, of Elkins, and es F. Howell, Jr., of Valley ad, both appeared before Magis-e Kathy Beverage on November n charges of possession of less n 15 grams of marijuana. They re each placed on probation for months and assessed $121 in rt costs.

Allen R. Garner, Jr., of Snowshoe, entered pleas of guilty to DUI, second offense, and driving with his license suspended before Magistrate Beverage on Thursday. He was sentenced to six months in jail, to be served concurrently, on each charge with fines totaling $1100. The jail time was suspended and Garner was placed on home

Fork, and domestic assault against Richard A. Friel, Sr., of Buckeye, were dismissed on Thursday.

Morris D. Byrd, of Marlinton, was arrested on five counts of false representation on Friday. The charges were filed by the Bureau of Employment Programs. He appeared before Magistrate Hevener and pled guilty to all charges. Byrd was sentenced to 30 days in jail on each count, to be served consecutively. Court costs came to $595

found that a wolf had sprung it and left two toes in the trap. The brute had made a plain trail, and Waters thought it would not go far or fast with a crippled foot and he trailed it into a cave that was too deep to see the end. Just above the time he got there two hounds came up and presently two men, their owners, appeared.

After discussing the situation for a time, Waters took his rifle and entered the cave which soon became very dark. Presently he observed the creature's eyes shining in the dark, and killed it with the rifle. He hauled the wolf out and the two men took it away from him, pleading the mountain law that their dogs had holed it and that it belonged to them

The three met in the county court to fight over the $20.00 bounty. Each of the two men claimed it, on the grounds that each dog had holed it up. Waters claimed it on the grounds that it had escaped from his trap wounded and that he had followed it up, located it, and killed it, without any assistance. Then he took the two toes out of his pocket, and the court seeing that they fitted the pelt, awarded Waters the twenty dollars.

The wild life of these great mountains was adjusted long before the white men came messing around, and I sometimes think that his puny efforts to increase or diminish the game do not amount to much in the eternal scheme of time.

Groundbreaking ceremony
Mountain Waters Byway pr

Even though it was a cold and snowy day, the Sunday, November 17, ground breaking ceremony was attended by about 50 people who heard remarks from Rich Hartman, representing the West Virginia Division of Highways from Charleston, Robert Beanblossom, District Administrator West Virginia Department of Natural Resources, and Congressman Nick Rahall, who came in from DC for the event. Also on the program were Jody Spencer, Superintendent of the Greenbrier River Trail State Park; Mayor Doug Dunbrack; Fred C. Burns, Jr., Luther Crouthamel, and Robin Mutscheller.

Senator Helmick also stopped by to offer his congratulations and support before returning to Charleston. Pocahontas County Convention and Visitors Bureau was represented by Gail Lowry. The Richwood sector of the Mountain Waters Byway was represented by a member of the Richwood Chamber of Commerce.

Ms. Mutscheller opened the festivities by welcoming all guests and speakers in the Opera House. The Rev. Stanley Clark, pastor of the Marlinton United Methodist Church, gave the invocation, and was followed by County Commissioner Reta Griffith, who sang *The Star Spangled Banner*.

The groundbreaking ceremony was held under cover of the twin canopies of the PCCVB set midway between 8th and 9th Streets, where the improvements will be made along the Greenbrier River Trail, including benches, bicycle stands, lighting, information kiosk, landscaping etc. Participants received the six ceremonial shovels as a memento of the day. Kelly Potter, of The Hollow Tree, designed and

CALVIN W. PRICE, EDITOR

THURSDAY, FEBRUARY 27, 1930

The legislature passes game laws to protect desirable animals fit for food, and these laws are pretty well observed by the educated, but there is a predatory set of creatures which do not believe in prohibition and they kill constantly and practically make the laws a dead letter. It has even been reasoned that by taking the guns away from the country boy that the balance of power has been disturbed and that the beasts and birds of prey are the sole beneficiaries of the iron laws. The boy with a gun could always be depended upon to fill a varment's hide full of shot and there by save the lives of harmless and useful animals.

The word varment is not from the word vermin. Vermin means a worm, and is applied to the smaller forms of life. The lexicographers who never lived in the Appalachaian Mountains or ever heard of the word except through such men as Davy Crockett or James Fenimore Cooper, have jumped to the conclusion that owing to the use of the word in England that it is a corruption of vermin from vermes, a worm.

Some years ago I made a research about this word and accumulated some notes and published my conclusions that the word was a corruption of the word vourment, meaning devoured. Our people never called fleas, gnats, caterpillers, and the like varmints. They called them vermin at

A Tribute
[to Allie C. Gibson]

If only a mother I could be
The kind of mother, Dave's is to me
One who raised such children great
Allie Gibson, who picked a good mate.
Together they made a home and then
Raised a family with smile and grin
For each one raised, so different they were
But taught love and manners and when to say, "Sir"
Six handsome sons God gave "well done"
And a lovely daughter, a special one
Now, time has past and Dad is gone
But God blessed Mom with heaven's throng
God needed him and their two sons
And gave her daughters-in-law to bless other ones
Also, of this love he gave her another son
Her daughter blessed her with this one
All in all through her children five
Grandma has grandchildren to keep her alive
All the love she has shared
Will in the future grow, because she cared.

—This tribute was written by Joanne Gibson, wife of Dave Gibson, from Deerfield, Florida.

Oren Waugh and Bill McMann visited friends in Ohio a few days last week.

back to the Spring Creek-Frankford area, and to

His wife is the former Mattie Winlock Harrison, of Kentucky, whom he married in 1941. They have two daughters, Carolyn, who is Director of Presbyterian Children's Home of the Highlands in Wytheville, Virginia, and Margaret, of Salem, Virginia. Two children died in infancy. Margaret has three daughters.

The Arbuckles will move to their home at Maxwelton.

Mrs. Glenna Moore and Mrs. Jean VanReenen last weekend visited Mrs. Moore's sister, Mrs. Mary Frances Meyers, in a convalescent home in Cumberland. Mrs. Meyers suffered a stroke recently.

Mr. and Mrs. Robert McLaughlin attended the banquet meeting of the West Virginia Horsemen's Association at Jackson's Mill last Friday.

Mr. and Mrs. Moffett McNeel, Mr. and Mrs. Harold Murphy, and Charles Wilfong attended the State meeting of the West Virginia Farm Bureau at Jackson's Mill the first of this week.

Pop Quiz: How Much Do You Know About Our Public

1. What percentage of Americans feel that a strong educational system will best guarantee a strong future

7. In 1970, 21 percent of the nation's high school honor students had used marijuana in some manner.

12. The school low-income $1.20 per m

guns away from the country boy that the balance of power has been disturbed and that the beasts and birds of prey are the sole beneficiaries of the iron laws. The boy with a gun could always be depended upon to fill a varment's hide full of shot and there by save the lives of harmless and useful animals.

The word varment is not from the word vermin. Vermin means a worm, and is applied to the smaller forms of life. The lexicographers who never lived in the Appalachaian Mountains or ever heard of the word except through such men as Davy Crockett or James Fenimore Cooper, have jumped to the conclusion that owing to the use of the word in England that it is a corruption of vermin from vermes, a worm.

Some years ago I made a research about this word and accumulated some notes and published my conclusions that the word was a corruption of the word vourment, meaning devoured. Our people never called fleas, gnats, caterpillers, and the like varments. They called them vermin at the same time that they called a wildcat a varment, and that is within my recollection. The presence of the meat-eaters in the woods was usually revealed by ravages in the sheep field, the hog-pen, or the forest. An inquest was held by the finder of the sign and he sized up the evidence. He would mention finding the mangled body of a deer. His hearers would ask: "What did the vourment look like." And the answer might be: "A panther." After strychnine was introdnced into this county nearly a hundred yenrs ago, it became the practise of the best hunters to carry some in a bottle and whenever they found signs of vourment, to poison the carcass and in this way they did a great deal to rid the woods of this kind of outlaw.

The legislatures have practically disarmed the American

Developer has interest in boiler at East Fork Industrial Park

At the County Commission meeting on Tuesday, Commissioner John Simmons reported that another company is interested in using the former Howes Leather Company wood-fired boiler at the East Fork Industrial Park for the generation of electricity. At its last meeting, the Commission learned that PEPCO is no longer interested in such a project and released the balance of the 18 month period it was given to have exclusive right to study the project.

Mr. Simmons reported that Brad Rogers Investment Group is now wanting to make the needed study to determine if the project is feasible. He recommended that the Commission offer this group the boiler and associated equipment, along with two acres of land, for $1 per year. Any additional acreage needed for the project to be leased at the rate of $100 per month per acre

meat-eaters in the woods was usually revealed by ravages in the sheep field, the hog-pen, or the forest. An inquest was held by the finder of the sign and he sized up the evidence. He would mention finding the mangled body of a deer. His hearers would ask: "What did the vourment look like." And the answer might be: "A panther." After strychnine was introdnced into this county nearly a hundred yenrs ago, it became the practise of the best hunters to carry some in a bottle and whenever they found signs of vourment, to poison the carcass and in this way they did a great deal to rid the woods of this kind of outlaw.

The legislatures have practically disarmed the American people and it is hard to imagine where the riflemen are to be secured for the next war. They insist on choice youth in their twenties to fight the war brought on by hob-nailed livers, and they ought to let every boy carry a gun without license and it would be no bad idea to present him with a gun.

The word varment was applied to the larger animals. The following were the most prominent of the class: *Indians*, wolves, bears, panthers, lynx [illegible] mink and weasels. birds. No one has ever used the word varment to describe the eagle or the other winged meat eaters so far as a purist in mountain language has observed.

Mention should be made however that in England that the use of the word vermin did not always apply to creeping and crawling things. As soon as any animal of any kind got to be a menace to the people it was called vermin. In some of the counties there were regular vermin hunters who destroyed such things as moles, field mice, and other enemies of the farmer.

Marlinton Girls

The Marlint
School Girls
team lost thei

to present [illegible] was applied to
The word varment was applied to
the larger animals. The following
were the most prominent of the class:
[illegible] panthers, lynx
birds. No one has ever used the
word varment to describe the eagle
or the other winged meat eaters so
far as a purist in mountain language
has observed.

Mention should be made however
that in England that the use of the
word vermin did not always apply to
creeping and crawling things. As
soon as any animal of any kind got to
be a menace to the people it was
called vermin. In some of the coun-
ties there were regular vermin hun-
ters who destroyed such things as
moles, field mice, and other enemies
of the farmer.

In that country of great game pre-
serves, the game keeper was a hun-
ter and trapper of game eating ani-
mals, excepting the sacred fox. And
this warfare was carried on so relent-
lessly, that at times, the meat eaters
were eliminated, and the game birds
and hares and rabbits increased so
enormously that the livings of the
people were threatened. It was a
country of intense farming. The
lord of the manor might take great
stretches of the country for game pre-
serves, while the poor lived off their
gardens and truck patches. Thus a
man's garden would be destroyed
by the scourge of rabbits, and then
the hares and rabbits in their turn
became vermin and were to be destoy-
ed. The nice balance that nature
had provided had been disturbed.

In the United States the balance
was destroyed by the importation of
the English sparrow and for fifty
years the country was divided on the
question, the vast majority being
against the jolly little bird. But

300,000 gallon capacity, will be available immediately. The other, which holds 250,000 gallons, will be available when the contractor for the environmental clean-up project has finished his work.

The Commission approved the employment of Dottie Halterman as a part-time correctional officer/911 dispatcher and Robbie Sharp as a deputy sheriff. Mr. Sharp will fill the position created by the resignation of J. L. Clifton. Sheriff Robert Alkire told the Commission that initially there were 16 applicants for the deputy's position. However, only nine came for the civil service test and Mr. Sharp was the only one to meet all the requirements for a deputy, the Sheriff said. Two other applicants would have qualified, he said, but they withdrew because of the salary paid to deputy sheriffs.

Only one bid was received for the chain link fence around the gasoline tank at the Court House. It was for $4100 from Woodridge Construction Company. The bid was accepted.

gardens and truck patches. Thus a man's garden would be destroyed by the scourge of rabbits, and then the hares and rabbits in their turn became vermin and were to be destoyed. The nice balance that nature had provided had been disturbed.

In the United States the balance was destroyed by the importation of the English sparrow and for fifty years the country was divided on the question, the vast majority being against the jolly little bird. But something has happened to the sparrow. He is not in evidence. At least not here anymore. Suspicion attaches to a roughneck that has come here in such great numbers, the starling. The starling brings a good reputation to this country but he has not been received by all the best people, though many of us did not bar the English sparrow. The American starling (meadow lark) has not a stain upon his character.

In making up the list of undesirable members of the meat eaters, the weasel, considering his size, easily led all the rest. This bloodthirsty brute fears nothing. If it meet a man armed with a gun in a path in the woods and knows that it is observed it will hold its ground with the air of an angry lion and intimate to the hunter that if he does not want to be destroyed he had better turn back or go a long way around This has resulted in many a one being shot the bullet boring a hole through the body that a man could thrust his arm through, as the old hunter remarked about a ground squirrel that he had gunned. The weasel weighs about the same as a common rat and

tank at the Court House. It was $4100 from Worledge Construction Company. The bid was accepted.

Commissioner Reta Griffith reported on a meeting held at Durbin on Monday on developing a hazard mitigation plan for the county. She said 20 people were at the meeting with a good discussion of various hazards in that area. Five people volunteered to serve on a committee to develop the plan, she stated.

The Durbin meeting is the first in a series to be held around the county.

Joe Wooden, from Valley Electric, of Frankford, reported on teh work his company has done to upgrade the electrical system in the jail building. He also gave a list of additional items that need to be done to upgrade the system, particularly for safety reasons. Approval was given for additional work, including rewiring the cell blocks and other areas, new lighting and outlets, and a new 100 amp breaker. The estimated cost will be $12,670.

William Hickman

William Hickman, 84, of Marlinton, died in Pocahontas Memorial Hospital Monday, November 14, 1983, after a short illness.

Mr. Hickman, a member of the United Methodist Church, was a retired college professor and former teacher at Marlinton High School. He was a graduate of West Virginia Wesleyan, received his Master's degree from West Virginia University and his Ph.D. from Pitt University, teaching at those colleges and at the University of Florida.

Born at Pennsboro August 11, 1899, he was the son of Lester and Mary Alice Burns Hickman. Two sisters, Margaret Dillon and Rose Elengart preceded him in death.

A sister, Mrs. Barbara Doltis, of Daytona Beach, Florida, and two nieces and two nephews survive him.

Services will be held in VanReenen Funeral Home Chapel at 11 a. m. Thursday by the Rev. Robert Cruikshank with burial in Mountain View Cemetery.

many of us did not bar the English sparrow. The American starling (meadow lark) has not a stain upon his character.

In making up the list of undesirable members of the meat eaters, the weasel, considering his size, easily led all the rest. This bloodthirsty brute fears nothing. If it meet a man armed with a gun in a path in the woods and knows that it is observed it will hold its ground with the air of an angry lion and intimate to the hunter that if he does not want to be destroyed he had better turn back or go a long way around This has resulted in many a one being shot the bullet boring a hole through the body that a man could thrust his arm through, as the old hunter remarked about a ground sqnirrel that he had gunned. The weasel weighs about the same as a common rat and can easily kill the largest rooster on the farm and suck the blood.

One of the most aggravating things connected with the weasel is its habit of concealing itself in the cliffs or log piles on a mountain side. Then when the hunter comes in at the close of the day and shoots a grey squirrel from the top of a tall tree the weasel grabs it and drags it to its den, and the hunter looks long and in vain for the game. If the weasel is detected in carrying off game, it will

obtaining land for a future school in the Snowshoe/Slaty Fork area.

In personnel matters the Board approved:

* employment of Beth Auldridge and Carolyn Pennington as assistants for the Hillsboro extended day program, on a contract basis.

* employment of Frances Galford as assistant for the Hillsboro extended day program

* employment of Elaine Faulknier as secretary/accountant in the central office

* change in the number of hours for Katherine Snyder as teacher for the Marlinton Elementary extended day program.

The Board met in an executive session on personnel prior to taking action on the personnel matters.

The next regular Board meeting will be on December 9.

Dear Editor,

I would like to take this opportunity to publicly congratulate James Carpenter in his winning the seat on the Pocahontas County Commission. I wish him the very best. Like any other contest, there must be a winner and a loser.

However, why the other opponent, the Reform Party candidate, attacked me with all those lies and half-truths in that garbage publication, Signal Fires of WV, is beyond my comprehension. As a public official, I have no problem with anybody disagreeing with any decision I help to make or to voice their opinion on any subject. That's their right, as long as they tell it the way it happened.

If he thinks that he can ever win any public office by downgrading others, he is badly mistaken. I did not respond to his lies before the election, and I see now where that was my big mistake. I would have been down to his low level to get into a campaign mudslinging match in the press.

I have more respect for the campaign process than that. I guess I gave some folks too much credit as I was advised by several just to ignore that trash, as no one believes it anyway, especially when they consider the source. Whenever you point your finger at someone, three fingers are pointing back at you. I could have made a big deal out of him being a convicted felon and having spent 33 months in a federal penitentiary for trying to get around the tax laws of the land then he turns around and asks the voters to allow him to [illegible] completed, except the big one, the lime sludge removal and disposal and that is now about 90% complete. After this is done, the county will have a completely clean bill of health on the property. I never had a subpoena to appear at any kangaroo court hearing that my Reform Party opponent was playing attorney at, this can be checked out in the county court records. I did not hide in Randolph County as he says. I was working for Union Tools in Beverly at the time and was home every night. If I would have had a subpoena, I would have been there, I don't violate the law as some do. By the way, I was one of the first to leave Howes when they announced the plant was closing, gone within one hour. My pension was at the same rate as all other supervisors, except I had 32 years and seven months seniority.

As for his far-fetched accusation that I raised taxes so that we could be paid a larger salary, I didn't know I had the power to raise taxes by myself!

The tax structure is somewhat complicated to understand, but each year the levy automatically goes up 3% without any deliberate tax levy increase. But the commission only controls 40% of taxes with the board of education controlling 60%. That would be 3% of 40% or about 1% the commission controls. In other words, a dollar increase on every $100 of taxes paid. This does not even keep up with inflation We could have raised the levy rate 10% each year by law, but we chose not to. Last year the

President.
Marlinton & Clover Lick Mutual Telephone Company.

respond to his lies before the election, and I see now where that was my big mistake. I would have been down to his low level to get into a campaign mudslinging match in the press.

I have more respect for the campaign process than that. I guess I gave some folks too much credit as I was advised by several just to ignore that trash, as no one believes it anyway, especially when they consider the source. Whenever you point your finger at someone, three fingers are pointing back at you. I could have made a big deal out of him being a convicted felon and having spent 33 months in a federal penitentiary for trying to get around the tax laws of the land then he turns around and asks the voters to allow him to help run our county government! What brass. What laws would he try to circumvent on the county level?

For the sake of space, I cannot go into detail to rebut all the lies that he printed about me, but I will tell the REAL side of the story on just a few and will be glad to go into more detail on each allegation if asked.

First, the 100 horses he says I helped steal. Since this case is in litigation, I cannot go into detail, but I can assure you one thing, the story is much different than what he says. There were 31 horses, not 100, and it's a shame that this had to happen, but when you have the sheriff, prosecutor, humane officer, [illegible] and the humane socie[illegible] involved, in agreement, you can bet there was a problem at hand that needed attention. The county commission is

had 32 years and seven months seniority.

As for his far-fetched accusation that I raised taxes so that we could be paid a larger salary, I didn't know I had the power to raise taxes by myself!

The tax structure is somewhat complicated to understand, but each year the levy automatically goes up 3% without any deliberate tax levy increase. But the commission only controls 40% of taxes with the board of education controlling 60%. That would be 3% of 40% or about 1% the commission controls. In other words, a dollar increase on every $100 of taxes paid. This does not even keep up with inflation We could have raised the levy rate 10% each year by law, but we chose not to. Last year the rate was at about 1/2%. The class that the county is in is what determines all elected officials salaries. The total evaluation of property, thanks to all the new building in the Snowshoe area has caused to class to change three times in the last four years. If this extra tax base was not there, I can assure you we would all be paying much higher taxes than we are. Because of the class changes, the commission salary was $18,500 four years ago and now is at $21,500, which is set by state law, not by county.

I will end here, but will be more than happy to set the record straight on all the other lies that were spread about me before election time. I tried my very best to work for our county in the past four years, but there is no doubt these lies did me in. I don't feel that I am the loser, the county is. I will go back into the private work

formally announced that Jo Ann Fromhart is the Pocahontas County nominee for Teacher of the Year. Mrs. Fromhart, of Seneca Forest, has been teaching in Pocahontas County for fifteen years. She currently serves as Language Arts teacher at Green Bank Middle School.

Mrs. Fromhart graduated from Fairmont State College and has completed some graduate work at West Virginia University. She taught for four years in Preston County prior to moving to Pocahontas County.

She currently serves on the West Virginia Advisory Council on the Professional Development of Educational Personnel.

Mrs. Fromhart is known for her pleasant disposition and her firm discipline in a motherly fashion. She takes a personal interest in each and every student.

National Lunch Week

TOWN COUNCIL

A regular meeting of the council of the town of Marlinton was held in the Mayor's office on Monday, July 1, with F. C. Allen, mayor; A. H. McFerrin, recorder and Ira D. Brill, F. M. Sydnor, C. E. Denison, D. W. Williams and D. C. Adkison, councilmen present. Minutes of last meeting were read and approved.

A letter from Mr. S. N. Bench, Supt. of Greenbrier Tannery was read advising the council that it would require a period of six months before the tannery would be in position to sell current to the corporation of Marlinton. They would also ask a rate of 4 1-2 per KWH delivered at a point on their property to connect with the town wire and would also require a clause in the contract with the privilege of canceling the contract on six months notice. The proposition was put to a vote and was rejected by a unanimous vote.

Monthly bills were allowed and ordered paid.

It was ordered that a notice be published in the paper and also signs be posted along the streets calling attention of automobile drivers to the speed limit in the town of 25 miles in the residential section and 15 miles in the business section. This law will be enforced.

On motion the mayor was authorized to employ a man for police duty for the month of August.

Mr. Allen, representing the Fairbanks Morse Co., met with the council and discussed the proposition of furnishing a new unit for the light plant. After some discussion a committe consisting of F. C. Allen, Mayor; and D. C. Adkison was appointed to meet with Mr. Allen, A. P. Edgar and F. R. Hill on Tuesday and work out the plan and report to the council at a meeting on Tuesday, July 2nd.

At the continued meeting of the Town Council held on Tuesday night the council bought from the Fairbanks Morse Company one 150 K. V. A. electrical unit for $8000. To run unit the council leased one Deisel 180 h. p. oil burning engine. This is a complete unit of double capacity of the present light plant. It is the latest thing in electrical equipment. Not only will this unit take care of the needs of the community for years to come, but when more electricity is needed another unit may be added. It is expected that the machinery will be shipped by October 1.

Oil burning engines are much more economical to run than coal consum-

the county level.

For the sake of space, I cannot go into detail to rebut all the lies that he printed about me, but I will tell the REAL side of the story on just a few and will be glad to go into more detail on each allegation if asked.

First, the 100 horses he says I helped steal. Since this case is in litigation, I cannot go into detail, but I can assure you one thing, the story is much different than what he says. There were 31 horses, not 100, and it's a shame that this had to happen, but when you have the sheriff, prosecutor, humane officer, veterinarians and the humane society from two counties involved, in agreement, you can bet there was a problem at hand that needed attention. The county commission is automatically named in every lawsuit against the county, as we are the fiscal officers of the county, but we were not directly involved and were named as a body, not individually.

On his accusation of my cover-up of toxic chemicals for Howes Leather Company, this is absolutely false. After Howes closed, the DEP and DNR inspected that site very closely and took many soil samples that proved there was no threat to the groundwater. They made a check-off list of 12 physical problems that needed to be corrected on-site and all of them have been

elected officials salaries. The total evaluation of property, thanks to all the new building in the Snowshoe area has caused to class to change three times in the last four years. If this extra tax base was not there, I can assure you we would all be paying much higher taxes than we are. Because of the class changes, the commission salary was $18,500 four years ago and now is at $21,500, which is set by state law, not by county.

I will end here, but will be more than happy to set the record straight on all the other lies that were spread about me before election time. I tried my very best to work for our county in the past four years, but there is no doubt these lies did me in. I don't feel that I am the loser, the county is. I will go back into the private work sector full-time in January where the pay is much better and the headaches are much fewer. I just wanted the chance to complete some of the projects in economic development I was working on, but I accept the defeat with the pride in being allowed to work for you as long as I did. Thank you for the opportunity. Life goes on.

Letters to the Editor

Bill McNeel disgorged a lengthy "Comment" on the recent Board of Education hearing. I'm glad Bill let us all know where he stands; now I would like to address some of his concerns.

First of all, when a group of citizens petitions the government for a redress of grievances, it should never be so casually written off as "meaningless." It is part of a healthy system of checks and balances; if people don't keep a close eye on the actions of their officials, then those officials might be tempted to take advantage of their positions to benefit themselves personally, at the expense of the public good. This matter involving the BOE is very serious—it involves the question of whether or not our Superintendent of Schools and some members of the Board are more interested in the perks of their office than in the education of the students of Pocahontas County—and if that is even a possibility then it deserves to be looked into!

The editor fears that if the risk of this kind of lawsuit becomes associated with the position, then "it will be impossible to get qualified citizens to consider running for the board of education (or other similar positions)."

To that I can only say that honest zen should only bring issues of government corruption to light on the basis of whether or not an official has "been good" to the citizen?

Isn't that "you scratch my back, I'll scratch yours" mentality the very basis on which the practice of BRIBERY is built? If anything, Alderman should be applauded for staying his course regardless of how he has been treated personally.

The editor also is concerned that if Alderman's action is successful, it will harm "not only the people in the lawsuit, but also the students and his fellow staff members." I attended school in Pocahontas County since the second grade; I graduated from PCHS in 2000. I've seen several cases of good teachers, frustrated or squeezed out of the school system because of the special privileges and favoritism shown to other, not-so-good teachers. And I've seen many more cases of students' time and energy wasted by ridiculous policies implemented by certain incompetent elements in the school administration. So let me assure the editor that the Pocahontas County School System can't get much worse! If this lawsuit is successful, it would only free up the many good teachers still struggling to do their job in this

HOSPITAL NOTES

Mrs. Hull Kramer, of Barlow, returned to her home last Saturday after being in the hospital for five weeks, her condition was much improved.

Miss Nella McLaughlin returned to her home at Dunmore after being in the hospital two months, her condition was greatly improved.

Mr. M. A. Atkinson, living near Marlinton, and who received very serious injuries from a fall off a pile of tanbark, a month ago, is able to be moved to his home for the 4th of July.

Miss Ella Pritchard, of Dunmore, is improved from treatment she has received since she has been in the hospital.

Mrs. Hanson Moore and baby will soon be able to return to their home at Minnehaha Springs.

Squire Hevener, of Bartow, is improving slowly from a long illness of several years. His mother, Mrs. Hevener, of Lewisburg, is visiting him this week.

Mrs. Renick Hogsett, of Huntersville, was brot to the hospital last Wednesday, June 26, having suffered fracture of the left leg. Her condition s very satisfactory, despite her advanced age.

Mrs. Thompson Clutter, of Lobelia, in the hospital for treatment, she the mother of Prof. E. C. Clutter, Hillsboro.

Joseph Friel, of Clawson, a lad of rteen, was brot to the hospital for servation, having injured his knee.

Mrs. Wm. Shearer, of Edray, was ivered of a male child, Monday at m. The child was dead. The her is doing fairly well, Monday

ODD FELLOW CHILDREN

The Odd Fellow Home Band was here last Friday night, and gave minstrel shows in the high school auditorium. At the first show people were turned away, and there was a good crowd at the second performance The young people gave entertainment at Durbin, Cass and Hillsboro, also. They are well trained and their entertainment is well worth going to. Their band is one of the best in the in the State.

The Odd Fellows of West Virginia maintain a home at Elkins for aged and dependent members of the lodge, their wives, widows and orphans At the present time there are over 200 in the institution. Of these 166 are children in school. The institution is located on a large farm. The idea is to make the institution as far as it is possible a real home.

The children attend the public schools of the city of Elkins. Each year there are a number who graduate in the high school. Then if these high school graduates are ambitious for a college training the Odd Fellow see that they are given an opportunity to go to college also. This year two graduate at the University and two at Normal schools. To raise money for this purpose, the home has purchased a large bus, and each summer the boys and girls of the band go out over the State and give minstrel shows in the towns where there is an Odd Fellow lodge. Whereever they go, the local Odd Fellows take care of the entertainment of the children and their chaperones, and other incidental expenses. As a result of the season's trouping, a good sum of money is raised each year to help defrayed college expenses.

The children are well clothed and show the effects of good training. On these trips they are usually accompanied by Hon. A. J. Wilkenson, of Huntington, but this year he is laid up with injuries received in an automobile accident. His place is well filled by Mr. Woodie, of Wheeling.

Meade Waugh, Edward Rexrode and Norman McHenry are the young men from Marlinton at the Citizens' Training Camp at Fort Thomas, Kentucky.

Miss Dunnaton Beckett

Superintendent of Schools] some members of the Board are more interested in the perks of their office than in the education of the students of Pocahontas County— and if that is even a possibility then it deserves to be looked into!

The editor fears that if the risk of this kind of lawsuit becomes associated with the position, then "it will be impossible to get qualified citizens to consider running for the board of education (or other similar positions)."

To that I can only say that honest people have no fear of being held accountable for their actions. We should not be afraid of discouraging those who have something to hide from seeking public office. Besides, an even greater discouragement to getting good people to consider running for public office is if there is a general perception that corruption and favoritism are tolerated in local government!

The editor can't understand why Norman Alderman would continue to spearhead this action because "the Pocahontas County School System has been very good to Mr. Alderman over the years, as have the very people he is now attacking."

I think that only proves Alderman is not motivated by any personal agenda or vendetta, but by a genuine desire to see justice done!

Is the editor implying that a citi-

[because of the special] privileges and favoritism shown to other, not-so-good teachers. And I've seen many more cases of students' time and energy wasted by ridiculous policies implemented by certain incompetent elements in the school administration. So let me assure the editor that the Pocahontas County School System can't get much worse! If this lawsuit is successful, it would only free up the many good teachers still struggling to do their job in this county from having to worry about petty internal politics, and that would be good for the students!

Thomas Jefferson wrote "Lay down true principles and adhere to them inflexibly. Do not be frightened into their surrender by the alarms of the timid, or the croakings of wealth against the ascendency of the people." If this lawsuit has no merit then the judges will dismiss it. If it has merit, then they will take action. But either way, there is nothing to fear— the school students and taxpayers of this county will come out ahead, secure in the knowledge that we have an honest, upright Board of Education able to stand up to the scrutiny of the law.

Respectfully,
Warren F. Balogh

Pocahontas County High School won first place in the plant pathology judging competition at the 60th annual vocational agriculture contests held at West Virginia University. Team members received a plaque from Dr. Mannon Gallegly, chairman of WVU's Division of Plant and Soil Sciences. From left, Robert Reel, adviser; Jim Pritchard; Rick Lantz; Pat Burns; Steven Bland, adviser; and Gallegly. New attendance records were set this year for the judging contests as 58 schools and 827 students from throughout the state participated.

Miss Helen Fortune spent the week end in Clifton Forge and Roanoke.

Stony Bottom, W. Va.

Dear Editor:

Unfortunately, there are a lot of Norman Aldermans in the world: petty, negative people who seem to delight in derailing—hopefully only temporarily—the system.

Their negativism is costly in lost time and money dealing with frivolous lawsuits. As part of our needed legal reform there should be a provision which not only requires a losing plaintiff to reimburse the defendant for attorneys' fees and court costs but also a sizable percentage of the amount sued for.

This would put a pause into frivolous lawsuits such as Arabian horses and Norman Alderman, who both have more than one thing in common.

Bravo, to WPM's November 14 editorial comment!

The Drive.

At this season of the year every one is more or less interested in "the drive." Those acquainted with the county know what is meant by "the drive," but to the uninitiated we will explain,

The logs which have been cut the preceding year, all of the same length, rounded up at the ends, and peeled, are piled up on the bank of some stream on skids. When all danger of the river freezing and of ice-gorges is over the logs are "broken in," and they float away towards Ronceverte.

At first the surface of the river is covered with them so that an expert lumberman might cross the stream by jumping from one to another, but the logs find stopping places along either bank and on islands, and so hardly a log reaches Ronceverte, where the boom is situated. Consequently the logs must be followed up, dislodged from the places where

Jaguars finish perfect season

At first the surface of the river is covered with them so that an expert lumberman might cross the stream by jumping from one to another, but the logs find stopping places along either bank and on islands, and so hardly a log reaches Rouceverte, where the boom is situated. Consequently the logs must be followed up, dislodged from the places where they have drifted, and put in the current again until every one is delivered at Roncoverte to be sawed.

The entire force which has been at work cutting all winter comes on the drive, and generally the driving crew consists of from seventy-five to one hundred men, and some eight or ten two-horse teams. The men must be housed and fed and the horses carried, and so a house about one hundred feet long is built on a raft of square-hewn pine timber, in which the men eat and sleep and the cooking is done. This is known as the "Ark." Two flat-bottomed boats are made, and a stable built on the one and a blacksmith shop and some horse-stalls on the other.

Jaguars finish perfect season

The Green Bank U-14 soccer team finished a perfect 11-0 regular season with an 8-1 victory over Pocahontas South on Sunday, November 3. This followed an exciting come-from-behind win over Highland County in the Highland "Soccerfest" on Saturday, November 2. The Jaguars' road to perfection included wins over Pendleton County (3), Highland County (3), Pocahontas South (2), Petersburg, and Covington.

Team members included: Erica Arbogast, Shawn Bland, Dustin Cassell, Chris Caplinger, Trevor Caplinger, Billy Currance, Katie Ford, Raymond Ford, Michelle Holstine, Mason Jewell, Derek Jonese, Kachine Jonese, Elizabeth Lockman, Stephen Rebenski, Ben Rittenhouse, Jacob Sheets, Brian Warner, and Thomas Webb.

The team, Coach Bob Sheets, and parents celebrated the successful season with a dinner and awards ceremony at the B&B Roadhouse in Marlinton. Coach Sheets commented on the players' contributions and their improvement over their years in the league. He also noted how many opposing coaches and game officials had praised the team's ability to pass and their willingness to "share the ball."

stalls on the [illegible]

These equipments being ready and the furniture put in, the crew has to wait for a "tide." When the river gets so deep that it can not be forded easily, there is water enough to make the driving easy. The men take canthooks and pry the logs loose from the shoals and shallow places where they have lodged. The teams are busy hauling in logs which have floated out too far to be handled by men.

When one of the workmen wishes to go down stream, he mounts a good sized log and rides it, standing as firmly as Patience on the monument. They all have calks in their boots and wear very heavy flannel clothes. Tho the water may freeze on the canthook and the banks of the river be covered with snow, the true lumberman immediately gets wet to the waist and works all day in the best of spirits.

As a rule, they eat four meals a day, the "ark" dropping down near the rear and bringing the dinner to the men. The food is of the very best the country affords, and is prepared by cooks who understand their business. With the exception of the style in which it is served, the meals are as good as one would get at a good hotel

ROBERT POWELL, RIGHT, salutes following his promotion to Commander in the United States Navel Reserve.

Powell receives Navy Reserve promotion

Robert "Bob" Powell, currently assigned to Commander Second Fleet, Joint Forces Air Component Commander, Norfolk Virginia, was recently promoted to the rank of Commander in the United States Navy Reserves.

The promotion took place aboard the USS Mount Whitney, Commander Second Fleet Flag ship. The oath of office was given by Lt. Col. Michael Ogus, United States Army, while Commander Powell's wife, Desi, looked on. Special guests included Admiral Archuleta, Joint Forces Air Component Commander and other family members.

During the ceremony, tradition is to replace the current officer collar devices with new Commander devices. During the ceremony, Lt. Col. Ogus tossed the old collar devices overboard as tradition is Commander Powell will never need his old collar devices again.

Commander Powell currently holds the position of Deputy Assistant Chief of Staff for Intelligence, Joint Forces Air Component Commander, where he has served for the past two years. In his civilian capacity, he is a program manager for the Army Unmanned Aerial Vehicle program and works at Fort Monroe, Virginia.

Commander Powell is the son of Mr. and Mrs. Leonard Edgar Powell, of Droop.

Anniversary

Fiftieth Wedding Anniversary

David and Evelyn Beverage, of Buckeye, celebrated their 50th Anniversary on October 27, 2002. The celebration started at noon with a potluck dinner consisting of many dishes. A great time was shared by many friends and family.

A beautiful anniversary cake, along with many other foods and drinks, were donated by their children and family. The afternoon was spent in reminiscence and playing horseshoes.

The family had a cluster of balloons, pink for the girls and blue for the boys, presented for the day.

All of the children made it home for the celebration, making it

If You Know Him, Write the Sheriff

Henry Wright, a prisoner in the jail, who was sent here from Cass for posession of moonshine liquor, was taken seriously ill with some intestinal disease and also seems to be affected mentally. He is being treated at the hospital. His home is said to be at Leonard, Greenbrier county, but nothing definite has been learned about his residence or family, if any. He will probably be committed to the State Hospital, if his condition warrants his removal. Any one knowing this man, or any information as to his relatives, kindly communicate with the Sheriff's office, Marlinton, Pocahontas County, W. Va. He seems to have been chronically sick for a long time, and bears the scars of several abdominal wounds or operations.

abdominal wounds or operations.

Theodore Carr Taken To Moundsville Mon.; To Hang June 14th

Petition to Commute Sentence Will Be Submitted to Governor Conley.

Guards, sent from the State Penitentiary, Moundsville, left here Monday with Theodore Carr, 50, farmer, who is under sentence to hang June 14th, for the murder of his brother-in-law, Lock Sharp. He was sentenced May 27 but was not taken to prison because of an appeal pending in the state supreme court. The appeal was denied.

Carr shot and killed Sharp, and his wife, Lydia Howdyshell, last November as they were surveying a piece of land on which he claimed he had forbidden them to trespass. His trial was held at the March term of Circuit Court.

Citizens seek to appear before Grand Jury

Three Pocahontas County Citizens petitioned the Circuit Court Friday, asking that they be allowed to appear before the grand jury in December.

Two of the three were successful in their pleadings, while the other may have a special prosecutor appointed to his case.

Richard Johnson asked Chief Judge James Rowe for transcripts of the August 5 and 6 grand jury. Johnson told the judge certain violations had occurred during the closed court session.

Johnson was indicted for child abuse resulting in injury.

Johnson said Weiford never contacted him during the course of the state's investigation against him.

Conversely, Johnson said he had never made an appointment to see the prosecutor concerning the matter.

"You are obligated to do that," Rowe told him.

Johnson said Weiford would be a witness in the case, as well.

Assistant Prosecuting Attorney Tony Tatano has a conflict of interest in the case, Johnson said, and could not represent Johnson while he was a public defender.

"I don't know what I'm a witness to," Weiford maintained.

Johnson had petitioned the court to appear before the

Curry told the court that story wasn't true.

Rowe allowed her to speak even though she didn't appear at her originally scheduled time. Curry said she had vehicle trouble and was not able to arrive at 10:15 a.m.

While the third petitioner didn't gain access to December's grand jury, his case concerning the Open Meetings Act may get its own prosecutor.

Norman Alderman, who was arrested in April after he refused to stop video- and audio-taping a board of education meeting, told the court his rights under the act were violated.

The Open Meetings Act, or Sunshine Law, allows audio- and video-taping of public meetings.

Alderman was physically dragged from the meeting by a state police officer who repeatedly asked him to go along peacefully.

He said Weiford, by virtue of the passage of time, was apparently not going to bring charges against board of education members Kermit Friel, Kenneth Vance, Ruth Taylor, Diane Buzzard and Bernard "Fuzzy" King.

"I don't think the issue was properly investigated," he said. Alderman is the Data Management

in the work, the exposure. ness results from the exposure. One of our county men lost a leg by getting it caught in a coil of rope when they "snubbed" the ark.

The greater part of the timber which has been cut has been floated down small tributaries of the Greenbrier, rnd on these "splash-dams" nre used. That is, the water is accumulated and then let loose thro the flood-gates. The additional supply of water helps the work.

Of late years, Knapps Creek has been supplying the greater part of the cutting of the county, the camps being established there after the timber was all out in the Dunmore neighborhood. The first drive down Knapps Creek was in the spring of 1887. Colonel John

stay of execution will be presented to Governor Conley next week, but it has not been predicted what action the governor is expected to take in the matter.

Wallace and Gibson on Board of Review

Among members of the various county boards of review and equalization appointed by the state Board of Public Works, were the following:

W. B. Hines, of White Sulphur, reappointed to the Greenbrier county board of review and equalization for a six year term.

A. J. Kincaid appointed to the Fayette county board for six year term.

Henry G. Brown, of Wolf Creek, district, to Monroe county board for six year term.

A. L. Craig, Richwood, to Nicholas county board for six years.

S. B. Wallace, of Marlinton, (six

the August 5 and 6 grand jury. Johnson told the judge certain violations had occurred during the closed court session.

Johnson was indicted for child abuse resulting in injury.

Johnson said Weiford never contacted him during the course of the state's investigation against him.

Conversely, Johnson said he had never made an appointment to see the prosecutor concerning the matter.

"You are obligated to do that," Rowe told him.

Johnson said Weiford would be a witness in the case, as well.

Assistant Prosecuting Attorney Tony Tatano has a conflict of interest in the case, Johnson said, and could not represent Johnson while he was a public defender.

"I don't know what I'm a witness to," Weiford maintained.

Johnson had petitioned the court to appear before the August grand jury, as well, but did not appear then because he said he didn't know when he was supposed to do so.

Hillsboro resident Judy Curry will seek redress against Weiford, whom she says assaulted her in his office, shoving her out into the courthouse hall. Curry said she had pointed out to him crimes committed against her that were not addressed by law enforcement. Weiford lost his temperment, Curry said.

Curry also said that Captain David Walton, of the Pocahontas County Sheriff's Department, had conspired against her by not investigating his relatives who had committed crimes against her.

She asked the judge to clear the courtroom prior to her accusations because a "relative or close friend" of Circuit Clerk Earl Michael was involved in the plot against her.

Rowe did not respond to her re-

prosecutor.

Norman Alderman, who was arrested in April after he refused to stop video- and audio-taping a board of education meeting, told the court his rights under the act were violated.

The Open Meetings Act, or Sunshine Law, allows audio- and video-taping of public meetings.

Alderman was physically dragged from the meeting by a state police officer who repeatedly asked him to go along peacefully.

He said Weiford, by virtue of the passage of time, was apparently not going to bring charges against board of education members Kermit Friel, Kenneth Vance, Ruth Taylor, Diane Buzzard and Bernard "Fuzzy" King.

"I don't think the issue was properly investigated," he said. Alderman is the Data Management Facilitator for the Pocahontas County Board of Education. When his name was placed on the transfer list last year, he filed a grievance and was taken off that list after a hearing. Alderman has since taken Friel, Vance, Taylor and Superintendent of Schools James Phares to court over eligibility and residence issues.

"His appearance here today is the only indication I've had that he believes himself to be the victim of a crime," Weiford responded.

Weiford agreed with Rowe that, in this case, the appointment of a special prosecutor was in order since Alderman has been charged with interrupting a board of education meeting, disturbing the peace and obstructing an officer. Weiford is the prosecutor on those charges.

Rowe deferred this petition until Alderman makes a complaint to Weiford, but Alderman argued that any more passage of time might

camps being
ter the timber was all out in the Dunmore neighborhood. The first drive down Knapps Creek was in the spring of 1887. Colonel John Driscol, since President of the Company, had taken a job of cutting near Huntersville to sever the timber from the land before a certain lease expired. The main drive under the direction of Mr Van-Dyke, was on the Greenbrier, and expected to reach the mouth of Knapp's Creek one Saturday evening. He sent Colonel Driscol word that if he did not get his logs out by the time he got to the mouth of the creek, he would not wait, and that he could drive to Ronceverte himself. Then came the race for the mouth of the creek. Colonel Driscol pressed into service every man and boy in the neighborhood of Marlinton who was big enough to carry a canthook. It was a most tremendous assemblage of unskilled workmen, but they were willing and all as enthusiastic as their

the stores have to offer. Many others will be found in the store.

The sale is conducted on a cash basis only, and those who attend it will find their money will go farther, and purchase better values, on this day than any other day in the year.

Wolfe Held For Federal Court

Charlie Wolfe, who made his get-away on April 8th, when State Policeman Busch arrested Sam Hollandsworth with a cargo of liquor after he had offered him a "lift" at the foot of Droop Mountain, was apprehended by officers in Greenbrier county recently, and was tried before the United States Commissioner in Lewisburg Monday. He was held under $3,000 bond for his appearance in United States Court, Bluefield.

will seek redress against Weiford, whom she says assaulted her in his office, shoving her out into the courthouse hall. Curry said she had pointed out to him crimes committed against her that were not addressed by law enforcement. Weiford lost his temperment, Curry said.

Curry also said that Captain David Walton, of the Pocahontas County Sheriff's Department, had conspired against her by not investigating his relatives who had committed crimes against her.

She asked the judge to clear the courtroom prior to her accusations because a "relative or close friend" of Circuit Clerk Earl Michael was involved in the plot against her.

Rowe did not respond to her request.

The judge told her she had the right to seek help from the FBI in cases concerning public officials and law enforcement.

Both Johnson and Curry may address the grand jury in December when the state finishes its presentments.

Weiford told the judge he expected the session to last two days.

After the prosecutor left the court room, Rowe advised Curry he had heard she made threats against him if he did not comply with her petition, including that she would "shoot the judge."

---

any weapon discharging a projectile within the corporate limits of the Town of Marlinton, without special permit authorized by the Mayor or Chief of Police.

. . . . .

5. Controlled hunt will be permitted with bow & arrow, with

hearing. Alderman has since taken Friel, Vance, Taylor and Superintendent of Schools James Phares to court over eligibility and residence issues.

"His appearance here today is the only indication I've had that he believes himself to be the victim of a crime," Weiford responded.

Weiford agreed with Rowe that, in this case, the appointment of a special prosecutor was in order since Alderman has been charged with interrupting a board of education meeting, disturbing the peace and obstructing an officer. Weiford is the prosecutor on those charges.

Rowe deferred this petition until Alderman makes a complaint to Weiford, but Alderman arguedthat any more passage of time might render him unable to bring charges.

"Once you meet the legal requirements you can come back," Rowe told him. "Once you do that, we'll find out where we are."

Johnson filed his petition with the court September 16.

Both Alderman and Curry filed their petitions October 23.

The grand jury convenes December 3.

Notice

Pocahontas County Family Resource Network General Meeting

The Family Resource Network will hold its monthly meeting on Thursday, December 12, at 11:45 a.m. in the Marlinton Presbyterian Church Fellowship Hall. Various committees will report on their progress with topics such as substance

Driscol pressed into service every man and boy in the neighborhood of Marlinton who was big enough to carry a canthook. It was a most tremendous assemblage of unskilled workmen, but they were willing and all as enthusiastic as their employer to beat VanDyke. Colonel Driscol was the life of the crowd, and he got everything to working smoothly, and succeeded in driving into the river a good half day before VanDyke came in. It was during this drive the writer saw one of the narrow escapes, so frequent in the lumber business.

A little Englishman had come out to work, and had fallen into about three feet of water near the middle of the creek. He was right above a jam of logs, and at least a hundred more were floating down on him. He seemed to be paralyzed with fear, and would have certainly been ground in two had not Colonel Driscol run out over the logs and lifted him bodily out of

JOE SPARKS IS WOUNDED BY SHOT

Joe Sparks Shot By Hugh Crouse Last Thursday Evening—Said Trouble Started Over Bad Check Given Crouse

Joe Sparks, of Droop Mountain, was seriously injured last Thursday afternoon when Hugh Crouse fired a gun at him, and shot him in the side, penetrating the spine and coming out on the other side.

The state police were called immediately to the scene of the shooting and were informed that Crouse had gone toward his home, but when they reached his home he was not to be found. The search started immediately, but to this date nothing has been heard of him, although his horse was found just a few miles from his home, and it is thought that he is in hiding somewhere in the mountains.

The latter part of last week it was reported here that they had located the fugitive on Droop Mountain, hiding in a cave, but upon investigation it was found that he was not there.

It s said that the trouble all started over a bad check given to Mrs. Crouse by Sparks.

Old Sweet Springs May Become Narcotic Farm

Six Tracts in West Virginia Offered Federal Government; Bidders Represent 14 State

Bidders from fourteen states offered the Federal Government more than 150 tracts of land last Saturday frmo which to choose a site for two narcotic prison farms.

The bids were opened on Saturday and the the sites will be selected after al lthe various features of the offers have been considered. Price area, geographical location and adaptability to the purposes for which the sites are to be used are some factors that will determine the choice.

There were 148 bidders, West Virginia offering six tracts. Among the six tracts was a tract of 610 acres in Monroe county proposed by Thomas E. Wadden of Washington. This is the old Sweet Springs resort property which is admirably situated for such a purpose.

This property is now being advertised for sale on October 22, 1929, under a decree of the circuit court of Monroe county. The famous resort has been under the care of a receiver for a number of months. The price is fixed in the offer by Mr. Wadden to the Federal government is $200,000.

The five other sites in West Virginia which have been offered for the narcotic prison farm are:

J. F. Reddell, Charleston 1,110

Paymond Richard, 200 tackle of the University of N foo ball team, whose playing is not hampered by the fact heart and other vital organs his right instead of his left s

In most West Virginia streams the logs are left to lie in the bed and the floods are trusted to bring them in of their own accord. The result of this is that the largest logs are most apt to lodge and rot. A section of a poplar tree was cut in the edge of Webster, and created universal comment at the World's Fair. The rest of the logs of that tree have lain in the bed of Williams River ever since, and are likely to remain there.

NEW ELECTIRC PLANT IS NOW IN OPERATION

New $20,000 Electric Plant Now In Operation—Much Improvement Noted Over Old Plant

The new electric plant for the city of Marlinton is now complete and in working order. This plant now has one of the best units to be found in this section of the state.

The new plant has some of the most complete and best machinery for the electrical distribution to be found any where. Along with the building, which was erected for the new machinery, it is estimated that the plant will cost $20,000, of which $10,000 is to be paid in one year and the remainder to be paid on a profit basis.

The people of Marlinton should feel proud of this new plant for they have long needed a complete electric system in the town and one that could be depended upon to give complete service.

Library Lines

by Allen Johnson

JANE PRICE SHARP presents Pocahontas County Free Libraries Director Allen Johnson with a copy of the video *An Evening with Cal Price*, with Robert Conte protraying the former editor of *The Pocahontas Times*.

In many folks' minds, libraries are books. True, libraries are books but much more than books, offering an array of services including public use of fax, copying, laminating, Internet computers, audio books, videos, historical archives, meeting rooms, and programs such as adult literacy, book discussion clubs, and children's instruction. Libraries also seek to promote ventures in the community that enhance community life and culture.

On the heels of "Out of the Storm," the documentary on the Galford Logging Company that salvaged the hurricane-caused timber downfall in Massachusetts, producer B J Gudmundsson has initiated a series of films and printed material on the life of Cal Price and the Pocahontas Times newspaper.

"An Evening with Cal Price" is the first of this unfolding series, now available for loan at McClintic Library through a gift from Cal Price's daughter, Jane Price S

JACOX NEWS

Ours is still a busy community with the regular fall work and many improvements at homes and farms.

Even the "stork" has been busy having recently ltfe a daughter at the home of Mr. and Mrs. Tillman Boyce and a son at the ohme of Mr. and Mrs. Remus Holmes.

Officer L. S. Cochran was in this vicinity after the shooting affray on Droop Mt., but failed to locate Crouse, the man who did the shooting.

Rev, Bracken the M. E. Pastor was making calls here one day last week learning the road ways and getting acquainted with his new pastorate, he was accompanied by wife and little daughter.

Wilton McMillion was a business visitor in Lewisburg, Saturday.

Theodore McMillion took Ronnie Clark to Marlinton on buisness Saturday.

Mr. Bartlett, of the Spring Creek Lumber Co., has recently been calling on the owners of timber lands contemplating purchasing timber if he succeeds in buying. A lumber railroad will be built up Robins Fork of Spring Creek.

Mr. Ellis has completed his work on our over the Mountain road and we learn that same is much benefitted as to grade and surface.

for tuberculosis of the skin; a young lady who had just been operated on for appendicitis, and a man whose spinal column had been dislocated the day before by a blow from a heavy piece of timber completely paralyzing all the lower part of his body and his legs. We were kindly permitted to witness the process by which this man's dislocated spinal column was restored to its normal position. The operation was a very simple one—the man being simply stretched at full length by four stout men while Dr. Guilford, with his hand, pushed the bone back into its proper position. The patient was then placed, flat on his back, on a bed and securely fastened so that he could not move, in which position he will have to remain for the next six weeks. This was Mr. Chas. D. Simmons, superintendent of the Rains Lumber Co., at Seebert. When we left Marlinton, Wednesday afternoon, he

Naming the New Highway

In last week's issue of the Pocahontas Times, the suggestion was advanced that the proposed new highway, linking route 56, (or as it is some times called, the Crozet Trail, in memory of the man who first surveyed the route between Staunton and Parkersburg.) with route 28, which connects Franklin with the Northwestern Turnpike be called the "Nancy Hanks' Highway".

It is a very beautiful thing to pay tribute to the mother of Abraham Lincoln, but in view of the fact that so much honor has already been accorded this illustrious family by every state in the Union, would it not be more fitting to do honor to some obscure, yet no less deserving historical character, who first saw the light of day here in our own mountains?

Surely some such character can be found in the section between Bartow and Franklin, or between 'Travtler's Repose," the historical home of B. B. Beard, and Marlinton, for whom the new highway could be named. This would be all the more appropriate, as the new trail, is primarily a mountain one, winding as it does, in the trough between the ranges of the glorious Alleghenies.

Of course this project is merely an embryonic one as yet, and naming the road, at this time, is like couning one's chicken's before they are

October 16, 1919

LAUREL CREEK

Rev. W. A. Grogg, of Durbin, and Rev. M. H. Ramsey will begin a series of meetings here Tuesday night the 14th.

Our church building is completed and adds much to the convenience of our Sunday school and other meetings, as it gives us more room.

Foley Morrison has moved here from Marlinton and will teach the Woodrow school.

J. Luther McNeil has moved here from Campbelltown.

Lloyd VanReenan and family are visiting Rev. and Mrs. W. A. Grogg at Durbin.

Several of our people attended the exhibit and horse show at Marlinton last week. All enjoyed it and seem proud of the success of it.

I. B. Moore, of Huntersville, was here on business a few days ago.

W. E. Poage, of Edray, has been taking up lambs and cattle here.

James Gibson; of Elk, was here on business recently.

Edmond Buzzard of Huntersville, was here looking after his cattle last week.

Emmett and Summers Galford, Frank Jordan and Morris Friel have a big job of cutting timber for the Spruce Lumber Company, below Slaty Fork.

Randolph Hambrick, of Millpoint, was a business visitor here recently.

hatched, but it does no harm to do a little day dreaming about it, at any rate.

We would like to have some suggestions from those who have access to records containing historical data regarding this section.

Personal Mention

Mr. and Mrs. E. L. Fenton, Mrs. Max Pascoxer, Misses Irene Casey and Helen Burner, drove to Fairmont to see the D. & E.-Quantico Marines football game Saturday afternoon.

They afterwards visited Miss Margaret LaRue, in Clarksburg, and spent some time in Weston.

James G. Willhide, who has been working temporarily for the Dupont Engineering Co., of Waynesboro, Va. spent two days at his home in Durbin

PARENT-TEACHERS AND COMMUNITY LIFE COUNCIL

The first Parent-Teacher Assaciation Meeting in connection with the Community Council will be held in the High School Library, November 8th at 7:30 o'clock. Subject "Community Spirit" under the direction of R. D. Moore.

There will be an election of officers for the year. Music will be furnished by the Glee Clubs under the direction of Miss Davidson. Refreshments will be served by the Home Economics Club.

NOTICE

Dr. S. A. Willhide and the writer had the pleasure of spending an hour Sunday afternoon, with Dr. and Mrs. C. B. Collins, at White Sulphur. Dr. and Mrs. Collins were former resi-

Edmond Buzzard of Huntersville, was here looking after his cattle last week.

Emmett and Summers Galford, Frank Jordan and Morris Friel have a big job of cutting timber for the Spruce Lumber Company, below Slaty Fork.

Randolph Hambrick, of Millpoint, was a business visitor here recently.

Mrs. Emmett Galford and Mrs. Ida Landis were at Marlinton last week, shopping and attending the exhibit last week.

Miss Lizzie Dulaney has been visiting Mrs. Bernard VanReenan at Onoto for several days.

The building committee for our church, asks all who have subscribed to please pay as the building is completed and most of the subscriptions are paid. The committee is J. N. White, John Galford, and Lloyd Van Reenan. Mr. White is treasurer. Wm. Shoemaker and J. L. McNeil were the contractors and did a good job of work.

Our Sunday school is progressing nicely so far. The children all enjoyed a Sunday recently when all recited Bible verses and were presented with candy and oranges for their good attendance and for learning and reciting Bible verses. We had a big crowd, good behavior and a fine time for all.

Local Independents Defeat New River State Team 37 to 27

After a very close and exciting game the Marlinton Independent team emerged victorious over the New River State College Freshmen quint on the gymnasium court here with a score of 37 to 27, February 23. The score was close throughout the game, being 14 to 13 in favor of the visitors at the close of half time and remained even until the last period when the Marlinton team, through some lightning pass work and spectacular field shots, built a margin which the Montgomery team were unable to overtake ere the final whistle blew.

Smith, who entered the game as Marlinton's right forward and was later changed to center, carried high point honors having made ten field goals and one foul shot. Reiter was the outstanding player for the New River State team.

The Lineups:

TWO BOYS HELD FOR STEALING 12 CHICKENS

Officers Intervene As Lads Are In Act of Exchanging Fowls for Cash.

Boys might steal a chicken or two and get away with it, but when they go to stealing them by the dozen and attempt to sell them, they are paving their own way to the jail house, it was found out Tuesday morning by Clarence Waugh and James Hall, two young chums, who live near here, after they had stolen the night before twelve of Mrs. Chas. Weatherholt's prize Plymouth Rocks and tried to sell them to the Home Products Meat Market, in this city.

Mrs. Weaherholt missed the chickerts Tuesday morning and immediately every place in this section which purchased them was notified to be on the lookout for them. About ten o'clock, one of the lads put in his presence at the meat market and ask them if they bought chickens and paid cash for them. He was told that they did, and while he was gleefully bringing in the dozen to exchange for cash, he was surprised to

The arrest was made, on charges of breaking and entering, and in a hearing before Magistrate T. S. McNeel, they were held under $500.00 bond each to await the action of the grand jury. In defaut of bond, they were remanded to jail.

Bayard Defeats Edray District High School

The Edray district high school quint were defeated on the local gymnasium court here Friday night by the Bayard high schools with a score of 27 to 16. The game was a hard fought one, though it was evident that the Marlinton boys were unable to match the unusual speed and network passing of the Bayard team, as they took the lead at the start and steadily increased this throughout the game having an eleven point margin over the local team

Deaths

Mrs. Icie V. Sharp

Mrs. Icie V. Sharp, 93, of Dunmore, died Sunday, November 20, 1983, in Pocahontas Memorial Hospital after a long illness.

She was a member of Dunmore United Methodist Church and was a lifelong resident of Dunmore, having been born there June 27, 1890, the daughter of Alex and Mary Ellen Alderman Buterbaugh.

Mrs. Sharp was preceded in death by her husband, Samuel P. Sharp, who died in 1960, one son, Vernon Ray Sharp, a sister, Ola Wooddell, and three brothers, George, Mack and Jack Buterbaugh.

Surviving her are two daughters, Mrs. Anna M. Gum, of Dunmore, and Mrs. Mabel VanDevander, of Marlinton; two sisters, Mrs. Vollie Ray, of Saegertown, Pennsylvania, and Mrs. Lillie Dean, of North East, Maryland; and a brother, Gilbert Buterbaugh, of Maidsville.

Services will be held at 11 a. m. Wednesday at Wallace & Wallace Funeral Home at Arbovale by the Rev. Edwin A. Tutwiler and the Rev. Norman Alderman, with burial in Arbovale Cemetery.

Greenbrier "Midgets" Win Over Grades

Although the grade boys were out-classed by an older and more experienced team, they fought gamely to the end. Hager, running guard for the Midgets, carried high point honors. The Marlinton grade boys play their last game of the season, when they meet the Greenbank grades on the E. D. H. S. gymnasium next Monday night, March 4th.

The grade girls lost to the High School 2nd team, 37-7. Louder milk was the outsanding player for the High School, making seven field goals, while Brill was the only girl able to tally for the grades. The grade girls played well for their first game.

Found Guilty

Kim Hickson was found guilty of malicious wounding by the jury in a trial on Thursday. He had been indicted on this charge by the grand jury in June.

The charge arose out of an incident that occurred about midnight on June 11 of this year at Geno's Dairy Bar, near Cass, involving Hickson and Debra Galford.

Witnesses for the state were Ms. Galford, her brother, Douglas Galford, Dr. Jo Jones, Magistrate Robert Gilmore, and Sheriff Deputy Nathan Quinn.

Ms. Galford testified that she was beaten by the defendant on the parking lot at the dairy bar.

Douglas Galford was with his sister at the time of the incident and also testi-

COMMUNITY PROGRAM

The following is the program of the Greenbank Community Council, to be held in the auditorium of the High School building at 8 p. m., on Friday, March 8th. The subject of the meeting is Farming and the program is being presented by Mr. Monroe Beard:

Song, The Farmer Feeds Them All; Devotional, Rev. G. D. Pope; Play, Agricultural Class; Farming, Mr. Claude W. Maxwell; Colored Will Rogers, R. B. Summerson; Quartett, Dr. McCutcheon, R. W. Brown, Frank Mann, and Rev. Pope; Minstrel Act, Madeline Slaven, Hilma Barkley, Joe and Elizabeth Beard; Play, The Hired Man's Courtship; Musical Reading, Mrs. Mack Woods; Song, Old Kentucky Home.

Some time has been spent in preparing the program and it is believed a real treat is in store for all who attend. We were very fortunate in securing Mr. Maxwell, of Elkins, as speaker of the evening, and you may rest assured his message will be instructive and interesting.

Douglas Galford was with his sister at the time of the incident and also testified that she had been beaten by the defendant. Magistrate Gilmore and Deputy Quinn saw Ms. Galford soon after the alleged beating and gave testimony on their observations of her emotional and physical state. Dr. Jones examined Ms. Galford on June 13 and testified on the injuries she observed.

The state entered two photos of Ms. Galford and her torn blouse as evidence.

The defense presented two witnesses, Kim Hickson and his sister, Melba Fitzgerald. The defendant gave his version of the incident at the dairy bar, admitting that there had been an argument between himself and Ms. Galford, but denying he had beaten her. Ms. Fitzgerald testified that she had seen part of the incident and did not

U. S. LEATHER CO. OFFICIALS HERE FRIDAY

Inspect Greenbrier Tannery; Served Luncheon at Marlin-Sewell Hotel.

Officers of the United States Leather Company, on an inspection tour of the company's holdings in the East, arrived in Marlinton Friday morning and looked over the Greenbrier Tannery, makers of a brand of leather known as "Greenbrier Leather."

After looking over the plant, their newest and best, completed last May following the fire which occurred in January, the party was entertained at the Marlin-Sewell Hotel at 2 P. M. with a luncheon, planned by Superintendant S. N. Hench.

Those included in the party were D. G. Ong, president United States Leather Company, and son G. W.; M. J. Beach, Ridgeway, Pa., president Union Tanning Company; W. C. Fisher, New York, chief Engineer United States Leather Company; Geo. Bristline, Cumberland, Md., division superintendent Union Tanning Company; J. S. Schultz, G. N. Daugherty,

gave his version of the incident at the dairy bar, admitting that there had been an argument between himself and Ms. Galford, but denying he had beaten her. Ms. Fitzgerald testified that she had seen part of the incident and did not see Hickson hit Ms. Galford.

The jury was given an option of five possible verdicts by Judge Frank Jolliffe. They were guilty of malicious wounding, guilty of unlawful wounding, guilty of battery, guilty of assault, or not guilty. The first two are felonies and the second two are misdemeanors.

The jury deliberated for about one hour and a half before returning the verdict.

The state's case was presented by Prosecuting Attorney Steve Hunter. Defense Attorney is Eugene Simmons.

The state's case was presented by Prosecuting Attorney Steve Hunter. Defense Attorney is Eugene Simmons.

On Friday the Prosecuting Attorney filed an information with the Court stating that this was Hickson's second felony conviction. He was convicted of third degree sexual assault in 1981. Having two felony convictions changes the sentence for malicious wounding from 1 to 10 years in the state prison to 2 to 15 years. The defendant agreed that he was the same person that had the previous felony conviction and did not demand a jury trial to make this determination. Judge Jolliffe proscribed the sentence and Hickson was taken on to the Huttonsville Correctional Center for screening and classification.

Details of David Corbett's Death

In last week's issue of this paper a short account appeared of the death of David Patterson Corbett, beneath the wheels of the C. & O. manifest freight train No. 196 on Wednesday morning, February 20th, near Cass.

He had been employed in Charleston since October of last year, and was presumably on his way to visit his wife and two sons, Delmar and Granville, in Washington, D. C., going by way of Monterey, Va., where some of his other relatives live, as papers found on his body would indicate.

His mangled remains were discovered shortly after the accident occurred by the day watchman of the chemical plant at Deercreek, who was on his way to work.

Justice of the Peace, J. B. Sutton was immediately notified, and he with the assistance of Dr. Hannah

Rail Line Abandonment

We reported last week that the W. Va. Public Service Commission has filed a protest with the Interstate Commerce Commission on the application of the Chessie System to abandon the Western Maryland Ry line to Durbin. We have now received a copy of the application and can provide more information.

In its application the PSC notes that the act creating the agency gives it jurisdiction over all public utilities in the state, including railroads. Also noted is a section of the W. Va. Code, Article 24-3-1, that provides, in part: "Every railroad . . . may be required by the commission to establish and maintain such suitable public service facilities as may be reasonable and just, to make reasonable

cal plant at Deercreek, who was on his way to work.

Justice of the Peace, J. B. Sutton was immediately notified, and he with the assistance of Dr. Hannah removed Corbett's body from the track and placed it on a cot, as passenger train No. 141 was almost due.

After communicating with Prosecuting Attorney A. P. Edgar, of Marlinton, the body was taken to Sutton's undertaking establishment where an inquest was held the following afternoon, the jury rendering a verdict of accidental death.

Mr. Sutton then prepared the remains for interment, which took place at Hambleton Chapel, Va., in the presence of a large crowd of friends and relatives.

Mr. Corbett was a cook by profession, and had led a colorful roving life, having cooked in the lumber camps of many states.

He was also highly educated, was master of several languages and had a host of friends wherever he went.

His age was 53 years, 2 months and 24 days, and he was born at Huntersville, W. Va.

Besides his wife who was Miss Mamie Jack, and his two sons, he leaves a grand-daughter, four brothers and two sisters.

Article 24-3-1, that provides, in part: "Every railroad . . . may be required by the commission to establish and maintain such suitable public service facilities as may be reasonable and just, to make reasonable connections with trains on branch lines of such railroads and with all connecting railroad lines . . ." Other sections of the same chapter established the PSC as a state agency charged with ensuring that, to the extent permitted by Federal law, adequate and reliable railroad service is provided in W. Va.

The PSC bases most of its protest on the fact that abandoning the Durbin line will deprive the Cass Scenic Railroad a connection to other railroad facilities. The protest points out that the state purchased the section of the Chesapeake and Ohio Ry's Greenbrier Branch from Cass to Durbin for $598,000 in order to maintain this connection for Cass. The PSC claims that there was an implicit un-

Road Not Scraped

Dr. George Gragg, H. H. Hudson and Kerth Nottingham drove to Cheat Mountain Clubhouse, Saturday evening, to spend the night with Dr. Gragg's brother, Price.

They reported an almost impassable condition of the road to the Randolph County line, but said from there on, the road had been scraped and was in fine shape. As this highway is under state supervision, we are at a loss to understand why the five miles between the bridge at West Durbin and the county line, was left untouched after the recent heavy snows.

Death of Mr. Wilfong

Henry Wilfong passed away at the home of Ona Mullenax, near Boyer,

of the Chesapeake and Ohio Ry's Greenbrier Branch from Cass to Durbin for $598,000 in order to maintain this connection for Cass. The PSC claims that there was an implicit understanding between the State and Chessie that the WM line to Durbin would continue to operate.

It is noted in the protest that the Chessie system has offered to sell the Durbin line for $300,000. In regard to this offer the PSC protest comments that "the ICC should consider this abandonment application as the breaching of an implied promise by Chessie and as an attempt to extract another $300,000 from the state of West Virginia."

The protest also questions the Chessie System's claim that operation of the line has been unprofitable. The PSC states that some of

Franklin Widney, Roy Spencer, of Arbovale and Leonard Tracy, of Boyer.

way is under state supervision, we are at a loss to understand why the five miles between the bridge at West Durbin and the county line, was left untouched after the recent heavy snows.

Death of Mr. Wilfong

Henry Wilfong passed away at the home of Ona Mullenax, near Boyer, on February 21st, at the ripe old age of 81 years.

Mr. Wilfong had made his home with Ona Mullenax for a number of years, but his boyhood was spent on a farm on Allegheny Mountain.

Funeral services were held at three o'clock, February 22nd, at Brushy Run Chapel, conducted by Rev. Wm. Pugh, and interment took place in the Calhoun cemetery.

Basket Ball

The Greenbank High School quintet played the two closing games of the season with Bayard on Thursday, and New River State on Friday, meeting these strong teams on the home floor of G. H. S.

At the end of the first half the locals had a margin of 10-5 over Bay-

The protest also questions the Chessie System's claim that operation of the line has been unprofitable. The PSC states that some of the affected shippers have indicated to PSC personnel a difficulty at times in obtaining rail cars. The ICC is asked to carefully consider whether the railroad may have withheld service to create a decline in traffic.

Finally, the PSC protest questions the figures in the abandonment application to rehabilitate the line. It wonders if the cost estimates are the amounts needed to keep the line in acceptable operating shape or putting the line in like-new condition.

The PSC asks that the application to abandon be denied or that at least

Basket Ball

The Greenbank High School quintet played the two closing games of the season with Bayard on Thursday, and New River State on Friday, meeting these strong teams on the home floor of G. H. S.

At the end of the first half the locals had a margin of 10-5 over Bayard, but the visitors kept gaining until the final count was 23-20 in favor of Bayard.

Dillon Pope got in his usual good work closely seconded by June Riley, and the stellar playing for Bayard was done by Winters and "Pete" Swartz, a brother of Austin Swartz, of Durbin.

In the game with New River State the visitors kept a small margin over the locals throughout the game.

The score at the end of the half was 14-13 in favor of New River State, and G. H. S. suffered a defeat of 2 points at the finish, the score showing a margin of 29-27.

The locals yielded the victory with good grace however, taking a certain amount of pride in the fact that Laurence Stewart, a former G. H. S. student, played forward for New River State.

DOUTHARDS CREEK NEWS

We are having a great deal of snow now, but nevertheless the sun shines just the same.

W. S. Palmer and Parley Kincaid are hauling lumber for the Mountain Timber Corporation.

Ernest White, Jr., who has been very sick is improving at this writing.

Mr. and Mrs. Clarence started to housekeeping last week.

Frank Pitman is working for Mr. P. A. Rexrode now.

The Mountain Timber Corporation is still trucking some lumber from here to Marlinton.

Mrs. Clarence White visited her mother on Cummings Creek one day last week, who has been very sick.

Rev. Sloan preached a very interesting sermon here February 17th. The words of his text were "Take up thy bed and walk."

T. S. Alderman, who had been sick for a long time, will soon be able to be out again.

Wilber Alderman, of this place, who was employed in the glass factory in Charleston was operated on for appendicitis last week in the Kanawha Valley Hospital, Charleston, W. Va.

Sectional Champs

The Lady Warriors defeated Webster Co. and Greenbrier West on their way to their first-ever sectional championship this past week. On Thursday, Nov. 17, the Warriors squared off against Webster Co. and won, 56-48. The first quarter was slow with both teams too nervous to play much basketball. In the second quarter the Lady Warriors exploded outscoring Webster Co., 17-10. The outburst was sparked by Kim Arbogast and Ronda Roy. In the second half Webster outscored PCHS but the damage was done. Kim Arbogast played her best game of the season scoring 16

Public cites probems/solutions at hazard mitigation meeting

The Marlinton Hazard Mitigation meeting was held Wednesday, December 11, in the Marlinton Municipal Building auditorium with eleven in attendance. This meeting was for the purpose of discussing Marlinton's hazards and to relay to the mitigation planner, Becky Payton, and County Commissioner Reta Griffith some of their concerns and problems for the area including ice, flooding, and the like.

Problems and suggestions by those attending were listed by Mrs. Griffith on an easel display. They included:

* abandoned mines in Pocahontas County; document/research where they are and how much water;
* abandoned quarries;
* stream bank stabilization needed;
* county-wide communications at time of emergency;
* Upper Knapps Creek needs dredged;
* how to get trees out of streams, some surrounded by National Forest (Minnehaha to Marlinton, this side of Huntersville);
* Monongahela Forest Plan, which is now being revised;
* try to explain [illegible] red tape for getting permits to clean out streams;
* [illegible]
* [illegible] Marlinton;
* Clean out storm drains;
* Threshold Pond concept for flood control needed at levees at Marlinton;
* Natural Advancement Diseases from the atmosphere help;
* water runs over road Rt. 219 near Jumpin Road.

Other concerns both here and in the Dunlap area in the storm sewer problem, where storm water run-off is included with the sanitary sewer service. In times of high water this puts an added burden on the treatment system as well as allowing untreated sewage to go through into the river.

The mitigation planner [illegible] addressing [illegible] through the county to address concerns [illegible]

...Inter-State Hardwoods Company, Inc., at Barton.

The loan will be used to expand its operation with a new molder and planer. The equipment will be housed in a 40,000 square foot building to be constructed on a 5.3 acre parcel in the East Fork Industrial Park. The expansion will permit the company to produce a wide range of value-added wood products, such as flooring and moldings.

...The company now employs 215. This is expected to increase to 235 in one year.

"West Virginia's economic future depends upon the expansion of existing businesses," Gov. Wise said. "Companies create new opportunities for West Virginia workers through the long-term financing the Development Authority loans provide."

Radio astronomy pioneer dies

Grote Reber, one of the earliest pioneers of radio astronomy, died in Tasmania on December 20, just two days shy of his 91st birthday.

Reber was the first person to build a radio telescope dedicated to astronomy, opening up a whole new "window" on the Universe that eventually produced such landmark discoveries as quasars, pulsars and the remnant "afterglow" of the Big Bang. His self- financed experiments laid the foundation for today's advanced radio-astronomy facilities.

"Radio astronomy has changed profoundly our understanding of the Universe and has earned the Nobel Prize for several major contributions. All radio astronomers who have followed him owe Grote Reber a deep debt for his pioneering work," said Dr. Fred Lo, director of the National Radio Astronomy Observatory (NRAO).

"Reber was the first to systematically study the sky by observing something other than visible light. This gave astronomy a whole new view of the Universe. The continuing importance of new ways of looking at the Universe is emphasized by this year's Nobel Prizes in physics, which recognized scientists who pioneered X-ray and neutrino observations," Lo added.

Reber was a radio engineer and avid amateur "ham" radio operator in Wheaton, Illinois, in the 1930s, [illegible]

As an amateur operator, Reber [illegible] and won awards and communicated with other amateurs around the world, and later wrote that he had concluded "there were not many worlds to conquer" in radio.

Learning of Jansky's discovery gave Reber a whole new challenge that he attacked with vigor. Analyzing the problem as an engineer, Reber concluded that what he needed was a parabolic-dish antenna, something quite uncommon in the 1930s. In 1937, using his own funds, he constructed a 31.4-foot-diameter dish antenna in his backyard. The strange contraption attracted curious attention from his neighbors and became something of a minor tourist attraction, he later recalled.

Using electronics he designed and built that pushed the technical capabilities of the era, Reber succeeded in detecting "cosmic static" in 1939.

In 1941, Reber produced the first radio map of the sky, based on a series of systematic observations. His radio-astronomy work continued over the next several years. Though not a professional scientist, his research results were published in a number of prestigious technical journals, including Nature, the Astrophysical Journal, the Proceedings of the Institute of Radio Engineers and the Journal of Geophysical Research.

Reber also received a number of honors normally reserved for scientists professionally trained in astronomy, including the American Astronomical Society's Henry Norris Russell Lectureship and the Astronomical Society of the Pacific's Bruce Medal in 1962, the National Radio Astronomy Observatory's Jansky Lectureship in 1975, and the Royal Astronomical Society's Jackson-Gwilt Medal in 1983.

Reber's original dish antenna [illegible] is on display at the National Radio Astronomy Observatory [illegible] where Reber [illegible] correspondence are held by the NRAO and will be exhibited in the observatory's planned new library in Charlottesville, Virginia.

Reber's amateur-radio callsign, W9GFZ, is held by the NRAO Amateur Radio Club. This callsign was used on the air for the first time since the 1930s on August 25, 2000, to mark the dedication of the Robert C. Byrd Green Bank Telescope.

Inter-State Lumber in line for development loan

Gov. Bob Wise announced last week the preliminary approval by the West Virginia Economic Development Authority of several incentives to state businesses.

Included is a $500,000 loan to Inter-State Hardwoods Company, Inc., at Bartow.

The loan will be used to expand its operation with a new molder and planer. The equipment will be housed in a 40,000 square foot building to be constructed on a 5.3 acre parcel in the East Fork Industrial Park. The expansion will permit the company to produce a wide range of value-added wood products, such as flooring and moldings.

Inter-State Hardwoods is a fully integrated manufacturer of wood products serving coal mining, furniture, and log buildings and wood product manufacturers and retailers. The company also has a warehouse in Norcross, Georgia. Current employment is 215. This is expected to increase to 135 in one year.

"West Virginia's economic future depends upon the expansion of existing businesses," Gov. Wise said. "Companies create new opportunities for West Virginia workers through the long-term financing the Development Authority loans provide."

flood control instead of levies at Madison.

* trained Adventist Disaster Team for emergency help.

* water runs over road Rt. 214 near Jericho Road.

One concern both here and in the Durbin area is the storm sewer problem, where storm water run-off is included with the sanitary sewer service. In times of high water this puts an added burden on the treatment system as well as allowing untreated sewage to go directly into the river.

The mitigation planner has been conducting meetings throughout the county to address concerns and to identify problem areas as well as possible solutions to these problems. Ms. Payton will take these ideas and include them into the report that has been mandated by FEMA to be turned into the Office of Emergency Services, who will then (after June 27) use the county's information on Hazard Mitigation to create the State Plan that will be turned into FEMA.

The public is encouraged to call Ms. Payton at 799-3982 if they have any specific problem areas that they would like added to the list. The public is also encouraged to participate in the Corps Planning Meeting; however, this does not mean a commitment to this project. If you have questions, please feel free to contact Becky Payton, Pocahontas County Hazard Mitigation Officer at 799-3982.

Those in attendance were Reta Gibson, Gibb, Dotty Kellison, Arrington, Sharon Arrington, Driscoll, Sr., John Emily Hughes, Shenda Price Sharp, Becky

The Nature Conservancy embarks on $12 million campaign to save the last great places in West Virginia

The Nature Conservancy of West Virginia last week announced their commitment to raise $12 million by the end of 2004 to preserve and protect West Virginia's natural heritage.

This historic effort, known as *The Campaign for Conservation: Saving the Last Great Places in West Virginia*, will provide the funds that will allow the Nature Conservancy to conduct scientific research to locate and study important and imperiled species and engage West Virginians to conserve those natural areas that are the last great places in their State.

"West Virginia has a rich natural heritage worthy of our protection. And now is the time for West Virginians to help preserve and protect those natural areas that make our state so special," said Gaston Caperton, former West Virginia Governor and Honorary Chairman of the Conservancy's Campaign for Conservation.

The campaign will help conserve critical landscapes in West Virginia of high ecological significance through the acquisition of key parcels of land and by the implementation of a broad range of innovative strategies to address the most pressing threats to these landscapes. These critical landscapes include Canaan Valley/Dolly Sods, Cheat Mountain/Shavers Fork, Greenbrier Valley, and Smoke Hole/North Fork Mountain. All four of these landscapes are in the Central Appalachian Forest ecoregion, where differences in geology, elevation and climate combine to produce a wide range of local conditions, and abundant biological diversity.

"West Virginia includes some of the most ecologically diverse landscapes in the United States," said Rodney Bartgis, State Director of the Nature Conservancy. "These landscapes include such features as the highest large river east of the Mississippi, the largest wetland complex in the Southern Appalachians, expansive cedar glades and pine barrens, beautiful subalpine summits, and many plants and animals found only in the Appalachians, including some found only in West Virginia. The future of these species and the ecological systems that support them is dependent upon what we do here in West Virginia."

West Virginia's natural diversity is spread across portions of three ecoregions—each with its own distinct character and conservation challenges. The campaign will also enable the Conservancy to help identify critical natural areas located throughout these ecoregions, determine the most significant threats to those areas, and develop conservation strategies that can abate those threats.

In addition to immediate action at sites of highest conservation concern, the Campaign will also plan for the future. These long-term strategies include investing in community-based initiatives at critical landscapes, establishing endowments for existing project areas, and securing the long-term management of The Nature Conservancy conservation properties.

In addition, a small portion of the campaign funds will be used to support a global partner site in the Bahamas—a rich natural treasure that shares some surprising ecological ties to the mountains of West Virginia—148 different species of birds, nine of which are of special concern.

For more information on how you can donate to the Campaign and help save the last great places

C. & O. TO SPEND $253,000 ON GREENBRIER DIVISION

An estimated expenditure of $235,000 will be made by The Chesapeake and Ohio railway on the Greenbrier Division, according to a statement issued by W. J. Harrahan, President, last week when he made the announcement that $18,403,000 would be spent by the company this year in making extensions and improvements. The amonut to be spent on the Greenbrier Division will be used for the strengthening of eleven bridges in order that heavier engines might be used on the division.

NICK BLACKMAN AND Mathias Callison came in first in the savory cooking category at the high school level.

Pocahontas Middle School Girls Basketball Tournament

The Marlinton Middle School Girls competed against Hillsboro in the finals of the Annual County Tournament on Wednesday, November 23, at PCHS. Marlinton defeated Hillsboro 21-10. Tabby Shinaberry led with 12 points. Other scorers were Cindy Roy with 3 points, Fran Lane, Kim Sparks and Stephanie Johnson with 2 points each. The Marlinton team is coachced by Miss Eckerd and Mrs. Wilburn.

After the championship game, Tom Sanders, the tournament director, presented trophies to the Green Bank team, which received 3rd place honors. The Hillsboro team was presented with the runner-up trophy and silver

they would have a lot of fun going through a hunters license file trying to find out whether he had the proper one or not.

Leave it to the legislature. They can suggest some of the dumbest things.

Last week The Journal carried an article stating that J. Raymond Gordon, a so-called shyster attorney of Charleston, had the "dope" on Judge George W. McClintic and had instituted impeachment charges against him. Yes, we got one subscriber on the strength of this article, for which we are thankful, but we can't hold out on one of our readers. The charges will not amount to anything, unless something else turns up.

If we could get Pocahontas county advertised to the outside world; a great change would come about. Every individual in the county will make money by spending a little time each day in thinking of something he can do to make the county known.

CASS NEWS

(Dorothy Wade, Reporter)

Some of the citizens of Cass gave Rev. Arthur, pastor of the Northern Methodist Church, a "pounding" Saturday night. Many old fashioned games were played and refreshments were served. There were about fifty people present. All reported a fine time.

Mr. and Mrs. R. S. Hickman who have been in Baltimore the past week returned home Saturday.

Mrs. Fred Grey who is living at Marlinton now, spent the weekend in Cass.

The sad news reached here Thursday evening of the death of Mr. Harlan Brown. Mr. Brown used to be an employee of the Pocahontas Supply Co.

Russell Richard left here for Hinton, Saturday night.

Mr. and Mrs. Stoner returned from Pennsylvania Saturday.

Mr. Lake Miller, bookkeeper for the West Virginia Pulp and Paper Company is spending his vacation in Alderson, W. Va.

Mr. and Mrs. W. W. Hoover and family of Durbin were visiting their relatives at Cass, Sunday.

In the ball game between Durbin and the Cass "scrub" team, Durbin won. The score was 10 to 0.

Miss Christeena Wykle of Anthony, W. Va., spent last week with her friends in Cass.

List of 1929 Objectives for the Marlinton Kiwanis Club

Agriculture and Town and County Relationship.—To have one Kiwanis meeting on Pocahontas Beautiful and work with communities and organizations sponsoring flower shows, home ground improvement contests, school ground improvement contests and other projects in beautifying the county, its homes, schools, roadsides. To take part in the Fourth of July Celebration at Droop Mountain. To have the weekly luncheon with the members and the leaders of the 4-H Club at their county camp at the Fair Grounds in July.

Attendance and Classification and Membership.—To increase the membership and to improve the attendance. To have a quota of 85 per cent attendance during the year 1929.

Finance and Budget.—To prepare a budget for 1929.

Good Will and Grievances—To do those things which tend to create a better harmony and cooperation within our club.

Good roads.—To watch carefully for an opportunity to assist any worthy road project in the county.

House and Reception.—To gain a closer inter-club and district fellowship by having our meetings in various parts of the county; to have ladies night more often, and stunt nights more often. Also by having one or more picnics at a suitable place to which we may invite representatives from various clubs or districts. Also to see that each visitor receives a most cordial welcome to our meetings.

Inter-Club Relations.—To organize one club in our section.

Under-Privileged Child and Vocational Guidance and Placement.—(a) To cooperate with the field nurse of the State Health Department when she comes to our county and help her in her work and meetings throughout the county; (b) To send speakers to at least three schools in the county in the interest of Vocational Guidance and Placement.

Kiwanis Education.—To educate Pocahontas county as to what Kiwanis means; also to give each member a thorough understanding of this.

Music.—To purchase new song books; to make a better singing club.

Program.—(a) That the programs shall be outlined in advance over a definite period; (b) That the plan of budgeting programs shall be carried out without exception; (c) That programs shall be budgeted according to their subject matter; (d) That a definite means of presenting the subject matter of these programs shall be adopted.

Public Affairs and Publicity.—To recommend to the Club that the Club's Major Objective for the year 1929 be: "ADVERTISE POCAHONTAS COUNTY, ESPECIALLY TO ATTRACT THE TOURIST TRADE." To organize a Boy Scout camp in Marlinton. (This has been completed.)

CLES OVER TOP

Pocahontas County goes over the top with 100 per cent enrollment in Pupils Reading Circle work. This has been made possible by the unself-ish loyalty and cooperatiop of the teachers working with the Superin-tendent and the establishment of a County Library where teachers could secure books to carry on this work. The maximum of 108 circles have been organized, with a total of 949 pupils doing the work, divided among the districts as follows: Edray 30; Greenbank 39; Huntersville 18; Little Levels 21.

From the report sent out by the Department of Education on Feb. ruary 28, only twelve counties out of fifty-five have gone over the top with 100 per cent enrollment, viz: Brooke, Fayette, Gilmer, Grant, Harrison, Kanawha, McDowell, Marion, Mo-nongalia, Pocahontas, Logan, Up-shur.

Pupils who have completed the work for the week March 5, 1929:

Ralph Taylor, Spice Run; Eva Taylor, Spice Run; Keith Small, Spice Run; Charles Matheny, Bartow; John D. Boseley, Bartow; Mae Gum, Bar-tow; Eunice Wiley, Bartow; Marie Mullenax, Bartow; Erma Henry, Bar-tow; Woodrow Beverage, Bartow; Darlie Collins, Bartow; Alma Mill-er, Bartow; Alvin Tasner, Bartow; Mary Wiley, Bartow; Willie Hughes, Bartow; Boyd Beverage, Bartow; Nola Wilfong, Bartow; Ruth Seiler, Bartow; Josephine Moyers, Bartow; Florence Simmons, Bartow.

DOUTHARDS CREEK NEWS

We still continue to have winter just as the old "ground hog" predicted.

The Mountain Timber Corporation will begin work soon. They have been delayed somewhat on account of the damage done by high water.

Misses Anna Ward and Thelma Alderman were visitors at D. W. Alderman's Saturday night and Sunday.

D. W. Alderman and Elton Wade had the opportunity of hauling in a broken car from the upper waters of Douthards Creek. The car was driven in there the night before by a Mr. Cottle from Virginia.

We received word that Wilber Alderman, who is in the Kanawha Valley Hospital, at Charleston, is recovering nicely from an appendicitis operation.

Parley Kincaid had the misfortune to break his wagon while hauling lumber for the Mountain Timber Corporation.

The writer of these items read the letter which was printed in last week's paper written by one of his old schoolmates, Craig Friel. Would like to hear from him again.

On short notice D. W. Alderman made a trip to Cummings Creek last week to the interests of that school.

CUMMINGS CREEK NEWS

R. W. Buzzard made a very interesting talk at the Cummings Creek school house one night last week.

Roy Hamilton has retired from trapping for the winter.

Miss Olive Underwood is collecting funds for the church at this writing.

Henry Perkins was complimented with a lamb to his flock one night last week.

Ned Madison had a hand to hand combat with wild cats one day this week.

Some folks say owls won't battle but Waldro Buzzard can tell you different. One cold night last week as he was returning home from Spice Run a huge owl attacked him. But Buzzard was armed with a hunting knife and won the day.

Henry Alderman is interested in fox hounds at this writing.

The man that minds his business
Has all that he can do,
His work is never ended,
His job is never through.

Sometimes he's called a meddler,
Because he pitches in,
To try to keep down trouble,
To check a little sin.

But if he knows his business,
He will not stop for that

JUDGING SUSANNA DILLER (right) as she does her French reading are Jeff Butler and Serena Shaw.

COMING IN THIRD in the high school Spanish savory cooking competition were Marlena Chestnut and Sara Simmons.

TRUST in God and
Never Despair of His Mercy!

Sentenced

Verlon G. Jones was sentenced to life in the state penitentiary for first degree arson by Judge Charles Lobban on Monday. Jones was convicted of arson during the last term of court for the fire at the county jail on Thanksgiving last year. The life sentence was mandated by the state's habitual criminal act. A jury determined in a trial in November that Jones was the same person that had two previous felony convictions before the arson conviction. The previous convictions were for burglary.

Prior to passing sentence the judge denied two defense motions. The first motion was for a new trial for the defendant in the habitual criminal matter. The second motion was that the sentence required under the habitual criminal act is too severe in this case and thus violates both the West Virginia Constitution and the Eighth Amendment

Fifty Years Ago in The Pocahontas Times

Thursday, January 2, 1953

From the desk of Calvin W. Price, Editor
People of Pocahontas

New York—Taken as a whole, residents of Pocahontas County are younger than their compatriots in any other part of the United States. This age differential is brought to light by the Census Bureau after an analysis of data gathered in the recent tabulation.

The median age of people in Pocahontas County is given as 27.2 years, signifying that there are as many above that age as there are below.

In the other parts of the country the median is 30.1 years. This places Pocahontas County residents 2.9 years younger than their counterparts.

Other revealing data on the population trends in Pocahontas County and elsewhere has to do with the increase in the number of persons of age 65 and over. Advances in the medical sciences and better living standards have had a marked effect in lengthening the life span and causing this increase.

In Pocahontas County, the Census Bureau reports, 8.8 percent of the population is in the 65 or over bracket. This is above the proportion found in the rest of the United States, 8.2 percent and the 6.9 percent reported for West Virginia as a whole.

Of great interest also is the progressive change occurring in the labor force, with an increased number of married women holding down jobs. In 1940 only one out of every nine married women in the United States was in the labor force. The proportion has risen to one out of every five.

In Pocahontas County, the Census Bureau found 13.0 percent of the female population over the age of 14 was in the labor force. The corresponding male percentage was 71.0.

The civilian [illegible] and did not have any, was only 4.2 percent. This was less unemployment than was reported for the nation, 5.0 percent, or for the state, 4.8 percent.

FIELD NOTES

The other Saturday, Oscar and Austin Sharp bagged their fifth bear of the season. They were in the Black Forest, over toward Big Beechy.

On this Monday morning, Grover Moore, of Knapps Creek, found a big red fox in his barn. He shot the varment. The skin is a fine piece of fur, but the fox was lean and poor. They figure the fox went into the barn for rats and poultry.

Last week, Milburn Sharp got the big wild cat of Bucks Mountain. It weighed thirty-seven pounds. More wild cats weigh 25 pounds or less than go over this weight.

fense motions. The first motion was for a new trial for the defendant in the habitual criminal matter. The second motion was that the sentence required under the habitual criminal act is too severe in this case and thus violates both the West Virginia Constitution and the Eighth Amendment to the U. S. Constitution.

Defense attorney Martin Saffer commented on the motions, particularly on the second. In his comments he discussed the requirement of the West Virginia Constitution that criminal penalties be proportional to seriousness of the crime. Mr. Saffer questioned whether a life sentence is proportional to the crimes of which Jones has been convicted. He claimed that all three crimes were crimes against property and not crimes of violence against people.

The Judge agreed that there was no actual or threatened violence involved in the first crimes,

crimes of violence against people.

The Judge agreed that there was no actual or threatened violence involved in the first crimes, although the potential for violence exists in any crime. In the case of the arson, however, Judge Lobban strongly disagreed with the defense on this point. He said the arson was very much of a threat of violence against the other prisoners in the jail as well as state police in the same building. There was also the risk taken by officers in removing Jones and Paulmer Adkison from the smoke filled jail.

Judge Lobban also reviewed the defendant's record in addition to the felony convictions. Jones has been convicted of numerous misdemeanors in this state and in Maryland as well as having his parole revoked on his second felony.

Robert Martin is also serving as defense at-

BUCKEYE COMMUNITY

(Beatrice Howard, Reporter)

Swago Community Meets

The Swago or Buckeye Community met Thursday night, February 28, at the Swago Church for their monthly meeting. The program was based on Health with Mrs. Carrie Morrison as chairman. The program was very interesting and there was a good attendance. The Buckeye school gave a very interesting health play entitled "The Muddies of Mussyland." The Swago school presented two musical numbers. J. Haynes Miller was the only speaker present so he gave us some pointers on our health. The next meeting will be held March 28, 1929.

Heap Big Rain

After a very hard rain Wednesday night, J. L. Howard awoke Thursday morning and found that his gas pumps and tanks had been washed out. The water had come up out of the ground with such force that it brought the big tanks up out of the ground, his knocking the pumps over. Mr. Howard expects to replace them immediately.

Local and Personal

Miss Opal Reynolds, of Edray, spent Thursday night with Miss Beatrice Howard.

Miss Elizabeth McNeill left here Thursday morning for Fayette county where she has accepted a position as Home Demonstration agent.

Think Fish Do Feel Pain

A German judge stated that fish have no feelings and, therefore, can not suffer pain. English fishermen disagree. According to J. R. Norman of the Natural History museum, South Kensington, London, fish have highly organized sensory systems and can suffer pain. The fact that fish dance about after being caught certainly seems to suggest pain, he believes. He also declares that a sick fish goes pale and its eyes become blurred.

Burns to chair American Trucking Association

It's a job Fred Burns, Jr., has worked his way up to.

He's chaired the West Virginia Motor Truck Association, the Marlinton Chamber of Commerce, the Pocahontas Development Authority, the Pocahontas County Airport Authority, the Greenbrier Valley Economic Development Corporation and was the chief of the Marlinton Volunteer Fire Department. And he's finance chair and trustee at Marlinton United Methodist Church.

You get the pattern. Burns is a born leader.

The list goes on.

He's a board member of the Truckload Carriers Association and the West Virginia Chamber of Commerce, a member of the U. S. Chamber of Commerce and the Marlinton Elementary School Improvement Council and a Governor's Appointee to the West Virginia Motor Carrier Advisory Board.

With all that in his resumé, the rise to a national appointment seemed inevitable.

And so it happened. He was named chairman of the American Trucking Associations, the nation's largest trucking industry trade and advocacy group in San Antonio, Texas, last Wednesday.

Burns is now the president of Burns Motor Freight in Marlinton, a family-owned, family-run business begun by his father, Fred Burns, Sr, in 1949.

Five other family members work at BMF. Fred Jr.'s brother, Larry, his sons, John and Doug, and Larry's son, Mike.

The legacy began more than 50 years ago with a used LJ Mack tractor and flatbed trailer. Number One is kept in top-top shape and is showcased in the Pioneer Days Grand Parade and other special events.

BMF now operates 100 tractor-trailer units out of its headquarters in Marlinton and its terminals in Beverly and Sam Black Church, specializing in service to the wood products industry.

THE NEW CHAIR OF the ATA is Burns Motor Freight's own Fred C. Burns, Jr., the Marlinton company's president. The 67-year-old Burns accepted the position last week in San Antonio, Texas. BMF is a family-owned and family-operated business.

must promote good image standards. Given how well we know just how much one bad driver can set us all back, we need to do everything we can to ensure that we always put our best foot forward."

With the third generation of the Burns family now on board at BMF, his other concern is the future of the trucking industry.

Burns said he sees membership in ATA as a way to do that.

"Carriers that belong to ATA are stronger than most non-members," he said. "They see issues and understand problems and know how it impacts costs. Then it's up to you to maintain the rate structure to stay in business.

"I want to give something back to an industry that has been good to me," he said. "I want to leave the industry stronger for generations to come."

Burns has been an active member of the ATA since 1978.

BMF has survived three regionally-devastating floods, one in 1985 and two in 1996.

Fred, Jr., is the son of Fred, Sr., and Lucille Burns, of Marlinton. He is married to the former Carolyn Barlow and, in addition to his sons at BMF, has a daughter, Anne Keeler, of Bridgewater, Virginia. He has six grandchildren.

BODY FOUND

A body was found by hunters near Rimel on Monday afternoon, November 21. The body was found near the head of Big Sandy Run, which is a tributary to Cochrans Creek between Rimel and the Pocahontas Campground.

According to Marlinton State Police, all that was found was skeletal remains and some clothing. The skeleton was not intact and the bones scattered over about a 20 square feet area. This scattering was no doubt due to animals.

The remains have been sent to the Medical Examiner's Office in Charleston but as of Tuesday afternoon no identification had been made, other than the skeleton is that of a male.

In May there was a search in the Rimel area for a man from Ohio whose car was found at the Pocahontas Campground. The man was not found then and has not returned home since.

NOTICE

Notice is hereby given that the County Court of Pocahontas county, W. Va., by an order entered of record on the 5th day of March, 1929, revoked the order heretofore allowing the thirty dollar bounty on old bear and the ten dollar bounty on cub bear No bounty except the statuatory bounty of three dollars shall be paid on bears killed after the 5th of March, 1929.

By Order of the Court
S. L. Brown, Clerk

Principal hired for MMS

BOE moves to settle Alderman lawsuit

The Board of Education met in a regular meeting on Monday at Marlinton Elementary School.

The Board met in an executive session with attorney Theresa Kirk to discuss a proposed settlement of the lawsuit filed in federal court by Norman Alderman alleging the Board has violated his civil rights. The lawsuit comes from the Board meeting on 6 April 8 of last year where he attempted to record the session. Mr. Alderman was asked to stop recording and when he did not, he was removed from the meeting by a state police trooper.

Ms. Kirk represents the Board through the state Board of Risk and Insurance Management.

As part of the proposed settlement to the law suit, the Board approved a resolution stating (1) the Board will provide Mr. Alderman with a formal apology; (2) the Board will undergo training on the Open Governments Proceedings Act; and (3) the Board will adopt rules and regulations regarding the placement of audio and video recorders.

The training on the open proceedings act will be provided by the state Ethics Commission. Board President Kermit Friel suggested that other interested groups be invited to join in the training.

School Superintendent Patrick Law read the following apology to Mr. Alderman, as required by the first part of the resolution:

"Be it hereby resolved that the Pocahontas County Board of Education, its individual members, apologize to Norman Alderman for violating his rights pursuant to the First Amendment to the U. S. Constitution and the W. Va. Open Government Proceedings Act by unlawfully attempting to prohibit Norman Alderman from recording the April 8, 2002, meeting.

"As a result of the settlement reached in Norman Alderman's Federal Civil Rights Case, the Board of Education has agreed to

Frost Community Meeting

The second meeting of the Frost community held its regular meeting Wednesday night, February 27. With all the unfavorable weather conditions with which we had to contend, we considered it a great success. The community was well represented, and a real spirit of citizenship was shown

We were unable to get any outside help, but our subject "Citizenship" was very well mastered by our home talent. Some interesting talks were given by A. H. Sharp, A. A. Sharp, G. M. Sharp and Mitchell Sharp.

Miss Eula Hill and her pupils from Cove Hill school gave a very entertaining play on Washington, which was enjoyed very much.

Frost upper grades came in with their part on the life of one of our great Americans, Abe Lincoln. Also the "Frost Orchestra" directed by Mrs. G. M. Sharp, gave some special music which was well rendered.

Our next subject to be discussed is Health. The meeting will be held at Frost Church, March 12.

Regional Finals

The Pocahontas County High School Lady Warriors advanced to the regional finals by demolishing Independence High School Tuesday night in Hinton by a score of 68-36. All of the girls played very well. Some individual stats were: Ronda Roy, 13 points; Gina Ratliff, 3 steals, 2 points; Jackie Burks, 10 points, 8 rebounds; Shari Vance, 16 points; Kim Arbogast, 13 points, 3 steals; Michelle Withers, 12 points, 10 rebounds, and Missy Kidd, 2 points.

The Lady Warriors will probably be playing Baileysville High School for the regional championship. The game will be Thursday, Dec. 1 at 7:30, at Hinton High School.

TEACHERS' INSTITUTE

On last Saturday the Teachers Institute for Edray District was held at the high school. There was a large attendance by the teachers. There was a profitable and interesting program. County Superintendent Flynn stressed the objectives of the year; pupils reading circle work; state educational association; better buildings and beautiful grounds; teaching mathematics in upper grades; retention of course of study and its return by the teacher from year to year Demonstrations of reading teaching by Mrs. Olivine McNeil for beginners and by Mrs. Ralph Yeager for second graders. Addresses by J. H. Miller on goals and ends of teaching; by Ira D. Brill on advertising the schools; by James Z. Johnson on the beginner in school and the rigid enforcement of the attendance law.

Among the teachers in attendance were: Edna May, Polly Gay, Lucille Bright, N. R. Fertig, Mrs. Ida Sue Choice, Elsie Adkison, A. W. Hill, Neff S. Morrison, G. H. LaRue, Mrs. Nellie E. Hefner, Arlene Judy, Okie Walton, Ruby Barlow, Virginia Gay, Mamie White, Charles J. Sharp, Mrs. Olivine McNeil, Glenna Barnes, Mrs. Ralph Yeager Glenna Gibson, Ruth Cunningham, Mrs. Jessie Mitchdll, Mrs. Edna C. Knapper, Mrs. Lillian VanReenen, Susie Stuart, James Z. Johnson, Enid E. Harper, Erma McCarty, Edna McNeill, Oleta Gay, Elizabeth Hill, Jewel D. Warwick, Madge Eskridge, Virginia Lancaster, B. F. E. Wooddell, Nelle P. ation in district—therefore each teacher help to keep within these bounds by practicing economy and thrift in every purchase made, wherein the board has to meet the indebtedness.

The matter of the educational exhibit at the County Fair was discussed, and the suggestions were noted by the exhibit committee, for consideration by the committee.

County Superintendent Flynn spoke of the necessity of discipline; for teacher to get down to the real essentials in teaching; to systemaize their work; be prompt with reports, etc., so that the regular routine work between schools, county superintendent and State department will not be delayed. Don't neglect to have the national flag displayed while school is in session. Make the school grounds more attractive. Join the teachers' association. Take a daily paper—history is being made. See that pupils attend school, and when necessory see that the compulsory attendance is enforced.

The importance of mathematics was stressed; pupils are behind in this study from the third grade up; the manual is a splendid treatise on mathematics. Teachers should be sure of the ability of the student to do the work before he is promoted. Thoroughness and accuracy are essential in teaching.

Among those in attendance were: T. P. Harwood, Mildred Pritchard, George Kerr, Lotus Butcher, Allyne Shisler, G. E. Pope, Mayo Beard, Alda Haught, Ella Waddell, Madeline Fuhrman, Leone Oliver, Bonnie Brooks, Margaret Wilson, Grace Arbogast, Mrs. Fred Moomau, Minnie Parg, G. Pearl Carter, Mrs. Clyde Wooddell, Jeanne Hevener, Monna Colaw, Mack Brooks, Marie H. Parg,

Green Bank Library supporter Emma Beard.

Hillsboro Town Council discusses town limits

By Joanna Radford
Hillsboro Treasurer

The Hillsboro Town Council held a special meeting Thursday, October 23, to discuss the lawful town limits. Present were Mayor Richard Workman, Recorder Mary Johnson, Treasurer Joanna Radford and Council Members Sam McNeel, James Johnson, John Hill, and William Burns.

Workman announced that he has been unable to come up with town limits more current than those given in the 1886 charter, despite having searched at the county courthouse with the help of courthouse employees.

James Johnson was informed that the town was surveyed in 1927 when the electric company placed the power poles and lights in town. He did not know the size of the town in the survey. Hillsboro was resurveyed in 1995 by surveyor William Dilley; this currently-accepted map is used by the State Road and for polling in town elections.

Workman stated that he found a 1910 survey showing a smaller Hillsboro than in the original charter, but found no documentation stating the reasons for the reduction in town size. Without such written reason, he assumes the town limits shown in the 1910 map, which shows Hillsboro as being the same size as is currently accepted, were re-

All subsequent surveys, he believes, were based on the 1910 survey, and therefore are also incorrect, leaving Hillsboro larger as indicated by the original charter in 1886. The records he searched included the Grantor Book and The Pocahontas Times archives for the period 1905 to 1910.

McNeel pointed out that if the town were to increase the town limits from what are currently accepted, the expanded town limits may be objected to when taxes are assessed. Radford mentioned that currently out-of-town residences would be absorbed by the expanded town limits and might object since the state law requires all in-town residences and businesses to be hooked to the town sewer system.

Burns and James Johnson asked the mayor if the town should re-vote on accepting the water and sewer rate ordinance since Fowler made the original motion to accept it, and his seat on council was and still is in question. Workman was not sure if a re-vote was necessary.

Workman suggested that the town hire an attorney to look into the town boundaries further. James Johnson suggested that, instead, the County Commission look into the situation and perhaps make a ruling. Johnson made a motion for the town to contact the County Commission, and Burns seconded it.

As an aside, Workman stated that sewer operator Morgan McComb is interested in purchasing an alternate chemical that might kill the duckweed on the sewer pond. He asked for a motion to buy it, and McNeel made the motion with Burns seconding it.

Andrew Price

A smart and stylish man was he,
He had a college-bought degree,
He wished to buy some timber land,
And so he took his pen in hand,
But when it all was said and done,
He hurt his friend in Marlinton,
He did a capital crime you see,
Spelling Marlinton with a G.
There ain't no G in Marlinton,
There ain't no G in Marlinton,

Jacob Marlin, a hunter bold,
settled here in days of old,
He camped in a hollow tree,
And spelled his name with nary G.
His partner, a hunter, also came,
Stephen B. Sewell, was his name,
The year was Seventeen-fifty-one,
They founded the town of Marlinton.

While they dwelt in solitude,
Sewell got in an ugly mood;

He took his knife and on a tree,
cut MARLING.
Then Jacob Marlin, mighty quick,
Fell on him like a thousand brick,
For it always riled his family,
For folks to spell the name with G.
Old Jacob Marlin died in bed,
Sewell—the Indians killed him dead.
It was an awful fate, but he
Was prone to use the extra G.
Let all take warning from his fate,
And when our town they designate,
They sure must mind their p's and q's,
This awful G we can't excuse.

Greenbank, W. Va.—The Teachers Institute for Greenbank District met at the high school on Saturday September 21. The attendance was large and the addresses and subjects up for discussion covered a wide range. Arrangements for consideration of the course of study was made as follows:

Durbin and Bartow, with Ralph Hedrick chairman; Greenbank, Rev. Pope; Dunmore, J. K. Arbogast; Cass, Mack Brooks. The rural schools will join with the nearest and most convenient of the fore going groups for their study in this course.

In the matter of Public School Day a committee was appointed to consider possible plans.

C. F. Hull, secretary of the Board of the District insisted that teachers use more care in signing their contracts; take their oath as required on contracts, give years of experience (this is required if you wish your salary;) be accurate in monthly and term reports. All teachers make out two reports the first month (the first month only) and send to secretary. The teacher's attention was also drawn to the fact that the maintenance fund had boen reduced to meet tax levy due to error in assessed valu-

Hillsboro.—On Sunday, September 29, 1929, the family and friends of Mrs. Preston Clark gathered at her home to mark the eighty-fifth anniversary of her birth. There were children, grand-children and great-grandchildren. Mrs. Clark is hale and hearty in spite of her age, and appeared to greatly enjoy the day. Among her children present were, Mrs. Brock, Mrs. Kelly, Miss Myrtle Clark, Lee and Norval Clark.

Mr. and Mrs. J. A. Sydenstricker, Misses Maggie and Susie Gay, Kenny Weiford and family and Harlow Waugh went to Hillsboro Sunday to call upon Mrs. Josephine Clark—that being her 85th birthday.

Marlinton Vikings win Midget Superbowl, have undefeated Season

THE CHAMPIONSHIP VIKINGS: Wesley Felton, waterboy, front; Michael Hensler, Jesse Walker, Casey Withers, Derek Kiner, Kendall Beverage, Andy Hefner, Aaron Totten, Jesse Ilske, Matthew Faulkner, Dylan Cuttip, second row; Coach Brett Withers, Coach Eddie Beverage, Coach Mark Williamson, Dan Richardson, Brandon "Pete" Oscar, Kevin Beverage, Greg Irvine, Dexter Skidmore, Mark Williamson, Jeffery Fertig, Mikey Callison, Joel Galford, Sean McCarty. Coach Rex Skidmore is not pictured.

The Marlinton Vikings Varsity played the Addison Chiefs last Saturday for the Midget League Super Bowl and came away with a 44-6 victory.

This capped an undefeated season in which the Vikings posted undefeated again. The high-powered offense and hard-hitting defense was just too much for the Chiefs.

The Vikings won the opening toss and elected to receive.

With Mikey Callison and Kendall Beverage going deep to receive, the ball was kicked to Callison. Callison had a 40-yard return but to about the 50 yard line.

Beverage took the first hand-off from quarterback Casey Withers for about a two-yard gain. Aaron Totten then took the ball around the right side for a short gain. The Vikings pushed the center quarterback exchange but fell on the ball.

That brought up a fourth and long. Withers pinched to Quarterback Dexter Skidmore on a sweep play and Skidmore picked up the first and more. Skidmore gained 27 yards on his first carry.

With the Vikings having a fresh set of downs, Skidmore took Withers' next hand-off on a cross buck play and Skidmore rumbled 50 yards for the Vikings' first score. Beverage took the hand off for the two-point conversion and scored with 9:11 left in the first quarter.

The Vikings kicked off to the Chiefs and Mark Williamson led the charge, along with Jeffery Fertig, and a host of Vikings pursuing the Chiefs at about the 30 yard line. The Chiefs moved the ball down to the Vikings 25, before the Vikings defense tightened up and held the Chiefs.

With the ball back in the Vikings' possession, quarterback Totten scampered for a 10-yard gain on a reverse. Withers then pinched to Skidmore on another sweep play and Skidmore picked up the first and more.

Circuit Court

A civil case was tried in Circuit Court Tuesday in probably one of the shortest jury trials in the County's history. The case was Cooper, Simmons & Martin, a Legal Corporation, vs. Jackie Arbogast, Carlos Jones, and Grace Jones. Involved was a dispute over legal fees.

The case was presented and verdict returned by the jury before noon. The jury

MARLINTON, POCAHONTAS COUNTY W

THE EMPRESS TREE

Some several weeks ago Eugene Kennison and H. C. Spencer of Hillsboro, brought to the Pocahontas Times office some pieces of a tree to be identified. This we failed completely to do.

Some years ago a Mr. Spencer found a tree strange to him in the woods on Cherry River. He was attracted by its immense leaves. Some of these leaves were two feet or more long. He took up the stranger and transplanted it in his home yard. It grew like a weed, reaching a height of 15 feet of a season, but freezing back each winter. The bark somewhat resembles the first year's growth of the poplar or white linn. The stalk is hollow, and it looks to be jointed like a reed.

This editor could find nothing in the books about it, as he had no idea where to look and what for.

While in Morgantown one evening last week, I sat and talked with Dr. Strausbaugh, the head of the Department of Botany at the University. I told him about the sew shrub. He said the description was that of the Paulownia or Empress tree, and to look that up in the books. This was done, and it proved out.

The books said nothing about the empress tree, but they did say Paulownia tomentosa were ornamental

Strausbaugh, the head of the Department of Botany at the University. I told him about the sew shrub. He said the description was that of the Paulownia or Empress tree, and to look that up in the books. This was done, and it proved out.

The books said nothing about the empress tree, but they did say Paulownia tomentosa were ornamental trees grown for their beautiful flowers and showy foliage. There are eight species in China. One book said there were none originally in Japan and another book said there was. Named for Anna Paulownia, a princess of the Netherlands. The other books said the lady was the daughter of Czar I, of Russia.

Medium sized or fairly large trees. Leaves similar to the catalpa and six to fifteen inches long. Violet or nearly white flowers two and a half inches long. Fairly hardy in sheltered positions as far north as Massachusetts. Flower buds often killed in winter. Ornamental plant as far north as Ontario where it is killed to the ground every winter. Each spring it throws up from the roots vigorous sprouts ten to fifteen feet high, with leaves one to two feet long. Diciduous; rarely half evergreen. Escaped from cultivation from New Jersey to Georgia. Bark in thin flakes. Specimens have reached the height of 70 feet.

The empress tree has a capsule like fruit which is eaten by the birds. This probably accounts for the stranger found in the Cherry River woods.

SGM SOLOMON WORKMAN with the Design Section of the 111th EN GP, inspects the installation of a Military Maybey bridge located in Alfalahat, Iraq, 59 miles north of Baghdad.

for Sharon Fowler, teacher at Green Bank, and Anne Thomas, teacher at Marlinton Middle

* resignation of Diane Hoover as teacher at Green Bank

* resignation of Lowell Galford as teacher of special education, half-time, at Marlinton Middle and substitute teacher

* resignation of Erin Lash as itinerant speech therapist

* transfer of Karen Goldizen from cook, half-time, at PCHS, to cook at Marlinton Middle

* employment of Nicole Dilley, Monica Green, Stephanie Lore, and Lora Miller as substitute aides

* employment of Diane Hoover and Anne Smith as substitute teachers

* employment of Wilma Dale and Thomas Sanders as mentor principals

* transfer of Pamela McCurdy from teacher at Marlinton Middle to teacher at Hillsboro

* transfer of Wanda Withers from preschool teacher at Hillsboro and Marlinton Elementary to preschool teacher at Marlinton Elementary

* transfer of Renee Hill from preschool aide at Hillsboro and Marlinton Middle Middle to preschool aide at Marlinton Elementary

* transfer of Carrie Hickson from custodian, half-time, at Green Bank to special education aide at Marlinton Middle

The resignation of Ms. Lash was of concern to a parent at the meeting. Noting the needs of her child for these services, she asked how soon the position might be filled. The response from the Board was not encouraging. It was pointed out that the county has another speech therapist position that has been unfilled for some time. The difficulty in finding people to fill these jobs was discussed.

Approval was given for Robin Tywoniw, Spencer Hill, Dawn Workman, Naomi Bostic, Heather Simmons, Lucy Youngblood, Priscilla Sheets, Ruby Burns, and Amy Williamson to be volunteers at Hillsboro.

Dr. Law provided Board members with information on tax increment financing. He said he had a meeting with J. D. Morgan from Snowshoe on this type of financing. Snowshoe is seeking authority from the County Commission to form a tax increment district to fund projects at the resort.

The Superintendent told the Board that the policy on Profession Leave needs to be revised and he would be bring ing a proposed revision to the next meeting.

Dr. Law and Roger Trusler discussed a grant that will provide staff development funds to enhance reading instruction in grades 1 -3. They will provide more details at the next meeting.

Mr. King expressed his appreciation to Ms. Dale for the good job she has done as interim

THE MURAL

The beautiful mural painting by E. D. Doniphan, of Washingtan, D. C., has been placed in the new post office at Marlinton. I reckon a body would call it composite picture. There are the mountains for a back ground, piled one on another in the biue of a summer evening. Agriculture is represented by a yoke of oxen hitched to a wagon, with a farmer loading on lime from a recently burned kiln. The oxen are the yoke of Fred Sharp and his son Calvin posed as the farmer. There is also the shorn ewe and her lusty lamb. The Camden avenue part of the Town of Marlinton lies nestled in the hills beside the river. Industry is represented by the picture of the Greenbrier Tannery. I am no judge of art, but I know when a picture pleases me. I am so well pleased with Mr Doniphan's mural I would like to see a lot more bare, dead wall space in the lobby of our fine new government building made alive with more of his paintings.

July 7, 1938

Buy Your own MACHINE

One book said that the empress tree was well worth planting in anybody's lawn, even if it did freeze down each winter. The directions were to cut back all but one or two of the sprouts. After continual cutting back and freezing down, the sprouts would become stunted, and then it was time to start another tree. This is done by taking a root section.

---

ments have appeared every two years and sometimes more often, beginning as far back as 1870.

During these sixty odd years private individuals have taken the old Code and made new codes of their own; these are called compiled codes, distinguished from official codes, as compiled codes are not adopted by the Legislature. Thus we have Warth's Code of 1887, West Publishing Company's Code of 1906, Hogg's Code of 1913, and Barnes' Code of 1923, with various editions of each. These compilers took the old Code and worked into it various acts of the Legislature, sometimes placing them in old chapters, and sometimes making new chapters. Some of the old

Clover Lick, W

Marlinton, Two — Mingo, Nothing.

In the football game between the Mingo Red Shirts and Marlinton Man Eaters last Friday, at Marlinton, the home team won out by a score of two goals to nothing in a fiercely contested game of one hour. The play from start to finish was round the visitors' goal and that the score was not larger was due to Mr. Lawson's phenomenal plays in goal.

May 4, 1905

In the first half no score was made, but it was clearly seen that the home team had the advantage and the play from the start was in Mingo s territory.

In the second half G. D. McNeill scored for Marlinton on a well passed ball, and shortly after Dr. Price shot a ball from the side line and made the second goal.

The following is the line up:

MINGO.

A. Lawson, goal; E. Hall, E.

in the dry places. Between Tonopah and Las Vegas, in southern Nevada, a wide expanse of desert country, several hundred miles long, is called the West's largest and most beautiful natural flower garden.—Popular Mechanics Magazine.

Mrs. Teodore VanReenan is being treated at the Pocahontas Memorial Hospital for blood poisoning. Her sister, Miss Hazel Sharp, has just recovered from an attack of appendicitis; her aged grandmother, Mrs. James Sharp. has been very ill the past month; her mother, Mrs. Warwick Sharp is sick in bed, and her aunt, Mrs. Elmer Sharp, died on Monday.

LIFE

Mingo s territory.

In the second half G. D. McNeill scored for Marlinton on a well passed ball, and shortly after Dr. Price shot a ball from the side line and made the second goal.

The following is the line up:

MINGO.

A. Lawson, goal; E. Hall, E. Moore, Full Backs; B. Swecker, Shiflett, Edmunds, Halfbacks; A. Rhea, G. Coff, C. Hodson, John Coff, Guy Marshall, Forwards.

MARLINTON.

W. Yeager, Goal; Dr. Yeager, W. B. King, Full Backs; Ted King, Arthur Patterson, Frank King, Half Backs; Dr. Price, G. D. McNeill, Clarence McLaughlin, Fred McLaughlin, Carl Slavin, Forwards.

Umpire—Andrew Price.

Linesmen — L. Duke, Doctor McClintic.

BARTOW

Shipping cattle and sheep is the order of the day. 2,300 head of sheep were loaded at Bartow last week, not to mention the cattle.

Rev. L. S. Shires is away attending conference. We hope he will be returned to us.

Mrs. P. M. Yeager has returned home from Marlinton where she had been visiting her daughter, Mrs. Pearl Yeager.

Mrs. Mintie Wooddell, of Doe Hill, Virginia, was visiting at B. B. Beards over the week end. She expects to visit relatives at Greenbank and Arbovile while here.

The 4-H Club had their meeting at Mrs. A. G. McLaughlin's last week. After the business session, refreshments were served and an enjoyable time was had by all.

Ira Rexrode was over at Covington Monday.

M. M. Gum and family visited his father and mother Sunday.

Misses Eunice and Mary Neeley spent the week end with Miss Jessie Beard.

Mrs. Louis Collins is visiting her friends and relatives at Arbovale this week.

Seclusion adds to appeal of Cal Price State Forest

William P. McNeel, Editor,
The Pocahontas Times

Visitors and residents alike are fortunate to have a variety of state-owned recreational facilities nearby in Pocahontas County.

These vary in the amount of development and the greatest attraction of one area, Calvin W. Price State Forest, is probably its lack of development.

The nearly 9500-acre Cal Price is the newest unit in the system of state forests, acquired in 1953. The northern boundary of the forest is Watoga State Park and national forest land joins the forest on the south, with the Greenbrier River to the west, making it West Virginia's most secluded state forest.

The namesake of the forest is Calvin W. Price, who was the editor of *The Pocahontas Times* from 1906 until his death in 1957.

Price was recognized both as a "typical" county editor and a dedicated conservationist. He was active in promoting conservation work in Pocahontas County and the state while he was *Times* editor. An excellent naturalist, his "Field Notes" column, with bear and panther stories, was long popular with readers of the paper as they are with readers today in the newspaper's 50 Years Ago column.

At the dedication ceremony for the new state forest on May 15, 1954, Mr. Price said he was "sinfully proud" the area was named for him.

The management plan for Calvin Price State Forest emphasizes timber, wildlife, and watershed protection with camping, hiking, hunting, and fishing the major recreational activities.

Although the original road from Huntersville to White Sulphur Springs passes through the forest, only a few people ever lived within its boundaries.

The white pine in the forest was cut in the 1880s and 1890s and floated down the Greenbrier River to the mill of the St. Lawrence Boom and Manufacturing Company at Ronceverte. The hardwoods were cut in the 1911-17 period by the Maryland Lumber Company and hauled by railroad to the company's mill at Denmar.

After timbering was completed, the lumber company sold its 16,600 acre tract in 1922. The land was split with the northern portion becoming part of Watoga State Forest, later a park.

The southern section was acquired by the New River Company, of New Hope. This company held the property until the state purchased it in 1953.

Had all the plans developed during the Civilian Conservation Corps era been realized, the forest would have become the site of a 40-acre lake and other recreational development. Some preliminary work was done, but the lake project fell victim to budget cuts and the CCC camp established to do the work, Camp Will Rogers, was closed in October 1937.

Recreation on the forest is under the supervision of the Watoga State Park

People You Meet

Lefty Meeks

Real Name: Lyle
Age: Will be 80 on Christmas Day
Family: Widowed; 1 daughter, 3 grandchildren, 1 great grandson
Occupation: The Barber of Cass
Home: Scary Bottom
Education: Wheeling Barber College
Hobbies: Loafing
Philosophy of life: "Clean living."

They come from everywhere to the nearly 100-year-old shop, just past the Cass General Store. Visitors from out of state who come to ride the trains and regulars from as far as Franklin and Morgantown come to Lefty Meeks to get their hair cut.

"I'm pretty sure I've cut hair from every state in the US, even some from overseas."

On the day I visited, Lefty and his regular patron from Franklin were chatting.

"I travel 96 miles round trip to get my hair cut," he said. "Wife thinks it's too far, but I won't go anywhere else."

Lefty mentioned his Morgantown regular had been in earlier that week. "He tells me he only comes in to look at that picture on the wall there," nodding to a poster-sized photo of a 70-something Lefty kicking up his heels with two bikini-clad 20-something women - one on each side. "We went to Emerald Isle one summer, and my daughter asked those girls - complete strangers - to pose with me."

Lyle "Lefty" Meeks has been cutting hair at Cass since 1954. He barbered in Durbin for a year before that. He trained under the former Cass barber, Clyde Wilmouth, before taking over the shop. He hardly looks his age.

Lefty was born and raised in Sunny Bottom. He recalled catching the school bus in Clover Lick with his brother back in the 30s. They had to walk about 4 miles to the bus stop.

"That was as far as the bus came, back then."

> "I like the work, I like the people. I think that's all that's kept me going."

Lefty quit school after 8th grade. One of the deciding factors was the bitter cold winters and that long walk to catch the bus.

He joined the Civilian Conservation Corps at age 17 and worked at camps at Black Mountain and Thornwood, doing roadwork for two years, before being drafted into the Army.

He spent time in Germany during World War II, then returned to the states to Akron, Ohio, where he worked at a chemical plant for about a year before entering barber school. He returned to West Virginia, and attended Wheeling Barber College.

I asked Lefty what made him choose barbering.

"Well, after watching some barbers work, I just decided I'd like to do that," he replied.

"The worst of it's been barbering," Lefty said, with a twinkle in his eye.

The best thing about his job he said is "Meeting people. I like the work, I like the people. I think that's all that's kept me going."

The worst thing, he said, is "Kids throwing up on you or biting you." He told me the story of one little boy who was squalling. "His momma tried to settle him down by shoving a chocolate bar in his mouth. You can imagine, it was quite a mess!"

No child has ever brought blood, but Lefty says "they'll bite you hard enough to let you know they don't like getting a haircut."

Lefty's most memorable years were when Cass was a thriving company logging town. All he houses were full and the mill was busy all the time. Back then he was open six days a week. Some days he'd work from 8 a.m. to 11 p.m. with no dinner, no supper. Prom nights were especially busy, too.

"One day back in the early 60s, I cut 47 haircuts in one day. I had 14 people still sitting in here at 7:00 p.m. Now I don't want any more than 50 a week."

He works from 7:30 a.m. to 5:00 p.m., Tuesday through Saturday.

County libraries receive national service award

The Pocahontas County Free Libraries in West Virginia is among six libraries and museums nationwide being awarded the National Award for Museum and Library Service for 2003.

The awards were announced Tuesday, October 21 in Washington, D.C. by Dr. Robert S. Martin, Director of the Institute of Museum and Library Services (IMLS). This is the nation's highest honor for the extraordinary public service provided by these institutions. Each of the institutions will receive $10,000 and will be honored later in a ceremony in Washington, DC.

"The four branches of the Pocahontas County Free Libraries represent the best in public library service to a rural population," said Martin. "Their programs and services improve education, provide recreation, enable research, facilitate community discourse, promote the arts, and encourage a healthy economy. I commend them and am proud to honor them with the National Award for Library Service."

The Pocahontas County Free Libraries (PCFL) serve 9,000 people scattered across almost 1,000 square miles of mountainous terrain. Four library branches operate in Durbin, Green Bank, Marlinton and Hillsboro.

"We are deeply gratified at this recognition of our community and its collective effort," said library director Allen Johnson. "Across West Virginia and sors a number of historic and cultural projects with other community groups, including a biographical film of a legendary local newspaper editor, a book and radio show about the history of forest fire towers and a veteran's oral history project. The West Virginia Supreme Court has just announced a PCFL branch to be one of six library Legal Research Centers in the state.

Strong community support has been an essential element of the Pocahontas County Free Libraries growth. Volunteers staff evening and Saturday hours, help with fund raising, and assist librarians with such tasks as re-shelving books. Both the Pocahontas County Commission and the Pocahontas County Board of Education have been faithful financial backers, and the county's representatives in the state legislature have been very supportive as well.

The Pocahontas County Free Libraries success story is due to dynamic outreach into the community and a resultant outpouring of support. For more information visit www.pocahontaslibrary.org or contact Director Allen Johnson at director@pocahontaslibrary.org or 304-799-6000.

By striking different notes remarkable sounds of purity and strength may be obtained.

This celebrated cave is three miles south of Ronceverte, one-half mile from Seneca Trail on good road, and eleven miles from White Sulphur. The drive from White Sulphur is one of the most picturesque of the Blue Hills. Many tourists have picnics on the cave grounds. Tables and bench es have been provided by the ower for the convenience of tourists.

Deaths

Mrs. Elsie Withers

Mrs. Elsie LaVada Withers, 90, died Tuesday, December 13, 1983, in Pocahontas Memorial Hospital. She had been hospitalized since suffering a stroke five years ago.

She was the widow of Isaac Withers, who died in 1953. Also preceding her in death were three children, Ruth W. Dunbrack, James and Viola Withers, and nine brothers and sisters.

Mrs. Withers was born in Millboro, Virginia, on September 13, 1893, the daughter of the late John W. and Martha Jack Hayslett.

She was a member of the Marlinton Presbyterian Church where she was a faithful and active member of the Women of the Church until her illness.

Surviving her are three daughters and two sons, Arlene Camper, Shannon Withers, Evelyn Withers, Maxine Withers, and Ivan Withers, Sr., all of Marlinton; a brother, John Hayslett, of Marlinton, and a sister, Hettie Meadows, of Beckley; eight grandchildren and ten great-grandchildren.

Services will be held at 2 p. m. Thursday afternoon at Van-Reenen Funeral Home by the Rev. Richard Newkirk, with burial in Mountain View Cemetery.

...able research, facilitate community discourse, promote the arts, and encourage a healthy economy. I commend them and am proud to honor them with the National Award for Library Service."

The Pocahontas County Free Libraries (PCFL) serve 9,000 people scattered across almost 1,000 square miles of mountainous terrain. Four library branches operate in Durbin, Green Bank, Marlinton and Hillsboro.

"We are deeply gratified at this recognition of our community and its collective effort," said library director Allen Johnson. "Across West Virginia and throughout rural America many small libraries are reaching out to their communities with excellent programs and services. We are honored to be representative of their efforts."

The IMLS community service award includes two other libraries. The Philadelphia Free Library and the Bozeman Public Library, Montana, as well as three museums, the Carnegie Science Center, Pittsburgh, the San Angelo Museum of the Arts, Texas, and the USS Constitution, Boston.

The Institute of Museum and Library Services is an independent Federal grant-making agency dedicated to creating and sustaining a nation of learners. The Institute fosters leadership, innovation, and a lifetime of learning by supporting the nation's 15,000 museums and 122,000 libraries. The Institute also encourages partnerships to expand the educational benefit of libraries and museums. Sewer system main... Hillsboro Council

by Joanna Radford
Hillsboro Treasurer

The Hillsboro Town Council met on October 14. Present were Mayor Richard Workman, Recorder Mary Johnson, Treasurer Joanna Radford, and Council Members Sam McNeel, James Johnson, John Hill, and William Burns. Also present for all or part of the meeting were council member David Fowler, former mayor Eric Domboski, and engineer Ray Tilley.

Workman announced that there is an upcoming 911-related street-addressing conference and asked council whether the town should attend. Burns pointed out that the county commission is leading an effort to address this issue, and the council agreed that we should wait for the commission's instruction on this.

The Treasurer's report and minutes for September were reviewed and accepted as written. Workman reported that the West Virginia Municipal League is organizing an insurance policy for towns like Hillsboro in order to reduce the costs of liability insurance.

FATAL ACCIDENT

Jessie Starks, 81, of Minnehaha Springs, was fatally injured on Thursday when struck by a car on Rt. 92. The accident occurred at 6 p.m. about 0.3 mile north of the Greenbrier County line.

Mr. Starks was hit as he was walking across the road. One car managed to miss him but he was hit by a Toyota driven by Patrick O'Brien, of White Sulphur Springs. Mr. O'Brien had his vehicle nearly over the embankment but was not able to avoid hitting the victim.

Mr. Starks was brought to the Pocahontas Memorial Hospital by the Marlinton Rescue Squad, but was dead on arrival. According to officials he probably died instantly.

State Police investigated the accident and do not plan to file any charges.

MTA Cuts Service

Wednesday of this week was the last day the Mountain Transit Authority's work bus run to Denmar Hospital operated.

According to MTA Manager, Scott McNeil, this cutback was necessary for budget reasons. At the end of November costs for the entire MTA system were running ahead of the bud-

Rail Line Abandonment Approved

On Tuesday the Interstate Commerce Commission gave approval to the Chessie System's request to abandon the rail line between Greenbrier Junction and Bartow. This action, together with inaction by the state to date on two proposals made by Chessie for maintaining service to the Tannery, make the future of rail service to the Durbin area very bleak.

Mainly affected by the abandonment are the Howes Leather Company a Frank and the Cass Scenic Railroad. The tannery receives a portion of the hide used in tanning by rail a well as other supplies. Th Cass Railroad has receive a great number of pieces railroad equipment by ra over the years as well taken trains to other local ties. Many items of r equipment will not be ab to be brought to Cass in th future without a a r connection due to weigh restrictions on highways.

According to Chessie official Barry H. Blank, Assistant to Vice-President, in Baltimore, the exact date for the termination of service to Durbin has not been set yet but it will probably be within 30 days. Time is needed to issue embargo

BROOKS IS PLEASED WITH STATE POLICE

Official Returns From Trip of Inspection Requested by the Governor

Conditions at state police posts and methods used in enforcing the state laws are satisfactory, Harry L. Brooks, chief of the state department of public safety, said recently upon his return from a two week's inspection trip through the northern and eastern portions of the state. The trip was made at the request of Governor Conley.

Chief Brooks visited 18 counties of the state while on the trip, conferred with Sheriffs, members of county courts, other law enforce men officials and principle men of the counties cooperating for suggestions as to how the work could be improved.

Particular attention was paid to the work ot Shinnson, one of the largest and considered one of the most efficiently operated posts in the state. There he met Captain Hobart A. Brown, in charge of company A and the two officials hen visited stations at Charles Town, Elkins, Berkley Springs, Keyser Kingwood, Buckhannon, Martinsburg, Petersburg and Romeny. At Shinnston they abolished the company mess in he interests of economy and suggested other changes. He was particularly impressed with the department motor repair shop maintained at the town. All of the department's automobiles and motor cycles are repaired there.

Chief Brooks praised conditions in the eastern panhandle and the spirit of cooperation with which he was received.

Monday.

Correction

Green Bank and Marlinton's joint football team has one girl. Natasha Trainer.

Magistrate Court

Andrew L. Lacey, of Marlinton, was arrested by Sheriff R. R. Alkire on Tuesday of last week and charged with two counts of contributing to the delinquency of a minor. He was released on $1000 bond.

Lewis M. Dunbrack, of Buckeye, was arrested on a domestic battery charge by Deputy Sheriff R. R. Alkire, II, on Tuesday. He was released on $2500 bond.

Sammy A. Sheets, of Marlinton, was arrested on Thursday by Marlinton Police Chief E. L. Tinney and charged with domestic battery, third offense. He was released Friday on $2500 bond.

Several hearings were held in Magistrate William Hevener's court on Friday.

Freddie Doss, Jr., of Hillsboro, pled no contest to domestic battery, second offense. He was sentenced to 12 months in jail, fined $100, and assessed $120 in court costs. All but one day of the jail time was suspended and he was placed on probation.

Michael P. McCarty, of Marlinton, entered guilty pleas to DUI, having no proof of insurance, and driving with his license suspended/revoked. He was sentenced to four days in jails with fines totaling $400 and court costs of $380.

Daniel E. Akers, of Buckeye, appeared for sentencing on charges of violating a protective order and making harassing phone calls. He had been found guilty of the offenses last month. On the first charge he

Library Services is an independent Federal grant-making agency dedicated to creating and sustaining a nation of learners. The Institute fosters leadership, innovation, and a lifetime of learning by supporting the nation's 15,000 museums and 122,000 libraries. The Institute also encourages partnerships to expand the educational benefit of libraries and museums. The Institute receives policy advice from the Presidentially appointed, Senate confirmed National Museum and Library Services Board.

Like many other small rural libraries, The Pocahontas County Free Libraries' branches function as community centers. PCFL hosts groups such as scouts, business associations, town council, blood drives, and holds active preschool playgroup and after school programs at two sites. Two of these branches also serve as school libraries for the local elementary schools. PCFL operates the county's adult literacy program.

The libraries are cornerstones of civic engagement. They receive thousands of hours of volunteer service and substantial and steady local contributions. Last year local funding provided 73 percent of operating expenses versus 27 percent state and federal dollars, a high ratio for small, rural library systems.

The system has built two new buildings and extensively renovated another building over the last 10 years, thus increasing the capacity for community service. One of these building projects was co-sponsored by the Green Bank High School Alumni Association, honoring a school that was closed by consolidation 30 years ago.

A special collection on Appalachian culture and history has been developed in

that the county commission is leading an effort to address this issue, and the council agreed that we should wait for the commission's instruction on this.

The Treasurer's report and minutes for September were reviewed and accepted as written. Workman reported that the West Virginia Municipal League is organizing an insurance policy for towns like Hillsboro in order to reduce the costs of liability insurance.

The town elected to send Workman to Municipal Judge class. The mayor stated the prices for the monthly water and sewer laboratory work are to increase. Domboski suggested that the town shop around for a less expensive firm, as he knows there are several to choose from.

Council set Halloween Trick or Treat for Friday, October 31, from 6 p.m. to 8 p.m.

LA Gates engineer Ray Tilley presented a study on the town's sewer needs that he has been working on for the past couple months. Tilley said he doesn't see how the town can meet the permit limitations with the effluent emptying into the creek, so the effluent will

MEMBERS OF GVEDC and the Pocahontas County Commission turn shovelsful of dirt at the Edray Industrial Park groundbreaking Thursday. Commissioners Jim Carpenter, Joel Callison and Reta Griffith, center, and Marlinton Mayor Doug Dunbrack joined in the morning festivities.

Edray Industrial Park breaks ground; construction underway

Construction at Edray Industrial Park is underway this week following a groundbreaking ceremony last Thursday near the Marlinton Motor Inn.

Greenbrier Valley Economic Development Corporation's executive director, Dick Nevi, said the GVEDC is "committed to improving the situation in all three counties...we serve."

GVEDC is the lead economic development agency for Greenbrier, Pocahontas and Monroe counties.

Pocahontas County Commission president Joel Callison commended a number of individuals who have moved along this project including Bob Lewis and W. D. Smith of the Region IV Planning and Development Council.

"Every person in this room has had a positive influence on this project," Callison commented. "All three counties will benefit from this project."

Callison maintained teamwork was the linchpin of the Edray Industrial Park.

Smith said the groundbreaking marked a "great day for Pocahontas County," since it will now be able to market the industrial park and bring jobs to the county.

"Job well done," he said, "I look forward to seeing it finished."

Nevi said the project had taken five years and come in two phases—the purchase of the property and the assemblage of loans and grants that will fund construction, including an access road.

Both Nevi and Callison applauded Richard Ellard who ensured the money was administered correctly.

Pentree, Inc., of Princeton, is building the access road this week.

land Ry at Spruce and the Cass Railroad at Old Spruce.

Under both proposals the state would be responsible for the final haul to the tannery. Chessie would leave the cars at either Greenbrier Junction or Spruce for pickup by the Cass Railroad. Chessie offered to make the C&S Railroad's share of the revenue from the tannery traffic at least $200 per car.

The Proposal to sell the line to Durbin has now been withdrawn by Chessie as this offer was good only while the abandonment request was under consideration by the ICC.

The state was informed of the withdrawal of this proposal in a letter dated November 23. The letter was sent to Elwood Williams, Chairman of the W. Va. Railroad Maintenance Authority with copies to the Department of Natural Resources and the Gover-

proposal in a letter dated November 23. The letter was sent to Elwood Williams, Chairman of the W. Va. Railroad Maintenance Authority with copies to the Department of Natural Resources and the Governor's office.

In the letter Chessie repeated its offer of donating track materials for the Spruce to Old Spruce connection, the track to come from the Durbin line. The railroad will also leave a connection to the tannery in place.

Mr. Blank told this paper Tuesday, as he did earlier, that Chessie will consider continuing service to the tannery beyond the next 30 days, if there was some indication that the state would take over the service. However, as of Tuesday, Mr. Blank said the railroad had not received a response of any type from any agency of the state to the letter of November 23.

Greenbrier Valley Theatre's memorable production of the charming musical by Ted Swindley. "Always...Patsy Cline" focuses on the night Seger hears of Patsy's death in a plane crash. Starring as Ms. Cline is Morgan Sturges, who has spent the better part of three years singing Patsy's songs. Starring as Louise is GVT's own Artistic Director, Cathey Sawyer. The unforgettable music of Patsy Cline is performed by the Bodacious Bobcats, a back-up band with the authentic look and sound to perform some of country music's greatest tunes.

that Chessie will consider continuing service to the tannery beyond the next 30 days, if there was some indication that the state would take over the service. However, as of Tuesday, Mr. Blank said the railroad had not received a response of any type from any agency of the state to the letter of November 23.

The Department of Natural Resources has been concerned about a number of questions if the Cass Railroad does take on hauling freight to the tannery. Some of the questions are legal ones. Others are of an operational nature, particularly if the freight is brought off the mountain from Spruce. The size of modern freight cars, wear and tear on the not-so-new Cass engines, and the general problems of winter operations.

Mr. Blank did tell this paper that Chessie is willing to send technical people

VICTORVILLE, Calif-- Technical Sergeant Charles H. Sharp (right), son of Mr. & Mrs. Charles J. Sharp, R.F.D. 1, Marlinton, received the U.S. Air Force Commendation Medal during his retirement ceremony at George AFB. Calif. Green Bank U14 soccer team wins several games

On October 8, the classic battle for bragging rights in Pocahontas County took place at Stillwell Park in Marlinton.

Green Bank U14 met the Marlinton/Hillsboro team in an evening match. After a long and well played match, the Green Bank team was victorious by a score of 3-0. A goal was scored by Abe Rittenhouse with an assist by Jesse Bolyard in the second quarter.

The remainder of the game was breath-stopping until Green Bank was able to score twice more in the fourth quarter. Both later goals were scored by Bolyard with assists from Rittenhouse.

October 18 saw Green Bank travel to Franklin. A tough match saw the game tied up at 2-2 at half-time. Green Bank's scoring in the first half was one goal by Bolyard with an assist by Rittenhouse and the second goal by Bolyard with an assist by Grant Langston.

The team continued to battle against the Franklin team and was able to score twice in the second half to win the game 4-2.

The first goal in the second half was scored on a corner kick by Trevor Caplinger to Rittenhouse and passed to Jerry Simonin for the goal. The final goal of the game to secure the win was passed from Rittenhouse to Mason Jewell for the score.

In Green Bank, on a beautiful fall afternoon, many parents, grandparents and friends turned out for a fantastic match against Covington on Sunday, October 19.

Never has there been a nicer day to win a soccer game. Green Bank took off to a 2-0 lead by half-time. Goals were scored by Bolyard with an assist from Grant Lockman and Simonin with an assist by Rittenhouse.

The teams took the field ready for the second half. A third goal was scored by Caplinger with an assist by Alex Jonese.

Covington returned with a goal.

Later in the second half Jonese made a beautiful pass to Bolyard for a goal. With Green Bank up 4-1, some younger players had the opportunity to play in positions they were not accustomed to playing.

Nevertheless, the team pulled together and only allowed Covington to score two more goals in the game. Green Bank was victorious by a score of 4-3.

Funeral arrangements are incomplete pending the arrival of the body.

New stamp honors Korean War veterans

Each year the United States Postal Service issues new commemorative stamps that honor important people and various events. One of these stamps depict the Korean War Veterans Memorial, which is located on the National Mall in Washington, D.C. It features John W. Alli's photograph of 19 stainless-steel statues and coincides with the 50th anniversary of the armistice that ended the hostilities.

The Durbin Post Office celebrated the issuance of this special stamp and also recognized the men of the community and the sacrifices they made while serving during this conflict. Each one was presented a framed Korean War Stamp and an envelope with the new stamp. They were also given a badge and posters commemorating the 50th anniversary, compliments of Mr. Richard Hiner.

Those honored were Robert Eades, Richard Hiner, William Woodford, Kennison Thompson and Vancie Lusk, Sr.

New superintendent sees advantages, challenges in Pocahontas County school system

by Pamela Pritt
Managing Editor

After 30 years in education, Dr. J. Patrick Law has seen superintendents come and go.

He knows what kind of superintendent he wants to be.

"I want to be a superintendent that's available to the staff, to the parents, to the community," he said recently. "I want to be a superintendent who's involved in the community."

Law also said he wanted to see Pocahontas County's school system become "one of the best.

"I don't see why we can't become one of the best," he said. "We've got all the pieces in place. It's a matter of putting them together."

Law promotes teamwork as one factor in a successful school system.

"We have to work as a team. We don't have enough people, we have to do a lot of sharing, a lot of collaboration a lot of helping out and cooperation.

"It's very important we work as a team if we want to continue to improve."

With only five schools educating 1400 students in the county, Law sees the small system as one of the advantages.

"You can make changes fairly quickly," he said. "Trying to keep everybody moving in the same direction in a small system is an advantage."

Law said the county's veteran teaching staff is another advantage, although it possibly creates a shortage issue down the road.

"Veteran teachers have a lot of experience and they're still putting that experience to use in the classroom," he said. "The staff seems to be very committed to education and kids."

He also noted the board of education works together well and seem to like and respect each other.

But the county has challenges to face, as well, the same challenges that all rural schools confront: not enough people to do all the things mandated by the federal government and by the state, great distances to travel and No Child Left Behind, a federal edict from the Bush administration.

Law said the county is already meeting the goals for NCLB, as proven by test scores; however, there are some places that need continued work.

"It's going to require a lot effort and a lot of ingenuity on our part to find new ways to do old things," Law said. "Teaching and learning are pretty much the same throughout history.

"You have to have an engaged student that's interested in what they're doing and you have to have someone with some knowledge and some skill to conduct the instruction.

"Where we have students who are more challenged for a variety of reasons, we have to find ways to apply and include the resources to have their needs met as much as we can."

Dr. J. Patrick Law

Law said he's heard about school systems in which every school has some sort of citation for under-achieving.

"I think we're in pretty good shape at this point," he said.

The superintendent said lessons can be learned from the success of Pocahontas County High School, which was able to recover from its "severly impaired" status in one year.

Law said PCHS principal Tom Sanders could share information about focusing staff and supporting students to raise test scores.

Law and his wife, Martha, have two daughters and one granddaughter.

He presided over his first board of education meeting Monday night.

n Another tip: If a holiday reveler drops a match or cigarette, recover it at once. If it fell into upholstery, you may want to put the cushion—or the whole couch—outside overnight. Upholstery soaks up heat quickly and releases it slowly. A brief exposure to hot ashes could result in a smoldering fire that doesn't erupt for hours—and is impossible to detect until it's too late.

By the way, here's a tip for choosing—and checking—a live Christmas tree for freshness. Pull out a needle and squeeze it between your thumb and forefin-

June 30, 1972. From 1942-1945, he served in the United States Naval Reserve as a gunnery officer aboard the U.S.S. Boise. For outstanding performance in the Battle of Layte Gulf, he received the Bronze Star medal.

In 1937, Walter married Frances Geraldine [Jerry] Holden, who predeceased him in January of this year. During their 45 years of marriage they had three children, Douglas H. Jett, of Marlinton, Suzanne Jett Sullivan and John W. Jett, both of Morgantown, and five grandchildren. Also surviving him are two sisters, Edna Nalley, of Parkersburg, and Irene Freasure, of Cadis, Ohio. His two brothers, Hobert O. and Layton C. Jett, predeceased him.

Following his retirement, Walter served as chairman of the Pocahontas Development Authority and was Coordinator for the Pocahontas County Commission. He was a member of the Marlinton Presbyterian Church, where he served as A Deacon, the Rotary Club

Letters to the Editor

Dear Editor:

For those of you who missed the county commission meeting on October 7 you missed quite a spectacle. Two Democrat commissioners sent out their Republican puppy attack dog because they did not have the guts to speak for themselves on an issue that had absolutely nothing to do with the subject matter on their agenda. As a Democrat I am embarrassed to admit we belong to the same party.

The agenda included a discussion concerning my request to change the government sponsorship of the proposed Huntersville Church Renovation Transportation Enhancement Project Grant from the Pocahontas County Commission to the Landmarks Commission. The requested change was based on my understanding of conversations I had with Harold Simmons, Transportation Enhancement Program, WV Dept. of Transportation, Division of Highways. A phone conversation (on a speaker phone), during the commission meeting clarified issues we all had questions about and made it clear we could achieve the goals of the grant, should it be awarded, without the need to change sponsorship. I respectfully withdrew my request for change of sponsorship on the promise from the county commissioners that the people of Huntersville along with the owners of the church (the Masonic Lodge) would take charge of implementing the grant should it be awarded.

Why the spectacle? It appears to me that Commissioner Reta Griffith does not like it when local people claim ownership in their community to determine for themselves what their future may be.

There isn't anyone that I know of in Pocahontas County that does not want positive economic change for our county. If, however, the cornerstone of the foundation of economic development we are building is not called Community Development, we will not succeed.

A storm is coming, the winds of change are blowing, that sweet smell of the beginning rain is in the air and its taste is delicious. This coming storm will pass and that which was not built on a strong community foundation will no longer exist. The sun will shine on a new day ,and the cycle of life will begin again, because the beginning and the true essence of democracy are found in community.

Luther Crouthamel
Anthony Creek

Dear Editor:

The new law "Help America Vote" will eat up $3.9 billion of taxpayers' money, partly to tempt states and counties to adopt computerized "touch-screen" voting machines before the 2004 Presidential Primary elections. There are already over 50,000 touch-screen voting machines nationwide.

Unlike with paper ballots, there is currently no "audit" trail with touch-screen voting machines. If the machine is tampered with or if it "crashes" on its own, there is no way to tell how people actually voted.

Led by Professor David Dill of Stanford University, 300 of America's top computer academics have signed their own petition warning of the dangers of electronic voting. They have seen the first elections with computers produce serious vote-count problems.

Touch-screen ballot machine vendors can easily and inexpensively include printers that produce a paper receipt before the voter leaves the voting booth so that a voter can confirm that the paper receipt matches their touch-screen choices. Receipts would go into a county lock-box for use in recounts, if necessary.

Ask yourself: Would you trust a vendor you don't know, who refused to give you a receipt for your purchase total? Tell the Pocahontas County Commissioners that you want a receipt for your vote. Tell them touch-screen voting must provide a paper trail!

If county touch-screen voting machines do not have a print-out receipt, voters can assure the accuracy of their own vote by voting with an absentee ballot, available at the County Election Commission.

It has just been announced that on

Luther Crouthamel
Anthony Creek

Dear Editor:

The new law "Help America Vote" will eat up $3.9 billion of taxpayers' money, partly to tempt states and counties to adopt computerized "touch-screen" voting machines before the 2004 Presidential Primary elections. There are already over 50,000 touch-screen voting machines nationwide.

Unlike with paper ballots, there is currently no "audit" trail with touch-screen voting machines. If the machine is tampered with or if it "crashes" on its own, there is no way to tell how people actually voted.

Led by Professor David Dill of Stanford University, 300 of America's top computer academics have signed their own petition warning of the dangers of electronic voting. They have seen the first elections with computers produce serious vote-count problems.

Touch-screen ballot machine vendors can easily and inexpensively include printers that produce a paper receipt before the voter leaves the voting booth so that a voter can confirm that the paper receipt matches their touch-screen choices. Receipts would go into a county lock-box for use in recounts, if necessary.

available at the County Election Commission.

Ask yourself: Would you trust a vendor you don't know, who refused to give you a receipt for your purchase total? Tell the Pocahontas County Commissioners that you want a receipt for your vote. Tell them touch-screen voting must provide a paper trail!

If county touch-screen voting machines do not have a printout receipt, voters can assure the accuracy of their own vote by voting with an absentee ballot, available at the County Election Commission.

OBITUARY

Charles Mearle Arbogast

Funeral services for Charles Mearle Arbogast, aged thirty, whose death occurred Tuesday morning, April 3, 1928, following an attack of double pneumonia, was held at the home of his father, Dr. P. D. Arbogast, 1080 University avenue, Thursday afternoon at two o'clock. The Rev. Dr. W. E. Brooks, pastor of the First Presbyterian church, conducted the rites. Temporally, the body was placed in East Oak Grove mausoleum and later will be interred in the family plot in Mount Calvary cemetery, Clinton District.

Mr. Arbogast was taken ill one week previous to his death but it was not until two days before he died that his condition was considered alarming. Death occurred at the home of Mr. and Mrs. J. Milton Hackney, Jefferson street, South Park, where Mr. Arbogast roomed.

He is survived by his father and step mother; four brothers, Harry, Hoyt, Keith and Gray, all of Morgantown; and one sister, Mrs. L. E. Frazier, of Bridgeport, Connecticut. One step sister, Miss Vida McLaughlin, also survives.

Mr. Arbogast was born at Charlottsville, the son of P. D. and Hodie Burner Arbogast. At an early age he moved with his parents to Durbin, W. Va., but in 1910 the family came to Morgantown and it was in this city that he spent most of his boyhood days, where he gained great popularity with his youthful companions. He attended Morgantown high school until the United States entered the World war when he enlisted in Company L, local National Guard unit. After a period of training at Camp Shelby he was sent to France,

Deaths

Walter E. Jett

Walter E. Jett, retired County Agricultural Extension Agent, died Friday, December 9, 1983, in Pocahontas Memorial Hospital.

Born in Ritchie County on February 22, 1912, Walter attended Salem College and West Virginia University. After receiving his Bachelor of Science in Agriculture from West Virginia University in 1941, he accepted a position with the WVU Extension Service and was assigned to Pocahontas County. Except for a three year period during World War II, he served as County Agent in Pocahontas until his retirement on June 30, 1972. From 1942-1945, he served in the United States Naval Reserve as a gunnery officer aboard the U.S.S. Boise. For outstanding performance in the Battle of Layte Gulf, he received the Bronze Star medal.

In 1937, Walter married Frances Geraldine [Jerry] Holden, who predeceased him in January of this year. During their 45 years of marriage they had three

Rev. Alfred Gum

Rev. Alfred Garfield Gum, of Gap Mills, died Saturday, December 10, 1983, in Greenbrier Valley Hospital. He had been in ill health.

Rev. Gum was a minister of the United Methodist Church, West Virginia Conference, for eighteen years. He was a former pastor on the Edray Charge.

Born at Huntersville October 3, 1908, he was the son of Elmer R. and Melvina Sampson Gum. His wife, Leona, and two sons, Virgil and William, preceded him in death.

Surviving him are two sons, Rev. Clyde Gum, of Minnehaha Springs, and Jimmy Gum, of Goshen, Virginia; two daughters, Ruth Roberts and Ethel Hiner, both of Covington, Virginia; 14 grandchildren and 9 great-grandchildren.

Services were held at 2 p. m. Monday in the Mountain Grove United Methodist Church by Dr. Wendell E. Eskew, of Lewisburg, with burial at Mountain Grove.

FIREFIGHTERS VISITED GREEN Bank's kindergarten last week, showing the students their gear and equipment.

Shavers Fork Fire & Rescue talks about fire safety with local school kids

Firefighters from Shavers Fork Fire Rescue traveled October 8 to local schools to perform a Fire Safety Presentation for Fire Safety Week (October 5-11). The Firefighters went to Green Bank Elementary Kindergarten classes in the morning and Marlinton Elementary Kindergarten in the afternoon. The firefighters explained to the children about what to do if they saw someone playing with matches or fire and Stop, Drop and Roll exercises. Some other topics included Get Low and Go, and When You're Out, Stay Out.

With the presentations lasting roughly one-half hour each, the firefighters' main objective was to teach the children not to be afraid of firefighters in their gear coming to help them. A lot of problems occur when children get scared and hide from firefighters coming to their aid.

At the end of the presentation the children were promoted to Jr. Firefighters and given firefighter helmets, badges and coloring books to take home.

Firefighters who attended were: Lt. Jason Hall, Capt. Shannon Boehmer, Firefighter Bobby Poage, and Firefighter Brian McClure.

Nursing Home

The review process for a Certificate of need for a 60 bed nursing home in Pocahontas County began this week with a regional meeting at Summersville January 4 and a project Review Committee meeting at Charleston January 6. Both of these meetings were conducted by West Virginia Health Systems Agency. A meeting by West Virginia HSA Board of Directors will be held January 12 at Charleston.

The West Virginia Health Systems Agency has calculated a need for 58 long term beds in area 4 E which is Pocahontas County. Denmar has already been figured into the need so these 58 beds are in addition to the beds at Denmar. (Denmar and other long term care facilities serve areas which extend far beyond the nursing home service in which they are located.)

The proposed 60 bed

Minnehaha Springs Extension Homemakers Lighting Contest

Winners of the Minnehaha Extension Homemakers Christmas lighting Contest were:

1st Prize to Home of Pete McCarty.

2nd Prize to Home of Corky Kelley.

3rd Prize to home of Don Groess.

Congratulations to all.

Lighting Contest Winners

Once again members of the Marlinton Lions Club searched the Town of Marlinton and surrounding areas for the best Christmas lighting of the season. On Wednesday, December 23, Keith Moore, Jimmy Smith and David Arrington made their rounds and the following often highly subjective choices:

Best Overall Lights: (tie) Nancy Curry and Bertha Galford.

This is supposed to be the last of the series under the title of the Huntersville road. It has been said that I got stalled on that road and have not been able to get off of it since. There are at least two reasons for hash. The first is that it is a popular dish especially with the aged and the other is that there is nothing else in the house to set before the family. A large turkey in a small family finally appears in hash, and if I have to eat turkey I prefer it in hash, for many cookings disguise the reptilian nature of the dish. And if it should hereafter appear that something else is offered on this subject it will be because the goods expected did not come.

I have a little book that I hope to publish sometime about birds. In it I have devoted the space to evidences of intelligence in birds, a phase of the subject which has been wonderfully neglected. I have a indefinite feeling that birds are the wisest of all animals and the most accomplished. They have even learned to speak human language and that is something that no other animal has ever done with the single exception of the donkey that Balaam heard. The bird is the oldest land animal. At first four footed like the most of the reptiles they developed their front feet into wings and were soon able to escape their enemies in the air. Nothing else in the way of land animals has been able to do this. They have many fine traits and they are much loved and cherished by men. I sometimes

Durbin mayor says town is "calm"

by Jason Bauserman
Contributing Writer

The town of Durbin has calmed down, according to Mayor Donald Jennings.

Jennings said noise on Main Street and four-wheeler use have decreased.

Business owner Frank Proud agreed that Main Street has been a lot quieter. Jennings said the sheriff's department has made frequent appearances in Durbin and he feels its presence has helped.

Proud, a certified accountant, announced the Durbin sewer debt stands at $113,000. He figured the town still has 11 years to pay off the debt.

The house numbering system will be implemented by an outside contractor. A meeting in Flatwoods next month should answer any questions, according to councilmember John Riffe.

Council gave its approval for Riffe to do some digging by hand in the alley behind his house to alleviate storm runoff onto neighboring property.

Riffe also said fire hydrants need to be tested to make sure they work.

Councilmember Nancy Benetato asked council to repair any damaged Christmas decorations. She also was concerned about runoff across the parking lot at the health clinic.

Jennings announced that he had printed the town coupon books himself, saving the town $400 in costs.

The mayor was given permission by council to give town is pastor of that church.

John West asked why he had to pay two town bills for his business and residence. Council decided that he would be credited for three months of payments since his business was not open yet.

Treasurer/Recorder Sandy Varner said some late town bills have been paid, while others remain outstanding.

Appeals rejected by State Supreme Court

The State Supreme Court has rejected appeals from both sides in the lawsuit filed by Norman Alderman against Dr. James Phares, Kenneth Vance, Kermit Friel, and Ruth Taylor. In his suit, filed last year, Mr. Alderman sought to have Dr. Phares removed as superintendent of schools and the other three as members of the Board of Education.

The suit alleged Dr. Phares was not a resident of the county, as required for school superintendents and the board members held other "public offices," in violation of code.

In a ruling on March 12, the three-judge panel appointed by the state Supreme Court refused to remove Dr. Phares and Ms. Taylor, but did agree that Mr. Friel and Mr. Vance did hold other public offices. These two were removed from the Board. However, they retained from the

helped.

Proud, a certified accountant, announced the Durbin sewer debt stands at $113,000. He figured the town still has 11 years to pay off the debt.

The house numbering system will be implemented by an outside contractor. A meeting in Flatwoods next month should answer any questions, according to councilmember John Riffe.

Council gave its approval for Riffe to do some digging by hand in the alley behind his house to alleviate storm runoff onto neighboring property.

Riffe also said fire hydrants need to be tested to make sure they work.

Councilmember Nancy Benetato asked council to repair any damaged Christmas decorations. She also was concerned about runoff across the parking lot at the health clinic.

Jennings announced that he had printed the town coupon books himself, saving the town $400 in costs.

The mayor was given permission by council to give town employee Roger Mick more hours to clean the garage and some other spots in town.

Riffe asked the council to distribute around town the five wooden benches Durbin Church of the Brethren donated to the town. Several people wanted to give the town a donation for a bench.

No decision was made. Riffe

Appeals rejected by State Supreme Court

The State Supreme Court has rejected appeals from both sides in the lawsuit filed by Norman Alderman against Dr. James Phares, Kenneth Vance, Kermit Friel, and Ruth Taylor. In his suit, filed last year, Mr. Alderman sought to have Dr. Phares removed as superintendent of schools and the other three as members of the Board of Education.

The suit alleged Dr. Phares was not a resident of the county, as required for school superintendents and the board members held other "public offices," in violation of code.

In a ruling on March 12, the three-judge panel appointed by the state Supreme Court refused to remove Dr. Phares and Ms. Taylor, but did agree that Mr. Friel and Mr. Vance did hold other public offices. These two were removed from the Board. However, they resigned from the positions in question and were re-appointed to the Board of Education.

In April Mr. Alderman and co-plaintiff Jerome Heinemann filed a petition appealing the panel's decision, as did Mr. Friel and Mr. Vance.

In a ruling on September 25 the Supreme Court refused to both petitions of appeal.

day:

Letter

To All Who Worked on HISTORY OF POCAHONTAS, 1981:

I am writing to congratulate you ALL on the History. The plan itself, the binding-printing, the writing, proof reading, the coverage, the many pictures, the general tone and "heart" of the book are truly impressive. That you were able to complete this massive project in less than two years is, of itself, a tribute to your industry, devotion, efficiency, and, also, to your physical endurance!

This book is a precious gift to the past, the present, and the future. As so many thousands have thanked Dr. William T. Price (and many others) for recording and preserving the old heritage, so will the unborn generations thank you for this new and enduring gift.

I have only one criticism of the History: since it was delivered to me, I have not been able to get any work done. I don't write, I don't cook, I don't clean. I sit around all day and half the night reading the History of Pocahontas County, 1981, and thinking what a fine, upstanding "bunch" of people the old County has produced from the native "lime-earth" or welcomed from a-far.

"Good Job" — "Happy New Year."

Lowest maximum temperature (48 degrees) on record here going back to the year 1939.

Greatest 24 hour snowfall was on December 8, 1981, 4.6 inches.

A HAPPY NEW YEAR TO EVERYONE.

J. P. Schaffner

One of the most remarkable incidents of intelligence and devotion to their human cousins is the tradition about the Cackley pigeons. Something over a hundred years ago a citizen named William Cackley, a son of the pioneer Valentine Cackley, lived on the farm now owned and operated by Fred W. Ruckman, at Marvin Chapel, on the Seneca Trail eight miles below Marlinton at the Stephen Sewell run. His wife was Jennie Gay, a daughter of Robert Gay, who lived just above Marlinton on the river, William Cackley kept a store at that place. He decided to move to Huntersville. This must have been just about the time that Huntersville had begun to boom by reason of being the county seat of the new county of Pocahontas. He did not go into the town but settled on Cummings Creek in sight of the court house. At Marvin Mrs. Cackley had a flock of pigeons. When they came to move she decided that it was not worth while to move the pigeons. They were hard to catch and of no intrinsic value. And they

Tax increment financing for development topic at County Commission meeting

Creating a Tax Increment Financing District, a method of providing funds for development projects, was discussed at length at Tuesday's meeting of the County Commission.

Snowshoe Mountain, Inc., is asking the Commission to create the Snowshoe Development District (the Snowshoe TIF District).

Meeting with the Commission to discuss the proposal were J. D. Morgan, of Snowshoe, and attorney Brian Helmick, with the Jackson, Kelly law firm.

Mr. Helmick said that the creation of TIF districts by county commissions and certain municipalities was authorized by the voters at the general election last year with the approval of a constitutional amendment. The purpose of the amendment is to provide funds that can be used to pay-off revenue bonds or other obligations issued to finance all or part of an economic development project.

The amendment allows the increased property tax increment created by an single development project or coming from the increase in value on all property within a development area to be used to pay off the bonds used to finance a project.

The boundaries for the proposed Snowshoe TIF District will take in all the properties owned by Snowshoe Mountain, Inc., and other parties within the area commonly known as Snowshoe Mountain Resort and Silver Creek Resort, on the mountain and in Hawthorne Valley. A few properties within the boundary, owned by non-resort related parties, are excluded from TIF district. Mr. Morgan had a map showing the boundaries of the proposed district.

Mr. Morgan said the "Base Assessed Value" for the Snowshoe TIF District will be assessed value of the real and personal property within the district as of July 1, 2002. (The value for the base year.)

ing a TIF district is a public hearing. If it is decided to go ahead with the plan, it is then submitted to the state Development Office, which approves or denies the district. If approved by the state, the proposal comes back to the commission for final approval.

After a TIF district is created, projects that use this method of financing must also be approved by the commission, Mr. Helmick stated, as the bonds are issued by the county. A public hearing is also part of the project approval process.

Mr. Helmick stressed that TIF districts are a creation of the county commission and can be eliminated at any time by the commission, if there are not bonds outstanding.

All three commissioners expressed reservations about the TIF concept. Commission President Joel Callison noted that Snowshoe is the county's main tax base, "our golden goose." He said the Commission depends upon the increasing tax revenue from the resort to meet the expenses that go up each year.

Commissioner James Carpenter and Reta Griffith stated similar concerns about freezing the tax revenue from the resort area at this year's level.

Ms. Griffith also expressed concern about extra work for court house staff due to paperwork from the TIF program.

Mr. Helmick noted that the Commission makes the decision how much of the TIF funds go for development projects and how much to put in the county budget.

Mr. Helmick and Mr. Morgan asked the Commission to hold the public hearing to give Snowshoe the opportunity to explain the the concept, answer questions, show what can be done with TIF money.

They both said the resort had a project to bring to the Commission if the TIF district is created.

Mr. Morgan gave examples of projects in the Snowshoe TIF District and increase employment.

The bonds issued for repayment under TIF are not general obligation or moral obligation bonds, Mr. Helmick said. The bond holders have liens only on the TIF fund and there is no other financial obligation for the Commission.

Any project that has TIF money as part of the financing package requires competitive bidding and the payment of prevailing wages, Mr. Helmick said in response to questions.

Mr. Helmick ended the discussion by again stressing that the Commission has to give approval for any projects funded by bonds under the TIF program and can eliminate the district at any time. He said all that is being requested at this meeting is to hold the public hearing.

The Commission agreed to hold a public hearing on the proposed Snowshoe TIF District and set it for Wednesday, November 19, at 6 p.m. in the court room.

In other matters the Commission:

* approved a $1000 contribution to the Mountain Resource and Development Council

* rejected a request from Charles Shomo for a partial refund of taxes on property he owns in Durbin

* decided to retain the sponsorship of a Historic Transportation Enhancement Grant that is being sought for restoration work on the Huntersville Presbyterian Church

* discussed law enforcement needs in upper Pocahontas County with Durbin Mayor Don Jennings

* heard a report from David and Susan Bennet on their Mountain Quest Institute

* discussed ways to reduce the cost of insurance with Wally Schwartz from the state Board of Risk and Insurance Management.

More detailed report on these items in next week's paper.

Durbin mayor says town is "calm"

by Jason Bauserman
Contributing Writer

The town of Durbin has calmed down, according to Mayor Donald Jennings.

Jennings said noise on Main Street and four-wheeler use have decreased.

Business owner Frank Proud agreed that Main Street has been a lot quieter. Jennings said the sheriff's department has made frequent appearances in Durbin and he feels its presence has helped.

Proud, a certified accountant, announced the Durbin sewer debt stands at $113,000. He figured the town still has 11 years to pay off the debt.

The house numbering system will be implemented by an outside contractor. A meeting to

Council gave its approval for Riffe to do some digging by hand in the alley behind his house to alleviate storm runoff onto neighboring property.

Riffe also said fire hydrants need to be tested to make sure they work.

is pastor of that church.

John West asked why he had to pay two town bills for his business and residence. Council decided that he would be credited for three months of payments since his business was not open yet.

Treasurer/Recorder Sandy Varner said some late town bills have been paid, while others remain outstanding.

Appeals rejected by State Supreme Court

The suit alleged Dr. Plumis was not a resident of the county as required for school superin-

One of the most remarkable incidents of intelligence and devotion to their human cousins is the tradition about the Cackley pigeons. Something over a hundred years ago a citizen named William Cackley, a son of the pioneer Valentine Cackley, lived on the farm now owned and operated by Fred W. Ruckman, at Marvin Chapel, on the Seneca Trail eight miles below Marlinton at the Stephen Sewell run. His wife was Jennie Gay, a daughter of Robert Gay, who lived just above Marlinton on the river, William Cackley kept a store at that place. He decided to move to Huntersville. This must have been just about the time that Huntersville had begun to boom by reason of being the county seat of the new county of Pocahontas. He did not go into the town but settled on Cummings Creek in sight of the court house. At Marvin Mrs. Cackley had a flock of pigeons. When they came to move she decided that it was not worth while to move the pigeons. They were hard to catch and of no intrinsic value. And they

ations was authorized by the voters at the general election last year with the approval of a constitutional amendment. The purpose of the amendment is to provide funds that can be used to pay-off revenue bonds or other obligations issued to finance all or part of an economic development project.

The amendment allows the increased property tax income created by an single development project or coming from the increase in value on all property within a development area to be used to pay off the bonds used to finance a project.

The boundaries for the proposed Snowshoe TIF District will take in all the properties owned by Snowshoe Mountain, Inc., and other parties within the area commonly known as Snowshoe Mountain Resort and Silver Creek Resort, on the mountain and in Hawthorne Valley. A few properties within the boundary, owned by non-resort related parties, are excluded from TIF district. Mr. Morgan had a map showing the boundaries of the proposed district.

Mr. Morgan said the "Base Assessed Value" for the Snowshoe TIF District will be assessed value of the real and personal property within the district as of July 1, 2002. (The values for the present tax year.)

Mr. Helmick explained the [illegible] the increase in value of the properties in the TIF district above the base value will go into the Snowshoe TIF Fund. He said the money in the fund can be used for the payment of the principal and interest on any bonds issued for development projects in the Snowshoe TIF District; held in reserve funds established by the issuance of bonds; used for expenses in servicing bonds; or used for various project costs.

Any funds not used for the above purposes can be used for "pay as you go" projects in the TIF district; retained for future projects; and for go to the regular county budget.

The law provides that boards of education will not lose money if a TIF district is created with additional funds from the state school aide formula, Mr. Helmick said.

He said the first step is creation of the district by the commission, if there are not bonds outstanding.

All three commissioners expressed reservations about the TIF concept. Commission President Joel Callison noted that Snowshoe is the county's main tax base, "our golden goose." He said the Commission depends upon the increasing tax revenue from the resort to meet the expenses that go up each year.

Commissioner James Carpenter and Reta Griffith stated similar concerns about freezing the tax revenue from the resort area at this year's level.

Ms. Griffith also expressed concern about extra work for court house staff due to paperwork from the TIF program.

Mr. Helmick noted that the Commission makes the decision how much of the TIF funds go for development projects and how much to put in the county budget.

Mr. Helmick and Mr. Morgan asked the Commission to hold the public hearing to give Snowshoe the opportunity to explain the the concept, answer questions, show what can be done with TIF money.

They both said the resort had a project to bring to the Commission if the TIF district is created.

Mr. Morgan gave examples of [illegible] development, from 0.3 per new lodging unit to 10 for 1000 sq. ft. of new food and beverage space.

At this time over 600 people are employed full-time at the resort (489 directly by Snowshoe) with over 1700 at the winter peak (1348 by Snowshoe), according to the application for the TIF district. Wages and benefits for the resort employees came to $18.9 million for 200-03.

Mr. Helmick said TIF comes to play with projects that need only a small amount of additional funding to complete the financing package. He said Snowshoe is at this point with a project they want to do.

If a project can be fully funded without TIF, then it does not qualify for the program, Mr. Helmick stated.

To be eligible for TIF, a project must discourage the loss of commerce or employment with-

Durbin mayor says town is "calm"

by Jason Bauserman
Contributing Writer

The town of Durbin has calmed down, according to Mayor Donald Jennings.

Jennings said noise on Main Street and four-wheeler use have decreased.

Business owner Frank Proud agreed that Main Street has been a lot quieter. Jennings said the sheriff's department has made frequent appearances in Durbin and he feels its presence has helped.

Proud, a certified accountant, announced the Durbin sewer debt stands at $113,000. He figured the town still has 11 years to pay off the debt.

The house numbering system will be implemented by an outside contractor. A meeting in Hazwoods next month should answer any questions, according to commissioner John Riffe.

Council gave its approval for Riffe to do some digging by hand in the alley behind his house to alleviate storm runoff onto neighboring property.

Riffe also said fire hydrants need to be tested to make sure they work.

Councilmember Nancy Benetato asked council to repair any damaged Christmas decorations. She also was concerned about runoff across the parking lot at the health clinic.

Jennings announced that he had printed the town coupon books himself, saving the town $400 in costs.

The mayor was given permission by council to give town employee Roger Mick more hours to clean the garage and some other spots in town.

Riffe asked the council to distribute around town the five wooden benches Durbin Church of the Brethren donated to the town. Several people wanted to give the town a donation for a bench.

No decision was made. Riffe is pastor of that church.

John Wise asked why he had to pay two town bills for his business and residence. Council decided that he would be credited for three months of payments since his business was not open yet.

Treasurer/Recorder Sandy Varner said some late town bills have been paid, while others remain outstanding.

* heard a report from David and Susan Bennet on their Mountain Quest Institute.

* discussed ways to reduce the cost of insurance with Wally Schwartz from the state Board of Risk and Insurance Management.

More detailed report on these items in next week's paper.

Appeals rejected by State Supreme Court

The State Supreme Court has rejected appeals from both sides in the lawsuit filed by Norman Alderman against Dr. James Phares, Kenneth Vance, Kerpan Friel and Ruth Taylor. In [illegible] removed as superintendent of schools and the other three as members of the Board of Education.

The suit alleged Dr. Phares was not a resident of the county, as required for school superintendents and the board members held other "public offices," in violation of code.

In a ruling on March 12, the three-judge panel appointed by the state Supreme Court refused to remove Dr. Phares and Ms. Taylor, but did agree that Mr. Friel and Mr. Vance did hold other public offices. These two were removed from the Board. However, they resigned from the positions in question and were re-appointed to the Board of Education.

In April Mr. Alderman and co-plaintiff Jerome Heinemann filed a petition appealing the panel's decision, as did Mr. Friel and Mr. Vance.

In a ruling on September 23 the Supreme Court refused to both petitions of appeal.

THURSDAY, OCTOBER 9, 2003

September Weather

By Jason Bauterman

It was uncanny how two tropical storms in September produced nearly the same results as last September. Precipitation was plentiful and temperatures were slightly cooler than normal.

Last year Hanna dropped .53" on the 15th. This year Henri had .45" on the 13th. Last year Isadore produced 2.48" around the 27th. This September Isabel blew 2.47" off the Atlantic Ocean around the 19th.

Precipitation for the month totalled 8.24". That was 4.93" above normal and the most for any September in my 12 years of record-keeping.

Precipitation for 2003 is 45.01" and that is the average amount for a full year.

The average high temperature was 68.3° and the average low temperature was 48.3°. The mean at 58.3° was 0.8° below normal.

The lowest temperature was 35° on the last day of the month. The highest temperature was 76° on the first day of the month. Last year September had 8 days in the eighties.

This summer there were only 20 days in the eighties. Last year there were 50 days in the eighties.

In my opinion leaves have never been as green this late in the season. Unfortunately, fall foliage will probably be very dull this fall.

Weather

Frost came Thursday, October 2, at Frost, with a temperature of 26 degrees. Friday morning there was a heavy killing frost at Marlinton at 20 degrees, with 10 degrees reported at Woodrow.

Williams River Road Construction Continues, Portions Remain Closed

Apparent suicide at National Alliance under investigation

The Pocahontas County Sheriff's Department is investigating the apparent suicide of a National Alliance member Sunday.

According to a media release, police were called to the National Alliance compound near Mill Point where Kenneth Edward Springer, Jr., had suffered what appeared to be a self-inflicted gunshot wound to the head.

Springer was still alive when police arrived, the release said.

He was transported to Pocahontas Memorial Hospital and later to Greenbrier Valley Medical Center in Fairlea. He was later flown to a Charleston-area hospital where he was pronounced dead at 8:45 a.m.

His body was sent to the chief medical examiner for autopsy, according to the release.

The National Alliance is the country's largest white supremacist group and was founded by the late Dr. William Pierce, a physics professor. Pierce died last year and was replaced by a former boxer, Erich Gliebe.

Pierce, under the pseudonym Andrew MacDonald, was the author of The Turner Diaries, a novel said to be the blueprint for a race war in America.

It became a high profile publication after implications Timothy McVeigh, the man executed for the April 1995 bombing of the Alfred P. Murrah Federal Building in Oklahoma City, had used a passage in the book to plan the attack.

The Marlinton Detachment of the West Virginia State Police is also involved in the investigation.

Bartow Civil War trenches to be

...Snowshoe Development District (the "Snowshoe TIF District).

Meeting with the Commission to discuss the proposal were J. D. Morgan, of Snowshoe, and attorney Brian Helmick, with the Jackson, Kelly law firm.

Mr. Helmick said that the creation of TIF districts by county commissions and certain municipalities was authorized by the voters at the general election last year with the approval of a constitutional amendment. The purpose of the amendment is to provide funds that can be used to pay-off revenue bonds or other obligations issued to finance all or part of an economic development project.

The amendment allows the increased property tax income created by an single development project or coming from the increase in value on all property within a development area to be used to pay off the bonds used to finance a project.

The boundaries for the proposed Snowshoe TIF District will take in all the properties owned by Snowshoe Mountain, Inc., and other parties within the area commonly known as Snowshoe Mountain Resort and Silver Creek Resort, on the mountain and in Hawthorne Valley. A few properties within the boundary, owned by non-resort related parties, are excluded from TIF district. Mr. Morgan had a map showing the boundaries of the proposed district.

Mr. Morgan said the "Base Assessed Value" for the Snowshoe TIF District will be assessed value of the real and personal property within the district as of July 1, 2002. (The values for the present tax year.)

(Mr. Helmick explained that the tax revenue that comes ... the increase in value of ... properties in the TIF district above the base value will go into the Snowshoe TIF Fund. He said the money in the fund can be used for the payment of the principal and interest on any bonds issued for development projects in the Snowshoe TIF District; held in reserve funds established by the issuance of bonds; used for expenses in servicing bonds; or used for various project costs.

York City trying to make a living as a salesman. His nex job was in the iron works at Homestead, at a dollar and a half a day.

From there he came to West Virginia and got a job as a section hand on the Baltimore and Ohio railway, and the engineer in charge of his part of the railroad was L F. Loree, the the great railway magnate of the present time.

From there Geddes seems to have landed somewhere over in the central part of the State, possibly on the West Virginia Pittsburgh which was being built into the Gauley country in 1890. The account says the station was called Nicolette but I can not figure out whether this was the place that he worked first in West Virginia or where he got in charge of the station. And I cannot locate Nicolette in West Virginia. At the last station he worked on he had a chance to study train dispatching and telegraphy under a young woman operator and when she married and resigned her job Geddes was put in charge of the station This is where he lived in an abandoned freight car. Later he left the railroad and worked in the woods. Probably on the waters of Gauley River. Later still he

York City trying to make a living as a salesman. His nex job was in the iron works at Homestead, at a dollar and a half a day.

From there he came to West Virginia and got a job as a section hand on the Baltimore and Ohio railway, and the engineer in charge of his part of the railroad was L F. Loree, the the great railway magnate of the present time.

From there Geddes seems to have landed somewhere over in the central part of the State, possibly on the West Virginia Pittsburgh which was being built into the Gauley country in 1890. The account says the station was called Nicolette but I can not figure out whether this was the place that he worked first in West Virginia or where he got in charge of the station. And I cannot locate Nicolette in West Virginia. At the last station he worked on he had a chance to study train dispatching and telegraphy under a young woman operator and when she married and resigned her job Geddes was put in charge of the station This is where he lived in an abandoned freight car. Later he left the railroad and worked in the woods. Probably on the waters of Gauley River. Later still he

THE PCHS GOLF Team: Seth Nelson, Wes Landis, Dustin Cutlip, Jonathan Wilson, Abby Dilley, front. Kelly Blechl, Derek Jonese and Justin Madron, rear.

Cutlip makes All-State Golf Team

PCHS Golf Team Region is IV Champions, advances to States

No team yet this year has experienced the success that the golf team had this week.

Dustin Cutlip placed fifth at the state golf championships Tuesday, the first PCHS golfer to be named to the All-State Team.

His overall score for the two-day event was 154.

The team placed seventh.

Since their first place win on September 19 at Canaan Valley the golf team has been virtually unstoppable.

They continued their success with a respectable second place victory during the PVC tournament at Moorefield during which two of the members, Cutlip and Justin Madron, were named to the All Conference Team.

Monday, however, was the golf team's time to shine as they traveled to Lewisburg Elks Club to face off against Tygarts Valley and Greenbrier West in their regional tournament.

The Warriors played an incredible game as they took first place with a team total of 407 and advanced to the state tournament which was held at the Speidal Golf Club, Jones Course at Oglebay Park in Wheeling.

Dustin Cutlip was the match's lowest scorer with a 74.

Congratulations Golf Team!

The Warrior Soccer team hosted Shady Spring in an exciting match Tuesday, September 30.

Pocahontas showed no mercy as they defeated Shady Spring 6-2. Contributing to the Warrior win were scorers Jonathan Burns with one, Markus Hiner-Warriors. The game was extremely competitive as the Oak Hill scored the first goal.

Pocahontas chased after the win, but was unable to garner the win as the game was called short due to the darkness on the unlighted field. The final score was 1-0.

The Lady Warrior Soccer team had a victorious week winning their match Tuesday against Midland Trail.

The ladies pulled together to play a much stronger game compared to the last time they faced off against Midland Trail which resulted in a 1-1 tie.

It was Pocahontas' turn as the match ended in the Lady Warriors' favor with a 3-0 win. Danielle Holstine, Heidi Beverage, and Michelle Holstine all notched goals for the Warriors.

Contributing assists were Kayla Jordan and Rachel Wayne with two. Because of their success in the match, Pocahontas will host sectionals.

The Volleyball team confronted a demanding sequence of competitors last week. On Tuesday they hosted Petersburg.

The Junior Varsity took to the court first and encountered a shaky start, losing game one 20-15. The ladies soon got their footing as they took Petersburg in both game two (20-4) and game three (20-15) to win the match.

The Varsity had much bigger competition. Petersburg and Pocahontas faced off in an intense and suspenseful match. In game one the Warriors dominated to take the 25-17 win.

The tides turned as Petersburg

Riddle-:-Matheny

Mrs. Ellouise Curry Matheny and Mr. Thomas Lee Matheny would like to announce the marriage of *their daughter, Pamela Sue to Lt. Michael Owen Riddle, on October 17, 1981.*

The bride carried a fresh bouquet of pink roses with baby's breath and a cascade of stephanotis. Pam also carried a blue lace handkerchief that belonged to her grandmother, Virgie Curry.

The maids of honor were Pamela Dunbar and Jackie Riddle. The bridesmaids were Pamela Pursely, Deborah Riddle, Pamela Bowen, and Renee Riddle. The maids all wore gowns made of ruby chiffon and wore baby's breath in their hair. Also, they carried fresh nosegays of pink carnations, red roses and white mums.

The flower girl was four year old Lindsay Windham. She wore a gown of white chiffon and wore baby's breath in her hair. Also, she carried a flower basket full of pink, red and white carnations and roses.

The groom wore black tails with boutonniere of a single pink rose enhanced with white stephanotis, matching the bride's bouquet.

The best man was Rupert Rentz. The groomsmen were: David McBee, Michael Matheny, Kenneth Baker, Frederick Golod and Charles Crapps. All the groomsmen and the father of the bride wore black tails with gloves and a red rose boutonniere, also accented with baby's breath.

The mother of the bride wore a pleated gown of primrose and wore a wrist corsage of white sweetheart roses.

The father of the groom wore his dress military tails.

The groom's grandparents also came to the wedding. Mike is the grandson of Mr. and Mrs. George H. Riddle, of Kansas City, Missouri and the son of Col. and Mr. Wm D. Spearman.

The bride is the granddaughter of Mrs. Harry Curry, of Durbin, Mrs. Josephine Matheny, of Brooklyn, New York and Mr. and Mrs. Ralph Matheny of Green Bank.

Visiting their grandparents, Mr. and Mrs. Harry J. Whiting at their home on Jericho Road during the Christmas holidays were

where the road is to be and where the bridges are to be made, and the construction garg follows and evens up and builds long cribs for the bridges and the railroad follows. On this heavy engines and trains are used for years.

When the necessity arose for quick transportation of men and munitions on the continent of Europe, the department got tangled up. Kitchener remembered Geddes and the woods road of India. He sent for him to get some lines built to relieve the congestion. Red Tape was offended and Geddes was not allowed to build his emergency lines.

But when Lloyd George came in they put Geddes in full charge and he built hundreds of miles of light railways and imported railroad builders from North America for the purpose. In a short time he became one of the great men of the world. When he could not get rails and rolling stock fast enough he would tear it up in England and lay it down in France. West Virginia people often discussed Geddes but they were somewhat puzzled just were to place him in their recollection.

A few words about the expedition

Letters to the Editor

Dear Editor:

I am writing to clear up a misconception reported in the Board of Education meeting minutes last week.

Although my letter did sound like I expected the Board to pay for my insurance, I stated at the meeting that was not my intent. I told them that I wanted only to be allowed to stay on their insurance and that I would pay for it myself.

I did not expect them to put any money into my leave, only to allow my insurance coverage to stay intact and my job to be there upon my return. I thought that was not too much to ask after 30 years.

What I find most upsetting is that had I not been completely truthful and only asked for time to work on my doctorate, I probably would have been granted the leave.

By being truthful, I was denied the leave.

Sue Hollandsworth
Former Principal
Hillsboro School

Dear Editor:

I keep reading about Norman Alderman's disrespectful, arrogant and intimidating actions toward Board of Education members.

These people have been voted into office by many of us because of their capabilities for doing a good job and they are also very good people. Maybe they did not know the law that Mr. Alderman has been digging up.

Mr. Alderman is trying to look good. Why he has not been fired is beyond me! His behavior last year at one of the BOE meetings was a disgrace. His actions were the actions of a two-year-old who does not get his way.

This year, Mr. Alderman started out by saying he would be filing a new suit to remove various members from the board. Who gave him this authority? He wants Mr. VanReenen to resign because he never felt that Mr. VanReenen was a member of the board.

Mr. Alderman, my vote put him in office and you're not taking him out.

Mr. VanReenen did what was required of him. He sought advice from the State School Superintendent, Dr. David Stewart. Dr. Stewart found no reason why a member of SCD could not run for a seat on the BOE, so Mr. VanReenen remained in the race and was elected. After the last legislature gave the State Ethics Commission the authority to rule on such situations, Mr. VanReenen resigned from the SCD board.

Mr. Alderman's next targets were Mr. Vance and Mr. Friel, who had resigned from the public offices that they held and were reappointed to their seats on the BOE. Mr. Alderman wants to seek contempt of court charges against them. Who made him a lawyer and a judge?

Mr. Alderman went on to say that should an effort be made to dismiss him from his position in the board office, he would use all his rights under the Whistle Blower's Protection Law.

My advice to Mr. Norman

May 28th. 1865, the war well over. the Ohio regiment was at Clarksburg The headquarters of the West Virginia Department at Cumberland, Maryland, heard that Ex Governor William Smith, [Extra Billy) was in retirement at Marlins Bottom, and for some reason the military authoritses wanted him apprehended and brought before them. So orders were issued to Owens to make an expedition through this part of the country for general purposes and to get Extra Billy if they could.

Owens left Clarksburg, June 1, 1865, with a column of 400 men on horseback. They rode through Philippi, Beverly, and Huntersville. At Beverly the search for government property began. Especially for concealed arms for they did not want the mountains to break out again.

At that time there were a lot of horses belonging to the United States on the farms. These were mostly horses that had been traded by the troopers for better ones. A horse

attacks against Greenbrier West with 24 that could not be returned. They also served a credible 93%.

Letters from page 3

Alderman is to blow your whistle until your eyes pop out.

I would fire you in a heartbeat.

No one should be voted into office and then be intimidated, harassed and threatened by board of education personnel.

The school system needs people on the board who can work together for the safety and betterment of all the schools. I believe these board members will do that.

Mr. Alderman's actions are unbecoming of a school employee and he is a bad influence for the children.

Maybe, with luck, Mr. Alderman will be fired and not be hired again.

Sincerely,
Christine Flynn

each year re
West Virgi

I have given the last appearance t at least two other commands in the last year of the war, and then dug up another and yet another from the records of the War of the Rebellion as it is officially named

May 28th. 1865, the war well over. the Ohio regiment was at Clarksburg The headquarters of the West Virginia Department at Cumberland, Maryland, heard that Ex Governor William Smith, [Extra Billy) was in retirement at Marlins Bottom, and for some reason the military authoritses wanted him apprehended and brought before them. So orders were issued to Owens to make an expedition through this part of the country for general purposes and to get Extra Billy if they could.

Owens left Clarksburg, June 1, 1865, with a column of 400 men on horseback. They rode through Philippi, Beverly, and Huntersville. At Beverly the search for government property began. Especially for concealed arms for they did not want the mountains to break out again.

At that time there were a lot of horses belonging to the United States on the farms. These were mostly horses that had been traded by the troopers for better ones. A horse

with her parents, Marie and Tom Walton, of Hillsboro, is the first baby born in the Pocahontas Memorial Hospital in 1982. She was born at 11:44 p. m., on January 7, weighing six pounds, and seven ounces. Heather was delivered by Dr. Pedro Gonzalez.

Grandparents are Dewey and Eric Farley, of Renick, and Barbara Walton, of Hillsboro.

Gas Test Wells

An inter-agency group met last Thursday with officials of the Union Drilling Company, of Buckhannon, to look at three proposed sites for a test gas well on Forest Service land on Cheat Mountain in Randolph County. Involved were personnel from the Forest Service, Department of Natural Resources, Mower Lumber Company, Department of Mines, U. S. Fish and Wildlife Service, and a representative of the West Virginia Highlands Conservancy. Forest Service people were from the Bartow ranger station and the Elkins office.

The drilling proposal submitted by Union to the Forest Service calls for two wells. One will be at an old mine site on the Gaudineer Knob road and thus present no new environment problems as the site has already been disturbed. The second well will be on the west side of Shavers Fork. The site for the well preferred by the company is near the mouth of Red Run. The second site is on the mountain above the Shavers Fork, not far from Stonecoal Run, and

Income Tax

Another income tax filing season is here and tax packages have been mailed to West Virginians who filed a federal tax return last year. With arrival of the tax packages comes questions on how to fill out the forms. IRS District Director Richard C. Herman advises, "Take time to read over the instructions early; the answers to most common questions can easily be found this way." He also noted there are several important changes in the law this year.

The tax reduction enacted last year has been figured into one new tax table, replacing the multible tables in the past. This table is used by all taxpayers with taxable income of less than $50,000. "While the new table is easier," Herman noted "it is different and care should be taken to avoid a mistake that might slow down the processing of the return."

Another major change will allow more taxpayers to use the short Form 1040A. A space on the back of Form 1040A is provided for reporting interest and divi-

can find out.

So Owens decided to give up the pursuit of Smith. He reported that affairs in Pocahontas county were in good shape. There was no horse stealing going on. The citizens were well disposed and quiet. Returning rebels immediately went to work and conducted themselves with propriety

He was eminently right in that statement. In my grandfather's family there were five surviving sons who had been involved in the War of the Rebellion and they had more than enough and were apprehensive of imprisonment and prosecution. They were peaceful and not attracting any more attention than they could.

Owens found and took the following government property: Thirteen horses, one mule, seven saddles and bridles, and eleven rifles.

He was very bitter about one thing however. A day ahead of him rode a company of West Virginia State troops under a Captain Allen, who was also searching for government

IN ITS FIRST year, Tradition Day had lots for visitors to see. Top row: Fried bread on the stove (Dreama Moore); gourd carving (Julie MacQueen); chainsaw carving (Billy Boggs); quilting (Linda Adams, Sherri Taylor Dean, Elaine Krueger. 2nd row: Cider press (Jim McComb); birdhouses (Jason Alderman; wood carving (Kenneth Ervine). 3rd row: Handmade furniture (Sharon Simmons) Confederate Camp - members of the 36th Va. Volunteer Infantry, Co. A. (Terry Hackney, Duane Hamlin, Mike Sheets); Huntersville Presbyterian Church, circa 1854; more fried bread. Bottom row: Huntersville Jail; blacksmith shop (Luke Ryder); wool spinning (Jo Ann Gardner). Many folks turned out to view the sites and demonstrations and enjoy the food, despite the less-than-perfect weather.

well preferred by the company is near the mouth of Red Run. The second site is on the mountain above the Shavers Fork, not far from Stonecoal Run, and the third on the River north of Stonecoal Run. All are on existing Forest Service roads.

The company is planning to drill to between 3500 and 4600 feet and hopes to start by the end of the month. The time taken to drill the well should be 90 to 100 days. By using what is known as a cable tool or spudding type of drilling rig, only about a 1/4 acre will have to be disturbed. They are planning to drill to the Benson Sand.

The mineral rights involved are owned by the Mower Lumber Company. Union has leased 43,000 acres of mineral rights from Mower. Union has already completed one well on Mower land north of Rt. 250. This was a deeper well, to about 8000 feet. A Union official commented that this well indicated possibilities for gas production at this deeper depth.

One of the main concerns of a number of those present was not ... test wells, but pipeline

well, to about 8000 feet. A Union official commented that this well indicated possibilities for gas production at this deeper depth.

One of the main concerns of a number of those present was not so much the test wells, but pipeline construction and the number of additional wells, should these test wells establish that gas production is possible. Union officials responded that no planning on pipelines has begun and would be extremely premature at this time in their opinions.

Leading the day's activity were David Sack, Greenbrier District Ranger, and Dr. Tom Manley, geologist for the Forest Service.

The morning was spent looking at the three sites and the afternoon discussing the pro and cons of each site. It was determined that the criteria to judge the sites should be water quality impact, visual impact, recreation impact, game inhabitant impact, safe and adequate access, soil conditions and threat to endangered species. The last is required by law and quickly dismissed from

Allen, of Clover Lick He was the commanding officer of the Pocahontas company of West Virginia state guards, a hard fighting and efficient company of soldiers who rendered fully as much service to the Union as any body of regular troops It has always seemed a pity to me that the federal government did not recognize them as fighters, after the war. They were not like the home guards of distant states. They were on the firing lines. At that time, it was a toss up with young men whether they would join the regulars or

At 5 p.m. the trouble occurred on the Snowshoe 69,000 volt tap line. Two insulators failed and the cause is unknown. Snowshoe was out 10 hours and 9 minutes (approximately 2,000 skiers on the mountain). The tap line over to Thorny Creek (340 customers including Pocahontas County High School) off for the same time. The Frank sub-station and Monterey line were out for 1 hour and 43 minutes.

Also at 5 p.m. Marlinton (2122 customers) went off for 4 hours and 37 minutes, while looking for the trouble. They couldn't find it by locatization so the two tap lines were disconnected manually. Again at 11:49 p.m. for 2 hours and 20 minutes Marlinton was off while the workers were returning the two tap lines to normal.

At 5 p.m. for 4 hours and minutes and again at 1:45 for 2 hours and 20 minutes the Slatyfork area was out of service also associated with the insulation problem.

Frank Burford, of Snowshoe provided "cats," etc., that were helpful in locating the trouble.

Some scattered places were gradually added but power was not finally restored everywhere until 9 a.m. Wednesday. The Mar-

mature at this time in their opinions.

Leading the day's activity were David Stack, Greenbrier District Ranger, and Dr. Tom Manley, geologist for the Forest Service.

The morning was spent looking at the three sites and the afternoon discussing the pro and cons of each site. It was determined that the criteria to judge the sites should be water quality impact, visual impact, recreation impact, game inhabitant impact, safe and adequate access, soil conditions and threat to endangered species. This last is required by law and quickly dismissed from consideration as there are no endangered species involved. For gas production potential, the Union geologist indicated all three sites were equal.

It was general agreement among the group that the third site was unsuitable. The first two came out about equal in the balance of pros and cons. Ranger Stack indicated that he would make his recommendation on a site as soon as possible and send it on to Elkins.

In the Marlinton District work has not yet begun on the test well at Rimel, to be drilled

Engagement

Mr. and Mrs. Arlie H. Ryder, of Cass, would like to announce the engagement of their daughter, Brenda Sue Ryder, to William Allan Shank, son of Mr. and Mrs. William T. Shank, of Green Bank.

Brenda and Willie are both graduates of Pocahontas County High School. Brenda graduated in 1981 and Willie graduated in 1979. Brenda is a freshman at Fairmont State College. Willie attended Potomac State for two years then went on to West Virginia University for one semester, but is now attending West Virginia Tech.

Wedding plans are incomplete.

Engagement

Mr. and Mrs. Brent T. Wooddell, of Slatyfork, announce the engagement of their daughter, Sandra Marie to Brian Allen Willhite, of North Vernon, Indiana. A May wedding is being planned.

Sandy is a 78 graduate of Pocahontas County High School and is employed by Mountain Development Corporation. Brian is a 1st Class Petty Officer in the United States Navy, and is presently stationed at the Naval Air Base in Norfolk, Virginia.

---

good deal about the war.

I remember one time I was in Charleston in a room in the hotel all cluttered up with statesmen and other prominent West Virginians who were engaged in the national game of holding hands. The old Captian was down there at the same time looking after some legislation He was a very striking example of the mountaineer with his bold and unterrified look, his eagle beak, his keen eyes, and a long matted red beard in which the gray was beginning to show. I have seen that same death defying look in one other man in my time, Captain Anson Hatfield, of the confederate service. Captain Allen was looking for me and when he came to the right room he opened the door and holding it part open, peered around at the unbelievers It was a striking sight. Senator Kidd glanced up and said: "Here's Old Man Remorse!"

In the above paragraph I do not use the word unbeliever in a bad sense. I mean those who pay to see what his opponent holds in the way of a hand. After giving up the hunt

IN ITS FIRST year, Tradition Day had lots for visitors to see. Top row: Fried bread on the stove (Dreama Moore); gourd carving (Julie MacQueen); chainsaw carving (Billy Boggs); quilting (Linda Adams, Sherri Taylor Dean, Elaine

The Neighbors

No Mail

It wasn't snow but roads coated with frozen rain stopped the mails Tuesday. No one can remember when or if this has ever happened before. In 1944 the road to Lewisburg was closed almost a week but the mail came in by train then. June Herold said then they took the mail as far as they could from the postoffice. We haven't been able to find the wording of that famous Post Office slogan, "Neither rain or hail, nor sleet or snow . . . nor gloom of night shall stay the faithful postman in his appointed rounds." We understand it is not an official slogan.

We may have worse weather ahead but we'll print the Trotter Brothers famous letter now:

During the winter of 1855, the Trotter Brothers had a contract with the U. S. Government to carry the mail between Huttonsville (Randolph County) and Staunton, Virginia. The brothers had made the trip

Outdoor Notes

LONNIE RATLIFF, II, had a successful alligator hunt. He harvested two gators on the recent hunt, a nine-footer and a five-footer. Ratliff used 400-lb. test fishing line with a large hook, rotten chicken and small boat. The chicken was hung on hooks approximately two feet above the water; the alligators swallowed the chickens and hooks. Ratliff pulled the live gator to the top of the water, kept it as still as possible and shot it in the back of the head at point blank range. He is the son of Lonnie and Charlotte Ratliff, of Buckeye.

MR. AND MRS. LEALE ANDERSON

61st Anniversary

The 61st wedding anniversary of Mr. and Mrs. Leale Anderson, of RD 4, New Philadelphia, Ohio, was celebrated on October 17, 1981. The couple moved from W. Va. in 1923 and have resided in Tuscarawas County for the past 57 years.

Hosting the celebration were their children, Willie, of New Philadelphia, and Leale, of Delaware, Ohio. Twleve grandchildren, 23 great-grandchildren, and one great-great-grandchild complete the family. Three children, one grandchild, and one great-grandchild are deceased.

Mrs. Anderson is the former Tossie Gibson, a daughter of the the late Warren and Florence Gibson, and Leale is a son of the late Rev. C. M. and Zelia Anderson, all of Lobelia. They were married on October 17, 1920, in the parsonage at Lobelia by Rev. Anderson.

The couple are members of the Otterbein United Methodist Church at New Philadelphia. Both are retired, Mrs. Anderson in 1946 from the Timken Company at Canton and Leale from the Tusco Manufacturing Company at Gnadenhutten in 1965.

it's like this...

beat a woman,

lose your guns.

it's that simple.

It's simple. Domestic violence is a crime. And once the police report is filed, it's too late. There's nothing you can get her to say or do to stop the process.

If you don't understand that, maybe you'll get this. If you're convicted of beating your wife, girlfriend or partner, you'll lose your guns. All of them. For life. It really is that simple.

Engagement

Mr. and Mrs. Ray A. Friel, of Marlinton, are proud to announce the engagement of their daughter, Lora Lea Friel to Kevin Thomas Malcomb. Lora is a junior at Pocahontas County High School. She is the granddaughter of the late Lee Hammons, of Marlinton, and Mrs. Elnita Friel, of Ohio and Sherman A. Friel, of Buckeye.

Kevin is also a junior at Pocahontas County High School. He is the son of Loretta T. Malcomb, of Buckhannon, and Steve Malcomb, of Slatyfork. Kevin is the grandson of Mrs. Fayree Malcomb, of Marlinton.

Wedding plans are incomplete at this time.

Hospital Auxiliary

The Pocahontas Memorial Hospital Auxiliary Executive Committee met on Monday, Jan. 11. Because of inclement weather the full auxiliary did not meet, but will meet as usual on February 8 at the Hospital.

Tony Snyder Fund

Anonymous - $5

Sponsored by the Marlinton Jaycees and Jayceeettes. Send donations to Jaycees Special Fund, Box 117J, Marlinton, W. Va. 24954.

Harvey and Nancy Galford were in Charlotte, North Carolina, buying Spring and Summer clothes for The Treasure Chest of Marlinton and Bartow.

Cranberry Garden Club

The Cranberry Garden Club met in the home of Mrs. William Moore Thursday, January 14, at 8 o'clock.

Our club will sponsor a student age 14 to 18 to Camp Caesar Conservation Camp near Webster Springs. Camp will be held in June.

Plans were made for some of our members to attend West Virginia Garden Club luncheon at the Greenbrier Hotel March 22.

Those present were Dottie Simkins, Brenda Nelson, Jane Shaw, Marlinton, Ruth Taylor, Sally Nottingham, Julie Macqueen, Ruby Burns, Linda Simmons, Phyllis Crickenberger, Wilda Chappell and Opal Moore, Hillsboro.

Our next meeting will be February 11. Julie Macqueen will be he

FROM UNCEE JOE

The first Sunday School in Huntersville was organized in 1823 by a man from North Caroiina. who came here for his health. This was over one hundred years ago.

The first community meeting was held in Huntersville on April 14, 15 and 15 of this year. Some one will speak of this community meeting one hundred years from now, if the results of this meeting are as far reaching as I feel they ought to be

There were good talks by Rev. Roy Hashsinger and others; the ladies with their good dinner and fine music. A great get together on Sunday. It should be a great help to all of us.

It is recognized that the homes of America are failing in training the children in righteousness.

The churches through the Sunday School are making an effort to reach the young people of the nation and mold their characters during the plastic days to the end that they may become useful Christian citizens and in their turn carry forward the work of the church and state.

The Sunday School with its schedule of one hour each week cannot

4-H News

Attention to all those i the Slatyfork area tha find themselves sitting a home in the evenings wondering what to do. Why no give it a try? The local club, Slatyfork Stallions, under the leadership of Karen McKenney, holds

The churches through the Sunday School are making an effort to reach the young people of the nation and mold their characters during the plastic days to the end that they may become useful Christian citizens and in their turn carry forward the work of the church and state.

The Sunday School with its schedule of one hour each week cannot make sufficient impression upon the lives of the red blooded youth of the land. It has been found necessary to give more time to religious instruction if youth is to be molded for effective christian citizenship.

The community meetings have come into existence in response to a clearly felt need. It is proving to be an effective agency in extending the religious educational program of the churches.

Roger Batson, a national business leader, says the need of the hour is not more factories or more materials; not more railroads or steamships; not more armies or navies, but rather more education based on the plain teachings of Jesus. The prosperity of our country depends on the motives and purposes of the people. These

that a search warrant may be obtained to insure compliance with said ordinance. The Council will meet next month to take up the matter of rifles and shotguns."

It won't happen here? Although it is highly unlikely considering the mature, intelligent individuals that make up our Town Council the people of Morton Grove, Illinois, probably thought so too. There, four individuals decided what was best for the rest of the people of Morton Grove. The decision was upheld by the District Federal Judge. The decision is now being taken to a higher court of appeals. Your local gun club through the National Rifle Association is supporting the attempt to have this decision reversed. If you wish to lend your support join and help support your local Pocahontas Gun Club.

From Charleston

Garnet Hoover, our Silver Haired Legislator, called Tuesday that she had just talked with Charlie Jordan and he reported that there was a proposal in the Redistricting Committee to place Randolph, Barbour and Pocahontas County in the same House of Delegates District; this would make three delegate members but one must come from outside Randolph County.

Please let Garnet Hoover, 456-4011 (call after 4 p. m.), know your reaction quickly to this proposal. The best answer is to still push for our own delegate. We will say this new plan gives Pocahontas a little more chance of getting a delegate but a big territory to campaign over.

Groundhog Day

Next Tuesday, February 2, is Groundhog Day. Then we will know whether winter will continue for another six weeks.

So far it has been winter indeed. Saturday was warm enough to make some slush, which promptly froze as the temperature plummeted on Sunday. The snow had a frozen crust which held cattle and trucks. Monday brought 5 to 9 inches in fluffy white snow, then the temperature dropped close to zero Tuesday morning. No school Tuesday again.

Wednesday morning the thermometer read 22 below at Green Bank with 10 below and 16 below several places. Warmer on higher elevaticns with promise of much warmer weather.

Local trooper awarded Medal of Valor

Governor Bob Wise and Colonel Howard E. Hill, Jr., recognized nine troopers for bravery and distinguished service while in performance of their duties. The ceremony took place at the West Virginia State Police Academy.

Senior Trooper F. H. Barlow, of Marlinton, was among the 10 officers honored. He received a Medal of Valor because he rescued a wounded officer during a gunfight and standoff in Randolph County.

"These awards are presented to Troopers who went above and beyond their normal call of duty," said Hill, Superintendent of the West Virginia State Police. "These awards are a reminder that Troopers place their lives in danger, even sacrifice their own well being, to uphold the law. The Troopers honored here today are great examples for what the new Cadet-Troopers should strive to become."

Certainly Barlow's award comes from an incident that bares out that statement.

He was called to a standoff in Randolph County during which one man in a farmhouse held out for several hours while approximately 100 law enforcement officers surrounded him.

When Barlow arrived, two officers were already hit near the house and officers were able to rescue the first one relatively easily by moving behind a fire truck.

The other officer was farther away. Barlow handed over his dog, Argo, to a fellow trooper and crawled the 20 yards between the truck and the cruiser. When he got there, the wounded trooper was still another 20 yards away.

Barlow crawled to him, loaded the trooper on his back and crawled again toward the fire truck and safety.

The man in the house was firing the entire time, but Barlow said officers covered him during the rescue.

The ceremony was held after the 53rd Cadet Class was sworn in Monday.

Oil and Gas Leasing and Drilling

As most everyone in the county is aware for the past several years extensive work has been done by the representatives of various oil companies to lease oil and gas rights, with thousands of acres now under lease. Efforts to lease land are still going on and the prices being offered for the first year of the lease have increased considerably from $2 per acre offered but a year or two ago.

Unfortunately what most people are not aware of is the almost complete lack of protection given by existing West Virginia law to surface owners if actual drilling for oil or gas is done on their land. The law is weak to the point the first notification a land owner might have that drilling is to take place on his property is the arrival of the drilling equipment.

This lack of legal protection could become of great concern to landown-

Chautauqua Guarantors Expect Program to Put Chautaqua Over-the-top

The guarantors who bring the Chautauqua to Marlinton each year are happy over the prospects of having a good attendance at Chautauqua this year. The program which the Redpath Bureau brings to this city this season is said to be the best to be found on any circuit in the country, and for that reason the guarantors believe a large enough crowd will be drawn to put the thing over the top.

Following is a list of the guarantors:

H. C. Solter.
H. L. Byers.
E. O. Rawlings.
M. S. Wilson.
F. M. Sydnor.
S. R. Neel.
Calvin W. Price.
A. E. Smith.

Business development for Mt. Waters Byway topic of conference

The Opera House in Marlinton was the location September 19 and 20 for a comprehensive conference on the Mountain Waters Byway and its business development. The Mountain Waters Byway runs from Lexington, Virginia, through Bath County into Pocahontas over Allegheny Mountain at Rimel on Route 39, through Huntersville to Marlinton, on to Mill Point, over Cranberry to Richwood and on to Summerville.

This was a practical and informative meeting to acquaint people with the potential of this Byway.

The meeting opened with a welcome by Robin Mutschelller, of Marlinton, who is president of Marlinton Business, Main Street. The Byway is a project of the Association.

Two Byway Coordinators from Virginia, Jean Clark Dodd of Lexington, and Sally Johnson, of Bath County Chamber of Commerce, were unable to attend because they were in the storm area.

Speaking first was Reta Griffith, MBA member, Byway Coordinator, and member of the Pocahontas County Commission. She told of efforts and accomplishments of the Business Association such as the town entrance signs, lights and planned improvements on the Greenbrier Trail block in Marlinton, marketing plan, and work on the Huntersville Presbyterian Church for a Byway Center.

Three Nicholas County Coordinators were next. Don McClung, mayor and member of the Richwood Chamber of Commerce, telling of his area. Ralph Kelly, 4C Economic Development Authority, who spoke of the five counties working together, and summarized the opportunities of recent advances in tourism in the area, and Gwen Hagaman, president of G. H. Baily Company, who came from California a year ago. She outlined the east end of the Byway, Cherry River, Summit Lake, Summersville Lake, and golf course, a number of pre-Civil War sites, and the large rural area around Richwood. Maxine Corbett, of *The Nicholas Chronicle*, was introduced.

Gail Price, of the Pocahontas Visitors Center, described the location of the beginning of the Mountain Waters Byway at the Virginia Horse Center at Interstate 81, then coming through Goshen Pass, Jackson Waters, Jefferson Pool and Springs in Bath County, and Warm Springs. In Virginia you don't have to put together a corridor management plan, but it is required in West Virginia.

[illegible] Trail Highways, a lifelong resident of West Virginia, had many practical suggestions, such as need for structure, for by-laws, etc., non-profit has good points, set up bookkeeping from day one, have legal structure, and need dedication of purpose. Talking of Midland Trail, which was an actual buffalo road, she told of Malden, where Indians actually extracted salt; the salt brought the buffalo and later the chemical industry. Need to pull history people into the planning, mayors, state senators, bankers, hotel, tourism, a diverse group. She was truly a marketer.

On Saturday morning Robin Mutchellier again welcomed the group with a few new people.

Rich Hartman, with the West Virginia Department of Transportation, had some practical advice for projects—talk with their Division early on all projects, applications from historic places need to be early and talked about before approvals—make list three months early.

Senator Walt Helmick was the next speaker with many interesting items. Of course, the budget is the big problem. And we need to improve the quality of life in our communities.

On our good side, he said, we have 220 attractions, including Pearl Buck Birthplace, our State Parks—we have five in Pocahontas; our income is highest ever—Pocahontas is one of nine leading counties; we do make money from tourism. We need to do more with Cass Scenic Railroad, which is the only logging/railroad community in the nation left intact; the lodge building at Cass has been purchased, the doctor's house needs to be purchased. He is interested in extending the railroad with a spur and depot near the lake at Snowshoe.

He emphasized that we need to do more for the Scenic Highway area, need to do more with [illegible] riding—the airport area at the Cal Price Tract for rail and Webster area are also attention.

Helmick stressed that our fishing program needs to be improved. The Department of Natural Resources doesn't have enough money to supply all the needs for trout. We have 240 miles of remediated water and we need to improve growth through the private area to supply enough trout. We have the second largest wilderness area, 34,000 acres here in Pocahontas, and 780 acres in Hamilley need to be enhanced. We need to increase tourism, have to increase cash flow.

We have a clean county, a good medical system, good landfill system for 20 years—the state needs to adopt our plan, said Helmick. Pocahontas was first in the Hotel/Motel Tax collection. We rank well in per capita income. We need to plan for growth and need to do more in the State Parks in the state.

Ruth Morgan commented on our properties listed on the Historical Register.

Greg Wingo, with the Greenbrier Valley Economic Development and Lightstone CDC, had some practical advice, not to purchase property, have working capital and equity, businesses should be socially acceptable—no bars or gambling. Needed are training

Continued to page 5

for Industrial Park

The Greenbrier Valley Economic Development Corporation (GVEDC) has been approved for a $100,000 grant by the U.S. Department of Agriculture (USDA) for the Edray

Business Park in Pocahontas County, announced U.S. Nick Rahall (D-WV).

"We will reap what we Seeds of time, money and pertise can yield an abu harvest of jobs for Sou West Virginia," said Ra "And, we will continue to hard towards that end."

"Congressman Rahall Southern West Virginia horse in Congress," said Nevil Executive Director Greenbrier Valley Econo Development Corporation Lewisburg. "He doesn't just about our needs. He gets ac With his help the Edray B ness Park will bring more to Pocahontas County."

The grant was issued as of the USDA's Rural Deve ment Program and will be for the construction of an ac road for the Edray Busin Park. The Edray Business P will house technology rela businesses as well as comp cents of the local wood indus The businesses are expected annually create 30 jobs for Po County.

Rahall added, "The [illegible] for the Edray Business Park, a will help the residents of Poc hontas County have access more economic opportuniti and most importantly, mo jobs."

Recently, Congressman Ra hall helped secure $1.8 millio in federal funding approved b the U.S. House of Representa tives for the Greenbrier Valley Economic Development Corpo ration (GVEDC) and the 4- County Economic Development Authority (4-C EDA), respectively for technology initiatives in Southern West Virginia. Specifically, the money will be used to further develop the I-64 Technology Corridor business development anchors in technology between Beckley and White Sulphur Springs. The bill has passed through the U.S. Senate Appropriations Committee and will be considered by the entire U.S. Senate.

"We are building a new tomorrow, and it begins with a wide high-tech corridor that will run through Southern West Virginia," Rahall said. "The I-64 high-tech corridor, we are calling the Silicon Mountains, is ushering in a new era in Southern West Virginia and bringing new jobs to our mountains and valleys."

eir classes.

A suggestion of the principal to save costs in the iddle School Football program by having a single ocahontas County Middle hool Football team was scussed. In addition to ving transportation costs games this plan would ow boys at Hillsboro a ance to play football. wever, the cost of transrtation to a central pracpoint would probably more than the savings.

—

The Board met for a gular meeting on Mony.

Maintenance Director rth Friel reported to the ard on the work that is ing done at the High hool to correct problems the heating system. Most the problems are in the ntrols and with the tors that operate the nts regulating the cold intake in the individual m heating units. He also dated the Board on the ogress being made by the HS vocational classes in modeling the old bus rage building at Green nk into a multi-purpose

the almost complete lack of protection given by existing West Virginia law to surface owners if actual drilling for oil or gas is done on their land. The law is weak to the point the first notification a land owner might have that drilling is to take place on his property is the arrival of the drilling equipment.

This lack of legal protection could become of great concern to landowners in this county who have oil and gas leases or rights outstanding on their land as the next few years could see a good many wells drilled in the county. As we have reported over the past several weeks exploratory well drilling is taking place or planned in adjoining counties and several wells are in the planning for within the county.

State Senators Tonkovich and Boettner have introduced a bill into the legislature to amend existing law to give surface owners considerable protection if oil or gas drilling should take place on their land.

well drilling is taking place or planned in adjoining counties and several wells are in the planning for within the county.

State Senators Tonkovich and Boettner have introduced a bill into the legislature to amend existing law to give surface owners considerable protection if oil or gas drilling should take place on their land.

The bill, Senate Bill 154, is long and involves many aspects of oil and gas drilling but the provisions of the bill that could be of interest to local landowners are the following:

—requires the operator to publish a legal advertisement containing the application made to the oil and gas office of the State Department of Mines as well as a plat showing the location of the proposed well.

—requires the notification of all property owners involved.

—allows the property owners as well as adjacent property owners to file objections and sets up a method to have them adjudicated by the state.

—establishes additional reclamation requirements

room.

Mr. Friel and Superintendent Bailey reported that Mr. Hathaway, a contractor from Elkins, was in the county Monday to look at building a vocational building at the High School and the roof of the Marlinton Middle School. He was to stay for the Board meeting, but decided it was best not to due the weather. He will come back at a later date.

Ernie Shaw and Eric Dye, representing the Extension Service Committee, appeared before the Board to present the committee's request for the amount of Board support for the 4-H agent's salary for the next fiscal year. The Board is being asked to increase its share from $7,200 to $7,550. No action was taken on the request at this meeting.

In personnel matters the Board:

—approved maternity leave for Diana Smith.

—employment of Virginia Shaw as a substitute teacher.

—employment of Vicki Rose as Assistant cheerleader sponsor at Hillsboro.

The following school trips were approved:

—Marlinton 5th and 6th grade basketball games on February

aspects of oil and gas drilling but the provisions of the bill that could be of interest to local landowners are the following:

—requires the operator to publish a legal advertisement containing the application made to the oil and gas office of the State Department of Mines as well as a plat showing the location of the proposed well.

—requires the notification of all property owners involved.

—allows the property owners as well as adjacent property owners to file objections and sets up a method to have them adjudicated by the state.

—establishes additional reclamation requirements than in existing law.

—provides for compensation to surface owners for damages caused by the drilling operations.

—State inspectors and oil and gas agencies are given more power to protect surface owners.

We have a copy of the bill at the Times office if anyone is interested in reading it.

A hearing on the bill will be held on Tuesday, February 2, at 4 p. m. in the Senate chambers at the State Capitol building.

OSBORNE - JOHNSON

The marriage of Miss Lessa Osborne and Mr. Lee Claire Johnson was solemnized on Saturday evening, June 30, at the home of Mrs. A. B Frame, in Third avenue. The ceremony was read by Rev. James F Pennybacker, of the Humphries Memorial church, in the presence of a small group of relatives and friends of the bride and groom.

The ceremony was performed before an improvised altar of palms and ferns. On each side of the altar tall cathedral candles burned in five branched candelabra Preceding the ceremony Miss. Thelma Stone sang "I Love You Truly," accompanied at the piano by Mrs Howard Holtzclaw Miss Mildred Reed of Dunbar played the wedding march from Lohengrin for the entrance of the bridal party.

The bride was lovely in a wedding gown of white chiffon and lace The waist was tight fitting and sleeveless and the skirt was full fashioned bouffant. Her veil was of tulle, held in place at the head by a band of orange blossoms She carried a bouquet of butterfly roses and white sweet peas.

Miss Macel Osborne, who was her sister's only attendant, was attired in a frock of periwinkle blue chiffon,

Warrior Sports

by Erin Coleman

Even PCHS sports teams felt the wrath of Isabel as their week was cut short with the cancellation of many of their games.

The volleyball and soccer teams did manage to get a few matches in early in the week.

On Tuesday, September 16, the girl's soccer team traveled to Greenbrier East. They played an intense game; however, were unable to stop East from dominating the field and taking the 4-2 win. Freshman Michelle Holstine put in both goals for the Warriors.

The boy's soccer team took their home field on Tuesday of that week hosting Shady Springs. The Warriors scored quickly and dominated the entire game as Shady was only able to get one goal past the Warriors defense.

Pocahontas finished the game with the 6-1 win. Scoring for the Warriors were Andy Wayne, Ben Jewell, Corey Simmons, and Clay Condon who all contributed one and Jonathon Burns, who scored two.

The volleyball team hit the road that same night for their first tri-match against Pendleton and Petersburg.

The Warriors took on the Pendleton Wildcats in the first round for a close match.

Pocahontas came out of top the first game with the close 26-24 win. In the second game the Warriors struggled with their offense allowing Pendleton to lead the match and take the 25-16

The Warriors took the lead in the second quarter as freshman Jesse Burdette took the ball in for two back-to-back touchdowns.

Thurston Willis put up the extra points putting the Warriors up 14-0 going into the half.

After the half the Warriors showed no sign of slowing.

East Hardy managed to score a touchdown in the fourth quarter, however, they were unable to catch the Warriors who scored two more touchdowns, the first by Senior Devin McCoy and the second which was run in by Mark Burdette 30 yards from the interception.

Willis kicked one extra point for the Warriors.

Pocahontas took the 27-6 win. Contributing to the Warriors' effort was Jesse Burdette who had 23 carries for 129 yards and Devin McCoy with four carries for 40 yards. The Warriors defense also managed to hold East Hardy to a total of 148 yards on offense.

On Tuesday, September 23, both soccer teams hosted Petersburg at home.

The Lady Warriors took the field first. Petersburg kept the Warriors on their toes; however, they could not stop Pocahontas from taking the 2-0 win.

Rachel Wayne and Danielle Holstine scored for the Warriors.

The boys stepped out next to face Petersburg. Pocahontas came out strong, as Andy Wayne put in first goal off the assist from Thurston Willis

score was a tie, 2-2.

score was a tie, 2-2.

Also on Tuesday, the Warriors volleyball team faced the challenging Nicholas County.

The Warriors played their best game of the season to shutout Nicholas and take the match. The individual scores from the game were 25-23, 25-18, and 25-22.

On Thursday September 25, the lady soccer traveled to Shady Spring. Shady proved to be no match for the Warriors' defense who prevented them from scoring.

The match ended with a 5-0 Warrior win.

Candace Morton, Heidi Beverage, Michelle Holstine all contribute one goal and Rachel Wayne put in two.

The boy's soccer team faced one of the toughest challenges of the season as they matched up against the Greenbrier East Spartans.

The Warriors had a shaky start and where unable to find their footing against the Spartans. Greenbrier East took the 2-0 win.

The volleyball team hosted the Tygarts Valley Bulldogs for another exciting shutout. The Bulldogs could not come close to the Warriors' intensity as Pocahontas held them to low scoring. The Warriors won the match with the individual game scores of 25-17, 25-5, and 25-8.

On Friday, the Warriors faced off against Richwood for their Homecoming Game.

The Warriors started out with tremendous power as Jesse Burdette returned the kick off 80 yards for a touchdown. Evan

quarter contributing to the Warriors 30-0 lead.

In the second quarter the scoring did not stop for the Warriors as Mark Burdette and Ryan Ware scored two touchdowns for the Warriors. Willis contributed the two extra points.

Richwood stepped up their offense slipping past the Warriors for two touchdowns.

Pocahontas went into the half with the 44 – 14 lead. In the second half Richwood stepped up their defense however the DJ Jones managed to slip through for the last touchdown of the game. Willis kicked the extra point to make it 51 – 14 at the start of the fourth quarter.

Willis finished the scoring with a 34-yard field goal for the Warriors.

Richwood got their third touchdown of the game with a two-point conversion, however, it was not nearly enough to catch the Warriors, who took the 54 – 22 win.

Also, contributing to the Warrior effort was D. J. Jones who had 8 carries for 71 yards, Mark Burdette who completed four passes for 56 yards and also had 68 yards rushing, and Curtis Dunbrack who completed two passes for 56 yards.

Edray District School Trustees Appointed

At a recent meeting of the Board of Education of Edray District, the following school trustees were either appointed or held over for 1928-29:

No. 1Brush Run, A. W. McNeill, custodian of property.

No. 2—Dry Creek, Porter Kellison, hold over one year, Lock McNeill and D. P. Barnes.

No. 3—Bucks Run, Ira Hannah, A. B. Beverage, and Lloyd Armstrong.

No. 4—Spruce Flat,Preston Moore, custodian of property.

No. 5—Marlinton, Board of Education.

No. 6—Greenbrier Hill, John Gilmore, hold-over for two years; James Harris, hold-over one year, and I. H. Goodwin.

No. 7—Campbelltown, M. R. Dunbrack, custodian of property.

No. 8—Pine Grove, Frank Baxter, hold-over for two years; A. C. Barlow, hold over one year, and W. A. Barlow.

No. 9—Green Hill, Adam Moore, hold-over two years; Elmer Sharp, hold-over one year, and George H. VanReenan.

No. 10—West Union, W. M. VanReenen, hold-over one year, Jesse Beverage and W. H. Gilmore.

No. 11—Woodrow, Andy Galford; custodian of property.

No. 13—Draft—Wallace Dilley, custodian of property.

No. 14—Pleasant Hill, Resse Wilfong, hold-over one year, George H. Wheeler, H. J. Menefee.

No. 15—Fairview, H. H. Waugh, hold-over one year, Ben Johnson, Dee Friel.

No. 16—Brownsburg,Roy Wheeler, hold-over two years, Rice Graves, hold-over one year and Moody Wilson.

No. 17—Brushy Flat, L. L. Smith, custodian of property.

No. 18—Stony Bottom, Guy Tallman, custodian of property.

No. 19—Cloverlick, Luther Coyner, custodian of property.

No. 20—Crooked Fork, Willie Gibson, custodian of property.

No. 21—Pleasant Valley, Jake Gibson, hold-over for one year, Forrest Gibson, and Charles McGuire.

No. 22—Hannah, Veo P. Hannah, hold-over one year, H. A. Hannah, Harry Varner.

No. 23—Slaty Fork, L. D. Sharp, hold-over 2 years; Page Hannah, hold over one year, and Lee Bonner.

No. 24—Linwood, M. P. Vandevender, hold-over 2 years, Sam Galford, and G. E. Wooddell.

No. 25—Mace, M. H. Beale, hold-over two years, C. C. Cross and Moral Miller.

No. 26—Brady, Gilbert Doyle, custodian of property.

No. 27—Thomas Springs, Ham Burns, hold over for two years, Edgar Dilley, hold over one year, and John Kramer.

No. 282—Poage Lane, Chas. Shinnaberry, custodian of property.

All the names which are not followed by explanation are newly appointed trustees.

Miss Beatrice Ruckman, student nurse at Davis Memorial Hospital, Elkins, is spending her vacation at the home of Mr. and Mrs. J. R. Ruckman, near Millpoint.

D. H. Grimes' Alleghany Logging Tradition

By David (DK)Knight

A light rain was falling when the mud-splattered pickup pulled along side our sedan, sending water and mud spurting wildly across the parking lot at Inter-State Lumber Company. Dawn had just ushered out the last remnants of darkness, and the little community of Bartow yawned slowly to life.

"You DK Knight?" asked the pickup driver, leaning out the window for a better look. "Yeah, it's you, I see now. You don't have your beard. Look a bit different than you did at the Richmond equipment show."

We exchanged grins as we shook hands and swapped small talk with D. H. (Dave) Grimes. We'd met Dave and sons, Terry and David (Lynn) a few weeks earlier. They all but insisted that we visit their woods

courses, business training, etc.

It was reported travel is up—2,000 cars in this area over the past two years.

Jean Murdock, from the Department of Culture and History in Charleston, talked of the importance to the Byway of Historic Preservation and that we need to promote our historic buildings and places. She emphasized that we need to get Historic Preservation to work on Cass. Property to be listed on the Historic Register needs to be 50 years or older. Get information for email.

One of her comments was that Marlinton needs a sign on Rt. 219 to tell people that there is more of Marlinton on the east side of the bridge.

A practical presentation on Small Business Managing and Marketing, with emphasis on employees being the key, trying to keep employees for the life of your business, knowing and being interested in your customers, was given by a Davis restaurant owner, Walt Ravilli.

Monica Miller, State Coordinator of Main Street WV, and Kim Donahue, Program Manager for Small Business Development Center, closed the day's program.

This was a practical information workshop for making the Mountain Waters Byway an asset to the attraction of tourist/visitors to our area with practical suggestions, information, and reports of actual development of byways in other locations.

As of Oct. 1, 2003, the office of Milestone

We exchanged grins as we shook hands and swapped small talk with D. H. (Dave) Grimes. We'd met Dave and sons, Terry and David (Lynn) a few weeks earlier. They all but insisted that we visit their woods at our earliest convenience. As old Dave put it in Richmond, "Come on up to where some real logging's done."

We pulled our gear into Dave's mount and headed for the logging site, enjoying every minute of the 30-mile journey. It didn't take long for us to realize just how much in love he was with both logging and the mountains. Not yet 60 ole Dave's logging roots go back a long time. He's worked the beloved Alleghanies all his life, following in the footsteps of his papa, H. H. Grimes. Dave's granddaddy, Zane Grimes, started the tradition. Now, Dave's three sons—Kay, 40, Lynn, 28, and Terry, 26, comprise the family's fourth generation of logging tradesmen. On the books, the title is D. H. Grimes & Sons Logging.

Grimes & Sons Logging.

Suddenly, ole Dave braked the pickup hard and stopped, pointing to a steep mountainside covered with timber. "See that? I logged it 20 years ago for sawtimber and it's ready to cut again. I tell you this country'll grow the timber. *Clear cutting may be necessary* in some cases—in fact, we're cleaning 1200 acres now because the area is to be stripped for coal—but I prefer selective cutting. It just suits my tastes better."

Dave recalled several highlights of his logging career, including some of the roughest areas to log, big trees, and the two brushes with falling trees that have left him partly crippled and the owner of steel in both hip and knee joints.

"We've worked some places folks said couldn't be logged," he said in a salty tone. "If ole Dave can't get 'em, they can't be got! One time we were in some bluffs above Greenbrier River. You let a log get over one of them bluffs and you forgot about

Alderman threatens new lawsuits

Hillsboro & Marlinton Middle principals resign

The new school year is only a few weeks old, but in addition to hiring a new superintendent, the school system will now need to look for two new principals.

At the Board of Education meeting on Monday, held at the Hillsboro School, the resignation of Fran McLaughlin as principal at Marlinton Middle School was accepted, effective at the end of school on September 22.

Also submitting her resignation was Hillsboro Elementary School Principal Sue Hollandsworth. She took this action following refusal by the Board to grant her request for a leave of absence for the balance of this school year. The purpose of the leave would be to participate in a program for an advanced degree and to do some contract work with the state Department of Education. She asked that the Board continue to pay its share of her insurance and guarantee a return to her present position at Hillsboro for the 2004-05 school year.

The agenda for the meeting noted that this request was not being recommended by Interim Superintendent Alice Irvine.

Ms. Irvine did not comment on the request but Board member Bernard King said it would not be fair to the school or school system to grant the request. Member Tom VanReenan expressed concern about filling the position if it is to be for only the balance of this year.

Ms. Hollandsworth's request was denied by a 4 - 3 vote. Ruth Taylor cast the vote in favor. (Board President Kernan Friel was absent from the meeting.)

Following the vote, Ms. Hollandsworth gave the Board her resignation, effective October 6. As it was not on the agenda, action on the resignation can not be taken until the next Board meeting.

When the minutes of the special Board meeting on September 8, the meeting where Dr. Patrick Law was employed as the new county Superintendent, are given [illegible] beyond July [illegible]

sion ruled that there was a conflict due to the stipend (all of $50) members of the SCD board received. Upon receiving this opinion, Mr. VanReenan resigned from the SCD board.

Mr. Alderman then moved on to Mr. Friel and Mr. Vance. He said he has been doing some legal research and claimed to have found case law that forbids someone removed from an office to be reappointed to the same position. He was referring to the lawsuit he filed last year that was successful in having the two removed from the Board based on the state code prohibiting board of education members from holding other "public offices."

However, Mr. Friel and Mr. Vance resigned from the other positions that the court found to be "public offices" and were reappointed to their seats on the BOE. Mr. Alderman said he would seek contempt of court rulings against them for this.

Before announcing his plans for the lawsuits, Mr. Alderman had told the Board that should an effort be made to dismiss him from his position in the Board office, he would use all his rights under the "whistle blower" protection law.

The agenda for the meeting called for the Board to meet with Hillsboro School's staff and local school improvement council. It was reported that it had been decided it would be better to have this meeting after the new superintendent is on the job.

Ms. Hollandsworth reported that the improvement council has met and she noted some topics that came up.

First, she noted that Hillsboro teacher Barb Lewis was one the five finalists to be state Teacher of Year. Also, she thanked the Board for providing a teacher at each at each grade level for the school this year.

Their main concern is the roof on the gym which was partially blown off in early July. Ms. Hollandsworth noted that the roof is still leaking and the students are having to use the [illegible] for [illegible]

week, Mr. Trusler said. He assured the Board all special needs will be met.

In another matter concerning special education students, a contract with Real Care, Inc., was approved. Under the contract, the company will provide the needed services for a student with diabetes at Hillsboro.

A parent at the meeting stated that her son is supposed to have services four days a week. Mr. Trusler assured her that this will happen.

Several parents expressed that they had been upset by the remark made at the last meeting that the special education programs are going to "bankrupt the school system."

Mr. Vance assured them that the remark was in no way meant to demean students needing special education services, but came as a result of the frustration felt by members of this and many school boards over the mandates from the federal and state governments to provide services but without providing the funds to carry the

Cathy Mitchell, representing the faculty senate at Marlinton Middle School, urged that the principal's position at her school be posted as soon as possible. She said they do not want a temporary person but an effort made to find a permanent principal. She said the staff was disappointed not knowing who will be at the school as acting principal on Tuesday morning.

Mr. Vance assured her that the position will be posted on Tuesday. As to who would be at the school on Tuesday, he said the Board does not know either. Ms. Irvine is working to find an acting principal, Mr. Vance said, but if people say no, there is not much can be done.

It was noted that MMS has had a number of principals in recent years and this problem is an issue that everyone needs to be concerned about and address.

Ms. Irvine gave a brief summary of the financial statement for the 2002-03 school. One bit of good news in the report was a balance of $427,333 at the end of the fiscal year, the last [illegible] the largest figure was [illegible]

son from pre-school classroom/bus aide at Hillsboro and Marlinton Elementary to special education/bus aide at PCHS.

* employment of Christopher Burns as head basketball coach at Marlinton Middle.

* resignations of Valerie Lambert and James Scott as substitute custodians.

* employment of Shannon Alderman as substitute teacher.

Approval was given for Elissa Taylor to complete her internship for a counseling degree from Marshall University in the county schools. She will be working at Green Bank and PCHS.

Chad Baldwin was approved as a volunteer coach for the volleyball team at PCHS.

Approval was given to the Wage and Hour Regulations policy for the county. Ms. Irvine reported that while the policy was out for public review, no comments were received.

Approval was given for the high school to continue the same policy on final exams as the school used for the last school year.

As the meeting ended, Board member Ruth Taylor reminded everyone that we are here to help children and there has been too much "worrying about me, me and trying to find what is wrong with others." "The children are suffering," she stated.

The meeting ended with executive session on personnel.

The next regular Board meeting will be held on October 13 at Green Bank.

Annual wage survey underway

Each year, the West Virginia Division of Labor is required by statute to "investigate and determine the prevailing hourly rate of wages that must be paid to the various classifications of workmen and mechanics that are employed by contractors that perform construction [illegible] projects with any public [illegible]

joints.

"We've worked some places folks said couldn't be logged," he said in a salty tone. "If ole Dave can't get 'em, they can't be got! One time we were in some bluffs above Greenbrier River. You let a log get over one of them bluffs and you forgot about it....

"What I know about mountain logging didn't come outa books," he continued, "just from experience. Now I'm not knocking education. I sent my boys through high school and was willing to help them beyond that, but they wanted to be out here with me. And I'd be lying if I said I wasn't a little proud of their choice. It's just that sometimes these young forester fellers don't know

Notice To Bidders

The Board of Education of Little Levels District of Pocahontas county W. Va, will receive on Saturdsy, July 21, 1928, until 1 p m at Hillsboro, for the conveyance of school children for the school year 1928 29, from the Ruckman School and Millpoint to Hillsboro; also the Seebert school and the Harper school to Hillsbore. Minors need not apply

At the same time and place, the Board will receive bids for hauling coal to the various schools of the district from Seebert.

The Board reserves the right to reject any and all bids

Rules and regulatiyns may be seen in hands of Secretary.

By order of the Board,
GEO. L. CARLISLE, Sec.

NOTICE

Starting July 10, 1928, the library of Mary McClintic will be open for

...ration. She asked that the Board continue to pay its share of her insurance and pension benefits to her present position at Hillsboro for the 2004-05 school year.

The agenda for the meeting noted that this request was not being recommended by Interim Superintendent Alice Irvine.

Ms. Irvine did not comment on the request but Board member Bernard King said it would not be fair to the school or school system to grant the request. Member Tom VanReenan expressed concern about filling the position if it is to be for only the balance of this year.

Ms. Hollandsworth's request was denied by a 1 - 3 vote. Ruth Taylor cast the vote in favor. (Board President Kermit Friel was absent from the meeting.)

Following the vote, Ms. Hollandsworth gave the Board her resignation, effective October 6. As it was not on the agenda, action on the resignation can not be taken until the next Board meeting.

When the minutes of the special Board meeting on September 9, the meeting where Dr. Patrick Law was employed as the new county Superintendent of Schools, were being considered, Board Member ... questioned why ... not allow ... employment beyond July 1, 2004.

At last week's meeting approval was given to employ Dr. Law until July 1, 2005. Mr. Vance said Dr. Law has been informed of the problem and a special meeting will have to be called to change his employment conditions. No contract has been signed and Ms. Irvine said it has not yet even been prepared.

Norman Alderman gave the Board the news that "we" will be filing new lawsuits, again seeking to remove various members from the Board.

His first target is Mr. VanReenan. Mr. Alderman alleges that Mr. VanReenan's position on the Greenbrier Valley Soil Conservation District board of supervisors at the time he was a candidate made him ineligible to serve on the BOE. Even though Mr. VanReenan has since resigned from the SCD, this does not make him a legal member of the Board, according to Mr. Alderman. That, he said, would ... questions all the votes made by Mr. VanReenan. ... includes the recent election of ... superintendent, which ... 3-2 vote with Mr. ... casting one of the ... votes.

Mr. Alderman ... asking Mr. VanReenan ... from the Board, ... or considered ... of the Board ...

... appointed to their seats on the BOE. Mr. Alderman said he would seek contempt of court rulings against them for this.

Before announcing his plans for the lawsuits, Mr. Alderman had told the Board that should an effort be made to dismiss him from his position in the Board office, he would use all his rights under the "whistle blower" protection law.

The agenda for the meeting called for the Board to meet with Hillsboro School's staff and local school improvement council. It was reported that it had been decided it would be better to have this meeting after the new superintendent is on the job.

Ms. Hollandsworth reported that the improvement council has met and she noted some topics that came up.

First, she noted that Hillsboro teacher Barb Lewis was one the five finalists to be state Teacher of Year. Also, she thanked the Board for providing a teacher at each at each grade level for the school this year.

Their main concern is the roof on the gym which was partially blown off in early July. Ms. Hollandsworth noted that the roof is still leaking and the students are having to use the cafeteria for physical education.

Ms. Irvine said she will ... contact ... said should repair ... gym. The state Board of ... has approved $... for the repair of the roof, gutters, chimney, and to reimburse the county for money already spent, she said. However, she is concerned that the $15,000 allocated for the repair of the floor may not be enough. The roof work will take about six weeks, Ms. Irvine said.

Mr. Vance said there have been rumors going around that the Board is dragging its feet in making the gym roof repairs as part of a plan to close the Hillsboro School. He denied this and stated that as long as he was on the Board of Education, this would not occur.

Roger Trasler reported to the Board on the pre-school program for the three-year-old children with special needs and those who are Head Start eligible. He said at Green Bank and Hillsboro, where there is a low enrollment, the three-year-olds will be combined with the classes for four-year-olds. At Marlinton Elementary services are to be provided by School Days Child Care, he said.

At all sites the four-year-olds will go to pre-school on a two-day one week, three-day the next week schedule, while the three-year-olds will go two days each ... as a result of the frustration felt by members of this and many school boards over the mandates from the federal and state governments to provide services but without providing the funds to carry the ...

Cathy Mitchell, representing the faculty senate at Marlinton Middle School, urged that the principal's position at her school be posted as soon as possible. She said they do not want a temporary person but an effort made to find a permanent principal. She said the staff was disappointed not knowing who will be at the school as acting principal on Tuesday morning.

Mr. Vance assured her that the position will be posted on Tuesday. As to who would be at the school on Tuesday, he said the Board does not know either. Ms. Irvine is working to find an acting principal, Mr. Vance said, but if people say no, there is not much can be done.

It was noted that MMS has had a number of principals in recent years and this problem is an issue that everyone needs to be concerned about and address.

Ms. Irvine gave a brief summary of the financial statement for the 2002-03 school. One bit of good news in the report was a balance of $497,773 at the end of the fiscal year. She said when the budget for the year was prepared, it was estimated the carry-over would be about $250,000. The main reason for the larger figure was greater than expected property tax revenue.

The financial statement was approved.

A question was raised about the $20,000 in Budget Digest money that is to go for band uniforms at PCHS. Maria Hall asked if the money could be transferred to the band boosters group so it can draw interest while the group raises the additional $25,000 needed for the uniforms.

Ms. Irvine said she did not know if this would be possible but would find out.

In other personnel items the Board approved:

* transfer of Patricia Thomp...

... reported that while the policy was out for public review, no comments were received.

Approval was given for the high school to continue the same policy on final exams as the school used for the last school year.

As the meeting ended, Board member Ruth Taylor reminded everyone that we are here to help children and there has been too much "worrying about me, me and trying to find what is wrong with others." "The children are suffering," she stated.

The meeting ended with executive session on personnel.

The next regular Board meeting will be held on October 13 at Green Bank.

Annual wage survey underway

Each year, the West Virginia Division of Labor is required by statute to "investigate and determine the prevailing hourly rate of wages that must be paid to the various classifications of workmen and mechanics that are utilized by contractors that perform construction ... maintenance work on public improvements as defined by ... Virginia Code ...

Anyone who is ... participating in this ... process should contact the ... Virginia Division of Labor at ... (304) 558-7890 and request ... vey forms. Upon that request, you will be sent survey forms and instructions to complete those forms.

Although participation in this process is not mandatory, this office requests that you complete the survey forms and return them no later than October 17. Please complete the survey forms according to the accompanying instructions. Any information submitted after that date will not be considered for the 2004 Prevailing Wage.

SWINE EXHIBIT

Withrow McClintic, superintendent of the Swine Department of the Pocahontas County Fair, wants to give notice to all that now is the right time to begin preparing the pigs and hogs of the Greenbrier Valley for the best exhibit of swine that the Pocahontas Fair has ever had.

The hog industry is a very considerable item of wealth of our people, and it should be a greater one. We do not yet begin to take care of the local markets for pork and pork products Some of our on exhibit at the Fair will awake this interest if any thing will.

There is room for a lot more pigs in Pocahontas county While we may not be able to compete with the corn belt in the production of pork for the great packing houses, there is always a demand at a profitable price for young pigs and shoats and for country cured hams and bacon, lard and sausage.

The Pocahontas Fair has always had a creditable showing of good hogs and Mr. McClintic and the other Fair officers are anxious that this year's pig show will excel all others.

Passing the remnants of a deserted coal mine, we arrived at the logging site—a relatively flat mountaintop sporting lots of cherry, oak, and maple. Dave underlined the fact that the site was far better than the show normally encountered. Two loaders were going. This too, was an exception, but was necessary because the timberstand contained as much pulpwood as sawtimber. "One just can't make the separation fast enough to keep the trucks rollin', explained Lynn, whose primary responsibility is loading.

After only a few minutes on the job the job's nature became more and

Alderman threatens new lawsuits

Hillsboro & Marlinton Mid

The new school year is only a few weeks old, but in addition to hiring a new superintendent, the school system will now need to look for two new principals.

At the Board of Education meeting on Monday, held at the Hillsboro School, the resignation of Fran McLaughlin as principal at Marlinton Middle School was accepted, effective at the end of school on September 22.

Also submitting her resignation was Hillsboro Elementary School Principal Sue Hollandsworth. She took this action following refusal by the Board to grant her request for a leave of absence for the balance of this school year. The purpose of the leave would be to participate in a program for an advanced degree and to do some contract work with the state Department of Education. She asked that the Board continue to pay its share of her insurance and guarantee a return to her present position at Hillsboro for the 2004-05 school year.

The agenda for the meeting noted that this request was not being recommended by Interim Superintendent Alice Irvine.

Ms. Irvine did not comment on the request but Board member sion ruled that there was a conflict due to the stipend (all of $10) members of the SCD board received. Upon receiving this opinion, Mr. VanReenan resigned from the SCD board.

Mr. Alderman then moved on to Mr. Friel and Mr. Vance. He said he has been doing some legal research and claimed to have found case law that forbids someone removed from an office to be reappointed to the same position. He was referring to the lawsuit he filed last year that was successful in having the two removed from the Board based on the state code prohibiting board of education members from holding other "public offices."

However, Mr. Friel and Mr. Vance resigned from the other positions that the court found to be "public offices" and were reappointed to their seats on the BOE. Mr. Alderman said he would seek contempt of court rulings against them for this.

Before announcing his plans for the lawsuits, Mr. Alderman had told the Board that should an effort be made to dismiss him from his position in the Board office, he would use all his rights under the "whistle blower" protection law.

more pronounced. Surely, there was little lost motion. Everybody seemed busy, constantly on the go, making moves count. We said as much, prompting this comment from the master:

"Nobody loafs at dad's house," Dave cracked. "Our truck drivers stay busy at the landing while their trucks are being loaded. They keep logs pushed up with a dozer, help out on repairing equipment, run a saw or do something productive. Kay handles a truck himself and more or less looks after hauling. Lynn's the loaderman. Terry looks after mechanic work. Lynn and Terry also look after accounting and figure the payroll. I'm just here and there. None of our hands knows where I'm gonna turn up next. This keeps 'em on their toes to some degree. I'm a pretty fair parts chaser too."

DAIRY BUSINESS

Not seeing anything in your paper on dairying, I will give you a few items from the Blue Grase Guernsey Farm.

We see farmers bringing butter to town and selling it for 25 and 30 cents a pound. Why not ship the cream and get 45 cents. I think the farmer should give this a trial. It makes no difference whether we have but one family cow or whether we have three or four farm cows to fur nis the family with milk and butter and sell what we don't ne d

First test your your cow and see if she is a paying cow. It takes just as much to keep a poor cow as it does to keep a good one What we want is the most and best milk, the most and best cream, the most and best milk and the most and best profit. Milk that tests 3 per cent per gallon at butter fat selling at 45ct would be worth per gallon 11 6ct, and a cow tests 5 per cent and butter fat selling for 46cts per gallon would be worth 19 3ct, we can see the difference in a good cow and a bad cow.

I wil give a record of two cows for the month of June. One cow made me $17 01, feed and grass $7 04—total profit $9 97 The other cow last month of milking, for she will be fresh in five weeks, averaged $13 20 feed and grass $6 50—total profit $6 70 I think more farmers should go into the dairy business I think with good cows it is profitable.

When the minutes of the special Board meeting on September 9, the meeting where Dr. Patrick Law was employed as the new county Superintendent of Schools, were being considered, Board Vice-president Kenneth Vance announced that it had been brought to the attention of the Board that state code does not allow his employment beyond July 1, 2004.

At last week's meeting approval was given to employ Dr. Law until July 1, 2005. Mr. Vance said Dr. Law has been informed of the problem and a special meeting will have to be called to change his employment conditions. No contract has been signed and Ms. Irvine said it has not yet even been prepared.

Norman Alderman gave the Board the news that "we" will be filing new lawsuits, again seeking to remove various members from the Board.

His first target is Mr. VanReenan. Mr. Alderman alleges that Mr. VanReenan's position on the Greenbrier Valley Soil Conservation District Board of Supervisors at the time he was a candidate made him ineligible to serve on the BOE. Even though Mr. VanReenan has since resigned from the SCD, this does not make him a legal member of the Board, according to Mr. Alderman. Thus, this puts into question all

Their main concern is the roof on the gym which was partially blown off in early July. Ms. Hollandsworth noted that the roof is still leaking and the students are having to use the cafeteria for physical education.

Ms. Irvine said the work to replace the roof should begin this week. The state Board of Risk has approved $38,300 for the repair of the roof, gutters, chimney, and to reimburse the county for money already spent, she said. However, she is concerned that the $15,000 allocated for the repair of the floor may not be enough. The roof work will take about six weeks, Ms. Irvine said.

Mr. Vance said there have been rumors going around that the Board is dragging its feet in making the gym roof repairs as part of a plan to close the Hillsboro School. He denied this and stated that as long as he was on the Board of Education, this would not occur.

Roger Trusler reported to the Board on the pre-school program for the three-year-old children with special needs and those who are Head Start eligible. He said at Green Bank and Hillsboro, where there is a low enrollment, the three-year-olds will be combined with the classes for four-year-olds. At Marlinton Elementary services are to be provided by School Days Child Care, he said.

FROM DR. CANTER

Hon. Andrew Price,
Marlinton, W Va
My Dear Mr Price;

For a number of years I have read every historical and scientific production of your pen which came under my observation.

Having spent the early boyhood years of my life in Huntersville, and knowing Marlins Bottom, and the Beaver Creek and Droop Mountain sections of which you write, and which are reproduced in todays' Charleston Gazette, or rather recalled vividly to memory, I am naturally always interested.

Many of the men of whom you speak were friends of my father, and I remember them very distinctly. Most of the places mentioned have been tramped by my bare feet, and sometimes by the same feet cramped and blistered in dress up shoes.

My mother sleeps on the hill at Huntersville where the first light of the new day falls. Something in my blood binds me to those mountains and valleys Once in a great while I go back for a short season of visiting with the memories that leap out from every nook Sometimes I see a man or woman who remembers a "bad boy" whose name I bear.

I am fond of your manner and style, and am always interested in the subject matter– but most of all I love to ramble in imagination along Knapps Creek and the Greenbrier wher once I dreamed of a great world beyond the rim of the mountains.

Very truly yours,

signed from the [illegible] member of not make him a legal member of the Board, according to Mr. Alderman. Thus, this puts into question all the votes made by Mr. VanReenan. This includes the recent election of Dr. Law as superintendent, since it was by a 3-2 vote with Mr. VanReenan casting one of the yes votes.

Mr. Alderman said he is not asking Mr. VanReenan to resign from the Board since he has never considered him to be a member of the Board. He said a lawsuit will be filed to have him removed from the BOE.

Mr. VanReenan did not respond verbally to the allegations, but provided a written statement that reviewed what he has done since the conflict allegation was raised by Mr. Alderman. Before the election he sought an opinion from the state school superintendent, Dr. David Stewart. Dr. Stewart wrote he found no reason why a member of a SCD board could not run for a seat on a BOE. Based on this, Mr. VanReenan remained in the race and was elected.

After the last Legislature gave the state Ethics Commission authority to rule on such situations, Mr. VanReenan sought an opinion from it. The Commis-

Elementary services are to be provided by School Days Child Care, he said.

At all sites the four-year-olds will go to pre-school on a two-day one week, three-day the next week schedule, while the three-year-olds will go two days each

winter and on front during summer, is common in the Grimes woods.

If any one particular thing distinguishes the job, it'd likely be in planning and coordination of day-to-day routine. While felling, skidding, and hauling is geared to one landing, a full time dozer operator stays busy pushing the next and putting in skid trails and access roads so essential to a high country operation.

"Up here you have to plan ahead or you're gone," said Dave, drawing nods from his offspring as he spoke." Landings and skid trails simply must be laid out and cleared ahead of everything else or you'll bog down and lose

THE CREAM BUSINESS

In one week recently no less than three farmers came to this editor to inquire if I knew of anyone who would buy the butter they had brought to town Each of them had a bucket of as fine yellow country butter as any one could wish to eat There was no sale for it. The stores had more butter than would supply the demand, and the price was down Many of the householders of town have a standing contract the year round for a certain number of pounds of butter each week at a fixed price per pound Shipping butter has not proved satisfactory. Such being the situation there is poor encouragement toward developing the butter making industry as a farm home industry.

A number of progressive farmers have been shipping sour cream. The start was made two years ago. So satisfactory and profitable has it proven that the number of shippers is growing each week. The price received for ur churned butter fat is usually more per pound than butter sells for and the demand for it is unlimited. Last week the price was 45 cents a pound net to the farmer, less twenty-five cents a cow handling charge by the local farmer's co operative warehouse. If preferred the farmer can deal direct with the creamery and save this twenty-five cent charge.

week, Mr. Trusler said. He assured the Board all special needs will be met.

In another matter concerning special education students, a contract with Real Care, Inc., was approved. Under the contract, the company will provide the needed services for a student with diabetes at Hillsboro.

A parent at the meeting stated that her son is supposed to have services four days a week. Mr. Trusler assured her that this will happen.

Several parents expressed that they had been upset by the remark made at the last meeting that the special education programs are going to "bankrupt the school system."

Mr. Vance assured them that the remark was in no way meant to demean students needing special education services, but came as a result of the frustration felt by members of this and many school boards over the mandates from the federal and state governments to provide services but without providing the funds to carry the

Cathy Mitchell, representing

son from pre-school classroom/bus aide at Hillsboro and Marlinton Elementary to special education/bus aide at PCHS

* employment of Christopher Burns as head basketball coach at Marlinton Middle.

* resignations of Valerie Lambert and James Scott as substitute custodians

* employment of Shannon Alderman as substitute teacher

Approval was given for Elissa Taylor to complete her internship for a counseling degree from Marshall University in the county schools. She will be working at Green Bank and PCHS.

Chad Baldwin was approved as a volunteer coach for the volleyball team at PCHS.

Approval was given to the Wage and Hour Regulations policy for the county. Ms. Irvine reported that while the policy was out for public review, no comments were received.

Approval was given for the high school to continue the same policy on final exams as the school used for the last

thing else or you'll [illegible] down and lose time and money. With the trails in, we can instruct individual cutters and skidder operators as to their particular working area. This reduces chances for accidents and causes of harmful bottlenecks, such as skidders meeting on a trail."

Strict ground rules are laid down and followed as to machine lubrication and other preventive maintenance. Heavy work is usually farmed out to area equipment dealerships.

Dave Grimes is proud of his family's logging tradition and the style of the operation today. He's winding down toward retirement, giving up ground to his boys. But nothing could please him more. That's four generations in the same trade. Likely, there'll ultimately be a fifth to keep it alive.

We shook hands [illegible]

A number of progressive farmers have been shipping sour cre m. The start was made two years ago. So satisfactory and profitable has it proven th t the number of shippers is growing each week. The price received for ur churned butter fat is usually more per pound than butter sells for and the demand for it is un limited. Last week the price was 45 cents a pound net to the farmer, less twenty-five cents a cow h: ndling charge by the local farmer's c operative warehouse. If preferred the farmer can deal direct with the creamery and save this twenty-five cent charge.

There is a farmer who lives near Marlinton who has four cows, and his weekly cream check is from ten to twelve dollars. He ships two cans of cream a week. If he made this cream it to butter he would not realize as much money for it and there would be the trouble of churning and butter fixing and then the item of selling it in a market already over supplied.

Another thing, shipping caeam will bring the local butter market up It is a club in the hands of the farmer if he chooses to take advantage of it. When butter is scarce, the demand brings up the price.

Many a Pocahontas county farmer has moved away to a community where they produce and sell milk and

that the special education programs are going to "bankrupt the school system."

Mr. Vance assured them that the remark was in no way meant to demean students needing special education services, but came as a result of the frustration felt by members of this and many school boards over the mandates from the federal and state governments to provide services but without providing the funds to carry the

Cathy Mitchell, representing the faculty senate at Marlinton Middle School, urged that the principal's position at her school be posted as soon as possible. She said they do not want a temporary person but an effort made to find a permanent principal. She said the staff was disappointed not knowing who will be at the school as acting principal on Tuesday morning.

Mr. Vance assured her that the position will be posted on Tuesday. As to who would be at the school on Tuesday, he said the Board does not know either. Ms. Irvine is working to find an acting principal, Mr. Vance said, but if people say no, there is not much can be done.

It was noted that MMS has had a number of principals in recent years and this problem is an issue that everyone needs to be concerned about and address.

PCHS.

Chad Baldwin was approved as a volunteer coach for the volleyball team at PCHS.

Approval was given to the Wage and Hour Regulations policy for the county. Ms. Irvine reported that while the policy was out for public review, no comments were received.

Approval was given for the high school to continue the same policy on final exams as the school used for the last school year.

As the meeting ended, Board member Ruth Taylor reminded everyone that we are here to help children and there has been too much "worrying about me, me and trying to find what is wrong with others." "The children are suffering," she stated.

The meeting ended with executive session on personnel.

The next regular Board meeting will be held on October 13 at Green Bank.

Annual wage survey underway

Each year, the West Virginia Division of Labor is required by statute to "investigate and deter-

operation today. He's winding down toward retirement, giving up ground to his boys. But nothing could please him more. That's four generations in the same trade. Likely, there'll ultimately be a fifth to keep it alive.

We shook hands with the boys and climbed in beside the driver, thinking what a fine morning it'd been, despite the damp and mud. Down the road heading back to Bartow, a burst of sunlight broke briefly through the clouds and fog, reflecting brilliantly on the thousands of water droplets oozing from the leaves. Even in this weather, we thought to ourselves, this country is outstanding. No wonder ole Dave is so attached [illegible], our thoughts revolved to his presence, and the new account he proceeded to bring up from way back when.

Another thing, shipping caeam will bring the local butter market up it is a club in the hands of the farmer if he chooses to take advantage of it. When butter is scarce, the demand brings up the price.

Many a Pocahontas county farmer has moved away to a community where they produce and sell milk and cream. Others have said that if some good angel would put in a creamery plant here they would go into the milk and cream business The truth of the matter is that we have already a better market for cream than if we had an expensive r amery p ant, with heavy overhead, eking out a miserable existence until there were cows in the county to supply a sufficient volume of milk to make a creamery a profitable venture

The conclusion of the matter is that the output of butter is fixed by the strength and willingness and opportunity of the women folks to make butter and the demand for it by local market often over supplied The output of cream is fixed by the number of cows the farm will support and the willingness to milk; the demand for cream is increasing all the time.

4-H CAMP

Board does not know either. Ms. Irvine is working to find an acting principal, Mr. Vance said, but if people say no, there is not much can be done.

It was noted that MMS has had a number of principals in recent years and this problem is an issue that everyone needs to be concerned about and address.

Ms. Irvine gave a brief summary of the financial statement for the 2002-03 school. One bit of good news in the report was a balance of $497,773 at the end of the fiscal year. She said when the budget for the year was prepared, it was estimated the carry-over would be about $250,000. The main reason for the larger figure was greater than expected property tax revenue.

The financial statement was approved.

A question was raised about the $20,000 in Budget Digest money that is to go for band uniforms at PCHS. Maria Hall asked if the money could be transferred to the band boosters group so it can draw interest while the group raises the additional $25,000 needed for the uniforms.

Ms. Irvine said she did not know if this would be possible but would find out.

In other personnel items the Board approved:

* transfer of Patricia Thomp-

Annual wage survey underway

Each year, the West Virginia Division of Labor is required by statute to "investigate and determine the prevailing hourly rate of wages that must be paid to the various classifications of workmen and mechanics that are utilized by contractors that perform construction or maintenance work on public improvements as defined by West Virginia Code §21-5A-1(4)."

Anyone who is interested in participating in this important process should contact the West Virginia Division of Labor at (304) 558-7890 and request survey forms. Upon that request, you will be sent survey forms and instructions to complete those forms.

Although participation in this process is not mandatory, this office requests that you complete the survey forms and return them no later than October 17. Please complete the survey forms according to the accompanying instructions. Any information submitted after that date will not be considered for the 2004 Prevailing Wage.

briefly through the clouds and fog, reflecting brilliantly on the thousands of water droplets oozing from the leaves. Even in this weather, we thought to ourselves, this country is outstanding. No wonder ole Dave is so attached. Quickly, our thoughts revolved to his presence, and the new account he proceeded to bring up from way back when.

This article appeared in the Loggin' Times for March 1977.

Final Settlement Notice

Notice is hereby given that the accounts of Gary Beverage and Mark Beverage, Executors of the Estate of Margaret Beverage, deceased, are before the undersigned Commissioner of Accounts for Pocahontas County, West Virginia, for final settlement.

Given under my hand, this the 19th day of January, 1982.

two sons, Halley and John R Jacobs, Jr., and one daughter, Mrs. Louise Stull, and two brothers and two sisters —Greenbrier Independent.

Mr. M. S. Woods and aged and highly respected citizen of the vicinity of Jacox died suddenly in the early morning of June 18, 1928, aged 80 years and two days, having been born in Clay county, June 16, 1848 In early manhood he came to this neighborhood and wooed and wed Miss Jennett Morrison, the only daughter and child of David and Polly Dearing Morrison. To this union two children were born, both dying in early infancy. Mrs. Wood preceded him in death, lacking but two days of seven months and in the passing of Mr. Woods that family and the family of David Morrison became extinct. He leaves one sister Mrs. Moffett Cutlip, of Beard; one brother, L. Wood, of Loveridge, Greenbrier County and one or two brothers in Clay county, with a wide circle of relatives, neighbors and friends to mourn the loss of a friend. Mr. Woods was an honest, industrious man and had accumulated quite a good property and a good home. He and his wife contributed to the support of both the churches near them and entertained the pastors of same. Mr. Woods never recognized himself as a member of either church but talked to interested persons of having made the necessary prepara-

Mrs. Ruth Ryan

Mrs. Ruth Gayle Ryan, 58, of South Charleston, died Tuesday, February 2, after a long illness.

Mrs. Ryan was an artist and made the sketches of the Pocahontas County Court House and other places in the County. She was here during Pioneer Days for several years.

Carl Harry Gladwell

Carl Harry Gladwell, 69, of Buckeye, died of a heart attack at his home Sunday morning, January 31, 1982.

Mr. Gladwell was a retired business man and a veteran of World War II. He was a member of the Methodist Church.

Born at Spice, May 5, 1912, he was the son of the late Dameron and Fannie McCoy Gladwell, of Droop. A brother, Dennis, and sister, Carrie, preceded him in death.

Mr. Gladwell is survived by his wife, Beatrice Howard Gladwell, twin daughters, Carla Totten, Marlinton, and Sharla Sherman, of Dallas, Texas; a foster daughter, Betsy Clark Nall, of Florida; one grandson, David Totten; and a brother, Virgil Gladwell, of Hillsboro.

Funeral services were held at 2 p. m. Wednesday in the VanReenen Funeral Home by Rev. Richard Newkirk and Rev. Kenneth Cloud, with burial in Mountain View Cemetery.

Freddie Oliver Ryder

SINGING ON DROOP

Beginning at 2:30 p. m., Sunday

August 5th

and every Sundap afternoon in August, 1928 the singers of Pocahontas County will meet at the Battlefield on Droop Mountain for a session of vocal music. No better place for outdoor singing could be imagined. A large chorus is insured from the start.

Morgan Kinnison, of Lobelia, is the leader. Bring your own music books. Vocal music only. Morning and evening church hours will not be interfered with. Everyone is invited.

DIED

Rev. John R Jacobs, pastor of the Ronceverte M. E Church, South, departed this life in the Methodist parsonage, at Ronceverte, after an illness of about two weeks. He had been a member of Baltimore Confer ence, M. E Church, South, for over thirty years, during which time he had filled many of the prominent pas tions for death. He had been in fail ing health for some time, but the day previous to his death was unusu ally well and retired for the night The family living in his home and caring for him heard him in his room early in the morning and when he failed to appear at the usual hour for breakfast they went to his room and found him dead on his bed part ly dressed. His heart that caused

VEPCO Power Project

A number of rumors have been going around about the status of the Bath County Power Project. We talked with a Vepco official Wednesday morning and got the following information.

First, Vepco President William Berry stated last week that the project will be completed by the Vepco and Allegheny Power systems. At the present time the inclusion of the Allegheny System in the project at a 20 per cent level with an option to go to 50 per cent has been approved by the appropriate agencies in W. Va., Va., and Ohio. In Maryland the Public Service Commission staff has recommended that Allegheny's inclusion be approved. The present problem is in Pennsylvania where the Public Utility Commission has issued a

the appropriate agencies in W. Va., Va., and Ohio. In Maryland the Public Service Commission staff has recommended that Allegheny's inclusion be approved. The present problem is in Pennsylvania where the Public Utility Commission has issued a show cause order for the West Penn Company (a subsidiary). West Penn has filed a response to the show cause order and a request for reconsideration.

If the Maryland Commission gives it approval quickly and the Pennsylvania Commission responds to West Penn in a reasonable time and gives its go-ahead, then the planned 1982 construction schedule will be continued. This means that the present slow buildup of employment will continue. The situation is uncertain until the two commissions act.

The Department of Welfare office on Third Avenue will be closed by March 1

A HIKING PARTY

A hiking party consisting of Annis Cole, Polly and John Gay, Eva Beverage, Pearl Cochran, A. W. Hill and daughters, Stella, Lelia and Orda, D. P. Barnes and daughters, Glenna, Pearl and Mary assembled together at the old red mill below W. McClintic's one morning last week and went up by Mr. McClintic's house, took a look at the fine fish in the pond, and some of the party peeped in and saw the silver foxes as we passed by.

The party proceeded on to the top of the mountain and along the top until we reached the famous high rock overlooking the east branch of Stamping Creek. Some of our party showed us a cleft in the cliff when we were some distance below it and said that we could go up through it It looked impossible and some of us said we would go around, but when we got nearer the opening was two or three feet wide and we ventured to go through and landed safely on top. This rock is a wonder. The high cliff rent in twain from top to bottom. From the top we had a grand view out over a great expanse of country toward the east and south, including the town of Hillsboro and the Little Levels. None but those who have visited the place can realize the thrill it gives one. We ate our dinner on top of this rock, then packed our load and made our way to the Barlow hacking, then down the mountain to Cranberry river and down that stream to within about a mile of the noted Cranberry Glades where we struck camp for the night.

There is an old adage and a true one that "A friend in need is a friend indeed." As we were preparing to camp in the open our friend John Roberts, the only man living in that country, a stranger to us all, heard us and came to us and directed us to a camp with a good roof, for which we were more than thankful. He also told us the best way to get to the Big Glade and another way to get out of there, as we had somewhat of a romantic spirit and not caring to go back the way we came but to see more new country. This was the first night of camping out with most of our young folks, but all enjoyed it. Next morning we we went down

IRREGULARITIES AT THE AUDITOR'S OFFICE

Details of alleged irregularities in the department of State Auditor John C. Bond, at the State Capital, have been given out by Governor Gore. An investigation made by Attorney General Lee and others reveals instances of checks drawn to relatives of the auditor, with the question raised as to whether these relatives performed any service to the State, checks drawn to other persons when there appeared to the attorney-general no record of services performed, checks cashed by Mr. Bond in some instances, and in two cases by his young son, and a long list of checks by negro messengers and janitors in the department, who said they carried the money to the auditor, with some instances among these in which investigators believe the names of payees are fictitious.

The report is divided into two parts, the first dealing with transactions since March 4, 1925, which the attorney general found were in the discretion of the auditor and did not warrant executive action, and the second, dealing with checks drawn before that date, in Auditor Bond's former term. Concerning these he recommended the filing of formal charges and discussed the possibilities of executive action.

Checks are said to have been drawn from the wrong fund at times, and others to persons believed to be sprious.

Details cannot be given until a thorough investigation is made; and this Governor Gore has directed.

Official jealousy, political considerations, disappointments of office seekers, attempts to evade the payment of claims against the State, hostility of persons prosecuted for arson frauds, and those who try to "live on their influence," were credited by State Auditor Bond with causing the charges brought against his official conduct in a statement in which he first broke the silence he has maintained since the first publication of news of these charges.

involvement of community citizens in its development and operation.

—

Denmar Hospital

The report recommends:

—an advisory board of local residents be established

—an agreement be reached with Pocahontas Memorial Hospital for lab and X-ray work to be done at PMH

—most importantly, Denmar should hire qualified county physicians to serve as staff doctors, particularly important if the doctors were also practicing at PMH as a way of increasing referrals to PMH and coordination between the two facilites.

NO GOVERNMENT BY CHECK BOOK

Arthur Capper, (R.), Senator from Kansas, is the latest recruit to the proposed coalition of Democrats and insurgent Republicans who will oppose the seating of Frank L. Smith and William S. Vare, Republican nominees for Senator from Illinois and Pennsylvania, if they should be elected in the face of disclosures of large primary campaign expenditures.

In the current issue of Capper's Weekly Mr. Capper declared: "I would doubt if either Vare or Smith will be seated in the Senate if elected The Senate is not likely to seat any person who has been nominated or elected in the face of disclosures of "Government by check-book," declared Mr. Capper, "should not be countenanced by the Republican party in either of these states.,'

"There can be no question, it seems to me, of the duty of the Republican organization of Pennsylvania and Illinois owes to the country. They should withdraw Vare and Smith," he asserted. He further suggested that the people of these states would be justified in demanding another primary "where nominations may be untainted by money."

The chorus of senatorial protest against the expenditure of approximately $3,000,000 in Pennsylvania and $1,000,000 in Illinois during the primary contests for nomination of a Republican Senator has been led by William Borah (R.), Senator from Idaho, and George W. Norris (R.), Senator from Nebraska.—Weston Independent.

THE NICKLE CAME BACK

An outstanding argument advanced by those who advocate spending your dollars at home, is that they are likely to come back, whereas dollars spent away from home never return. It seems that a nickle spent at home likewise has this habit of returning to the spender. Mrs. Veneta Baily, of Mabton, Wash., carved her initials on a five cent piece before spending it for an ice cream soda. Inside of two weeks she received the nickle in change. She made a little notch in the rim of the coin this time and spent it again. Two months later she again received the nickle from a bank. She added another notch and again spent the nickle.

It was in 1916 that Mrs. Bailey spent the nickle the last time. She had forgotten all about it, but the other day while walking to the railway station, she saw a nickle lying on the sidewalk and picked it up. It bore her initials and had the two notches in the rim. She has her own nickle back again.

It is hardly possible to avoid having the money returned to you if it be spent in your own commutity. It is only when it is carried away and spent for necessaries, comforts or luxuries that you should kiss it goopby forever.—Petersburg Index.

As if Roadkill wasn't enough

New activities spice up this year's festival

The Autumn Harvest Festival in Marlinton, known primarily for its tongue-in-cheek West Virginia Roadkill Cook-off, is serving up a number of new activities this year to add even more flavor to the event. The festival will begin in downtown Marlinton on Saturday, September 27, at 10 a.m.

Mitchell Chevrolet is sponsoring a car show for antique cars, motorcycles, trucks, fire trucks, tractors and classic cars. There will be no judging, but People's Choice trophies will be given for first and second place. The first 70 to register will receive dash plaques and a participation trophy. Registration starts at 9 a.m. at Mitchell's Chevrolet on Eighth Ave.(Main Street).

In keeping with the traditions of a country fair, the festival will include agricultural and homemaking exhibits in the historic Pocahontas County Opera House on Third Ave. starting at 10 a.m. Judging will be at 9 a.m. For information about entering items for judging, contact Rene White at (304) 799-4035.

Also new is a tractor and trailer pull to benefit the Hillsboro Volunteer Fire Department. It will be held at Stillwell Park at 6 p.m. Admission is $6 for adults and $4 for children ages 6-12. Children under 6 free. For further information about the Truck and Tractor Pull, contact the Hillsboro Volunteer Fire Department at (304) 653-4636 on Thursday evenings from 7 to 9 p.m., or call Chris Rose at (304) 653-8508 or Matt Workman at (304) 653-4753.

THERE'S SOMETHING FOR everyone to do and see at the Autumn Harvest Festival and Roadkill Cook-off. Doug Bernier of Marlinton is a perennial favorite with his cider press top right). book of literary gems all right. Being as this is Institute week we reprint a selection in verse from it, "The Village Schoolmaster," by Goldsmith.

B. W. Gorrell, of St. Marys, is in Pocahontas County, as the State Organizer of the Junior Order American Mechanics. He is also visiting the parents of his wife, Mr. and Mrs. Ellis N. Bussard, of Knapps Creek. Mr. Gorrell is not a stranger in Pocahontas county by any means. From 1910 to 1918 he was in the employ of the Warn Lumber Company. In the latter year he received a broken back in an accident on the Warn log train. His injuries were thought to be fatal, but he fought his way back to health. His legs are helpless, but he is making his own way in the world, nevertheless. In traveling over the State organizing Mechanic lodges Mr. Gorrell travels in his own car. He cannot drive it of course but he hires drivers as he goes from town to town. About the towns he goes in a wheeled chair, which he propels by means of a couple of cranks. In his home town he fills the office of sergeant and collector of taxes.

Robert Oleson, aged about twenty years, was before Squire Smith Tuesday morning, on a charge of forgery. He had signed McKinley Waugh's

Letter

To the Editor:

In last week's paper were two letters that made me see I, as a citizen had to write in about my views on both subjects that Phil McComb wrote in about, also, Willard Smith.

My views on these two subjects is one word, Fight, not for what we believe is right, but fight for our rights that have already been fought for by our forefathers. As stated in Mr. McComb's letter, let us have a government of and by the people.

The loss of personal and civil rights and liberties had been the reason for rebellion against Britain. Specific guarantees of these rights are given in the first ten amendments, which were added to the constitution in 1791. The Bill of Rights as they stand today protecting rights which

The loss of personal and civil rights and liberties had been the reason for rebellion against Britain. Specific guarantees of these rights are given in the first ten amendments, which were added to the constitution in 1791. The Bill of Rights as they stand today protecting rights which are considered fundamental for a free people. It states no person shall be deprived of life, liberty, or property without due process of law, states right to bear arms. Note this amendment is often cited as a constitutional right by those opposed to gun control laws.

In my opinion the right to own property is already our contitutional right so when you purchase a gun it is your property and not to be deprived of it without due process of law. Amendments 9 and 10 protect the rights of the people and the states by giving them all powers not specifically delegated to the federal government. It was a safeguard against too powerful a federal government. The powers not delegated to the U. S. by the constitution, nor prohibited by it to the states are reserved to

rights of the people and the states by giving them all powers not specifically delegated to the federal government. It was a safeguard against too powerful a federal government. The powers not delegated to the U. S. by the constitution, nor prohibited by it to the states are reserved to the states or to the people.

Our civil liberty was won by a hard struggle. Civil liberty means our government is based on the idea of the consent of the governed. Taking an active part in local, state, and national government is the mark of freedom-loving people. Civil liberty as we understand it is non-existent in the Soviet Union, The People's Republic of China and other Communist countries.

In the famous words of Patrick Henry, "I know not what course others may take but, as for me, give me liberty or give me death!

Randolph Citizens Ask Commission To Complete 50 Mile Gap on Trail

Efforts to have the Seneca Trail completed have revived, with George Ward, Mill Creek banker, taking the lead in insisting that the trail should be completed and that it is useless to have a road virtually completed at each end, with a fifty-mile gap in the middle such as is now to be found between Valley Bend and Marlinton. The trouble appears to have been that the State Road Commission has spent so much of its money in some of the large counties of southern West Virginia that there has been nothing but the mere county allotment in some other counties.

It is pointed out by Mr. Ward that "The road extends from Red House to Bluefield and each end of it is in sight of completion. It is impossible, however, to travel over a road with complete ends and no middle, and that is where you are called upon to fill the gap.

"From Valley Bend, in Randolph county, to almost within Marlinton in Pocahontas county, is a fifty-mile gap of grade without a foot of surfacing. It is a tremenduous gap when you consider the total length of the trail, and the grading of it was completed only last year.

"The result is not what the effort called for," continues Mr. Ward," because it is not a through road at all and can never begin to render the service that it should and would render as a completed unit for tourists and long distance traffic, as well as for local travel."

The Seneca Trail is probably one of the most important in the state but there is probably a longer gap in it than in any other state road so that the road can be used only during half of the year, so that both through and local traffic is halted during a part of the year.

From the best information obtainable no money is to be expended upon the Seneca Trail in Randolph county this year and it is that fact which is giving Randolph people considerable concern. They are unable to learn of the proposed expenditure of any money in Randolph county this year and it is one of the few counties in the state that is without a hard-surfaced road to no less than four different county seats—those of Pendleton, Upshur, Pocahontas and Webster sothat many Randolph people feel that they have received less than perhaps any other county of the state especially in view of the fact that it is the largest county in the state.—Randolph Review.

Historic vehicle donated to Cass Scenic Railroad

A 1930 Chevrolet Express truck has recently been donated to the Cass Scenic Railroad State Park by Elizabeth Boehner in memory of her late husband Ken Meadows.

Following her husband's death from cancer in November 2001, she was unsure what to do with the truck. Following an inspection of the vehicle by people from the Smithsonian Institution and being told it is very rare and of museum quality, she got the idea of donating it to the railroad. Ms. Boehner noted that this brought together two things her husband loved, antique vehicles and the Cass Railroad.

The original owner of the truck was the Hammond Sheet Metal Company in Fort Smith, Arkansas. When World War II broke out it was placed in storage in back of the sheet metal shop until about 1949 due to high gas prices. The vehicle was then sold to the Sleeper Radiator Shop, also in Fort Smith. Mr. Sleeper sold the truck in 1970 to Bobby Brock, of Greenwood, Arkansas, who apparently hardly ran it.

Mr. Brock sold the truck in 1993 or 1994 to Charlie Bishop, of Greenwood. By that time the tires and wood on the vehicle had developed some dry rot. Mr. Bishop stripped the truck to its frame and replaced the worn parts. He later sold the truck to Chuck Stanick, of Greenwood, who sold it to Mr. Meadows in the spring of 2001.

The odometer reading at this time was 35,645. The truck has always been kept in garages and only used for parades and shows since the restoration of the mid-90s.

Except for the wood and some of the mechanical parts that have had to be replaced, the truck has most of its original components. The original jack is behind the seat. In the 90s restoration, all the metal was cleaned with a water sandblaster. The present forest green color was the original truck color.

Mr. Meadows was born in Princeton and graduated from Princeton High School in 1968. He moved to Erie, Pennsylvania, and worked in a steel mill for about 18 months. He then returned to Princeton and attended Concord College for two years. Mr. Meadows worked in a variety of construction trades around Princeton and eventually opened his own residential remodeling business. He moved to Maryland in 1986 where he worked as a building engineer in Rockville for 15 years. At the time of his death he worked for the JBG company as Chief Engineer for the Twinbrook Metro Region.

His father, Sam, who is a professional musician and has played with Bill Monroe and Lester Flatt, now lives in Milton. Mr. Meadows has two brothers and one sister.

He and Elizabeth were married in 1989. She reports that one of the things that attracted them was both wanting to build a cabin in the mountains of West Virginia. In 1992 the couple started the realization of that dream by buying land at Arthur, near Petersburg. The two, with the help of her father, built the house they have been using on weekends and during vacations.

Mr. Meadows had two hobbies, woodworking and restoring antique cars. He starting restoring cars with a 1923 Model T Ford his wife bought at an auction at Harmon. Next was a 1949 Chrysler Windsor, a wedding anniversary present. The 1930 truck was the next old vehicle in the collection.

Ms. Boehner said her husband loved the vehicles and built a garage in Arthur just to have a place to put them. He would take them out for parades and car shows and the occasional Sunday afternoon drive.

The couple traveled all over West Virginia, visiting the state and national parks and forests, with the Cass Railroad his favorite, she said.

After her husband's death, Ms. Boehner felt she would not be able to keep the vehicles, due to health problems of her parents. An ad in the *Washington Post* brought a response from the Smithsonian. They were working up an exhibit on Route 66 and the Depression and looking for a particular type of Chevy truck. Her husband's truck wasn't exactly what they were looking for, she said, but they told her of is being rare and of museum quality.

"Ken and I both tried to promote West Virginia and to be a part of the Petersburg community. West Virginia is an undiscovered jewel that so few people in the Washington/Baltimore area are aware of. Donating the truck to Cass seemed to tie together so many things that Ken was interested in. I just knew that the truck was supposed to go to Cass," she said.

Ms. Boehner works for the Montgomery County, Maryland, government where she is the Director of the Area Agency on Aging.

A NEW ADDITION to the historic collection at the Cass Scenic Railroad State Park is this 1930 Chevrolet Express truck. It has been donated to the park by Elizabeth Boehner in memory of her late husband, Ken Meadows.

years when you were here
Now that God has called you home
I feel oh so alone
But I know you are happy
There in your heavenly home
So I'll go on loving and missing you
Until He calls me to come and join you and Dad
On that golden throne
Where there will be no more sorrow or tears
Just happy birthdays all through the years

Missed by your Daughter
Esther O. Kellison Eberle

Birthday

Congratulations, Henry, Jr. on your 21st birthday. Love you have many more.

Your family

In Loving Memory

In loving memory of my brother, John (Buck) Dep... departed this life Feb... 1974.

You are gone but not forgotten
And as dawns another day
In our lonely hours of ...
Thoughts of you are always near

You left memories to ...
Bearing fruit for years to come
In the lives of those who ... you
Precious memories of ... that are gone

Thinking of the thought...

and national parks and forests, with the Cass Railroad his favorite, she said.

After her husband's death, Ms. Boehner felt she would not be able to keep the vehicles, due to health problems of her parents. An ad in the *Washington Post* brought a response from the Smithsonian. They were working up an exhibit on Route 66 and the Depression and looking for a particular type of Chevy truck. Her husband's truck wasn't exactly what they were looking for, she said, but they told her of it being rare and of museum quality.

"Ken and I both tried to promote West Virginia and to be a part of the Petersburg community. West Virginia is an undiscovered jewel that so few people in the Washington/Baltimore area are aware of. Donating the truck to Cass seemed to tie together so many things that Ken was interested in. I just knew that the truck was supposed to go to Cass," she said.

Ms. Boehner works for the Montgomery County, Maryland, government where she is the Director of the Area Agency on Aging.

Banana Employed by the Serpent in Eden?

"Early inhabitants of the East believed that the banana plant was the source of good and evil and that the serpent which tempted Eve hid in a bunch of the fruit," according to W. T. Pope of the Hawaii experiment station of the United States Department of Agriculture.

Undoubtedly this legend influenced the early classifiers who designated two species of the plant as musa paradisiaca (fruit of paradise) and musa sapientum (fruit of knowledge). The common name, "banana," was adopted from the language of an African Congo tribe, and first came into use during the Sixteenth century. Prior to that time the fruit was called "apple of paradise" and "Adam's fig."

The name "banana" seems to have been borne for a long period by the fruit, which was eaten raw. The term "plantain" was given to a variety which, though closely related to the banana, is edible only after being cooked.

The generic name "Musa" for the banana group was bestowed by the botanist Linnaeus in honor of Antonius Musa, a learned physician of the early Roman empire.—Chicago Journal.

Honored

Everett W. Dilley was recently honored with a pin for 25 years of service with the United States Postal Service.

Mr. Dilley began his career at the Dunmore Post Office in August 1956. In 1975 he was transferred to the Marlinton Post Office, due to the two Rural Routes being consolidated at Dunmore. He also worked as a city carrier and clerk.

Upon the retirement of Bernard Galford as Rural Carrier at Dunmore, Mr. Dilley returned to Dunmore November 1, 1980.

CUMMING'S CREEK NEWS BUDGET

It still continues rainy and the crops in this section are in much need of cultivation.

Several of our young folks attended the community meeting at Huntersville, Wednesday night, of last week. All report a good time.

The Cummings Creek 4-H club put off a stunt with much enthasiasm at the community meeting which was much enjoyed by all present.

Miss Vera Buzzard who has been employed at Marlinton for some time has returned to her home.

Miss Carrie Alderman spent sunday with her sister, Mary, at Huntersville.

Mrs. Clarence McComb and little son, Edgar, have been visiting her mother at Covington, the past week.

J. H. Doyle, of Huntersville, was in this section last week installing telephones for some of our folks.

Miss Ruth Bare, of Keyser, spent a few days with Mrs. Agnes McComb the past week.

Merrick and Henry Alderman and Waldo Buzzard heve returned from an extended trip to Elk river. They report a good time and lots of fish.

Mr. and Mrs. A. H. McComb spent Sunday in Marlinton.

Thomas Alderman who is employed at Hillsboro, spent a few days with home folks here.

J. S. Lee has his residence well under construction and expects to complete it soon.

Low Crime Rate

Pocahontas County had the fourth lowest crime rate in West Virginia in 1981 with a rating of 6.45. This number is the number of felonies per 1,000 population.

McDowell County had the lowest crime rate with 4.64 felonies per 1,000 people. The highest crime rate was in Cabell County with a rating of 70.24. Kanawha was next with 50.11.

Other area counties were as follows: 7-Greenbrier, 7.11; 9-Pendleton, 8.34; 10-Monroe, 8.36; 12-Nicholas, 8.85; 16-Webster, 9.71; 34-Randolph, 14.19.

DUNMORE TO HAVE LIFE CONFERENCE

A Country Life Conference will be held at Dunmore September 14, 15, and 16, it was announced the first of the week.

Starting Thursday at 7:30 P. M. the first sessions of the conference will be held in the Presbyterian Church, with Harry Moore presiding.

The first session will be a community Program on Schools, by Mr. and Mrs. J. K. Arbogast, C. C. McLaughlin and Jamie Campbell.

Following this will be a dialogue entitled "The Census Taker", a play, "Bertha Brings Home the Bacon" by the Arbogast trio, a dialogue, Ham and Sam, and a closing talk by C. E. Flynn, County Superintendant of Schools.

Friday's program will be held in the Methodist Church with Harry Moore presiding. Devotional by Rev. George Mauze, followed by special music. J. Haynes Miller, county agent, will talk on A Country Life Conference for Dunmore. Committees will report, and the community will be scored by Rev. L. Reggleman, after which Rev. Reggleman will deliver a sermon.

On Saturday at 2:30 P. M. a flower show will take place under the auspices of the Community Spirit Committee, and the Community will be scored.

Saturday night's program will be held in the Presbyterian Church. Devotional by Rev. G. E. Pope, followed by community singing. Mrs. John Pritchard will outline the community activities for 1928-29 and Rev. Reggleman will deliver a sermon.

The final session will be held starting at 11:00 A. M. Sunday at the Methodist Church. J. Haynes Miller will talk on the Score for Dunmore, and Rev. Reggleman will deliver a sermon.

OFF FOR SCHOOL

The following young people have left or will leave during the next week for school: Alfred Edgar, Edward Rexrode,

prize, $3.00 in cash, Mrs. Kathaleen Vaughan second, $2.00, and Mrs. F. M. Sydnor third, $1.00.

For years and years the women of Marlinton have prided themselves on the beautiful flowers they grew, but never before have they had a chance to show them to the public, except to invite them to their flower garden and show them around. The Community Club, conceiving the idea that to further the growing of flowers, a flower show would be the thing and arranged to have the exhibit and invite the general public to view it.

Those entering one or more exhibits were: Mrs. J. M. Bear, Mrs. C. S. Kramer, Mrs. Kathleen Vaughn, Mrs. Dolly Richardson, Mrs. W. H. Hiner, Mrs. R. S. Staton, Mrs. F. M. Sydnor, Mrs Ada Lancaster, Mrs. Calvin W. Price and Mrs. Amon Wooddell.

Five judges were selected to look over the exhibits carefully and award prizes for the best three. The judges were Mr. E. H. Wade, Mr. Robert Kramer, Mr. Harry L. Byers, Miss Lucille Gibson, and Miss Fleeta Lang.

Starting at 9:00 o'clock in the morning, and ending late in the afternoon, interest in the show never ceased. A roster of those entering to look at the exhibits was kept and when the show was over more than fifty visitor's names were recorded. About fifty more, who did not register, are said to have been among the visitors.

HOSPITAL NOTES

Mrs. Ira D. Brill, city, who has been taking treatment in the hospital, was abble to go home Sunday.

Mr. Wood Cooper, of Gormania, who is taking treatment, is improving.

Mr. Sterl Sharp, who suffered a cut under the arm and brbuises in an automobile accident Tuesday, is resting comfortably.

Rosser Wickline, of Spice, is recovering nicely from an operation for appendicitis.

Mr. William Grose, of Huntersville, who underwent an operation for appendicitis, is improving.

Mrs. Asa Barlow, who is taking treatment, will be allowed to sit up today, Wednesday.

Dorothy Turner, two year old

28 CANDIDATES REPORT FOR HIGH SCHOOL FOOTBALL

With but sixteen working days until the first test of strength, the Edray District High School football machine, under the guidance of Paul Lord, coach, started practice yesterday, and will undergo daily workouts on the high school athletic field.

Monday, with the opening of school Coach Lord called the candidates together and talked things over. Twenty-eight reported. It is thought that a crack team can be picked from this number.

This year promises to yield one of the best teams from Edray District High School to have ever graced the gridiron. Thirteen "old-timers" are in the lineup. Five of this number played on the first team last year, and eight played on the second team.

Those listed as "old-timers" are: Randolph Kenney, Glen Shinnaberry, Reed McNeill, Roscoe Dilley, Layman Davis, Edwin Coyner, Sam Neel, Ralph Hebb, Fred Wilson, Everett Herold, Jr., Hilbert Hayslett, Chas. Miles and Jim Wilson.

Among the fifteen new candidates who have lined up for trial, there is to be found some hefty material, Coach Lord states.

Those listed as "old-timers" are: Randolph Kenney, Glen Shinnaberry, Reed McNeill, Roscoe Dilley, Layman Davis, Edwin Coyner, Sam Neel, Ralph Hebb, Fred Wilson, Everett Herold, Jr., Hilbert Hayslett, Chas. Miles and Jim Wilson.

Among the fifteen new candidates who have lined up for trial, there is to be found some hefty material, Coach Lord states.

The opener this year will be with Hillsboro at Hillsboro on September 29th.

Although the schedule is not yet completed, four other stiff games, Anstead, Ronceverte, Alderson and Rainelle have been contracted.

Coach Lord arrived in Marlinton Friday from the Spears-Henderson coaching school of D. & E. In this school he fattened himself on good coaching ideas. During the next few days the local football machine will be given strenuous tryouts on the latest in football playing, and it is thought that they will grasp enough of it before the season opens to cause opponents to find "tough sledding" in each clash.

the latest in football playing, and it is thought that they will grasp enough of it before the season opens to cause opponents to find "tough sledding" in each clash.

FROST

Mrs. Taylor Townsend is a very sick woman at this time. Her friends hope for her speedy recovery.

Cornelas Bussard had his shoulder dislocated a few days ago. He came in contact with Mr. "buck" which proved too much for him. Dr. McCutchin set the shoulder.

Clay Dreppard and family and Press Dreppard and family attended the Staunton fair.

J. B. Miller and a Mr. Barnes, of Broadway, Va., spent a few days with Mr. Jack Townsend last week. They are buying cattle and calves.

Plenty candidates around for the past few days, shaking hands.

Mrs. Willard Weatherby and son, Willard, Jr. and daughters Misses Marion and Inez Gregory, of Russell, Pa., came for a few weeks visit and took in the County Fair. Mrs. G. A. Briggs and little son, Raymond, accompanied them, but did not get to attend the fair owing to the illness of her little son. Mrs. Briggs is a daughter of Dr. and Mrs. G. M. Jordan. Mr. Roland Sharp accompanied them on their return and will spend a few weeks. On his return he will go to Athens College where he will will attend another year.

Dr. Jordan and Russ Chestnut, were in the Valley of Virginia a few days last week. They report good crops.

Mr. Houdyshell and family of Elkins, W. Va., were visiting Mr. Houdyshell's uncles, Melvin Sharp and Mr. Clay Dreppard and friends. They returned Sunday evening.

THE COUNTRY NEWSPAPER

J. C. Holton, Mississippi state commissioner of agriculture, recently paid a worthwhile tribute to newspapers that express graphically the general public for the press.

"I have always appreciated the power of the press, more especially the 'country' press," said Mr. Holton. "The home papers carry the home news, and are read from cover to cover by those whose first interest is in home affairs. They reach the people and constitute a powerful influence of public sentiment. . .

"A wonderful factor for good is the country newspaper; worthy of the pride and support of folks at home, an avenue of commercial entrance to those who would sell their goods to our people. President T. L. Turner in his annual address eloquently described its importance in these words:

" 'Out yonder stands a locomotive on the railroad track. Everything about it is in order; water in the boiler, coal in the tender, engineer at the throttle; but it can't move. All it lacks is steam. Remove the newspapers from Mississippi, take away the 'steam' and this state would soon be a state of idle people; its credit gone. Weeds would grow in the streets; our farmer would look for pastures newer, manufacturers would depart from us, and our people would seek new fields of labor.' "

The "home town" paper is an integral part of the lives of the people it serves. It has been a tremendous factor in building up an American spirit and consciousness, and in turning public opinion into wise avenues.

Who will never be forgotten

G. H. S. DEFEATS MARLINTON

Greenbrier High School waded through the season s fifth game, against Marlinton High School on Island Park grid, Ronceverte, Friday, with a victory of 6 to 0. About 500 people thronged the field and witnessed the most exciting game the local eleven has taken part in for some time. Both teams were in fine condition. Marlinton made the most first downs, but Greenbrier made the most and longest single runs. The touchdown was achieved in the first quarter, and Joe Sawyers, starring as Greenbrier's full back, having crossed the line for that one, was about to make another when in the third quarter he got loose for 50 yards, but stepped outside near the ten-yard line.

Joe Sawyers, Julian McMann, and Luther Kramer were the high lights of Greenbrier's team, while Kenney was outstanding for Marlinton.

Commissioner of Marwhere he plead guilty and was itted to the Charleston jail. r was also taken to Charleston. Saturday, the 20th, the same made a raid on Meadow in Greenbrier County and de about eighteen hundred gal mash and two stilling plants, the stills which has been hast-

DANGER PASSES IN MARLINTON

State Sanitary Engineer Tisdale Reports Investigation of Typhoid Fever Outbreak.

"There is no occasion for alarm or for anybody to stay away from Marlinton on account of typhoid fever," it was declared Saturday by E. S. Tisdale, state sanitary engineer, on his return from Marlinton, where he made a thorough investigation of the reported outbreak of fever.

Engineer Tisdale reports there are now 16 persons in Marlinton who have had or have typhoid fever during the present outbreak. He declares there is no danger of contracting typhoid fever by going to Marlinton and that there is not likely to be more than one or two scattered cases that will develop.

The city water supply is safe, he states. Bacteriological and chemical tests prove that it is safe and the state health department urges that it be used rather than water from wells and springs in the vicinity of Marlinton.

For a short time about September 20 and 21, he says, the city water supply became contaminated on account of the fautly operation of the filtration plant. This has been corrected," he reports. Changes have been made in operation methods and with the new system, further trouble will not occur. A system of record keeping checked by the health officer and by the state health department, will insure the safety of the city water at all times.

Tests of the Marlinton city water made on October 10 at the state hygienic laboratory in Charleston show the water to be safe.

The dairies supplying milk to the city have been examined and found in good condition. The city presents a neat, clean and commendable appearance, Engineer Tisdale says, from the standpoint of sanitation.

...tas Cim...

...4954, FEBRUARY 18, 1982

...s
...r
...eived by

Engineer Tisdale declares, is that neither the town nor the county has any full-time trained health officer and no full time public health work is being carried on. The town and county, he declares, should jointly put on a full time health unit, like 15 other West Virginia counties just as soon as humanly possible, for the purpose of preventing disease. It can be done, he said, economically.

DURBIN NEWS

Mr. J. W. Goodsell is building an annex to the Goodsell Garage in Durbin which will afford a storage space of 26x58 feet, also a store room 18x 58. This building will be completed in about two weeks and will be quite an addition to the town.

—

Henry C. Astin

Luther Kramer were the high lights of Greenbrier's team, while Kenney was outstanding for Marlinton.

OFFICERS CAPTURE CAR WITH BOOZE

George Kershner, Driver of Car, is Placed Under Arrest; Another Raid is Made in Greenbrier Co.

(Special to The Journal)

Last Friday, October 19th, A. C. Allman, Federal Prohibition officer, and H. G. Summerville, State Prohibition officer, of Charleston and L. S. Cochran, Prohibition officer, of Cass, captured George Kershner driving a five passenger Chrysler car containing six gallons of moonshine liquor. Kershner was brought before A. E. Smith, U. S. Commissioner of Marlinton where he plead guilty and was committed to the Charleston jail. The car was also taken to Charleston.

On Saturday, the 20th, the same officers made a raid on Meadow Creek in Greenbrier County and destroyed about eighteen hundred gallons of mash and two stilling plants, except the stills which has been hast-

Remains of the mill draped over the power shaft that ran beneath the building. The engine house is in the smoke in the background.

Cass Mill Destroyed

Another piece of the history of Cass and the once major lumber operation there disappeared early Tuesday when the saw mill was destroyed by fire. The fire was discovered about 2:30 a. m. Responding to the fire were men and equipment from Cass,

Letter to the Editor

Cass Mill Destroyed

Another piece of the history of Cass and the once major lumber operation there disappeared early Tuesday when the saw mill was destroyed by fire. The fire was discovered about 2:30 a. m. Responding to the fire were men and equipment from Cass, B-F-D, NRAO, and Marlinton Departments.

The mill building was beyond saving so efforts were concentrated on protecting the adjacent water tank which is used by the Cass Railroad. The fire was under control by 4 a. m.

The cause of the blaze is unknown. The State Fire Marshal's office will be investigating.

Hospital Board

The Pocahontas Memorial Hospital Board met for a regular meeting Tuesday.

MRS. LILLIE SPRIGGS DIES

Mrs. Lillie Spriggs, one of Marlinton's most prominent colored women, died Sunday morning at her home off Seneca Trail after a brief illness from typhoid fever.

Mrs. Spriggs was born in Greenbrier county, a daughter of Amos and Harriet Crawford. She was converted in early life and became a member of the Methodist Church, in which she served as a member of the Ladies Aid and Superintendent of the Sunday School. She was also an active member of the Woman's Club.

Mrs. Spriggs is survived by her father, two brothers, two sisters and two daughters and many other relatives and friends in whose memories her life and character live on.

She was a mother of whom we can truthfully say that her strength and honor were her clothing. As a counselor she opened her mouth with wisdom and in her tongue was the law of kindness. She looked well to the ways of her household and never ate the bread of idleness. It may be well said "Lord, give her the fruit of her hands and let her works praise her."

Funeral services were held at Horrock on Monday. X X.

Bike-A-Thon

The Central Regional office of St. Jude Children's Research Hospital announced today that Ms. Sola Arbogast has agreed

ton's most prominent colored women, died Sunday morning at her home off Seneca Trail after a brief illness from typhoid fever.

Mrs. Spriggs was born in Greenbrier county, a daughter of Amos and Harriet Crawford. She was converted in early life and became a member of the Methodist Church, in which she served as a member of the Ladies Aid and Superintendent of the Sunday School. She was also an active member of the Woman's Club.

Mrs. Spriggs is survived by her father, two brothers, two sisters and two daughters and many other relatives and friends in whose memories her life and character live on.

She was a mother of whom we can truthfully say that her strength and honor were her clothing. As a counselor she opened her mouth with wisdom and in her tongue was the law of kindness. She looked well to the ways of her household and never ate the bread of idleness. It may be well said "Lord, give her the fruit of her hands and let her works praise her."

Funeral services were held at Terrock on Monday. X X.

FOOTBALL BOYS ATTEND GAME

The following football men of this city attended the W. V. U.-W. & L. game at Charleston Saturday.

Clayman Davis, Reed McNeill, June Bold, Fred Wilson, Harry Baughman, Norval Marshall, Chas. Miles, Jack Neel, Kermit Dilley, Harold Bixby, Raymond Shrader, Brown Bixby, Bob Gay, Hilbert Hayslett, Ralph Sharp.

ON CAMPING TRIP

Messrs. Judge George McClintic, Guy T. McClintic, Hunter McClintic, F. R. Hill, Ira Mottesheard, Simon Briggs, R. S. Spillman, Geo. Smith, Frank Anderson, and Dr. Herold left here Tuesday for Head of Spice Run on a hunting and camping trip.

Mrs. and Mrs. D. N. Gates and Mrs. Charmack, both of Charleston, were here the latter part of last week on business. Mrs. Gates is Deputy Grand Matron of the Eastern Star, and while in the county inspected the Marlinton, Hillsboro and Greenville chapters of that order.

as soon as humanly possible, for the purpose of preventing disease. It can be done, he said, economically.

DURBIN NEWS

Mr. J. W. Goodsell is building an annex to the Goodsell Garage in Durbin which will afford a storage space of 26x58 feet, also a store room 18x58. This building will be completed in about two weeks and will be quite an addition to the town.

The brick work is in charge of John Ward of Elkins, and O. P. Slaven is chief carpenter.

Ward Cody, a sixteen year old boy residing near Glady broke into the post office of that place shortly after closing hours, Friday evening.

He succeeded in getting away with nearly $75.00 in cash, and was on his way toward the Virginia line, when he was apprehended by Constable J. R. Simmons of Durbin, near Slab Camp on Allegheny Mountain Saturday.

The deputy sheriff of Randolph County took him to Elkins Saturday afternoon where he will be held for Federal Court.

A said incident relative to this unfortunate affair is that the lad's mother is very ill in an Elkins hospital.

The Durbin school truck was put out of commission Monday morning by losing a wheel a short distance out of town, but fortunately the mishap was not a serious one, and resulted only in giving the young people an unexpected "consitutional" back to town.

A large black bear weighing over 400 pounds was caught in a trap and killed by Price Gragg on Cheat River, about a mile above Cheat Mountain Club House last week. This was a lucky "catch" for Mr. Gragg, as the hide, which was an unusually fine one, together with the meat, netted him about $85.00 when sold to the hunters stopping at the Club House.

Mr. H. M. Widney and Mr. J. W. Goodsell attended the funeral of Mr. John Hoffman, Jr., who died at his home in Wheeling, October 2nd, after a lingering illness of more than a year.

He was president of the Pocahontas Tanning Co., and is succeeded in

The Marlinton Copperheads won their ninth and tenth games of the season in the past week when they defeated White Sulphur Springs, 40-36, and Richwood, 61-52. In their victory over White Sulphur, the Copperheads burned the nets for 32 points in the first half but went cold in the second half and barely held on to a victory. Scoring for Marlinton were Mike Beverage (11 points); Tim Buzzard (7 points); Tom

SHANNON PLAYERS RETURNING TO CITY

Seneca Theatre to House the Harry Shannon Players for 3 nights. Have a Real Show this Season from Reports.

Harry Shannon Players, that have been coming to Marlinton for the last few years will be here again with new shows that are bound to please the patrons of the Seneca Theatre, 3 nights starting Monday, October 29.

We all know the fine reputation that the Shannon show holds in our midst here in Marlinton, and no doubt a capacity crowd will be on hand when they play here.

The opening play will be "In Self Defense" a comedy that has just enough of a plot to make it a real play.

The vaudeville is all new this season. Mr. Shannon is giving away 50 gallons of gasoline on the closing night of their engagement, and he wants to state to the patrons for them to hold their coupons that they receive nightly at the theatre.

The Shannon dates at the Seneca Theatre will be Monday, Tuesday, and Wednesday, October 29, 30, 31.

cident being one which requires professional medical attention) and the lowest incidence of preventable motor vehicle accidents

Note of Thanks

I would like to thank who helped or were trying help during my stay here

The meeting next year will be held in the new high school building at Ronceverte.

Douthard's Creek News

We are having fine weather at this writing and farmers are about ready for winter.

Elmer Moore weighed lambs from this Creek one day last week totaling a number of 144.

Mr. Mikle and Slavens who have been contracting for the Mountain Timber Corporation are moving back to Virginia.

Charlie Palmer got his ankle badly mashed while loading ties last week.

Mr. P. A. Rexrode who has been very sick is some better at this writing.

Mr. Dave Perkins has moved on the Pat Bennett place.

D. W. Alderman went to North Fork last week and put up a phone in Clarence Alderman's house on the state line.

The Mountain Timber Corporation sure is moving lumber from this place with Mr. Alcott, superintendent.

Mr. Pat Bennet has moved to Laurel Creek.

Mr. Arnott White reports the gathering of 100 bushels of winter apples.

T. S. and D. W. Alderman had a fine crop of potatoes this season.

If wearing the emblem is a sign, Hoover is ahead in this section.

Monongahela Power Company

Employees of Monongahela Power Company's Marlinton District completed 1981 without a disabling injury or preventable motor vehicle accident, the utility announced recently.

The eight employees of Marlinton District worked the entire year without an injury that resulted in an employee missing work and did not have a motor vehicle accident that could have been prevented by defensive driving.

"Marlinton District is pleased with this achievement," Dick Eddy, Marlinton District foreman, operating, said. "Our safety record required teamwork and constant safety awareness."

"Monongahela Power Company is proud of the employees in Marlinton District," John Heim, director, personnel added. "Their fine safety record reflects teamwork and dedication to the safe work habits established by the Company."

Marlinton District serves almost 5,000 customers in Pocahontas County.

Monongahela Power Company's Marlinton District employees completed 1981 without a disabling injury or a preventable motor vehicle accident. Those employees are (l to r) Jerry Clifton, lead lineman; Albert Jackson, lineman; Dick Eddy, foreman, operating; Jim Calhoun, utility man; Kyle Carpenter, lineman; and Herb Friel, lineman, Not present when the picture was taken were Joe Roy, lineman and Ted Moore, lineman.

The 88 employees of Monongahela Power Company's Elkins Division have been recognized by the utility for winning first place in both categories of the Company's 1981 safety program.

Jim Patton, manager, Elkins Division, recently accepted two plaques from Monongahela president Don Hollen at the Company's General Offices in Fairmont. Elkins had outstanding records in both the personal injury and defensive driving categories of the safety program.

To win the awards Elkins Division employees had to achieve the lowest incidence of recordable accidents (a recordable ac

ing beauty contest. She will be the only entrant to fly to the beach and Akron's only entrant in the contest. Miss Woods is a neice of Mrs. W. H. Hiner, of his city, and will be remembered by many friends here.

Judge Moore Speaks

Judge Forest Moore who was born and reared at Dunmore, this county, made an address to the voters at the Seneca Theatre Thursday night of last week. As a speaker, Judge Moore, bears a national reputation, and for the past three weeks has been making addresses in the interest of Smith's campaign in this section of the state.

Attends Football Game

Those attending the W. & L.-W. V. U. game in Charleston were: Misses Mary McClintic, Nancy McNeel, Margaret Rose, Leeta Beard Fan Hill, Virginia Lancaster and Delphia Snedegar. Messrs. Ed Coberly, Eric Clutter, C. S.

Monongahela Power Company's Marlinton District employees completed 1981 without a disabling injury or a preventable motor vehicle accident. Dr. Hammen Tells Cass Democrats Why He Opposes Alfred E. Smith

October 12th.

The Editor of Marlinton Journal,
Marlinton, W. Va.

Dear Mr. Editor:

I am enclosing to you a letter I have written in reply to a letter I received from Cass (also enclosed) signed We Democrats. Not knowing who wrote the letter I am sending the reply to you and hope you will see fit to publish it in your paper, as it may do some little good in holding some of my old friends in line with Hoover.

I don't believe I ever met you, I am Dr. Hammen, who practiced Dentistry in Cass for the past 19 years and was Democratic Com'r. from Greenbank District for a number of years.

Mrs. Hammen will also support Hoover for president. Send me one of your papers if you will publish same.

Resp. yours,
Dr. W. A. Hammen,
1404½ Adams Ave.,
Huntington, W. Va.

* * * *

Dear Doctor:-

We are enclosing a script clipped from a news paper which pretty well explains the present day standing of the "Ku-Klux" and also Mr. Hoover with reference to the Tea Pot Dome scandal.

We are utterly surprised at the position you are taking against Al Smith, after the way the people here held you up as a faithful Democrat, and to think that you would betray them in the way you have is more than some can imagine, but after seeing how deeply you were absorbed in the bloodstained Ku Klux Klan, it is no wonder. However, we do not feel that it is any religious prejudice you have against Al, for the fact he worships the same God that the Presbyterians do, and in the end will go to the same heaven.

We call your attention to your old Mother State, which was the first state to enact the right of free religion upon its statute books and

Klux now since they were ran out of Atlanta, Georgia for murdering a prominent attorney in cold blood in his office, because he was bringing suit against them. In the list of stockholders of this publication is the name of W. G. Conley of Charleston, the Republican candidate for Governor. There are several other stockholders in this state, including the name of Hubert Echols, of Marlinton. Since the expose, the Hon. W. G. Conley comes out and admits being a stockholder but says he thought it was a Masonic publication he was investing his money in. He is a good deal in the position of Herbert Hoover who does not seem to know anything about the wholesale robbery of the Government by the Teapot Dome crooks while he was a member of the cabinet and sitting in with the gang. He was either a party to the crookedness or else he is toto dumb to be President of the United States and if Mr. Conley was so dumb to believe that he was putting his money in a Masonic paper while investing in the rankest publication ever sent through the mails and entirely filled up with lying abuse of Al Smith and the Democratic party, he should never be caught out in a hard rain and is not fit to be Governor."

* * * *

We Democrats,
Cass, W. Va.

I received your letter addressed Dear Doctor, with clippings enclosed which made reference to the Hon. Herbert Hoover in connection with the Tea Pot Dome scandal, and the Fellowship Forum, in which latter you held out the hope that by this time I had reconsidered and (would vote for Smith) and live the remainder of my days a Gentleman instead of a traitor, said letter signed "We Democrats".

I am indeed sorry you did not sign the name or names of the person who drafted the letter. I would have been glad to have replied direct

ANNOUNCES FOR CONGRESS

Steve Hunter, prosecuting attorney for Pocahontas County, announced in Charleston last Thursday that he will seek the Republican nomination in the Second District Congressional race to be held June 1.

Hunter, 34, said he had switched his party registration from Democrat to Republican because his "personal philosophy is more in line with that of the National Republican Party than

Candidate for State Senator

Democrat Larry Tucker, a 12-year veteran of the West Virginia House of Delegates, has declared his candidacy for the Democratic nomination to the West Virginia Senate from the 12th Senatorial District.

In making the announcement, Tucker, a Nicholas County banker, stated, "In 12 years of serving in the West Virginia House of Delegates, I have learned my way around state government and how to meet the needs of my constitu-

same.

Resp. yours,
Dr. W. A. Hammen,
1404½ Adams Ave.,
Huntington, W. Va.

We Democrats,
Cass, W. Va.

I received your letter addressed Dear Doctor, with clippings enclosed which made reference to the Hon. Herbert Hoover in connection with the Tea Pot Dome scandal, and the Fellowship Forum, in which letter you held out the hope that by this time I had reconsidered and (would vote for Smith) and live the remainder of my days a Gentleman instead of a traitor, said letter signed "We Democrats".

I am indeed sorry you did not sign the name or names of the person who drafted the letter. I would have been glad to have replied direct to such individuals, and thus saved the trouble to reply through the newspaper.

No, My attitude towards Smith has not, and will not change, as I can never vote for a candidate who is a traitor to the platform and whose desire it is to deliver the Democratic party into the hands of the Wets.

No honorable man could have remained silent as did Al Smith at the Convention and allow a platform to be drafted with any plank opposing his views, and then accept the nomination.

I am aginst Al Smith. First, His

tion from Democrat to Republican because his "personal philosophy is more in line with that of the National Republican Party than the National Democrat Party."

"I grew up in a Democrat household and was strongly influenced as a young man to become involved in the Democrat Party," he said, adding that his political views matured as an adult when he "thought more deeply about the processes of government and party politics . . ."

Hunter stated that he opposed "any political philosophy which leans toward massive government control of our daily lives, and I agree with the Republican Party's philosophy that limited government is government at its best."

"The Republican Party has helped steer the country more in the direction of productive individualism," he said. "That has been the backbone of our growth as a strong nation, and must continue to be the backbone of our growth as a strong nation."

Hunter said he would release position papers throughout the campaign and hold periodic news conferences "to discuss the direction of the campaign and the kind of Congressman I will do my best to be, and to make myself open to the media for any questions."

Hunter and his wife, the former DeEtta King, 27, a native of Mt. Nebo, Nicholas County, are residents of Buckeye. He has one son, Joshua, age 7, of a previous marriage.

Steve was born November 4, 1947, in Ronceverte, the son of Roy M. and Emma Hunter. His father was a truck driver for 17 years before his death in 1965. His mother was a social worker for the Department of Welfare and later a correctional officer at the Federal Reformatory for Women. In 1981 she married Stanley Newton of Hinton and now resides in Hinton.

Alderman threatens new lawsuits

Hillsboro & Marlinton Middle principals resign

The new school year is only a few weeks old, but in addition to hiring a new superintendent, the school system will now need to look for two new principals.

At the Board of Education meeting on Monday, held at the Hillsboro School, the resignation of Fran McLaughlin as principal at Marlinton Middle School was accepted, effective at the end of school on September 22.

Also submitting her resignation was Hillsboro Elementary School Principal Sue Hollandsworth. She took this action following refusal by the Board to grant her request for a leave of absence for the balance of the school year. The purpose of the leave would be to participate in a program for an advanced degree and to do some contract work with the state Department of Education. She asked that the Board continue to pay its share of her insurance and guarantee a return to her present position at Hillsboro for the 2004-05 school year.

The agenda for the meeting noted that this request was not being recommended by Interim Superintendent Alice Irvine.

Ms. Irvine did not comment on the request but Board member Bernard King said it would not be fair to the school or school system to grant the request. Member Tom VanReenan expressed concern about filling the position if it is to be for only the balance of this year.

Ms. Hollandsworth's request was denied by a 1 - 3 vote. Ruth Taylor cast the vote in favor. (Board President Kermit Friel was absent from the meeting.)

Following the vote, Ms. Hollandsworth gave the Board her resignation, effective October 6. As it was not on the agenda, action on the resignation can not be taken until the next Board meeting.

When the minutes of the special Board meeting on September 9, the meeting where Dr. Patrick Law was employed as the new interim superintendent [illegible] was ruled that there was a conflict due to the stipend (all of $50) members of the SCD board received. Upon receiving this opinion, Mr. VanReenan resigned from the SCD board.

Mr. Alderman then moved on to Mr. Friel and Mr. Vance. He said he has been doing some legal research and claimed to have found case law that forbids someone removed from an office to be reappointed to the same position. He was referring to the lawsuit he filed last year that was successful in having the two removed from the Board based on the state code prohibiting board of education members from holding other "public offices."

However, Mr. Friel and Mr. Vance resigned from the other positions that the court found to be "public offices" and were reappointed to their seats on the BOE. Mr. Alderman said he would seek contempt of court rulings against them for this.

Before announcing his plans for the lawsuits, Mr. Alderman had told the Board that should an effort be made to dismiss him from his position in the Board office, he would use all his rights under the "whistle blower" protection law.

The agenda for the meeting called for the Board to meet with Hillsboro School's staff and local school improvement council. It was reported that it had been decided it would be better to have this meeting after the new superintendent is on the job.

Ms. Hollandsworth reported that the improvement council has met and she noted some topics that came up.

First, she noted that Hillsboro teacher Barb Lewis was one the five finalists to be state Teacher of Year. Also, she thanked the Board for providing a teacher at each at each grade level for the school this year.

Their main concern is the roof on the gym which was partially blown off in early July. Ms. Hollandsworth noted that the roof is still leaking and the students are having to use the [illegible] for the repair of the roof, gutters, chimney, and to reimburse the county for money already spent, she said. However, she is [illegible] week, Mr. Trusler said. He assured the Board all special needs will be met.

In another matter concerning special education students, a contract with Rest Cars, Inc., was approved. Under the contract, the company will provide the needed services for a student with diabetes at Hillsboro.

A parent at the meeting stated that her son is supposed to have services four days a week. Mr. Trusler assured her that this will happen.

Several parents expressed that they had been upset by the remark made at the last meeting that the special education programs are going to "bankrupt the school system."

Mr. Vance assured them that the remark was in no way meant to demean students needing special education services, but came as a result of the frustration felt by members of this and many school boards over the mandates from the federal and state governments to provide services but without providing the funds to carry the

Cathy Mitchell, representing the faculty senate at Marlinton Middle School, urged that the principal's position at her school be posted as soon as possible. She said they do not want a temporary person but an effort made to find a permanent principal. She said the staff was disappointed not knowing who will be at the school as acting principal on Tuesday morning.

Mr. Vance assured her that the position will be posted on Tuesday. As to who would be at the school on Tuesday, he said the Board does not know either. Ms. Irvine is working to find an acting principal, Mr. Vance said, but if people say no, there is not much can be done.

It was noted that MMS has had a number of principals in recent years and this problem is an issue that everyone needs to be concerned about and address.

Ms. Irvine gave a brief summary of the financial statement for the 2002-03 school. One bit of good news in the report was a balance of $497,233 at the end of the fiscal year. She said when the budget for the year was prepared, it was projected the carry-over would be about $250,000. The main reason for the larger figure was greater than expected property tax revenue.

The financial statement was [illegible] son from pre-school classroom/bus aide at Hillsboro and Marlinton Elementary to special education/bus aide at PCHS.

* employment of Christopher Burns as head basketball coach at Marlinton Middle.

* resignations of Valerie Landwirt and James Scott as substitute custodians.

* employment of Shannon Alderman as substitute teacher.

Approval was given for Elissa Taylor to complete her internship for a counseling degree from Marshall University in the county schools. She will be working at Green Bank and PCHS.

Chad Baldwin was approved as a volunteer coach for the volleyball team at PCHS.

Approval was given to the Wage and Hour Regulations policy for the county. Ms. Irvine reported that while the policy was out for public review, no comments were received.

Approval was given for the high school to continue the same policy on final exams as the school used for the last school year.

As the meeting ended, Board member Ruth Taylor reminded everyone that we are here to help children and there has been too much "worrying about me, me and trying to find what is wrong with others." "The children are suffering," she stated.

The meeting ended with executive session on personnel.

The next regular Board meeting will be held on October 13 at Green Bank.

Annual wage survey underway

Each year, the West Virginia Division of Labor is required by statute to "investigate and determine the prevailing hourly rate of wages that must be paid to the various classifications of workmen and mechanics that are utilized by contractors that perform construction or maintenance work on public improvements as defined by West Virginia Code §21-5-1(f)."

Anyone who is interested in participating in this important process should contact the West Virginia Division of Labor at [illegible]

nomination was seamed by unwarranted trickery. Had the party know at the time of his nomination of the stand he has taken since he would not have been nominated. Therefore I am against him for his disloyalty.

Second, I am absolutely against him because of his attitude on Immigration.

Third, I am against him because in his every utterance he proves himself unfit for the exalted office of President, all his utterances having the ring of a ward politician.

Last but not least, I am against him because he is a graduate of that school of iniquity, "TAMMANY". The Encyclopedia Brittanica describes Tammany in part as follows: Tammany Hall is a political organization of N. Y. City, claims to be a regular representative of the Democratic party of N. Y. City, always, however, subordinating the interest of the party to its own selfish interest.

Tammany's most effective allies were largely saloon keepers over whose places of business were the headquarters of the ward and district bosses. Our own William Jennings Bryan said, "This party of ours that calls itself Democratic cannot afford to either nominate or

Following the vote, Ms. Hollandsworth gave the Board her resignation, effective October 6. As it was not on the agenda, action on the resignation can not be taken until the next Board meeting.

When the minutes of the special Board meeting on September 9, the meeting where Dr. Patrick Law was employed as the new county superintendent of schools, were [illegible] not allow his employment beyond July 1, 2004.

At last week's meeting approval was given to employ Dr. Law until July 1, 2005. Mr. Vance said Dr. Law has been informed of the problem and a special meeting will have to be called to change his employment conditions. No contract has been signed and Ms. Irvine said it has not yet even been prepared.

Norman Alderman gave the Board the news that "we" will be filing new lawsuits, again seeking to remove various members from the Board.

His first target is Mr. VanReenan. Mr. Alderman alleges that Mr. VanReenan's position on the Greenbrier Valley Soil Conservation District board of Supervisors at the time he was a candidate made him ineligible to serve on the BOE. Even though Mr. VanReenan has since resigned from the SCD, this does not make him a legal member of the Board, according to Mr. Alderman. That, he puts into question all the votes made by Mr. VanReenan. This includes the recent ejection of Dr. Law as superintendent, since it was by a 3-2 vote with Mr. VanReenan casting one of the yes votes.

Mr. Alderman said he is not asking Mr. VanReenan to resign from the Board since he has never considered him to be a member of the Board. He said a lawsuit will be filed to have him removed from the BOE.

Mr. VanReenan did not respond verbally to the allegations, but provided a written statement that covered what he has done since the conflict allegation was raised by Mr. Alderman. Before the decision for sought an opinion from the state school superintendent Dr. David Stewart. Dr. Stewart wrote he found no reason why a member of a SCD board could not run for a seat on a BOE. Based on this, Mr. VanReenan remained in the race and was elected.

After the law [illegible] gave the state Ethics Commission authority to rule in such situations, Mr. VanReenan sought an opinion from [illegible] the Commis-

...not be filled until the next regular meeting.

Their main concern is the roof on the gym which was partially blown off in early July. Ms. Hollandsworth noted that the roof is still leaking and the students are having to use the cafeteria for physical education.

Mr. Irvine said the work to repair the roof, gutters, chimney, and to reimburse the county for money already spent, she said. However, she is concerned that the $15,000 allocated for the repair of the floor may not be enough. The roof work will take about six weeks, Ms. Irvine said.

Mr. Vance said there have been rumors going around that the Board is dragging its feet in making the gym roof repairs as part of a plan to close the Hillsboro School. He denied this and stated that as long as he was on the Board of Education, this would not occur.

Roger Trusler reported to the Board on the pre-school program for the three-year-old children with special needs and those who are Head Start eligible. He said at Green Bank and Hillsboro, where there is a low enrollment, the three-year-olds will be combined with the classes for four-year-olds. At Marlinton Elementary services are to be provided by School Days Child Care, he said.

At all sites the four-year-olds will go to pre-school on a two-day one week, three-day the next week schedule, while the three-year-olds will go two days each

...ing principal, Mr. Vance said, but if people say no, there is not much can be done.

It was noted that MMS has had a number of principals in recent years and this problem is an issue that everyone needs to be concerned about and address.

Ms. Irvine gave a brief summary of the financial statements for the 2002-03 school. One bit of good news in the report was a balance of $497,723 at the end of the fiscal year. She said when the budget for the year was prepared it was estimated the carry-over would be about $240,000. The main reason for the larger figure was greater than expected property tax revenues.

The financial statement was approved.

A question was raised about the $20,000 in Budget Digest money that is to go for band uniforms at PCHS. Maria Hall asked if the money could be transferred to the band boosters group so it can draw interest while the group raises the additional $25,000 needed for the uniforms.

Ms. Irvine said she did not know if this would be possible but would find out.

In other personnel items the Board approved:

* transfer of Patricia Thomp-

Annual wage survey underway

Each year, the West Virginia Division of Labor is required by statute to "investigate and determine the prevailing hourly rate of wages that must be paid to the various classifications of workmen and mechanics that are employed by contractors that perform [illegible] of state insurance work, on public improvements as defined by [illegible] Virginia Code [illegible]

Anyone who is interested in participating in this important process should contact the WV Virginia Division of Labor at (304) 558-7890 and request survey forms. Upon that request you will be sent survey forms and instructions to complete those forms.

Although participation in the process is not mandatory, this office requests that you complete the survey forms and return them no later than October 17. Please complete the survey forms according to the accompanying instructions. Any information submitted after that date will not be considered for the 2004 Prevailing Wage.

machinery in early spring—the proposed timetable for the beginning of construction of the new band building.

Volunteerism in Action

Building a public education facility is not an easy task, but community determination and volunteer donations and labor can make this project a reality in Pocahontas County.

With the organization of the Marlinton Middle School Band Building Committee, Inc., this non-profit organization is now undertaking the tremendous job of organizing the construction of a new Middle School Band and Music Building for the students of the community.

Many stages must be completed to make this building a reality. For the last month now, much work has been done to complete the paperwork required by county and state officials. So far, the proposed 72'x44' building, designed by professional architects and studied by professional acoustics specialists for considerations of acoustics, heating, lighting, and ventilation, has already been approved by the State Fire Marshal and the State Department of Health.

Now the committee is entering the next two stages—these two stages are the progress of money accumulation as the fund drive goes on.

Construction planning and building is also now underway.

Last Friday, February 19, Lee McGee and Phillip Dean were at the site near the Marlinton Elementary School to decide upon an access to the projected site that would not hamper the movement of heavy machinery in the early spring and tear up school property. Lee McGee, representing Pocahontas Construction Company, and Phillip Dean, project supervisor and construction consultant who will oversee all construction activities at the site, chose the access which will be used by all construction vehicles as construction progresses. County Superintendent of Schools, B. R. Bailey, has approved the access road, and approval must now be made by the Town of Marlinton.

With approval of the access road, Pocahontas Construction Company will begin trucking in the 800 tons of backfill donated to raise the site far above

however, subordinating the interest of the party to its own selfish interest.

Tammany's most effective allies were largely saloon keepers over whose places of business were the headquarters of the ward and district bosses. Our own William Jennings Bryan said, "This party of ours that calls itself Democratic cannot afford to either nominate or elect to the presidency any man to whom after his election, Tammany Hall can come and with pointed finger say "Remember now thy Creator."

No, I am not against Smith because of his religious connections. I have been against many of the things for which he stands long before he was ever thought of for president, and I can see no reason why I should change now.

Your letter, however, simply shows how desperate the Smith followers are becoming and to what depths they will stoop in their endeavor to get the thousands of Hoover Democrats back in line. Now think it over yourselves, join the large number of Hoover Democrats and be able to rejoice with us at the Wets defeat on the evening of November 6th when the returns will show Mr. Hoover elected by four or

has been done... the paperwork required by county and state officials. So far, the proposed 72'x44' building, designed by professional architects and studied by professional acoustics specialists for considerations of acoustics, heating, lighting, and ventilation, has already been approved by the State Fire Marshal and the State Department of Health.

Now the committee is entering the next two stages—these two stages are most important because each relies heavily on the other. The Band Building Committee is now preparing for its fund-raising campaign to bring in money to buy the materials to construct the building. At the same time, much work is now being done in the construction planning and building stage.

These two stages must be completed together if the new building is to be ready by this coming fall and the beginning of the school year.

The MMS Building Committee has undertaken several fund-raising ideas which are now underway. One is a music variety show to be scheduled sometime in March and the organization of an Alumni Association roster. The immediate monetary goal of the fund-

site, chose the access which will be used by all construction vehicles as construction progresses. County Superintendent of Schools, B. R. Bailey, has approved the access road, and approval must now be made by the Town of Marlinton.

With approval of the access road, Pocahontas Construction Company will begin trucking in the 800 tons of backfill donated to raise the site far above flood level. Pocahontas Construction is also donating the use of heavy machinery for the work.

Special attention was also made at the site concerning how the backfill materials would be compacted in consideration of foundation requirements and block laying for the walls.

Saturday, February 20, Richard Gorby, surveyor, measured the ground elevation of the site to determine the lows and highs of the ground lay. This will be important to Pocahontas Construction as they begin determining excavation and backfill, as well as the location of filler and foundation.

All this work is culminating to the point where funds are needed now to begin the actual construction.

I have things for which he stands long before he was ever thought of for president, and I can see no reason why I should change now.

Your letter, however, simply shows how desperate the Smith followers are becoming and to what depths they will stoop in their endeavor to get the thousands of Hoover Democrats back in line. Now think it over yourselves, join the large number of Hoover Democrats and be able to rejoice with us at the Wets defeat on the evening of November 6th when the returns will show Mr. Hoover elected by four or five million.

Ambulance transports topic at Commission meeting

The County Commission met for a regular meeting on Tuesday.

Commissioner James Carpenter reported on a serious problem facing Pocahontas Memorial Hospital and its patients. He said it is getting more and more difficult for the hospital to find ambulance services willing to come to PMH and transport patients to another medical facility.

Local ambulance services have long been unable to provide transports, in other than very emergency situations, due to the burden on their volunteer staffs. Also, regulations now require a transport ambulance to carry a paramedic in many, if not most, situations, such as when an IV has been started on a patient. It was noted that the county ambulance squads have only three paramedics available.

For many years transports have been handled by out-of-county ambulance companies, but now they are no longer willing to come to the county, Mr. Carpenter stated. He said the problem has been ongoing for about a year and the situation has gotten to the critical stage.

He said the PMH Board of Trustees, of which he is a member, has discussed the issue at length many times and is considering whether the hospital will have to set up its own ambulance service to handle transports.

Related to the ambulance issue is the consideration being given by the Board on having PMH [illegible] to requiring a average of four days.

Mr. Carpenter said a grant to fund a study on the possibility of PMH becoming a Critical Access Hospital is almost certain to be approved. The study and will give the Board a good idea if this is the way the hospital should proceed.

Commissioner Reta Griffith said the county Emergency Medical Services Board is supportive of PMH organizing an ambulance service for transports.

While the hospital was the topic of the meeting, Deputy County Clerk Sandy Friel told Mr. Carpenter that the slowness of PMH to bill Medicare is causing a delay to the settlement of some estates. He replied that the PMH Board is well award of the problem and a new employee in the hospital office is making a difference on the billing.

Ms. Griffith reported on concerns the EMS Board has about how emergency services are being handled at Snowshoe.

She noted the 911 calls are answered by the resort switchboard instead of going directly to the 911 center at the jail. The operators have had 911 training, she said, but there are question about this procedure.

There are also questions about the relationship between Shavers Fork Fire/Rescue and Ski Medic - are they two organizations or one, she said. Finally, there have been rumors about unlicensed transports, using the van from the Snowshoe clinic.

Ms. Griffith said a meeting

paign to bring in money buy the materials to construct the building. At the same time, much work is now being done in the construction planning and building stage.

These two stages must be completed together if the new building is to be ready by this coming fall and the beginning of the school year.

The MMS Building Committee has undertaken several fund-raising ideas which are now underway. One is a music variety show to be scheduled sometime in March and the organization of an Alumni Association roster. The immediate monetary goal of the fund-raising is $25,000.

Sometime this week, a chart in the form of a musical note will be placed on the corner property of the Bank of Marlinton. This chart is intended to show materials would be compacted in consideration of foundation requirements and block laying for the walls.

Saturday, February 20, Richard Gorby, surveyor, measured the ground elevation of the site to determine the lows and highs of the ground lay. This will be important to Pocahontas Construction as they begin determining excavation and backfill, as well as the location of filler and foundation.

All this work is culminating to the point where funds are needed now to begin the actual construction.

Donations, which are tax deductible, may be sent to the MMS Band Building Committee, Inc., Rt. 2, B154, Marlinton, West Virginia 24954. Your receipt for your donation will be mailed to you upon request.

VOLUME XI

Shinnaberry Suicides at Minnehaha Springs

Page Shinnaberry, age 26, of Minnehaha Springs, died in the Pocahontas Memorial Hospital, July 19, from a self infflicted gun-shot wound.

A period of depression and a deranged mind culminated in him taking his life at the home of his father, Henry Shinnaberry, at Minnehaha Springs. The act came as a thunderbolt to his relatives and friends. No plausible reason can be assigned to the deed except that a mind steeped in depression and intemperateness, which characterized his being for the past several weeks, suddenly snapped under the strain destroying all vestigage of reasoring power.

Page, who was living on his father's farm, about two miles above Minnehaha Spring on Knapps Creek, was visiting at his father's store Thursday. Along in the afternoon

...transport ambulance to carry a paramedic in many, if not most, situations, such as when an IV has been started on a patient. It was noted that the county ambulance squads have only three paramedics available.

For many years transports have been handled by out-of-county ambulance companies, but now they are no longer willing to come to the county, Mr. Carpenter stated. He said the problem has been ongoing for about a year and the situation has gotten to the critical stage.

He said the PMH Board of Trustees, of which he is a member, has discussed the issue at length many times and is considering whether the hospital will have to set up its own ambulance service to handle transports.

Related to the ambulance issue is the consideration being given by the Board on having PMH designated a federal Critical Access Hospital. This would have both advantages and disadvantages. The advances would be fiscal, including the 80-85% payment of all costs of a hospital-based ambulance service, Mr. Carpenter said. Among the disadvantages are restrictions on the number of beds the hospital can have and the length of time patients can stay in the facility.

There has been an increase in the length of time patients can stay in this type of hospital, however. Mr. Carpenter said the regulations have moved from allowing a stay of only one day

...Mr. Carpenter that the slowness of PMH to bill Medicare is causing a delay to the settlement of some estates. He replied that the PMH Board is well award of the problem and a new employee in the hospital office is making a difference on the billing.

Ms. Griffith reported on concerns the EMS Board has about how emergency services are being handled at Snowshoe.

She noted the 911 calls are answered by the resort switchboard instead of going directly to the 911 center at the jail. The operators have had 911 training, she said, but there are question about this procedure.

There are also questions about the relationship between Shavers Fork Fire/Rescue and Ski Medic - are they two organizations or one, she said. Finally, there have been rumors about unlicensed transports, using the van from the Snowshoe clinic.

Ms. Griffith said a meeting will be held as soon as possible with the state Medical Director and EMS Director with all involved to ensure that emergency services on the mountain meet all regulations.

The Commission voted to continue Pocahontas Woods as the recipient of its share of the funds that come from the sale of resources on national forest land. Commissioners reported they have received no objections from the public to the money going to Pocahontas Woods. People like the training in woodwork the organization provides, Commission President Joel Callison said.

mind steeped in depression and intemperateness, which characterized his being for the past several weeks, suddenly snapped under the strain destroying all vestigage of reasoring power.

Page, who was living on his father's farm, about two miles above Minnehaha Spring on Knapps Creek, was visiting at his father's store Thursday. Along in the afternoon he left the store and walked to the house a short distance away. He greeted his mother who was sitting on the porch and continued his way to the second story of the house. Here he secured a 25-20 Winchester rifle, and placing the muzzle against his right side, fired the fatal shot.

It seems as though the riflle pressed so close against his body müffled the report to the extent that his mother sitting on the porch did not hear it. She did, however, hear the noise as his body struck the floor and sensing something wrong investigated the source. Discovering her son mortally wounded, she quickly summoned aid, and as quickly as possible he was rushed to the hospital. But the bullet which had penetrated his side, coursing through the liver, and lodging in the back, had done its work and he passed away about two hours later.

Remaining conscious almost to the very end he never voiced regret for having committed the rash act.

Aside from a wife and two children, one girl about six and the

Durbin locations to be numbered

by Jason Bauserman
Contributing Writer

Durbin households and businesses will soon receive address numbers, a mandatory edict because of enhanced 911 emergency services.

Councilmember John Riffe is the Durbin coordinator who will assign numbers that must be posted near the front door of residences and businesses. The numbers must be four inches high.

Riffe said he has been in contact with Pocahontas County Emergency Services Coordinator Shawn Dunbrack, who instructed him to start at Main Street and work uphill with odd numbers on the left and even numbers on the right.

Becky Payton, Pocahontas County Hazard Mitigation Planner and County Commissioner Reta Griffith brought the council the final Pocahontas County hazard Mitigation document listing town problems that need attention. Council accepted and signed the plan.

Griffith stated the United States Congress has approved $327 million nationally through the Federal Emergency Management Agency. It was her opinion that West Virginia could receive up to $10 million. Pocahontas County has been preapproved for some funds, she said.

Council will meet September 22 at 7 p.m. in special session to apply for grants.

Durbin's former mayor, Paula Dilley, met with the council to object to a bill she'd received for $66.78 because of a sewage backup from the Upper End Club.

Dilley's basement was cleaned out by Mike Vance.

Council agreed it was the town's problem and will work it out with Vance.

Mayor Donald Jennings had a letter prepared for Vance.

Riffe spoke with Howard Shinaberry, Pocahontas County game warden, about all-terrain vehicle traffic in Durbin. Riffe reported that Shinaberry has written several tickets and ATV use and speed have decreased.

There was much discussion about police protection. Jennings will meet with the county commission later this month.

In a letter to the mayor, Patty Nottingham complained about storm drainage on her property. Riffe said a lot of topsoil and apples come from his property, but he is not sure how to solve the problem.

Apples plugging storm drains were mentioned several times during the meeting. Jennings said some apple trees on town property will be cut.

The gate to the town cemetery remains an issue. Councilmember Donald Peck said the owner is considering a suit against the town.

Forest Festival Princess

Melissa Ann Rexrode, of Bartow, has been appointed by Director General Ray LaMora as a Princess in the Court of Maid Silvia during the 67th Mountain State Forest Festival.

Rexrode is the daughter of Sherry and Billy Cassell, of Bartow, and the late Terry Rexrode. She is the granddaughter of Frank Bennett, of Circleville, and the late Ben and Shirley Rexrode. She has two brothers, Timothy and David, and one sister, Jennifer.

Miss Rexrode is a 2003 graduate of Pocahontas County High School and is currently attending West Virginia University.

Rexrode's honors and activities include being an honor graduate. She participated in FFA for four years and served as secretary in FBLA, placing fourth in entrepreneurship. She was a cheerleader for two years and also a Homecoming attendant her freshman year. She enjoys music, swimming, ATV riding, and spending time with her family and friends.

last two weeks on vacation, has returned to the hospital to take up her work again.

ATTEMPTED SUICIDE

Lanty Hogsett, a well known young business man of this town and who has been employed as clerk at the Marlin-Sewell Hotel the past two years was found in his room early Saturday morning, July 21, with a gun shot wound in his breast said to be self inflicted. He was immediately taken to the Pocahontas Memorial hospital where treatment was given and on examination the wound was found not to be as serious as was first thought and barring complications which might set in he is expected to recover.

Henry Poague was also before the Squire charged with operating a motor vehicle upon the state highway while under the influence of liquor. In answer of the charge he plead guilty, and was fined $40.00 and costs and sentenced to 60 days in the county jail.

TERESA NELSON HAS been named Pocahontas County's 2003 Outstanding 4-H Volunteer Leader. Bob Galardi made the presentation to Ms. Nelson.

Nelson recognized for leadership

When West Virginia University paid its annual tribute to 4-H volunteers, Teresa Nelson was honored as Pocahontas County's 2002 Outstanding 4-H Volunteer Leader. Bob Galardi, WVU Extension Service's Director of Development, presented the award.

The tribute to leaders was held during the recent 4-H Volunteer Leaders' Weekend at Jackson's Mill, the state 4-H camp.

Teresa has been a 4-H leader for 11 years and is currently the organizational leader of the Beaver Creek Beavers 4-H Club. Some of her major accomplishments as a leader are in the areas of project work and parent involvement. She is very enthusiastic about 4-H and what it can mean in the life of young people.

During the weekend, Teresa was also inducted into the West Virginia 4-H All Stars. This honor is in recognition of exemplary service to the 4-H program in the state and is the highest award that can be earned by a 4-H'er or 4-H leader.

REWARDS FOR SLAYER NOW TOTAL $1,000

Additional rewards bringing the total to a thousand dollars, have been posted for the apprehension of the murderer of Otis Winebrenner, Gauley Bridge taxi driver who was brutally murdered and robbed about a month ago. Gauley Bridge citizens have put up a total of $600, the state is offering $300 and the county $100.

The identity of the murdered is believed to be known and officers have been on his trail for some time. Recently they went to Columbus in search of him and learned that he had been gone from there about 14 hours.

Dr. Little, Retired Physician, Succumbs Mon.; Buried Wed.

Was Graduate of University of Baltimore; Practiced at Huttonsville, in Randolph, and Greenbank.

Dr. L. L. Little, the son of Marcus W. and Mary Matilda Little was born in Marion County, West Virginia, April 24, 1867, died at his home in Marlinton, West Virginia, September 24, 1928, aged 61 years and five months.

He received his medical education at the University of Baltimore, and first located for practice of his profession at Huttonsville, Randolph County, and after remaining there for two years, in 1894 he moved to Greenbank, this county, where he remained until about five years ago On account of failing health he retired from the active practice and moved to Marlinton where he has made his home ever since.

On February 9, 1888, he was united in marriage to Miss Eva Welch, of Fairmont. He is survived by his widow and three daughters, Mrs. Lelia L. Flenner, of Durbin, Mrs. May F. Hiner, of Marlinton, and Mrs. Mary Myrtle Pifer, of Cannonsburg, Pennsylvania, and two granddaughters, Jean Pifer and Sue Hiner, and one son, Charles Brooks died in infancy,

He united with the Marlinton Presbyterian Church upon his profession of faith in Jesus Christ in 1925, and ever since, although prevented by ill health from attending the services of his church, a faithful and zealous follower of his Lord and Master, and a devoted student of the Bible. His favorite passages of scripture were Isaiah 40: 31; 41: 10-13, and John 25: 10-12. Just before he lapsed into unconsciousness in his last illness he requested his loving and devoted wife to repeat the Lord's Prayer.

Funeral services will be conducted this afternoon, Wednesday by Rev. Fred Gray, at the West Liberty Church, Greenbank, and interment made in the Greenbank cemet

Order of the 35th Star

Alva E. Moore, 711 Ninth Street, Marlinton, received a certificate as a member of the Order of the 35th Star from Secretary of State A. James Manchin on his birthday Monday. Mr. Moore was 91 on February 22nd, George Washington's birthday.

Mr. Moore had to move out of his home in the recent flooding on Knapps Creek caused by the ice jam but he says he is getting the house back to normal. He keeps house by himself since the death of his wife.

Birthday Dinner

Alva Moore, of Marlinton, was honored on his

ACP Signup

Farmers are reminded that the initial signup period for the Agricultural Conservation Program (ACP) is in progress and will continue through March 12. ASCS will also accept applications for Long-Term Agreements through that date.

Pocahontas County's ACP program is aimed at solving high priority problems such as lack of water for livestock; control of erosion by topdressing meadows and pastures, planting trees, and stabilizing critical areas.

A request for cost-sharing assistance must be on file and approved by the County ASC Committee before the practice is started. Cost-sharing may range from 50 per cent to 65 per cent of the cost of performing practices.

Soil tests are needed for practices of applying lime or fertilizer.

Approvals will be made on March 15, so applications should be made immediately to be considered in this first approval.

Accidents

Slick roads last Thursday night were the cause of at least two accidents and put one person in the hospital. Both were investigated by the Sheriff's Department.

About 11 p. m. Thursday Roger Irvine, of Marlinton, hit a patch of ice on the

Farm Service Agency NAP Coverage

Producers of noninsurable crops of alfalfa, barley, grass, oats, rye, and rye have until Tuesday, September 30, to apply for coverage under the Noninsured Assistance Program (NAP). NAP coverage requires a service fee of $100 per crop, per producer, with a $300 cap per county. Out-of-pocket expenses for any producer will not exceed $900, even if production occurs in more than three counties. NAP coverage payments are issued when a crop's loss exceeds 50% of a crop loss and the NAP payment rate is set at 55% of the average market rate. Record keeping by producers is very important. This is especially true for NAP because eligibility requires timely reporting of crop acreage, yields, production and loss.

Contact the Farm Service Agency at 799-4317 for additional information or for filing an application.

Lamb Program

The Lamb Meat Adjustment Assistance Program (LMAAP)

member of Renick Baptist Church.

Born June 8, 1912, at Anthony, she was the daughter of the late Late and Nancy Sexton. She was preceded in death by her husband, T. T. Williams, in 1969.

Survivors include three daughters, Lucille McMillion, of Renick, Rusty Dabrooka, and Joan Lauenstein, all of Baltimore, Maryland; a son, Roy L. Williams, also of Baltimore; seven grandchildren and twelve great-grandchildren.

Services were held Tuesday morning at Renick Baptist Church by Pastor Steve Barnette. Burial was in Morningside Cemetery at Renick.

Deloris Irvine Lewis

Deloris Irvine Lewis, age 53, of Straits, North Carolina, died Thursday, September 4, 2003, at Carteret General Hospital in North Carolina of a heart attack.

Her father, Andrew Gale Irvine, and a brother, Kyle Irvine, preceded her in death.

She is survived by her husband, Tom Lewis, of Straits; two sons, Vince Baker, of Havelock, North Carolina, and Ryan Lawrence, of Straits; her mother, Elva Irvine; sister, Donna Wade; two brothers, Kenneth Irvine and Robert Irvine, all of Harkers Island, North Carolina; and two granddaughters.

She is the niece of Elsie L. Long, of Mill Point, and Kyle "Chick" Irvine, of Marlinton, and visited here in her father's home county many times.

Services were held Sunday, September 7, at Munden Funeral Home Chapel with Joel Hancock, Church of Jesus Christ of Latter-day Saints, officiating, assisted by the Rev. Leann Calhoun. Burial was at Vergie Mae Cemetery, Harkers Island, North Carolina.

Three Towns Install New Water Systems

Durbin is Included in List; Gets Water From Mountain Spring at Cost of $19,000.

During the next thirty days three West Virginia towns will put into operation new and modern water systems it was announced today by E. S. Tisdale, chief sanitary engineer of the state health department.

Lumberport in Harrison County, with a population of 1250 is installing a new water system and treatment plant at an estimated cost of $25,000. Durbin in Pocahontas County is completing a new water system the supply being secured from a mountain spring. This system will cost in the neighborhood of $19,000.

At Grafton a new filtration plant, costing $140,000 will go into operation on November 1st. This will provide a safe adequate water supply and prevent the recurrence of such a typhoid epidemic as visited tha city two years ago. The state health department recently conferred with members of the city council relative to the employment of a competent filter plant superintendent, which is considered of vital importance in the operation of this new and splendidly equipped plant.

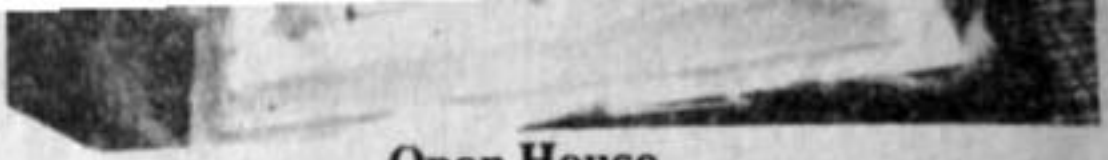
The occasion also celebrated the implementation of the state's comprehensive cancer

Virginia Department of Health and Human Services, and the



Open House

Open House was held on Sunday, February 7, 1982, in honor of the 90th birthday of Lucy Sarah Sharp at the home of her son and daughter-in-law, Mr. and Mrs. Julian C. Sharp, of Baltimore, Maryland. Lucy's five sons were there along with their families. Agnes McCloud, Lucy's daughter was unable to make it to Baltimore and was greatly missed. She called during the festivities and everyone was glad to hear from her.

Those attending were Julie Johnson and daughters, Jennifer and Anne, Diane and Rick Delfino, daughter Gina and little Rick (3 weeks), Julie and Diane are the daughters of Julian and Betty Sharp; Arlie and Elizabeth Sharp, Cheryl and Fred Kurhman, daughter, Kerry and son, Douglas; Cheryl is the daughter of Arlie and Elizabeth; Adrian and Zoe Sharp, Gillis and Jane Sharp, son, Wade, and daughter, Dale Nelson, her sons, Matthew and Daniel, Wayne and Becky Sharp, son Joshua and daughter, Wendy, Sandra and Wayne Chandler, daughter, Lisa and son, Jason, Gillis, Wayne and Sandra are the children of Adrian and Zoe; Alvon Sharp, Harold, Terry and Paula Sharp; Paula is the daughter of Harold, Larry Sinnot, Noyle and Maude Fertig, Pearl Stinchecum, John Tyler and Helen Denbow.

There were lots of third and fourth generations and one fifth generation. There was lots of eating, talking, picture taking and a good time was had by all who attended.

Pocahontas County Historical Society

The Pocahontas County Historical Society met February 22, 1982, for a dinner meeting at the home of Mary Shafer. The dinner fully served turkey dinner and was followed by the presentation of door prizes, secured by Alice Waugh from the generous business people of the County.

During the next thirty days three West Virginia towns will put into operation new and modern water systems it was announced today by E. S. Tisdale, chief sanitary engineer of the state health department.

Lumberport in Harrison County, with a population of 1250 is installing a new water system and treatment plant at an estimated cost of $25,000. Durbin in Pocahontas County is completing a new water system the supply being secured from a mountain spring. This system will cost in the neighborhood of $19,000.

CANCER SURVIVORS GATHER in Charleston to celebrate life.

Carpenter, Jackson celebrate cancer survival

On June 18 Pamela L. Carpenter and Julie M. Jackson were honored along with other West Virginia cancer survivors in Charleston. The group commemorated Mountains of Hope Day. Gov. Wise, a cancer survivor, was honored along with nearly 100 survivors chosen to represent all West Virginians who have survived cancer. The celebration was sponsored by Mountains of Hope: The West Virginia Comprehensive Cancer Coalition. Mid-Atlantic CIS assisted in planning the event.

The occasion also celebrated the implementation of the state's comprehensive cancer control plan. Created by Mountains of Hope, the plan was completed last year. Today, West Virginia is one of 14 states and the Northwest Port-land Area Indian Health Board to receive funding to implement plans by the Centers for Disease Control and Prevention. Mountains of Hope was founded by the Mary Babb Randolph Cancer Center, West Virginia Breast and Cervical Screening Program, West Virginia Department of Health and Human Services, and the American Cancer Society.

Pam and Julie were placed on the West Virginia Survivor Honor Roll, and thanked for working to reduce the cancer burden throughout the Mountain State.

Anyone interested in attending our Cancer Support Group meetings please call 304-799-6141. Anyone with or surviving any type of cancer is invited.

HOME DRE

Two Truck Riders Are Victims of Bullet Fired by Mrs. Sheets

Shot is Fired as Truck Passed House: Stricks Clinton Beverage and Mrs. Bowling; Wounds Serious.

Clinton Beverage, 14 year old son of Mrs. George Conley, of Stony Creek, lies at the point of death in the Hot Springs Hospital, and Mrs. Troy Bowling is recovering from a hip wound from the same bullet, which was fired from a house at Mt. Grove Sunday afternoon and struck them as they were passing in a truck, and a Mrs. Sheets, better known as "Paragoric", reputed to be a dope addict, is being held without bail in the Bath County jail.

Mrs. Bowling's husband has a job skidding logs on Williams River, and almost every Sunday returns to his home at Mt. Grove to be with his wife. When he started home last Sunday, an invitation was extended the Beverage boy to accompany him and spend the day.

Sunday afternoon Mr. and Mrs. Bowling and young Beverage were out riding in the truck, the boy in the back and the Bowlings in the front seat. In passing the house where Mrs. Sheets resided, a shot rang out. Beverage crumpled to the floor of the truck, shot through the stomach and bowels. The bullet passed on through his body, through the back of the seat and struck Mrs. Bowling in the hip.

Officers were immediately notified of the shooting and while the two gun shot victims were being rushed to the hospital, Mrs. Sheets was placed under arrest and taken to the Bath County jail. It was discovered by the officials making the arrest that a 25-20 high power rifle was used.

Two men were said to be in the house at the time the shot was fired, but according to informaion they escaped and their identity remains unknown.

CHIEF McMANN IS DEAD FROM WOUND

KIWANIANS HONOR HAROLD TOMPKINS

Harold P. Tompkins, Charleston Coal operator was selected district governor of West Virginia Kiwanis clubs at the final business session of the ninth annual convention at Hunting Tuesday. Dr. R. N. McGraw, Wheeling, was elected lieutenant governor of the first West Virginia division; Dr. W. H. S. White, Martinsburg, lieutenant of the second division; James Hale, Hinton, lieutenant governor of the third division, and D. J. Cook, Kimball, lieutenant governor of the fourth division. John Fish, Sistersville, was elected treasurer.

Republican Women Active in Campaign

Mrs. Thomas Scott and Mrs Ellis A. Yost Are Gratified With Activity of Women's Political Organizations

Charleston, W. Va., Sept.—Activities among the Republican women workers in the fall campaign have been shaping up in a good manner, and Mrs. Thomas H. Scott and Mrs. Ellis A. Yost are extremely gratified with the success of the preliminary arrangements.

After a conference between directors of the women's division and Mrs. Yost and Mrs. Scott, appointments of women to take charge of various phases of activities in the state have been announced.

Mrs. Julian G. Hearne, of Wheeling, long prominent in politics and woman's clubs affairs in West Virginia, has been named state director of the Home-Makers division. This division is headed nationally by Mrs. Thomas G. Winter, former president of the General Federation of Women's clubs. An effort will be made to line up all homes for the ticket headed by Hoover and Curtis, and some very attractive posters have been prepared for display in the windows of the homes.

For the work among the division of women in industry, Mrs. Mary Dille Emory, of Morgantown has been selected. She has been engaged

Engagement

Johnson ~ Mikaelsen

Allen and Debora Johnson, of Frost, and Nathan and Inge Mikaelsen, of Sendai, Japan, are proud to announce the engagement of their children, Joel and Naomi.

Their wedding will be held Sunday, January 4, 2004, at Berea, Kentucky, where both Joel and Naomi are seniors at Berea College.

Wedding

Sheets ~ Fanning

Mr. and Mrs. David Gandee, of Snowshoe, and Mr. and Mrs. Robert Sheets, of Green Bank, would like to announce the engagement and forthcoming wedding of their daughter, Rachel Pauline Sheets, to Stuart Cecil Fanning. Stuart is the son of William Fanning, of Mingo, and Mr. and Mrs. Allen Kuchinski, of Tularosa, New Mexico.

Birthday

Birthday Party

Relatives and friends celebrated the 90th Birthday of Peggy McNeel on Sunday, August 31, at Oak Grove Presbyterian Church in Hillsboro. Out of town guests were: Charlie and Martha Braddock, Anderson, Indiana; John M. Braddock and Joe McNamee, Lafayette, Indiana; John and Barbara Braddock, Tulsa, Oklahoma; Wally and Joy Grant, Blacksburg, Virginia; George and Harriet Wilson, Bridgewater, Virginia; Rex and Renee Myers and sons, Zachary and Jackson, of Charlotte, North Carolina; Terri and Tim Helmick and children, Isaac, Nicholas and Sarah, of Cross Lanes; Mary Jarvis Currence and Sallie Sheridan, of Charleston; Nancy Daugherty, of Washington, D.C.; Jimmy and Judy Workman and Mattie Stapleton, of Mt. Ulla, North Carolina; Claudia and Gill Duffee and sons, John and Ernest; Glenn and Mary Jane Gilkerson and Betsy Edgar, of Lewisburg; Prudence Piercy and Jacki Villars and daughter, Calee, of Clintonville; Karen Chappell Daniels, of Huntington; Blanche Geiger, Bill and Denise McNeel, Margaret and Jerry VanReenan, all of Marlinton.

Friel Writes Friend About Visit To The Pocahontas County Fair

Flushing, Ohio,
Sept. 15, 1928

Mr. Lancaster:

In 1917 Chas. Grose and I, boyhood chums, met at the Fair, which was then known as the Horse Show, at Hillsboro, and planned to meet each year at the Fair, but our plans have went wrong as plans will, and while we have each been at the Fair since then, we have never been able to get there at the same time, and it has become a habit that the one that gets there writes to the other through the Times.

This year I have made a copy and if you care to use it I would be glad to have you do so.

Both my wife and I had a wonderful visit in old Pocahontas this year, and I look back with much pleasure to the hospitality and Pocahontas hand shakes.

With best personal regards, I am
Very truly yours,
Craig Friel.

Flushing, Ohio,
Sept. 15, 1928

Chas. M. Grose,
2117, 5th Ave., Highland Park,
Richmond, Va.

My Dear Chas:

A boy was asked by his teacher to tell the story of Elisha and the bears, and tell it in the fewest words possible. After thinking a moment he said, "Elisha told the kids if they mocked him again he would have the bears come and eat them up. The kids did, Elisha did, and the bears did."

Last year you will remember that I told you that Mr. Wallace said they were going to have a better Fair in 1928—and they did.

To tell you in what way it was better, and why, is going to take more words than the boy used and may not be so accurate when told, for as Will Rogers says, "All I know is just what I saw" and I saw learning what and how to exhibit and entertain, and how to enjoy and get the most out of the Fair, and as the cooperative spirit grows, so grows the Fair.

The programs this year were as a rule better suited to outside conditions than they were last year, and I think that any one who was there will agree that it was the features "seen" rather than the ones heard, that made the greatest hit, with a few exceptions, one of which was the Colored Chorus. This was about the greatest singing I ever listened to, and when they let loose on "Hold the Winds" one just sort of wondered what angels singing would sound like. Their singing alone was to me worth the price of a season ticket, and if they install the microphone and amplifiers next year it is going to be one hundred percent better, and will make other forms of entertainment possible, but as a whole I am of the opinion that a program should be planned as far as possible to be seen rather than heard, under present conditions.

The exhibits were in all departments better than last year. The live stock barns were full from the first day; more horses than ever before; the poultry house was full of blue bloods, and every inch of space in the agricultural building was taken up, and in this building the improvement was especially noticeable. Where last year one saw bare boards in the booths and on tables, this year many of them were covered with wall paper or crepe, softening and beautifying the exhibits, making the entire building more attractive and colorful and emphasizing the fact that a pretty setting is almost as important as the exhibit itself. The canned goods department was especially attractive, and the exhibitors are learning what a quarters worth of crepe paper will

ice in memory of our deceased famiy members the past year: Dee Stockton, Lucy Moore

The Pocahontas County School System will be screening all second grade students for possible inclusion in the program for gifted students. (This is often referred to as the Special Topics Program at individual schools.)

The screening will consist of the administration of the Otis-Lennon School Ability Test (Primary II), a measure of abstract thinking and reasoning ability. The test session lasts for one hour and 20 minutes and will be given as a group test.

After the testing is completed, results will be reviewed to decide if a child should proceed to having an evaluation. If this is recommended, then written permission will be requested of parents before that level of testing begins.

The Otis-Lennon test will be administered to second graders between the dates of March 22 and April 22. Written results will be sent home to parents once the tests are scored.

Any parent who does not want his or her child tested should phone Jane Robertson, Special Education Director, at 799-4505.

KING AND QUEEN of the Friel Reunion, 2003 were Walter Kelly and Janice Via.

2003 FRIEL REUNION

The Annual Friel Reunion was held August 3 at the Seneca State Forest picnic shelter.

A large turn-out of more than 100 people attended. It was a grand event; the weather was very cooperative, and a wonderful time was enjoyed by all.

A delicious meal was served. Appreciation goes to David J. Friel for the preparation of his secret recipe for biscuit and special chicken.

Many games and contests were played. The following are a few of the prizes awarded:

Agnes Jones and Susie Wymer were the most honored guests.

Walter Kelly and Janice Via were selected as King and Queen.

Earl Ware won the break dancing contests. Tom Kennedy was voted most likely to be reincarnated as a proud peacock.

Jake Ray was selected in his absence to be the most truthful man of the year.

A grand prize is yet to be awarded for a contest sponsored by Cristella Friel and Della Ryder.

Special appreciation is expressed to those who make this reunion

ice in memory of our deceased famiy members the past year: Dee Stockton, Lucy Moore, Toots Rogers, and Mark Rogers. A special display was also set up honoring Sgt. Major Tom Workman, who served in the

dren, a colored chorus, a Spanish bull fight by Lloyd Vaughan and a group of boys from Hillsboro, which was a scream, but to me the crowning feature of this program was Miss Dolly Gray Kennison's Acrobatic Troupe of thirteen school girls, which I believe had a lot to do with the blue ribbon going to Little Levels District.

Wednesday was the big crowd. Everyone comes on Wednesday to see that bunch of pretty girls from Greenbank District.

The Greenbank District program was lively and full of fun, winding up in the evening with the pageant "A Mystic Revelation," depicting two youthful lovers in search of an ideal community, visiting Ireland, Holland, Spain, Hawaii and Japan, but finding the ideal right in Poca- but finding the ideal right in Pocahontas County, at the Fair—More Acres of Diamonds.

Thursday, and "Milestones" was Huntersville district's leading number, gotten up by Heyner Dilley, Ben-

Kanawha educator hired as new school superintendent for Pocahontas County

At a special Board of Education meeting on Tuesday night Dr. J. Patrick Law was employed as the new Superintendent of Schools for Pocahontas County.

Dr. Law, of Charleston, is presently employed by the Kanawha County Board of Education as an Assistant Superintendent. He has worked for Kanawha County Schools as a teacher, vice-principal, principal, and administrator since his graduation from college in 1973.

Thirteen people applied for the position and six of these were interviewed at special Board meetings last week. Following these interviews, three were called back for additional interviews on Tuesday. Reaching the final stage were Dr. Law, Dr. Stephen Akers, and PCHS Principal Thomas Sanders.

Following the three interviews, the Board discussed the candidates for about an hour before making its decision.

Kenneth Vance made the motion to appoint Dr. Law as Pocahontas County Superintendent of Schools, effective October 1, for a term ending June 30, 2005, at a salary of $74,000 per year. Thomas VanReenan seconded the motion.

The motion was approved on a 3-2 vote, with Mr. Vance, Mr. VanReenan, and Ruth Taylor casting the votes in favor. Board President Kermit Friel and Bernard King voted against the motion.

Mr. Friel said he supported Mr. Sanders for the position. He said he felt someone who has worked through the local system should have the opportunity to take the position. Mr. Friel said he feels Mr. Sanders has earned the respect of the county.

Dr. Law is a native of Parkersburg and graduated from Glenville State College with a BA degree in education. He earned his MA in education administration from the WV College of Graduate Studies in 1976, and his EdD in the same area from West Virginia University in 2002.

The Board interviewed six of the 13 candidates who applied for the county's superintendent post in two special meetings last week. Also taking part in these interviews was a committee made of school personnel and community members.

On Tuesday Dr. Law, Sue Hollandsworth, and Mr. Sanders responded to questions from the Board and committee members. Interviewed on Wednesday were Dr. Dwain Wilcox, Dr. Akers, and Don Johnson. Roger Brady was also to be interviewed, but called at the last minute to say he was not coming.

The Board of Education met for a regular meeting on Monday.

Cheryl and Josh Dilley appeared before the Board concerning having a bus run on the Lake Reed Road. Jamie Walker and Mike Galford, the drivers of the two buses that come from the Slaty Fork area were at the meeting. Also present was Barbara Gibson, who used to drive a bus in the same area.

Ms. Dilley said they had been told a bus would come up the road if an area for it turn around was constructed. She said they arranged to have that done and then found out it was too far up the road.

It was reported the road is safe for a bus for only 0.7 mile, about 0.2 mile from the Dilley house. The drivers, present and past, agreed this is as far as a bus should go on this road.

The Dilleys also expressed concern that if Mr. Walker's bus is the one that picks up their children, ages 4 and 7, only high school age students will be on the bus until closer to Marlinton. In response to a question, he said there would be no problem with having them sit at the front of the bus.

The drivers warned that going onto Lake Reed Road will mean an earlier starting time of ten to 15 minutes for both of their [illegible]

The Dilleys were told that bus service would be worked out for the Lake Reed Road.

Diane Dalton, special education teacher at Marlinton Middle [illegible]

about the impact on the regular and more advanced students, whether they are being slighted due to all the attention given special needs students.

Interim Superintendent Alice Irvine and Mr. Trusler said as soon as all the case load information on special needs children is submitted to the central office from the schools, action to correct the situations at each school can be taken.

The Board approved ZDS Design Services, of St. Albans to provide the engineering/architectual services for the renovations at PCHS which include upgrades to the science classrooms, electrical system, and installation of new fire alarm, intercom, and security systems.

ZDS is the engineering firm for the grothermal heating/cooling system now being installed at the high school.

Concerning that project, Ms. Irvine reported that that 138 wells have been drilled to far. The total will be 176, including 16 new wells that will be needed to provide heating and cooling for the expanded science classroom section of the building, she said. No connections have been made yet and will done be after after all wells are drilled, with a November 1 completion date, Ms. Irvine said.

Ms. Irvine said the project "seems to be going well."

She reported that an estimate of $35,000 has been received for the repair/replacement of the gym roof at the Hillsboro School. The adjustor for the state Board of Risk is satisfied with this amount, but it still needs BOR approval. If approval is given and bids come in under $35,000, the work can begin immediately, she stated.

Bids are already being sought for the roof work.

The adjustor also approved new ceiling tile and floor. Ms. Irvine samples of different types of floor covering will be obtained for the school staff to select which they prefer.

Approval was given for the following to serve as volunteer coaches at PCHS: Greg Moseson, girls soccer team, Melodi Kinsely, cheerleading team, Andrew McNabb and Pete Burdette, football team, and Richard Lacasse, boys soccer team. The vote to approve was 4 - 1 with Mr. VanReenen casting the no vote. He indicated he is concerned about the cost to the Board, due to the background checks and training that is now required for volunteers working with students.

In personnel matters the Board approved the employment of:

Continued to page 5

Council discusses quitclaim deeds, takes no action on horses

Council met on September 2 with all members present except Jim Gibb.

Region IV representative was not present.

David Cain was first on the agenda list. He wants to get the Council's opinion on quitclaim deeds on unused alleys, mentioned three pieces of property in the Smith Addition by which three different people had gained property from alley ways, and there are some alley ways adjacent to his property he would like to have.

David Zinn said the Dog [illegible] the site.

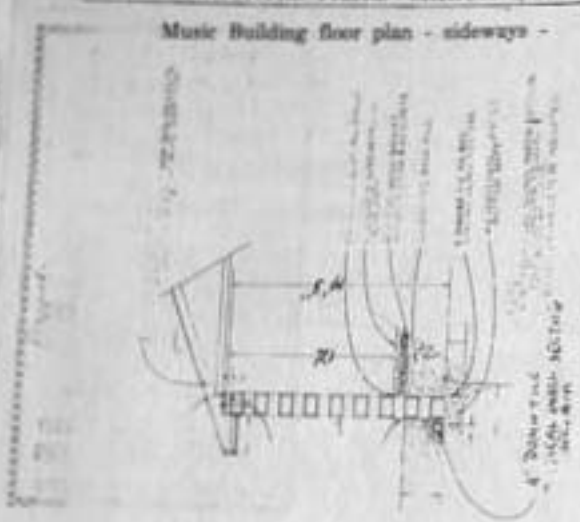
The Mayor stated he thinks the Town's position is against giving alleys that are town property away but the court decides.

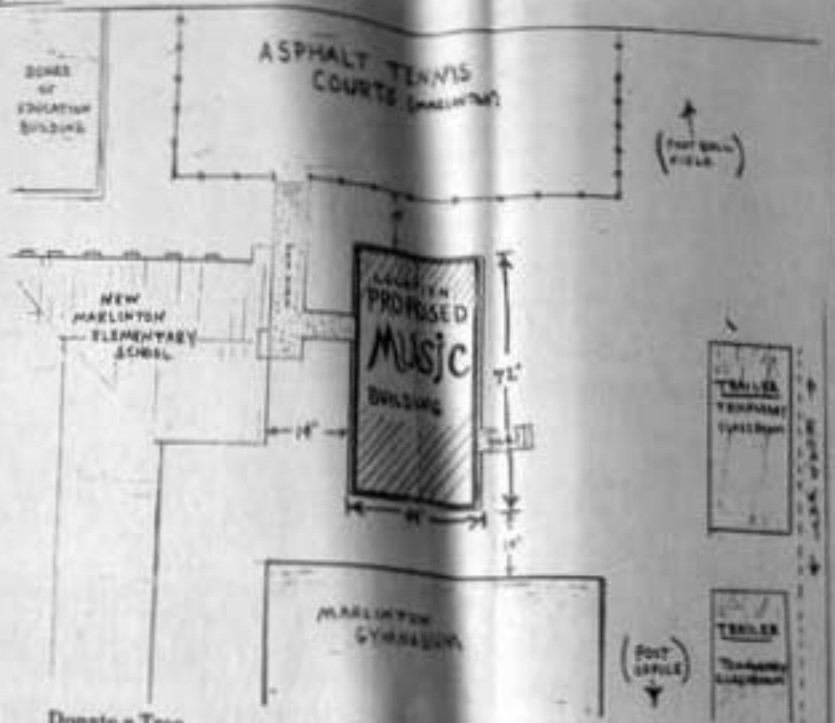
Chuck Workman, the second member of the committee appointed to study the ordinance, reported that he thinks the Greenbrier River Trail may have some problem with change, and thinks we could enforce cleanup, giving tickets for disorderly conduct, endangering others, etc.

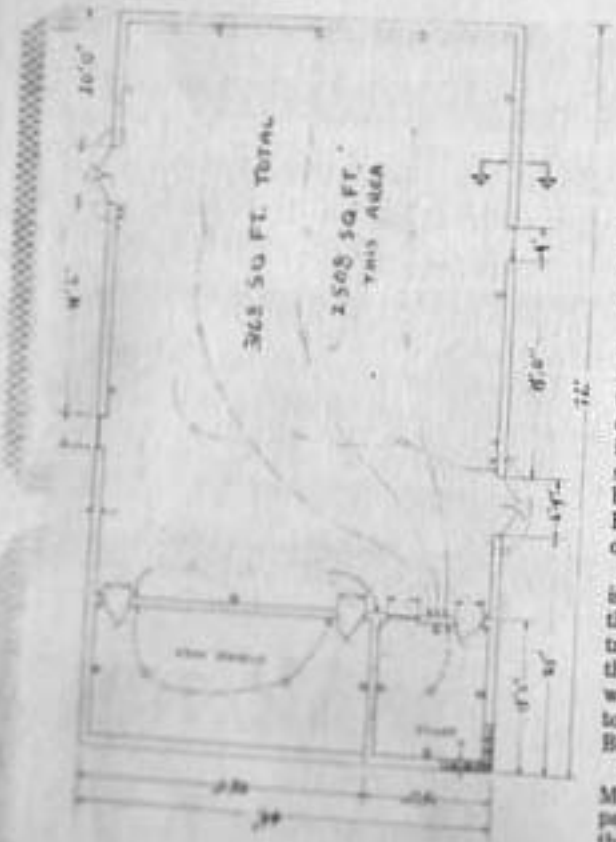
From the audience came the opinions that horses should be allowed to be ridden in town, shouldn't have to clean up, make an ordinance, give first time warning, don't hinder visitors, only a few people causing problems, ought to be responsible for their animals, [illegible] keep them under control, keep these same things would solve problem, have them to be used in town except for Greenbrier Trail.

The Mayor noted that State

Music Building floor plan - sideways -







Donate a Tree

Several items needed for the construction of the music building can not be supplied directly by local companies.

The 37 – 48 foot trusses to be used in building the roof structure are one of these items. Green lumber can not be used for building these trusses, but a suggestion was submitted by Ralph Beckwith of the Beckwith Lumber Company of Slatyfork.

Mr. Beckwith's company is willing to trade cash or the materials needed for trees (hardwood or pines) that people in the county would donate to the Marlinton Middle School Music Building Committee, Inc.

Everett Tibbs of the W. M. Cramer Lumber Company has also consented to this donation approach.

All trees offered as donations will be scaled to determine their value, and the cash value of the trees will be written upon a receipt as a tax deductible donation from the M. M. S. Music Building Committee, Inc.

Please Consider donating A Tree

Shopping for Building Supplies

The Marlinton Middle School Music Building will be built with volunteer labor, but the concrete, cement block, roof, electric supplies, doors, windows, and fire alarm systems will be acquired through direct purchase.

Fund raising for the music building project has officially begun. Bids and prices for building materials are being gathered to compile a shopping guide to compare prices as well as quality of materials.

During this part of the project, local businesses and community members can offer valuable advice concerning where the best materials can be found and make suggestions as to alternate methods for construction of materials to be used.

Music Building Fundraising

Another fundraising project for the Music Building is being spearheaded by Marlene Chittum, of Snowshoe. Donations of $25 may bring you 3 1/2 acres of land near Seneca State Forest or 10 other prizes at Snowshoe. A Season ski pass worth $400; Season pass to Mountainton Athletic Club, worth $400 Dinner for two at the Summit Restaurant; Dinner for two at Auntie Pastas' Ristorante; Dinner for two at Grady Cassells; Dinner for two at Marlinton Motor Inn; Dinner for two at Alfredos; Picnic for two at Slope Stops; Gift Certificate at the Why Not Shop.

Donations may be mailed to Marlene Chittum, Snowshoe, W. Va. 26209 or Marlinton Middle School Music Building Committee, Rt. 2, Box 154, Marlinton.

Straight Answ
How can I tell ho

up in the evening with the pageant "A Mystic Revelation," depicting two youthful lovers in search of an ideal community, visiting Ireland, Holland, Spain, Hawaii and Japan, but finding the ideal right in Poca- but finding the ideal right in Pocahontas County, at the Fair—More Acres of Diamonds.

Thursday, and "Milestones" was Huntersville district's leading number, gotten up by Hevner Dilley, Beulah McComb, Mrs. Aaron Sharp, W. A. Hively, Mrs. Elmer Moore, Mrs. Wilson and others, and representing the various steps in the progress of the County's development. Both afternoon and evening programs were lively and full of interest and there was not a dull moment. A typical Huntersville district program.

On Friday it rained a little and did not look like a very good day for Edray District to put on the "Battle of Pt. Pleasant" but Mrs. Anna Hunter proved herself General, and with orders to "Trust in the Lord and keep your powder dry" she rallied her forces, and when evening came the report was "All present or accounted for" and

...meetings ...three were ...called back for additional inter... ...views on Tuesday. Reaching the final stage were Dr. Law, Dr. Stephen Akers, and PCHS Principal Thomas Sanders.

Following the three interviews, the Board discussed the candidates for about an hour before making its decision.

Kenneth Vance made the motion to appoint Dr. Law as Pocahontas County Superintendent of Schools, effective October 1, for a term ending June 30, 2005, at a salary of $74,000 per year. Thomas VanReenan seconded the motion.

The motion was approved on a 3-2 vote, with Mr. Vance, Mr. VanReenan, and Ruth Taylor casting the votes in favor. Board President Kermit Friel and Bernard King voted against the motion.

Mr. Friel said he supported Mr. Sanders for the position. He said he felt someone who has worked through the local system should have the opportunity to take the position. Mr. Friel said he feels Mr. Sanders has earned the respect of the county.

Dr. Law is a native of Parkersburg and graduated from Glenville State College with a BA degree in education. He earned his MA in education administration from the WV College of Graduate Studies in 1976 and his EdD in the same area from West Virginia University in 2002.

...he was not coming.

The Board of Education met for a regular meeting on Monday.

Cheryl and Josh Dilley appeared before the Board concerning having a bus run on the Lake Reed Road. Jamie Walker and Mike Galford, the drivers of the two buses that come from the Slaty Fork area were at the meeting. Also present was Barbara Gibson, who used to drive a bus in the same area.

Ms. Dilley said they had been told a bus would come up the road if an area for it turn around was constructed. She said they arranged to have that done and then found out it was too far up the road.

It was reported the road is safe for a bus for only 0.7 mile, about 0.2 mile from the Dilley house. The drivers, present and past, agreed this is as far as a bus should go on this road.

The Dilleys also expressed concern that if Mr. Walker's bus is the one that picks up their children, ages 4 and 7, only high school age students will be on the bus until closer to Marlinton. In response to a question, he said there would be no problem with having them sit at the front of the bus.

The drivers warned that going onto Lake Reed Road will mean an earlier starting time of ten to 15 minutes for both of their buses, regardless of which one ...

The Dilleys were told that bus service would be worked out for the Lake Reed Road.

Diane Delfino, special education teacher at Marlinton Middle School, expressed concern to the Board about her student case load. She said two years ago there were two special ed teachers with a caseload of 35 students, while this year she is alone with 34 students and no teacher aide. Ms. Delfino said there are too many students with too many needs in her program for her to be able to properly serve. She said she hates to see the special education program at MMS go backwards.

Later in the meeting the special education situation was discussed again. Mr. Vance listed the needs of the program at Green Bank, the high school, and now Marlinton Middle, as well as the need for another speech therapist.

Mr. Friel commented that special education is going to bankrupt school systems. Roger Trusler reported that the county spent over $1,000,000 on ...

...rooms, electrical system, and installation of new fire alarm, intercom, and security systems.

ZDS is the engineering firm for the geothermal heating/cooling system now being installed at the high school.

Concerning that project, Ms. Irvine reported that that 138 wells have been drilled to far. The total will be 176, including 16 new wells that will be needed to provide heating and cooling for the expanded science classroom section of the building, she said. No connections have been made yet and will done be after after all wells are drilled, with a November 1 completion date, Ms. Irvine said.

Ms. Irvine said the project ...

...ject which they ...

Approval was given for the following to serve as volunteer coaches at PCHS: Greg Mouser, girls soccer team; Melodi Knisely, cheerleading team; Andrew McNabb and Pete Bundens, football team; and Richard Lacasse, boys soccer team. The vote to approve was 4 - 1 with Mr. VanReenen casting the no vote. He indicated he is concerned about the cost to the Board, due to the background checks and training that is now required for volunteers working with students.

In personnel matters the Board approved the employment of

Council discusses quitclaim deeds, takes no action on horses

Council met on September 2 with all members present except Jim Gibb.

Region IV representative was not present.

David Cain was first on the agenda list. He wants to get the Council's opinion on quitclaim deeds on unused alleys, mentioned three pieces of property in the Smith Addition by which three different people had gained property from alley ways, and there are some alley ways adjacent to his property he would like to have.

David Zorn said the Dog ... property he got was property that went through his property and he quitclaimed it to clear the title.

The Mayor stated he thinks the Town's position is against giving alleys that are town property away but the court decides. Council voted to challenge quitclaims.

The Mayor said the Harvest Festival will be held September 27 and First Avenue will be closed above Main Street with activities on other streets.

Motorcycle Rally will be in Marlinton Friday evening, September 12, at 6 p.m. Music during the evening with awards at 9 p.m.

The 911 Ordinance order to provide map for identification of property and house numbers for rescue squad, etc., will be forthcoming in the next few months.

In regards to the Horse Riding Ordinance, the Mayor called for the committee's report.

Robin Mutschelier said they were doing research with the Municipal League and also getting information on diapers or bags but don't have answers back yet. She said taking broom and pan with them ...

Chuck Workman, the second member of the committee appointed to study the ordinance, reported that he thinks the Greenbrier River Trail may have some problem with change, and thinks we could enforce cleanup, giving tickets for disorderly conduct, endangering others, etc.

From the audience came the opinions that horses should be allowed to be ridden in town, shouldn't have to clean up, make an ordinance, give first time warning, don't hinder visitors; only a few people causing problem; ought to be supervised; at ages (young girls have been seen on horses) to keep them safe; using bags would solve problem; have them to be used in town except for Greenbrier Trail.

The Mayor noted that State Park, and therefore the Trail, are exempt. Also he said next year a guided tour and camps for horses and visitors will be located on park property below town rented by Parks and Recreation.

Committee will report a recommendation next meeting.

Upon request from Region IV, Hannah and Associates were approved for payment of $47,000 for engineering costs.

Maintenance workers are working on trimming trees.

Mr. Workman said he had been checking on property in the Judge Street area; it wasn't easy to travel; he thinks if someone spends thousands on building property the Town should be business-friendly and lay street. Mike Rider asked about a sewer line running through it. David Cain said he is considering building and even paving street to get to it.

The Mayor stated if

Court

...charged with driving under the influence of a controlled substance and possession of controlled substance. On Monday he pled guilty to both offenses in Magistrate Hevener's court. He was sentenced to 24 hours in jail and fined $100 on the DUI offense. For the drug charge, Carden was placed on probation for six months. Court costs were $140.

...Ora R. Williams, of Richwood, was arrested by Deputy McCoy on Sunday and charged with possession of less than 15 grams of marijuana. On Monday he pled guilty to the charge and was placed on probation for six months by Magistrate ... court. Court costs were $140.

swell from the ground to several stories above the five-story home of American defense. American Airflight 77 with 64 passengers on board had slammed into and through sections A and B of the five-sided building and into the C section where David had been.

And for awhile, he felt as if he were watching a movie, a horrible action-thriller come to life in front of his eyes.

"It didn't seem real at all," he said. "Everything was kind of slow motion at that point. For a split second it was kind of madness and then it seemed, actually, to move fairly well."

The smoke and flames grew and he returned to his office only to be greeted by an order to evacuate and then, just as quickly, an order to return inside as another plane approached. It turned out to be a military plane and Pentagon survivors were once again ordered to evacuate.

Emergency service first responders were on the scene trying to keep everyone away from that end of the building because of the fire and secondary explosions.

"Several of the guys I work with ... were coming in on the Metro and ended up going in to the building just as the plane crashed," he said. "They[were out, there trying to help evacuate. They stepped up."

David, however, [illegible] forced to watch the [illegible] unfold, unsure [illegible] some of his co-workers [illegible] made it onto the grounds when they saw the plane fly low over the Interstate, ripping through power lines and hit the building. Two others were sitting in a crash vehicle right in front of it and saw the plane hit the dirt before it bounced into the wall. They were able to save themselves by crawling under the vehicle, but were badly burned.

People covered in smoke, ash and water were pouring out of the building, they were, he said, "just black from the smoke." He watched as people went into the building, crawling amid the rubble to search for anyone who might be alive and he watched as ambulances and

the friendship of the white pine days. There were about sixty present at the meeting; but by afternoon the number had increased to about eighty and it was a great bunch of men that carried our minds back to the days of "Sweet Marie" and "After the Ball", and I was mighty proud of the chance to stand before them for a few moments that morning, for in their young days they were the best of men, and they have not changed with the passing years. Long live the White Pine Union.

To mention all the interesting things of the week would take too much space as there was something doing every moment. It was all good, each act and feature adding its mite to the making of a banner week. There were of course some outstanding features. The band, under Tom Anderson's leadership, was unusually good. They had harmony, time and the will to please, and were complemented on every hand.

The Colored Chorus was on the job about

Major David Jonese instinctively knew what had happened as soon as the C section of the Pentagon shook.

His wife, Cheryl, had called from home in Green Bank to tell him New York's World Trade Center had been attacked by terrorists. David had just hung up the phone and turned to tell his co-workers what had happened in New York when what was presumably the safest building in the world suffered the same damage—terrorists had flown a passenger plane into the newly remodeled section of the Pentagon.

The building shook, lights flickered and David ran outside in time to see a huge ball of fire swell from the ground to several stories above the five-story home of American defense. American Airflight 77 with 64 passengers on board had slammed into and through sections A and B of the five-sided building and into the C section where David had been.

And for awhile, he felt as if he were watching a movie, a horrible action-thriller come to life in front of

police officers arrived to do a job they had been prepared for, but never thought they'd be dispatched to do.

"[It] all burned," he said. "It was by the sheer grace of God we moved or we would have been in there." Because of the reconstruction, he was actually quartered in offices attached to the south side of the Pentagon.

Fortunately, most people made it out of there, he said, although a lot of them were hurt. People were crawling through total darkness trying to lead others out of there

"They really didn't know where to send people," David recalled. "We tried to account for everybody in our department."

That proved to be a difficult task; some people were in ambulances, too much traffic struggled to flee the area.

But one officer was unaccounted for that day. They searched, but not until later did they discover he had been on American Airflight 77, a victim of the terrorists' plot even though he was not in the Pentagon.

It requires the full six days to get a good picture. There is too much to absorb in one day or two days and those who get the most out of the Fair are the ones who go Monday morning and stay until after the fire works on Saturday night.

True, it comes in a busy season, but if one looks forward to, and arranges for the spending of this one week of the year in recreation and pleasures, it can be managed, and is worth to anyone many times more than the time lost. In fact it is not time lost at all, but a week well spent in profitable schooling and learning again how to play and keep young.

To me it was a wonderful week, spent in a wonderful place, and I am better off because of it, and on the last night when the program was ended and Miss Wilson stepped down in front and led the singing of "The West Virginia Hills" it came to me

Pentagon.

The building shook, lights flickered and David ran outside in time to see a huge ball of fire swell from the ground to several stories above the five-story home of American defense. American Airflight 77 with 64 passengers on board had slammed into and through sections A and B of the five-sided building and into the C section where David had been.

And for awhile, he felt as if he were watching a movie, a horrible action-thriller come to life in front of his eyes.

"It didn't seem real at all," he said. "Everything was kind of slow motion at that point. For a split second it was kind of madness and then it seemed, actually, to move fairly well."

The smoke and flames grew and he returned to his office only to be greeted by an order to evacuate and then, just as quickly, an order to return inside as another plane approached. It turned out to be a military plane and Pentagon survivors were once again ordered to evacuate.

Emergency service first responders were on the scene trying to keep everyone away from that end of the building because of the fire and secondary explosions.

"Several of the guys I work with were coming in on the Metro and ended up going in to the building just as the plane crashed," he said. "[They] were out there trying to help evacuate. They stepped up."

recalled. "We tried to account for everybody in our department."

That proved to be a difficult task; some people were in ambulances, too much traffic struggled to flee the area.

But one officer was unaccounted for that day. They searched, but not until later did they discover he had been on American Airflight 77, a victim of the terrorists' plot even though he was not in the Pentagon.

"It could have been worse," he said, "a lot worse."

Had the terrorists flown into the center of the Pentagon, involving all five sides of the building, or flown into another section not yet reconstructed with explosive-proof windows, casualties could have risen exponentially from the 189 who died there.

"Fortunately, the terrorists were not very smart in what they were doing. They hit the Pentagon because it was a target they could identify," David said.

Officials had to make a tough call, then.

"They had a hard time trying to decide where to put people where they thought it would be safest," he said.

Eventually, hotels in nearby Crystal Springs opened up for the evacuees. For hours they sat and watched as the tragic day developed, learning the twin

that surely this must be the place that "Polly Anna" came from, but I did not feel like singing as there seemed to be something great big lodged in my throat, and something moved slowly down over my cheek that felt like a rain drop, and when they reached that verse:

"Oh the West Virginia Hills
I must bid you now adiew;
In my home beyond the mountains
I shall ever dream of you.

I made up my mind that when my

trying [illegible] from that end of the building because of the fire and secondary explosions.

"Several of the guys I work with were coming in on the Metro and ended up going in to the building just as the plane crashed," he said. "[They] were out there trying to help evacuate. They stepped up."

David, however, as one of the evacuees, was propelled across the street by security and forced to watch the tragedy unfold, unable to help. And some of his co-workers hadn't made it onto the grounds when they saw the plane fly low over the Interstate, ripping through power lines and hit the building. Two others were sitting in a crash vehicle right in front of it and saw the plane hit the dirt before it bounced into the wall. They were able to save themselves by crawling under the vehicle, but were badly burned.

People covered in smoke, ash and water were pouring out of the building, they were, he said, "just black from the smoke." He watched as people went into the building, crawling amid the rubble to search for anyone who might be alive and he watched as ambulances and [illegible] a target [illegible] identify," David said. Officials had to make a tough call, then.

"They had a hard time trying to decide where to put people where they thought it would be safest," he said.

Eventually, hotels in nearby Crystal Springs opened up for the evacuees. For hours they sat and watched as the tragic day developed, learning the twin towers had fallen, killing some of New York's first responders and that another plane apparently headed to Washington had crashed in Pennsylvania.

Roads were closed, cell phone and land lines were busy. "No one could call; no one could do anything," he said. "You couldn't move.

"You were just stuck. You just kind of sat there for hours and wondered what was next."

And then Air Force F-16s arrived, presenting themselves overhead, patrolling for any other inbound planes.

"It was a really weird feeling to think, 'I'm sitting here in Washington, D. C. with combat air defense planes flying overhead,'" he said.

"That's what changed it all for me, my whole perspective on living."

Then a body of people accus-

tomed to following orders were told, "Try to make it out of here the best you can."

On their own, they walked for miles until a bus picked them up. The driver couldn't negotiate the congested roads and took them back to where they started.

They walked some more.

"It took me about 10 hours to get back home (to Quantico) that evening," he said. "I had no way to identify myself to anybody," he said. No way to verify that he was Major David Jonese, United States Marine Corps, because his badge was in his brief case inside the Pentagon.

Quantico, by that evening, had stepped up security, as well.

David had eventually gotten through to his brother, Mark, also stationed at Quantico. Mark picked him up and they traveled back to the base.

"When we got to the gate, (guards) started searching the car and I just said, 'hey, I don't have any ID, it's all at the Pentagon," David said.

Mark was able to vouch for David and get him through the gate.

When he finally did get a line through to Green Bank, about 6 p.m., he found many people had called Cheryl and his parents,

Deaths

Carrie B. Morrison

Mrs. Carrie Hester Brown Morrison died Monday, March 8, 1982, at her home in Lobella.

Born May 16, 1898, near Renick, she was the daughter of Andrew and Mary Hinkle Brown.

Mrs. Morrison was a retired school teacher, having taught for thirty-five years in Greenbrier and Pocahontas counties. She first came to Buckeye to teach in 1918.

She was preceded in death by a son, Bruce, her husband, Frank, two sisters, Mrs. Prudence Culp, and Mrs. Pearl Fuller and a brother, Edgar.

She is survived by two daughters, Mrs. Joan Cuskey, of Abingdon, Virginia, and Mrs. Reta Rose, of Hillsboro. She is also survived by three sisters, Mrs. Nellie Powell, of Droop, Mrs. Lena Eiler, of Akron, Ohio, and Mrs. Clara McFarland of St. Petersburg, Florida, and nine grandchildren.

Services will be held at the Mt. Zion Methodist Church on Droop at 2:00 p. m. Thursday, by Rev. Verlin Butcher, and Rev. Cecil McMillion. Burial will be in Sunset Cemetery at Jacox.

Mrs. Morrison will be sadly missed but fondly remembered by all who knew her.

AMBITION OF SIX YEARS FULFILLED BY LILLIAN GISH

Descendant of Early Puritans, Noted Actress Inspired by "Scarlet Letter."

Lillian Gish, celebrated star of the screen, has just fulfilled an ambition of some six years in playing the role of "Hester Prynne" in Nathaniel Hawthorne's classic romance, "The Scarlet Letter." For six years the actress has mentally rehearsed the role, hoping that some day she would be given an opportunity to play the dramatic heroine of one of the most famous romances in the world.

The fulfillment of her ambition will be shown at the Seneca Theatre Thursday and Friday when Metro-Goldwyn-Mayer will present her in the role.

Miss Gish regards the role as a tribute to her ancestors, as she is directly descended from one of the original Puritan families. In fact, the family home at Deerfield, Mass., is being maintained by the Daughters of the Revolution as a museum where the ancient furnishings and possessions of the actress' ancestors are on public display. Miss Gish is herself a member of the D. A. R.

The new picture is the dramatic story of a Puritan woman who carried a badge of shame through life to shield the man she loved. It was staged on a lavish scale, with a huge cast of celebrities, nearly a thousand men, women and children in the larger scenes and in elaborate settings. An entire replica of America's first Puritan village was constructed for the big production, her second Metro-Goldwyn-Mayer vehicle, "La Boheme" being the first.

Victor Seastrom, famous as the director of "He Who Gets Slapped" and "The Tower of Lies," directed the production. Lars Hanson, famous Swedish star, makes his American debut as her leading man, and Henry B. Walthall, Karl Dane, Marcelle Corday, William H. Tooker, Jules Cowles, Fred Herzog and other notable players appear in supporting roles.

Annual Report Of Community Club

Officials had to make a tough call, then.

"They had a hard time trying to decide where to put people where they thought it would be safest," he said.

Eventually, hotels in nearby Crystal Springs opened up for the evacuees. For hours they sat and watched as the tragic day developed, learning the twin towers had fallen, killing some of New York's first responders and that another plane apparently headed to Washington had crashed in Pennsylvania.

Roads were closed, cell phone and land lines were busy. "No one could call; no one could do anything," he said. "You couldn't move.

"You were just stuck. You just kind of sat there for hours and wondered what was next."

And then Air Force F-16s arrived, presenting themselves overhead, patrolling for any other inbound planes.

"It was a really weird feeling to think, 'I'm sitting here in Washington, D. C. with combat air defense planes flying overhead,'" he said.

"That's what changed it all for me, my whole perspective on living."

Then a body of people accus-

Washington area called to say they could be a certain place if Cheryl could talk to David and could tell him to get there. They would wait until they knew for sure. People who lived here offered to go to Washington, to get in as far as they could, and bring him home. They would wait until they knew for sure.

It is the first moment during the story that David Jonese shows emotion. "That, to me, was the most incredible thing," he said. "I just never imagined people going that far out of their way."

That moment affirmed the Joneses' decision to move back to Pocahontas County, where they both grew up, where they wanted to raise their family. They had lived in Green Bank less than a month.

"Knowing that people would stop from their daily lives here, (people) you would never think about. We came back to the right place."

But in the city, people were transformed by tragedy, as well. They offered rides.

"Where do you need to go?"

"What can we do to help?"

"Everybody was doing something to try to help somebody else," he said, "which was

Geo. Sharp's Position In Race For Governor As Seen By The Mail

Secretary of State, George W. Sharp still has the gubernatorial bee buzzing around his head and is said to be considering an announcement. It is said that of late he has acquired some new backing coming from the southern end of the state. A report, which seems to have been well founded, is to the effect that a meeting was held somewhere in "the southern end" during the last 10 days, at which Judge J. W. Maxwell, of Beckley was present. Later, it is said, Judge Maxwell saw Mr. Sharp and told him that he had been selected as the candidate for governor by a strong "group". Mr. Sharp, it is said, replied that he would decide later whether he would accept.

If Mr. Sharp declined to accept the backing offered by Judge Maxwell, so the story goes, the same backing would go to Former Supreme Court Judge J. A. Meredith, of Fairmont.

This was the first time Mr. Meredith's name has been mentioned prominently in connection with the governorship.

Another story going the rounds is that if Mr. Sharp decides not to become a candidate for the gubernatorial nomination, he will offer himself as a candidate for the Republican nomination as auditor.

While there is doubt about who will run for this or that office, numerous candidates are springing up for them.

Several already are talking of

thaneil Hawthorne's cla "The Scarlet Letter." the actress has menta the role, hoping that would be given an o play the dramatic hero the most famous rom world.

pretty amazing, considering most of the time up there you'd swear people would step right over you to get where they're going."

Cheryl had sat, none too patiently, by the telephone all day.

"I just wanted to go get the kids," she said. "I just wanted to get the kids and bring them home."

A thought gnawed at the back of her head. Plagued her.

"Did they talk to their daddy yesterday?"

Daughters Kachine and Makeia and son Lakota were students at Green Bank School and were dismissed early because of the tragedy.

She made frantic calls to his cell phone, their "life line," to find out what had happened to her husband of 21 years.

That cell phone was in his brief case, along with his government badge and wallet, in the C section of the Pentagon.

When he got back to it a week later, he heard the messages she'd left, heard the fear in her voice as she begged him to call her and tell her he was all

"the message said.

[illegible] driveway. Lakota fishes with his friends. And Makeia alternately

"I've seen this in other places, but I never thought it would be in Washington, D. C.," he said.

His days after September 11, 2001, were much unchanged, otherwise.

"There was never any fear, never really an issue of what's going to happen to us," he said. "It was more of it's time to get involved and do something or stay out of the way."

"You look back and think there was probably so many things that should have been done or could have been done to help, but basically it was just luck. Sheer luck."

He saw the September 11 memorial at the Smithsonian Institute and it was "the first time I ever really stopped to think about it."

David was promoted to Lieutenant Colonel September 1. He begins a new job at Quantico this week and could retire in a year or stay for another three year hitch.

And then he will come home.

Home—where Cheryl runs a busy household bustling with children. Kachine shoots bas-

wraps her arms around her father's neck from behind and bounces on his lap.

Home–where friends and neighbors call to say they care when they know something might have happened.

It's difficult to see the changes September 11 made in this family who is dedicated to one another and to the new life they've chosen. But they are caught in the special glances between David and Cheryl, in the softly spoken phrases which seem to deny the presence of anyone else. They are caught in the determination of people who mean to make a difference with the lives they've been given.

Changes marked by a day no one can forget, but a day that has given David and Cheryl Jonese a renewed sense of the importance of communication and of community.

Councilmen: T. J. Mason, 79; Van Fortune, 68; William Deering, 80.

On this ticket there were two unfilled vacancies, and one or two names were filled in by voters, but not enough votes were gotten to merit any consideration.

Two of those who were on the People Ticket have served the town during the past year. They will retire from office the first of February when the new Mayor and Council takes over the reigns of city government.

Hefner Fined For

ON TUESDAY, AUGUST 5, in their official attire of red hats and purple dresses, the ladies of the Lulu Belle's chapter of the Red Hat Society spent the day in Monterey Virginia, with sight-seeing, shopping, and luncheon at Highs Restaurant. Making the trip were, l-r, Mary Paul, Edith Kisner, Cathy Grimes, Gladys Vance, and Hazel Chenoweth. The local chapter of the Red Hat Society was chartered in April 2003.

Beating Baxter Up

Quite an interesting trial was held in Justice A. E. Smith's court Thursday afternoon as a result of a fight which took place between Melvin Hefner and John Baxter at Stillwell early in the week.

According to the testimony, Hefner's children and Baxter's children had been having some trouble on the way to and from school. They had been rocking each other and flinging back and forth nasty remarks. The parents took it up. So one night when Baxteer was returning home, Hefner was lying in wait for him at the lower end of the lumberyard at Stillwell. He attacked him and a fight ensued in which Baxter charged Hefner with using a pair of steel knucks. In the trial there was not enough evidence produced to sustain this charge, but a verdict was rendered demanding that Hefner pay a fine of $25.00 and costs. Upon failing to pay the fine and costs he was committed to jail until such fine and costs were paid, but his friends were with him, and rallied to his support, securing the $43.20 necessary to release him from jail, and he went on his way rejoicing.

THE KIWANIS C
INST

With the insta
at the meeting F

Mountain Waters Byway Business Development Conference

Friday and Saturday, September 19 and 20, at the Pocahontas County Opera House in Marlinton.

Representatives from Bath and Rockbridge Counties, in Virginia, and Greenbrier, Nicholas, and Pocahontas Counties will gather in Marlinton to learn more about the Byway Program. Mountain Waters Byway runs from Lexington, Virginia, to Summersville in Nicholas County. Make a reservation by September 15 by calling the Pocahontas County Visitors Bureau at 1-800-336-7009. Fee is $10 which includes two lunches and dinner.

Registration is from 11 a.m. to noon on Friday, September 19. After the Welcome by Robin Mutscheller, President of the Marlinton Business Association, lunch will be served in the Opera House. From others who have worked with Byways and from the Byway Coordinators, those attending will learn about the Byway process. Dinner is with a voucher from MBA to enjoy one of several restaurants in Marlinton.

On Saturday registration is from 8 to 9 a.m. Then elected officials and those in State government who work with the program will talk about federal programs for Byways and how to utilize these programs for our businesses and community. After lunch experts will update those attending on Historic Preservation, Small Business Development, Main Street Programs and Workforce Training.

The meeting will conclude around 3:30.

No Shell

A duck belonging to Attorney David Arrington laid an egg Tuesday with no shell. It had the soft membrane covering but no shell. He has 16 ducks on the pond at his home above Campbelltown. He found four eggs Tuesday in addition to the odd one so he says it is "sufficiently spring."

H. Sharp, members of Board of Directors; C. C. Clendenen, trustee; and J. Haynes Miller, secretary. These officers will preside throughout the year of 1928.

YOUTH ARRESTED IN SLAYING OF RECLUSE

Richwood, Dec. 30.—Worthy Vaughan, 22, who lives on the Greenbrier road near here, was under arrest today on a charge of killing Snowden Crane, an aged hermit, of near Quinnwood. Vaughan was found on Williams River by Greenbrier County officers and arrested. Crane's body was found buried under a rail pile a few weeks ago.

Vaughan said he was in Richwood at the time of Crane's death. Officers said he was employed on the Crane farm. He was taken to Lewisburg and lodged in jail.

DONATES NUMERAL BOARDS

The teachers of the first five grades of the local graded school have expressed their great appreciation to S. B. Wallace and Company for a donation of numeral boards. The boards have already been put to

Animal health officials discover West Nile Virus in Northern Panhandle horse

West Virginia Department of Agriculture Animal Health officials announced discovery of West Nile Virus in a Hancock County horse.

"The owner discovered the horse was sick August 20, and notified a local veterinarian," said State Agriculture Commissioner Gus R. Douglass. "At first it was thought to be rabies and then possibly West Nile Virus. Blood was taken and sent to a laboratory in Pennsylvania for testing. The tests came back positive for West Nile."

The unvaccinated horse was treated for the disease and is now recovering. State Veterinarian, Dr. Joe Starcher said it is important for horse owners to make sure their animals are vaccinated against West Nile and other equine encephalitic viruses.

"Effective vaccinations take two injections—a first injection, then a booster injection is given one month later," Dr. Starcher said. "By the time the booster is given the threat this year will be reduced. However, getting the shots now and a booster in the spring will protect the animals at the beginning of the mosquito season next year."

More than 15,000 cases of West Nile Virus were diagnosed this past year.

Nearly one-third of these horses died or were euthanized.

Dr. Starcher said he is especially concerned about the current case since the horse is located just five miles from Mountaineer Racetrack—a horse racing facility where approximately 1,500 horses are housed.

The threat to these animals may be significant if they haven't been vaccinated," Dr. Starcher said.

For more information on West Nile Virus, contact the WVDA's Animal Health Division at 304-558-2214 or call your local veterinarian.

Beverage Attends WV School of Osteopathic Medicine

Jennifer G. Beverage, of Hillsboro, was one of 104 students who began first-year studies at the West Virginia School of Osteopathic Medicine (WVSOM) in Lewisburg on August 11. She was among 1,432 applicants who vied for a spot in this fall's freshman class.

Beverage will study basic sciences on the WVSOM campus for two years before spending medical education on clinical rotations at various hospitals, clinics, and private practices. She will graduate in May 2007 upon successful completion of the WVSOM medical program.

Her first white coat was presented to her on August 23 by Dr. Roland P. Sharp.

Beverage received a bachelor of science degree in Biology from George Mason University in Fairfax, Virginia. During her undergraduate study, she was listed in the national Dean's List for three consecutive years.

Beverage is the daughter of Virginia Deputy, of Stony Bottom, and the late John Deputy, Jr. She is married to Mark Beverage.

Potatoe Growers to Tour In 22 Counties

Covering nearly three times as large a territory as last year, a series of potato tours extending into 22 counties will be conducted July 2 to 28 under the direction of Dee Crane, potato specialist, and E. C. Sherwood, plant disease specialist, both of the Extension Division of the College of Agriculture. These men will be assisted by K. C. Westover, College of Agriculture, and representatives of the State Department of Agriculture and the Farm Bureau.

Starting in Brooke County in the Northern Panhandle, the tours continue down into the north-central region, down through the Ohio Valley region, over to Mercer County in the extreme southern portion, start northward again through the Eastern counties, again touch the north central counties, and wind up in Hardy county in the eastern Panhandle.

A multiple purpose is served in these tours. Farmers accompanying the touring party in their own and adjoining counties will gather much from the successful and practical methods being followed by neighboring growers. They will likewise learn much in the way of newer and more successful practices in potato growing from the demonstrations with large power sprayers and various types of potato machinery, and the demonstrations of improved methods of cultivation.

The schedule for the tours follows: Brooke, July 2; Marshall, 3; Marion, 3; Harrison, 5 and 6; Tyler, 9; Pleasants, 9; Wood, 10; Mason, 11 and 12; Wayne, 13; Cabell, 13; Nicholas, 14; Fayette, 16; Summers, 17; Mercer, 18, Monroe, 19; Greenbrier, 20; Pocahontas, 21; Randolph, 23; Barbour, 24; Upshur, 25; Lewis, 26; Preston, 27; and Hardy, 28.

PRIMARY WORKS SLOW

General dissatisfaction is expressed with the workings of the West Virginia primary law, being cumbersome, slow and expensive. The cost of the late primary to Pocahontas County is reported to have

PRIMARY ELECTION

Although returns from the Primary Election held on Tuesday, May 29, trecked into the State House at Charleston slowly, they made little change in the vote which was tallied the day following the election.

Those who were nominated on the Republican ticket for the race this fall were:

For United States Senator, Dr. Henry D. Hatfield, of Huntington, was nominated over his nearest opponent, Howard M. Gore, by a majority of more than 45,000.

William G. Conley received the nomination for governor over his opponent, H. Roy Waugh, by a plurality or more than 56,000.

William Cassius Cook took the nomination from Gorby, Muldoon and Boyles by almost two to one.

Johnson was nominated over Miller in the race for State Treasurer by a majority of 30,000.

For Commissioner of Agriculture John W. Smith was nominated by more than two to one over his two opponents, Devore and Wheeler.

On the Democratic ticket, J. Alfred Taylor, of Fayettesville, was nominated over the party candidate Gory Hogg, by 15,000 majority.

Vote In Statte Split For Both Ticke

West Virginia will have mix delegations at the Houston and Kansas City conventions on the face returns in the State primary.

Based on present figures, Govern Smith, New York, will have elev and one-half votes out of the sixte West Virginia votes and James Reed, Missouri, four and one-half.

The unite rule would cause sixte votes for Smith. Mrs. J. Walt Barnes ran on a Reed slate in the primary and led the delegate list, b the popular choice was for the Ne York Governor. Another apparen ly elected as a delegate is Cly Beecher Johnson, who is anti-Smit and anti-Tammany. West Virginia sixteen votes are made up of tw from each of the six Congressio

PDA lawsuit free

Heidi Zemach
Allegheny Mountain Radio

Four Pocahontas Development Authority members met last Wednesday evening for the PDA's monthly meeting and shared some positive new developments.

Board member J. D. Morgan jubilantly explained that two long-term lawsuits, in which the PDA had been named, were recently dismissed, according to a representative from the West Virginia Board of Risk, their insurance company.

"For the first time in the 10 years that I've been here there is not an active lawsuit against the PDA!," Morgan said. "It means now what we do can work. There's no one to tell us we can't."

Board members have said that the lawsuits effectively prevented them from pursuing other courses of action-such as liquidating, and then possibly selling the defunct shoe-factory building in Marlinton.

A handful of shoe companies which used the factory building in the past left behind many of the tools of their trade. They include everything from old fashioned sewing machines to more than a dozen large drums of unused shoe glue. Some of the equipment was purposely sold, given as gifts or left behind for the next company to use. Other equipment was not moved out after the companies went into bankruptcy proceedings, a few of which still are underway.

In the past few weeks, a subcommittee of the PDA, helped by former Greenbrier Footwear manager Tom Allen and friend and private financier Cathy Cash, have been working hard to move start the liquidation process, Morgan said.

The PDA members, Cash, Allen and two helpers they hired have been numbering, color-coding and tagging all of the equipment they find. PDA also has enlisted 16 or 17 "runners" ... 75% of the tagging work is complete.

"The idea is to have a huge yard sale, or auction, and invite the 63 manufacturers that need and use this type of equipment," said Frank Proud, the PDA Chairman. Morgan suggested they could hold a closed bid on E-bay or on a private website.

The members also discussed the drums of chemicals left behind by former shoe companies, which West Virginia Department of Environmental Protection inspectors have informed PDA are in violation of the law. Understanding that PDA is doing its best to secure and monitor the building, and is proceeding with the liquidation process, DEP inspectors verbally agreed to wait another month before writing up any citations or penalties for environmental code violations, Morgan said.

At this point, PDA is uncertain whether the drums are an asset or a liability—hazardous waste or possibly recyclable chemicals that may bring in some money, Proud said.

The PDA gathering took place Wednesday night out-of-doors, on the steps of City National Bank in Marlinton. Members usually meet in one of the buildings' upstairs conference rooms. But none of those gathered had brought along a key. Because they didn't have enough members there to make a quorum, the gathering didn't constitute an official meeting, and so they didn't take any official action on agenda items.

Nevertheless, PDA member James Carpenter said he would go home from a PDA meeting with a big smile on his face for a change. Investor Cash, who has an UCC filing against the building's assets, also smiled broadly as Proud helped her into her vehicle.

Commission h... meeting

The County Commission met for a regular meeting on Tuesday with only routine matters on its agenda.

Decisions were made on two grants from Legislature Budget Digest Funds.

The first is $25,000 through the Governor's Community Partnership Grant Program and going to the Commission. Use of the money was left up to the Commission. It was voted to use $20,000 for the FFA/4-H meat curing facility at the high school and $5,000 towards the cost of repaving part of the parking lot at the Court House.

The second grant, of $30,000, is through the West Virginia Division of Tourism and to be used by the Pocahontas Country Club to provide golf privileges for guests at Watoga State Park and a golf education program for youth. The Commission approved handling the funds providing the details can be worked out with the country club.

The Commission passed a

Huntersville Community Club Holds First Meeting

The first regular meeting of the Huntersville Community Club was held in the Presbyterian church Wednesday evening, May 30th.

The prominent speakers of the evening were Judge S. H. Sharp and Attorney Allen Edgar. Their talks centered around "Community Spirit and Neighborliness", which if each citizen would follow, every Community should prosper.

Bethel and Huntersville 4-H Clubs stunts were put on with enthusiasm by the members and were much enjoyed by all.

The folks of Cummings Creek and Beaver Creek responded gladly and entertained with their musical talent, and we hope that we may soon again hear these good folks sing.

It was a great pleasure to all those who gave their time and talent and help make the program a success.

We hope to have these interesting programs each month and hope to have a good attendance at each meeting.

We were so glad to see so many from the Minnehaha Community and hope they will attend regularly.

Our next meeting will be June 27. Watch for further announcement.

Beulah McComb, Sec'y.

Police Detachment conducted a marijuana eradication flight. With the assistance of the Pocahontas County Sheriff's Department, a total of 230 marijuana plants were located and destroyed. The marijuana was valued at $345,000. If you have any information where illegal marijuana is growing, contact the local State Police Detachment, 799-4101, or the Sheriff's Department, 799-4445.

Commission has routine meeting

The County Commission met for a regular meeting on Tuesday with only routine matters on its agenda.

Decisions were made on two grants from Legislature Budget Digest Funds.

The first is $25,000 through the Governor's Community Partnership Grant Program and going to the Commission. Use of the money was left up to the Commission. It was voted to use $20,000 for the FFA/4-H meat curing facility at the high school and $5,000 towards the cost of repaving part of the parking lot at the Court House.

The second grant, of $30,000, is through the West Virginia Division of Tourism and to be used by the Pocahontas Country Club to provide golf privileges for guests at Watoga State Park and a golf education program for youth. The Commission approved handling the funds providing the details can be worked out with the country club.

The Commission passed a resolution needed to complete the paperwork for a TEA-21 Recreational Trail Enhancement grant which will be used to improve the Props Run Trail near Slaty Fork. The Forest Service and Elk River Touring Center are partners in the trail project and Elk River is providing the local match by donating property.

Commissioner James Carpenter reported on a problem with the building at Frank that is used for storage by the Pocahontas County Public Service District. He said that although the county appropriated money a number of years ago to help with cost of the building, it is located on property not owned by the county. The present owner of the property is demanding that the PSD move its material from the building, Mr. Carpenter stated. He also said the County Surveyor William Dilley agrees the building is on the privately owned land.

Mr. Carpenter said he got the owner to give the PSD 30 days to remove its property from the building. The Commission agreed that the PSD can move the material to the former tannery office building, which is located near the other building.

Letter

Dear Editor,

I just received my copy of the Times today and read the comment about Cass. I applaud the writer for his comments, which hit the nail right on the head.

Cass is still considered my home although I have been away for a good number of years. I do get back for a visit when I can. I moved from Pennsylvania to Florida about 2 1/2 years ago, but still keep in close touch with my brother and his wife in Cass. He worked on the skidder several years ago and was also foreman in the planing mill when things were running good.

My stepfather also worked for years in the dry kiln and also the yard.

I cannot see why the DNR wants the town of Cass to die. It is a great

HUNTERSVILLE ITEMS

A number of our folks attended the Memorial services at Marlinton Sunday night.

W. H. Barlow made a business trip to Weston Monday.

Harry McComb is spending his vacation with his father A. B. McComb.

Mr. S. I. Barlow purchased a new Essex sedan recently.

Harry D. Cochran was in town last week demonstrating Delco lights.

Mr. and Mrs. Frank Moore and family spent Sunday at the home of Mr. Elihu Moore.

Jack C. Moore and Nowlen Sheets spent the weekend with home folks.

Mr. C. M. Jordan has moved his family back to town after spending the winter in Marlinton.

Miss Helen Barlow is home from Queens College, Charlotte, N. C.,

arpenter said he would

Mr. Carpenter said he got the owner to give the PSD 30 days to remove its property from the building. The Commission agreed that the PSD can move the material to the former tannery office building, which is located near the other building.

In another matter concerning the PSD, Calvin Hill, of Bartow, was appointed to fill the unexpired term created due to the resignation of Kermit Friel.

Lake Vaughan and Lucy Youngblood were appointed to the Pocahontas County Dramas, Fairs and Festivals Board. Mr. Vaughan was appointed to a full term and Rev. Youngblood to the unexpired term created by the death of Louise McNeel. It was noted that one more position is open on the board, from the Northern District.

The commissioners discussed their entry in the Roadkill Cook-Off competition during the Autumn Harvest Festival on September 27. However, this paper will not disclose the culinary delight they have planned for this year. Citizens will have to attend the cook-off to find out what their elected officials have chosen to serve to the public this year.

I cannot see why the DNR wants the town of *Cass to die. It is a great resort town, even more so* with Snowshoe so close. I agree with the writer of the comment that they want to rid themselves of Cass.

It is really sad about all of the fires and even sadder, the fire marshal can't take the time to investigate. I was happy when they replaced the station, but much, much more could be done by the DNR. They spend lots of money foolishly that could be put to good use in Cass. I'm a true hillbilly, even though I've been gone some thirty four years.

Thank You,
A Reader

and Mrs. Barlow drove through and accompanied her home.

Miss Frances McComb and Harper H. Barrett spent Sunday at the home of Mrs. Ida McComb.

Miss Nell Barlow visited friends at Hillsboro last week.

Thomas Alderman is home from Hillsboro where he attended High School.

Miss Anna Phillips spent the week end with her parents, Mr. and Mrs. W. J. Phillips.

Mr. and Mrs. Earlo Hickman, Richard Hinesman and Miss Bertha Hinesman, of Berea, W. Va., are visiting Mrs. Florence Kincaid.

Commencement exercises for the graduates of Edray District High School were held at the Methodist Church Friday evening of last week at 8 o'clock, at which time diplomas were presented to 37 members of the graduating class. The diplomas were prsented by G. D. McNeill, Principal of the school.

for their benefit. If they don't agree, Morgan said, each individual owner may have to be taken to civil court, one by one.

Thus far, none of the equipment tagged and cataloged seems to have been claimed by more than one owner, according to PDA members. They believe accurately predicted some hours in advance, if sufficient information on upstream and watershed conditions is brought together in time.

Much constructive action can be taken, if such credible advance warning is given, which can significantly reduce damage

Training will be provided. Please contact Dennis Driscoll at the Marlinton Town Offices, at 799-4315, or at home at #50 Greenbrier Hill, 799-2228, or by email "driscoll@marlintonwv.com"

Pocahontas County to get city-style addressing

Pocahontas County is responding to legislation enacted to establish city-type addresses throughout all of West Virginia for Enhanced 9-1-1 service. Called Enhanced 9-1-1, the system displays the address of the caller on a computer screen at the call answering center.

If a caller is hysterical, becomes unconscious, or is forced to hang up, the answering center will know exactly where to send help. Those unfamiliar with their location, such as out-of-state visitors, will also benefit.

To provide the exact location of a caller, each telephone number must be linked to a city-type address, a unique address that clearly identifies where a property is located, such as 911 Country Road or 98 Pine Lane. A rural route mailing address, such as RR1 Box 889, does not reveal an exact location.

Creating city-type addresses requires naming all roads with unique names and assigning numbers consistently to all properties. Once the road names and property numbers are assigned and adopted by our county, the new city-type addresses will be used primarily for 9-1-1 service. The U.S. Postal Service, utilities, delivery services and others will also use these addresses.

Recently, our county assigned an Addressing Coordinator to work with the state to create the city-type addresses recommended for 9-1-1 service. The committee will hold public meetings during this addressing process. Citizen suggestions will specifically be sought in the renaming of roads, if necessary, to eliminate duplicate or similar-sounding road names and to name all public and private roads that are currently unnamed.

If you have any questions or wish to volunteer to assist addressing efforts, please contact the Pocahontas County Addressing Coordinator below:

Bill McLaughlin, Pocahontas County Addressing & Mapping Coordinator, 900 Tenth Avenue Suite 200, Marlinton, WV 24954. Phone: 304-799-4445

Or you may contact Shawn Dunbrack, Director Pocahontas County Emergency Services, 24 Lake Street, Marlinton, WV 24954. Phone: 304-799-6973.

Cass Upset About DNR Inaction

Director Callaghan Says We're Not Neglecting It

By RICHARD GRIMES
Chief of the Capitol Bureau

The idea sounded great. An old train would haul tourists up the scenic mountainside. The state would preserve the turn-of-the-century lumber town. And the people of Cass would live happily ever after.

That was in the 1970s. But it didn't work out that way.

A series of fires have destroyed key buildings in the town's history, which is depressing in its own right. But Pocahontas County residents are bitter about other things. Some say they think the state Department of Natural Resources allowed Cass to deteriorate into

Safety Belts

"As adults we help protect childrên from infectious diseases through immunizations. It also makes sense to protect them from the leading cause of child-death—traffic accidents," said David Carmichael Safety Director of the Central West Virginia Automobile Club.

The AAA spokesperson revealed that about 2,000 children are killed while riding in vehicles each year, with nearly 700 of this total youngsters under the age of five. "furthermore, recent government figures show that only about 5 per cent of children and 36 per cent of infants currently wear restraint devices when riding in a vehicle, and more than 100,000 children are injured while vehicle passengers each year. Clearly there is a need for both drivers and passengers to use seat restraints whenever they're in a vehicle." "Remember that children follow adult example," he said. "Fas-

Same vs Same, judgement for judgement for plaintiff for $2819.-70.

Durbin Colored School Holds Commencement

The Commencement Exercises of the Cass and Durbin Colored schools was held Friday evening, June 2nd at the Baptist Church, Cass, W. Va.

This was the first commencement Exercises held by these schools and was voiced generally to be a marked success. Over one hundred were present, seven or eight auto loads coming from Durbin.

The room was beautifully decorated and the graduates and choruses marched to their places led by Miss Frances Brown and Mr. Archie Stewart after which the following program was rendered, Miss Georgia Hill, teacher of Durbin School acting as chairman:

MARQUES WILFONG IS surrounded by the results of his shopping trip that was an award for his quick actions that has the life of a California woman.

Quick thinking Marlinton boy saves California woman's life

Thanks to quick thinking by a Marlinton boy, a California woman is alive today.

and leg, according to Marques.

Marques said she had waxed her kitchen floor and fallen on

depressing in its own right. But Pocahontas County residents are bitter about other things. Some say they think the state Department of Natural Resources allowed Cass to deteriorate into oblivion, because it costs to much to run.

Others say that the DNR, while it has done a good job running a park, has done a lousy job with historic preservation, having allowed irreplaceable railroad parts and lumber mill equipment to rust and rot beyond repair. Still others say that when the state took over the town, no private enterprise could come in and, besides what jobs the state provides, there is nothing left to the community.

"This place is a mess," says Ernestine Clarkson, a member of the town council who has lived in Cass all her life. "As far as we're concerned, the state isn't doing anything toward real historic preservation. We had more going for us 10 or 20 years ago than we do now. There were once beautiful plans for Cass.

"But they (the DNR) let the old equipment lay around and rust. And what didn't rust was stolen," she said. "We had an old Climax engine — and there probably aren't more than six of them in existence— deteriorate until it was beyond repair. It was almost criminal."

Glen Grandon, another member of the town council agrees.

Cass Mayor Carl Davis also admitted that there is growing dissatisfaction among the people there. "Things are moving awfully slow. There were a lot of promises the state made that they

need for both drivers a
passengers to use seat
straints whenever they
in a vehicle." "Remem

WEATHER REPORT

For month ending May 31, 1928

Huntersville to initiate 'Traditions Day' Festival

The idea has been discussed over coffee and between neighbors for several years, and now Huntersville is about to embark upon its first event festival. The planning committee began discussions last year and the Huntersville Festival Committee is very proud to announce the first Traditions Days will be inaugurated on the 4th of October this year.

As residents and long-time visitors know, Huntersville was the original County seat for seventy years, 1821-1891. Huntersville suffered during the Civil War. The courthouse and other buildings in town were burned twice. There were no "big battles" that can be remembered, but it was a supply depot and as such was valuable for the Confederate Army, and it was raided by Union Soldiers in January 1862. At that time the courthouse was spared along with the jail and the Presbyterian Church.

Several residents and businesses have offered their property as sites for events during the day beginning at 10 a.m. and closing at 5 p.m. Parking is available at the Huntersville Baptist Church and wagon rides will take you to the site areas or you can use the oldest method of traveling and walk to the several sites.

— A Civil War Camp will be set up on the grounds of the 1834 Presbyterian Church Thursday night through Saturday night. Feel free to stop by and visit the camp.

At the Huntersville Jail there will be historical displays and books and pamphlets with the area history also for sale. Tours will be available for both the Jail and the Church, Huntersville's two Registered Landmark buildings.

— To the left of the jail at the Barlow-Pierson homesite, there will be interesting displays/sales of handcrafted items, attendants in period and Indian Dress, and craft demonstrations.

— Across the street from the Presbyterian Church at the 1884 Methodist Church, you can enjoy an old-fashioned church "supper" for lunch or dinner and get a good look at this gothic style beauty.

— At the Carrs' residence, enjoy watching an old-fashioned cider press in action, fly tying, some good ol' WV fiddling and blacksmithing. West Virginia Crafts will also be for sale there. You will hear Traditional West Virginia Music offered by local musicians as they rotate from site to site, and you will find plenty of events, snacks and items to enjoy throughout the day.

— The Carriage House Inn will also host demonstrations of old time crafts, craft vendors and there will be games and face painting for the younger folk. In between, look for other displays/items of interest at the blue "Just Stuff" Antique Shop, at T-N-T Traders, and elsewhere along Route 39 at Huntersville.

— Donation Cans will be available to defray expenses of the festival, for musicians, and for the restoration of the two Landmark Buildings, the Presbyterian Church and Jail at Huntersville. Please give generously.

Please note that sponsors and property owners are not liable for any accidents or injuries at any site during the festival.

Registration forms for vendors and participants are available at The Carriage House Inn and must be received by September 9. Call 799-6706 for more information. Non-refundable registration fee for vendors is $10, for volunteer civic groups, $5. Checks should be made to Jeannie Dunham/ Huntersville Traditions Day.

Registrants will be assigned space at a HTD registered site on a first-come-first served basis and must supply all their own equipment. Each will be notified of their numbered space and site after September 9. Donation cans will be available for musicians and the restoration fund for the two landmark buildings, The 1854 Presbyterian Church and the Huntersville Jail.

Period dress is optional for registered participants and sites, but everything else, with a few specified exceptions, will relate to the era when Huntersville was the county seat, 1821-1891.

And with the exception of the church meal, no electricity, gas or water hookups will be available.

We welcome a wide variety of participation; however, the specially designed Huntersville Traditions Day Liability Statement will be posted only at registered sites hosting only pre-registered participants and does not relate to any unregistered sites, their owners or hosts, or unregistered vendors, demonstrators, exhibitors, et al, on any unregistered site.

The official 2003 HTD site Markers and participant badges will be available only to registered participants and their registered host site owners. Any site with unregistered vendors, demonstrators, exhibitors, et al, on site will not be registered as an official HTD site.

Huntersville Traditions Day sponsors and its registered sites and registered participants have no connection with non-registered sites or unregistered participants.

This is a non-profit, grass roots managed event. No county or state agencies have provided subsidies for this event.

Chair of the committee is Terry Carr; secretary/treasurer is Jeannie Dunham.

Contact 304-799-6706 for application/further information.

Renick Park plans improvement

On the bank of the Greenbrier River in the small town of Renick is located a small community oriented park on land donated by a local family. The Renick Park Project was initially started with a small grant from the Presbytery of West Virginia.

The Spring Creek Presbyterian Church formed a committee of representatives from various churches and organizations in the community and through a lot of hard work and donations we were able to open to the public a couple of years ago. The Park is in continuous use at this time, but we have plans for other improvements. We depend on donations for these improvements and for the continued operation of the Park.

The Renick Park Project has been asked to participate at the 19th Annual Frankford Autumn Festival and Homecoming on September 26 and 27. We would like to hold a Silent Auction in the Frankford gym to raise money for the Park. We are asking for your help and support. We need good used and new items (antiques, collectibles, furniture, art, tires, [illegible] the auction. If you [illegible] anything or have any questions or concerns, please contact a representative at 497-2574 or 497-3562.

Renick Park Project Committee: Paul and Genelle Flippin, Ann Brown Robinson, Kay and Jason Reynolds, Donald Vandervort, David Ramsey, Don Kellison, Ella Mae Taylor, Johnnie Walkup

Ruckman Cemetery

Pictured is the sign for the Ruckman Cemetery made by Pastor Harry (Buddy) Crockett, of Trinity Baptist Church of Buckeye.

Maintenance was done by Tommy Puffenbarger, of Marlinton. Arrow was made by Charles Beverage. Hubert Puffenbarger and Bill Palmer, of Hillsboro, put up the sign. The families of loved ones buried in the cemetery appreciate their work and the efforts of Pastor Crockett.

moving awfully slow. There were a lot of promises the state made that they never kept," he said.

And, in a recent editorial in the Pocahontas Times, Editor William Price McNeel wrote: "As I was standing last Tuesday morning watching the smoke rise from the latest fire in Cass, this time the mill, I couldn't help but think that there was probably joy in the Department of Natural Resources office in Charleston — 'that is one less building that we have to worry about some history nut trying to get us to restore'."

McNeel went on to say that the state's involvement with Cass has been a case of neglect. He said the DNR didn't want the Cass Railroad in the first place, but when it turned out to be such a popular attraction (about 1,500 people a day in the warmer months) state officials realized they couldn't quietly dump it.

The state has owned the town of Cass since 1977. But residents say there is poor fire protection, no police protection and a night watchman that works four nights a week until 2 a.m.

There is dissatisfaction in state government, too. Administration sources say that the state may have dropped the ball on the historic preservation of Cass. There was a plan drawn up by the Department of Culture and History in 1977, which called for a private corporation to be formed at Cass, made up of craftsmen, townspeople and other interested parties. There was going to be an effort to solicit help from private corporations to each pay for the reconstruction of one building.

DOUTHARDS CREEK NEWS

Some of the farmers of this neighborhood have been shearing sheep but it is rather cool yet.

The W. W. Wilder lumber job of Douthards Creek is progressing nicely as they have four mills running and trucks hauling everyday.

Mr. and Mrs. Pat Benett were callers in Marlinton one day last week.

State Police, Jack Tidd and Sheriff Barlow were callers on Douthards Creek last week.

The Sunday School of this place is progressing nicely as D. W. Alderman is superintendent and Mrs. Clara Wade assistant superintendent and with an enrollment of about 30.

D. W. Alderman, local fire ranger of this place, was called to a forest fire one day last week near Mr. W. W. Wilder's sawmill on the Middle Mountain.

T. S. Alderman lost a fine calf last week by blood poison.

Miss Mable Kincaid and her mother were visiting her sister and daughter, Mrs. Fishe, of Huntersville last week.

Cass. There was a plan drawn up by the Department of Culture and History in 1977, which called for a private corporation to be formed at Cass, made up of craftsmen, townspeople and other interested parties. There was going to be an effort to solicit help from private corporations to each pay for the reconstruction of one building.

But they say a political decision was made to give to the DNR to develop as a park and it was the wrong decision.

Natural Resources Director David Callaghan and State Parks Chief Don Andrews defend the DNR. "It's one of the best tourist attractions in the state. We're not neglecting it," Andrews said.

He said the state kept a promise to provide water and sewage and now is fixing up 17 homes out of about 40 in the town. Seven will be done this year, he says. He says there are hopes for a museum or an interpretive center, or maybe a large scale mill center. To date, he said, the state has spent $1.5 million at Cass. He said there also is a contract to roof 32 houses in the area, which is a first step to preservation.

He said the DNR has a plan with three alternatives. One would cost $5 million and have all of the above and a deluxe plan with a 100-unit campground and swimming pool, craft shops

THE HISTORY OF MINNEHAHA SPRINGS COMMUNITY

(Continued from last week)

The Minnehaha Springs M. E. Church, South

(Mrs. Elmer Moore)

This church was built in 1926, being formally opened Sunday October 31, of the same year. Rev. Mack Thomason was the pastor at the time. The opening day services consisted of an all day meeting, with dinneer on the ground. Rev. J. W. Leggett of Vinton, Va., a former pastor, preached the first sermon at eleven o'clock, and Rev. F. B. Wyand, of Monterey, Va., preached at 2:30 P. M.

This was made a separate appointment on the Huntersville charge in 1915, under the pastorate of Rev. J. W. Leggett. The place of worship was transferred from Browns Mountain school house in which building the worship was held until the completion of this church.

The church building was begun some time during the year 1923, while Rev. Palmer Eubank was the pastor. He was very faithful in all his labors. In the first place, two lots were donated by Mr. and Mrs. Amos McLaughlin as a memorial to their son, C. C. McLaughlin, who died from wounds received in battle in France during the World War. These lots were later exchanged for two lots nearer the parsonage for the reason of better location. Mr. P. A. Rexrode donated the timber for the frame work for the outside of the building. Quite a lot of free labor was given. June 5, 1924, was set apart for the excavation, the men doing the work, and the ladies serving a free dinner at the parsonage.

All denominations gave quite liberally in this community and adjoining communities and also in the town of Marlinton. Tthe largest money donations were made by Elmer Moore, Mrs. Effie Campbell, Mrs. Sidney Wilson, Dr. H. S. Jones, Mr. W. H. Grose, and Mrs. A. D. Cash.

This church is deeply indebted to a very faithful Building Committee, which overcame many trying obstacles. This Committee was: W. H. Grose, President; J. C. Harper, Mr. and Mrs. Amos McLaughlin, G. M. Ervine, Mrs. J. G. Sharp, and Mrs. Elmer Moore, Secretary and Treasurer. The two non-resident members. Mr. Grose and Mr. Harper never missed a committee meeting and deserve special mention for their faithful and most helpful assistance.

Schools of Minnehaha Community

(Mamie White)

We do not boast a high school in our community for the reason that the settlement is a scattered one, but we are proud of the progress the schools have made since the age of the log school house.

When the Civil War began, school was being taught by Miss Mattie Gum, the mother of George Gingar, of Huntersville, in a log school house which stood on the knoll near L. R. Hiveley's residence. The next building used for school in the Sunset neighborhood was on a hill not far from J. A. Cleek's. The last term taught here was by Enoch H. Moore, in the year of 1876 and '77. By the next winter a new building had been constructed at the present location. This was destroyed by fire a few years ago. The building now in use was located on the site of the old one.

The very first school at Minnehaha Springs, then Driscol, was taught in a dwelling located on the bank above the warm spring. H. M. Lockridge and Mrs. W. L. Herold were the teachers. School was held here be-

Sporting Clays are a great escape

Sunny Given
Staff Writer

Ricky Tyson told me when I walked into Snowshoe's Sporting Clays cabin that it was "addictive."

He was right. This is something I tried this summer for the first time in my life, and I can see I'll be coming back.

This adventure began when my managing editor suggested the story to me. One call to Andy (whatever would I do without him?) Gibson, and I was in. It just so happened he was treating his employees at Split Rock Pool to a round as part of his "Let's-do-something-fun-before-y'all-go-back-to-school" thing.

We drove down to the course, which is located near Shavers Lake. You get there by taking the road to Silver Creek, then taking a right onto a dirt road that winds down to the lake. The facility doubles as winter as the cross-country ski center.

The building is on the left, and the course is on the right. Tyson, an assistant range attendant, is working the summer before heading off to college.

After signing the waiver forms, our party - consisting of Jes Littlefield, Andy Gibson and me - were outfitted in vests, earplugs and shooting glasses. Sporting Clays stocks shotguns of three different gauges: a 12 gauge over/under and 12 gauge semi-automatic, 20 gauge semi-auto, and a 410 gauge for kids or small adults.

> "Boom!" went the shotgun. The target floated to the ground, untouched.

Mike decided the 12 gauge semi-autos would be the best bet for Jes and me, and Andy chose the 20 gauge, having done this a time or two already.

Mike told us that people are allowed to use their own equipment on the course, as well. You can buy ammunition from Snowshoe or bring your own, and the clays are sold there, too.

Before walking out to the stations, Mike went over basic gun safety: Always keep your barrel pointed in a safe direction, know where the safety button is and how it works, keep your gun unloaded and

Marlinton celebrates Bike Night September 12

A gigantic roar will herald the arrival of hundreds of motorcycles in Marlinton on the evening of Friday, September 12, for the town's annual Bike Night celebration. A parade of bikers attending the West Virginia State Harley Owners Group (HOG) Rally at Snowshoe Mountain will depart from the resort at 5:30 p.m. and travel south on US 219, arriving in Marlinton at approximately 6:00. They will be joined in Marlinton by other bikers and fans for a Bike Show and a dance on the downtown streets.

Motorcycles of all makes are welcome to enter the Bike Show. Registration for the general public will begin at 3 p.m. at the intersection of Eighth Street and Third Avenue in downtown Marlinton. Awards will be presented at 9 p.m. The Bike Show is sponsored in part by the Pocahontas County Chamber of Commerce.

The band Crystal will entertain the crowd with old-time rock and roll from 6-10 p.m. Food will be available from street vendors and at local restaurants.

The Marlinton Business Association will organize a Poker Walk for HOG Rally participants on Thursday, Friday and Saturday.

Bike Night is sponsored by the Town of Marlinton and the Pocahontas County Convention and Visitors Bureau in appreciation of the many bikers who make Pocahontas County a touring destination. For further information, contact the Pocahontas County CVB at 800-336-7009. Ω

Photo courtesy PCCVB

Photo by Carol Moore, Pocahontas Times

Bikes, bikers and curious locals and tourists in town line the street after the parade arrives from Snowshoe. At least 500 bikes were on display last year, nearly half of them in the bike show. At left, just one of the entries in the bike show.

Deaths

Ivan D. Greathouse

Ivan Dorr Greathouse, 65, of Durbin, died Saturday, March 13, 1982, after a sudden illness.

Born January 7, 1917, at Durbin, he was the son of the late William and Maggie Hevener Greathouse.

Mr. Greathouse was a lifelong resident of Durbin, a member of Bethel United Methodist Church on Back Mountain and a retired farmer.

He was preceded in death by a sister, Nettie Cassell, and three brothers, Clyde, Freddy and Herman.

Survivors include his wife, Ella Morgan Greathouse; a daughter, Donna Hommema, Elkins; a son, Dale, of Durbin; four sisters, Ina Shelkey, of Arlington, Virginia, Kathy Shiley, of Thaxton, Virginia, and Bertie Sheets and Annie Cromer, both of Durbin; a brother, Herbert, of Durbin; five grandchildren.

Services were held Tuesday at 2 p. m. at Bethel United Methodist Church with Rev. Mark Hickman and Rev. Harold Swecker officiating. Burial in Church cemetery.

Donations to the

Mr. and Mrs. Amos McLaughlin about 1895. Miss Nora Riley was teacher. The next year the school was taught in Mr. and Mrs. Mack Ervine's home. Miss Lillie Friel was the teacher. Then a school building was erected and at the present, school continues in this building. Miss Anna Lee Ervine, Miss Clara Palmer, (now Mrs. G. O. Wade), Austin Dearman, Miss Ethel Correll (now Mrs. D. C. Adkison) are noted teachers who have taught in this school.

It is thought that a school house once stood where H. Lee White's residence now stands. When the late Henry White and family moved here from Virginia in 1876, the residents of the community referred to this particular hollow as "School House Hollow." Then when workmen were excavating for the building of the residence the remains of a chimney were found; also, tin pails, knives, forks, spoons, etc., which evidence leads one to believe that several years before, a school had been located on this site.

COUNTY 4-H CAMP

Camping time is here. The signs of the moon are right and the almanac says that the third and fourth weeks in July are auspicious ones for the club members in the county. We are planning for two weeks of good times together for good to ourselves and our communities and

Hearing

A hearing was held Monday with Judge Jolliffe presiding on a motion by the defendants in the case involving the marijuana near Stony Bottom to suppress evidence in the case. The defendants are Claude V. Goodwin, Jr., Kimberly Ann Spangler, and Richard S. Judy. Defense counsel for the first two are Robert P. Martin, R. Keith Stroup, of Washington, D. C., and Gerald H. Goldstein, of San Antonio, Texas. Counsel for Judy is Gregory J. Campbell, of Charleston. In the absence of Prosecuting Attorney Steve Hunter, Assistant Prosecuting Attorney Walter Weiford handled the case for the State.

A number of legal points about the obtaining of the evidence in the case were brought up by the defense attorneys.

Judge Jolliffe gave the defense fifteen days to

SLATY FORK

Mr. and Mrs. J. P. Hannah and Dock Hannah and Miss Goldie Gaye Hannah spent Sunday in Elkins.

A very enjoyable evening was spent by the Slaty Fork school at the home of Miss Goldie Gaye Hannah on Monday, October 8.

At five-thirty a delicious supper was served on a long table out in the yard. The table was beautifully decorated with candles and flowers.

Those participating in the good time were: Mrs. Stella Conrad, Misses Mattie and Dena Sage, Louise Painter, Helen Johnson, Pearl Simmons, Lexie and Helen McNeely, Vivian Howell, Leola Simmons, Anna Belle Gibson, Eva Hannah and Messrs. S. H. Davis of Williamstown, Verdon McNeely, Ray Sage, Arlie Hannah, Norman and Therman Gibson and Jack Painter.

Everyone reported a very pleasant evening.

An official report has gained considerable currency within the past few days that the next location of the state convict camp will be in or near

COUNTY CONFERENCE

Pocahontas has had a County Country Life Conference. It began Sunday night at the Methodist Church. Rev. L. Riggleman, of the Extension Division of the West Virginia University, was the speaker. Conferences were held Monday and Tuesday afternoons, Representatives from Hillsboro, Greenbank. Huntersville, Dunmore, the Kiwanis Club, Womans' Club. Community Club, County Hospital, and Four-H Clubs of Marlinton were present and gave reports of their group organizations, their objectives, and the progress made the past year.

These conferences in the afternoon were informal and were splendid. We only wish we could have had a larger group to hear the reports. After the group discussions, Rev. L Riggleman gave a brief summary of some community objectives for the county. One of these being to develop the "Big Brother" idea with some neighboring group that is not organized and that does not have community activities. Several agreed to carry this idea out for the year. The Monday afternoon conference was held in the Presbyterian church and everyone enjoyed it. The program for Tuesday was in the Methodist church.

The night programs were given over to entertainment

age reduction program.

The signup period for this program continues through April 16.

Only participating farmers will be eligible for program benefits. To participate acreages must be reduced 15 per cent for wheat and 10 per cent for feed grains. As an example, a farm with an established corn base of 25.0 acres must plant no more than 22.5 acres (10 per cent reduction) for harvest in 1982. The reduced acreage (2.5 acres) must be devoted to conservation uses. If the farmer plants less than the 22.5 acres, he would devote fewer acres to conservation.

The program benefits include eligibility for loans and target prices protection. Target price protection is a payment made if the average price of the crop falls below the target price for that crop for the first five months of the marketing year. For example, on the farm described above, the farmer could earn a maximum of $303.75 if he has a corn yield of 90 bushels per acre and he grows the 22.5 acres. He would set aside the 2.5 acres, not harvest hay from it, or graze it between May 1 and October 31.

Farmers are encouraged to take a look at their Notice of Yield and Acreage which was received a few days ago and consider the benefits of participating in the program.

Please stop by the ASCS Office and sign an intention to participate before April 16. You can withdraw later if you decide not to participate.

program.

For farmers convenience, the ASCS Office will be

Notice

To whom it may concern:

We the teenagers, of Marlinton, who go to the Marlinton Arcade wish to be heard concerning the arcade. We think the people or persons trying to close the arcade don't know what they're talking about. The girls were called bad names and the people who were slandering the girls had no right to be saying anything bad about anyone else. Even other newspapers published such things. We wish you would get your facts straight before you start saying such things. One thing that might help is getting teenage opinions because the older generation has certainly changed compared to now. All we're trying to do is have fun. The arcade is a place where teenagers get together to talk about what's happening in their lives and enjoy the activities provided by Tom. We think Tom is a good manager and to us a second dad. He tries to make our lives worth living and more enjoyable. We don't mean to harm or upset anyone. We just want the arcade to stay open so we will have somewhere to go on the weekends. We hope the public understands our opinions. Thank you for taking the time to listen.

group to hear the reports. After the group discussions, Rev. L Riggleman gave a brief summary of some community objectives for the county. One of these being to develop the "Big Brother" idea with some neighboring group that is not organized and that does not have community and community activities. Several agreed to carry this idea out for the year. The Monday afternoon conference was held in the Presbyterian church and everyone enjoyed it. The program for Tuesday was in the Methodist church.

The night programs were given over to entertainment by community groups. They were exceedingly popular. These meetings were held in the High School auditorium. Home talent in Pocahontas County is surely being developed. On Monday night the communities of Hillsboro, Dunmore, and Swago had actors on the stage. On Tuesday night, the Greenbank community gave a fine play, to the delight of a capacity house.

All in all the first Country Life Conference for Pocahontas County was a great success.

BEARD

On Wednesday evening October 17, at 7 p. m. the ladies of Beard community will hold a benefit supper at the home of rs. W. T. Poage. The object of this supper is to raise funds in order to paint the church. Oy t rs chicken, ice cream, cake, pie and cake will be served. Also hope to offer a musical program during the supp er. Don't forget the time and place and everyone turn out to help a worthy cause.

A community program was given on onday night at Beards Chapel as follows:

Opening song—Community
Bible Reading— rs. S. M. Hefner
Song—Community
Reading— rs. Nora McNeel
Special music— rs. Ray Frame and
r. Winston Yeager, accompanied by Miss ary F. Bratton
Recitation—Virginia Poage
Piano solo— iss ary F. Bratton
Health talk— rs. Woodyard of Poca.
emorial hospital
Song—Community
Closing prayer—L. W. Kidd

A large and appreciative audience was present and thoroughly enjoyed the program. We want to thank everyone for their part in helping to to make a pleasant evening.

eb Galford

Letters to the Editor

Dear Editor:

I believe that it is a sad day for Marlinton when an able and well intentioned business man decides to leave. The loss is surely Marlinton's. It seems to me that the town would have benefited from a fully restored Peacock Building (now listed on the register of Historic Buildings and maintained by the Department of Interior), where town and county folk as well as tourists could have enjoyed an old fashioned ice cream parlor, locally made crafts, antiques and a flea market. A showroom of authentically restored antique cars was planned, combined with a used car agency which would have been interesting and practical. The young people's club that he founded will, hopefully, continue. The Rambler car sign, beautifully restored to its former splendor, will remind us what we have missed as we drive in and out of Marlinton on Route 39. So . . goodbye to ex-Marine and West Virginian Jay Perry. Good wishes to you, may your next ventures meet with success, recognition and a true welcome.

Thanks for trying.

Nicola Wolcott
Marlinton

Dear Editor:

I would like to express my opinion as well as the opinion of many other commuters on Route 219. The condition of the pavement on Elk Mountain is unacceptable!! Everyone who commutes to Snowshoe and beyond from the Marlinton side of Elk Mountain will no doubt agree. The State Road began much needed patching work on Elk Mountain in the spring, which was great. I thought the holes and washboards from the winter were going to be repaired. I couldn't have been more wrong. A few holes were repaired, but they also created more holes by removing large sections of pavement. Then the roadwork stopped and we are left with dangerous patches of missing pavement that are not marked and have been sitting untouched all summer. I know winter is coming up fast and it will soon be too cold to apply asphalt. I just bought a brand new 2003 vehicle on July 25 and have busted front shocks already, due to those holes. I am furious and want to know when something is going to be done about it. If the snow removal efforts from the past winter are any indication, I guess there won't be anything done! This county depends heavily on tourist business and if I were an out of town/state visitor I would not return to Pocahontas County because the roads are dangerous enough when they are in good condition, let alone with a 10-foot section removed and there isn't even a sign to warn of the danger!

Shelly Whitman
Buckeye

I rejoice in life for its own sake. Life is no brief candle to me. It is a sort of splendid torch which I got hold of for a moment, and I want to make it burn as brightly as possible before turning it over to future generations.

BOY ON TRAIN IS STRUCK BY STRAY BULLET FROM RIFLE

Kermit Foe, a lad of 12 years was the reciprocant of a stray rifle bullet Friday, when the ball crashed through the train window, striking him in the right breast leaving a flesh wound.

Foe was going from Cass to Anthony and as the train passed near Thorny Creek a rifle barked and the bullet found lodging in his body. His wound is not considered serious.

Futile efforts have been made to determine who fired the shot, but it is thought that the person who was using the weapon promisciously did not fire intentionally at the passing train. Judging from the direction from which the bullet came, it has been concluded that whomsoever fired the shot, fired at a mark, and the ball struck a tree and glanced in the direction of the train.

Young Foe was taken off the train here and taken to the Pocahontas Memorial Hospital where he received medical attention.

Two hours after the shooting Benny Waugh was placed under arrest. When arrested he claimed that he was shooting at a hawk with a twenty-two rifle. He was brought to Marlinton and placed under bond. The hearing will be held in Justice A. E. Smith's Court on August 8th.

HUNTERSVILLE DISTRICT FAIR

The district committee has arranged for the district fair for Huntersville at Frost, Thursday, August 9th, beginning at 1:00 P. M. and extending through the evening.

The program will consist of soccer football games, potato race and ring tournament in the afternoon. At night the district will present their entertainment features for the fair and practice on them. Make your plans for August 9th.

Dr. and Mrs. H. C. Solter have established a camp near Violet, and are spending their vacation there. During the past week they have had as guests Judge and Mrs. S. H. harp, Secretary of State George W. Sharp and Mrs. Sharp, and Miss Marion Sullivan, of Charleston. Miss Sullivan returned to Charleston the first of the week. She was accompanied by Miss Jean Sharp, daughter of Mr. and Mrs. S. H. Sharp.

Reminiscences
By Clyde W. Wooddell

Bill, I wasn't in the Army but at first, the U. S. Army Air Corps and later in the U.S. Air Force, the 3rd Tactical Arm of the Air Force. I'd like to write some now after 37 years gradually awakening to reality to its fullest. Some of these things I wrote when I first came home, otherwise, a lot of it would be lost, but today, my thoughts are clearer than they have been for a long expanse of time. I'm going to the end of my tour to begin these stories.

September 5, 1945

It was the beginning of the end, the end of three years, four months and eight days. This was to be the last day, graduation day. Into the flag draped receiving room of the Post Chaplain at Camp Atterbury, Indiana, filed thirty silent but elated men. A plain simple room, entirely military, other than chairs for the callers, with a desk and a chair for the chaplain, and various pictures of our leading army chiefs, peeping from the draped corners of the flags, while a huge portrait of our fallen commander-in-chief dominated the center of the forward wall. The strains of America Forever culminated and died away entirely at a signal from the Chaplain and with a slow glance around, began the few statements we were there to hear.

"Fellows, this will probably be the last Special Order the most of you will ever hear, and in passing it on to you in general force, I have the honor and privilege of doing. This order gives you the basis for your release from active duty but I shan't keep you waiting very long to read it to you. But, a final paragraph, I will try to impress upon your minds. It is not an order but merely a request, I shall read to you. As you know you have ninety days that you may wear your uniform if you so desire and sometimes conditions prevail that some must do so. Others will, no doubt, lay theirs aside promptly. The objective of this station is to perform all of your legal arrangements for discharge and their only favor in return will be that request. As you leave here, remember that yours has been a hard earned record, so now, at this late date, don't bespoil it by any action of yours that will cast degradation on the uniform of the best army in the world. Keep that in mind will you?

"The evidence I've seen convinces me that you've merited far and above your Company orders. To your comrades, who have fallen, we give an invocation that theirs hasn't been, nor will be an unorthodox sacrifice. Blessed be his name who has fallen, by the hands of the enemies, for the sake of Christianity. Amen."

I see that one and the other of you wear decorations that are highly commendable to you, but my

LOBELIA NEWS

The county is now building a new street between N. E. Walton's store and the Odd Fellow Hall. This will improve conditions greatly in our community. This work has been contemplated for several years.

Howard Spencer, and Denny Hollandsworth were business visitors here last week.

Our 4-H Club work is progressing very nicely. The projects which the members are working on have a favorable prospect of turning out favorably. We hope to get some new members soon.

Gus Walton and Herman Rogers were visitors in Hillsboro Sunday.

H. C. Clutter was sick last week due to indigestion.

Mr. Alfred Tharp, of Logan City is now spending a few weeks with friends and relatives in this community.

Owen Townsend is now employed on the county road. He has formerly been farming for T. A. Bruffey.

Jack Armstrong spent the last weekend with his father-in-law P. M. Townsend. He is railroading for the Cherry River Lumber Company.

SCS

Conservation tillage offers "one of our best hopes for improved resource management on cropland" and in some form could be applied to every acre of cropland in the nation, according to Chief Norman Berg of the U. S. Department of Agriculture's Soil Conservation Service (SCS).

Craig M. Right, SCS state conservationist in West Virginia, urges farmers in the Mountain State to consider using some form of minimum tillage in their planting of crops this spring, as opposed to plowing up the soil they seed.

Berg, commenting in the January issue of the magazine, "Soil and Water Conservation News," stated, "Leaving adequate amounts of crop residue on the soil surface year round reduces sheet and rill erosion, the worst offenders on cropland, by as much as 90 per cent. Reducing erosion protects the long-term productivity of the soil."

He emphasized that conservation tillage should be applied as part of an overall conservation system involving such practices as grassed waterways and diversions. But he added that conservation tillage "appears to be the most cost-effective method of con-

THE NECESSITY OF GOOD SANITATION

A large number of our citizens assembled at Marvin Chapel Church Sunday, July 15th for community singing; at which time and place Hon. John D. Sutton, Chairman of the Droop Mountain Battlefield State Commission was invited to address the people. Mr. Sutton's subject was the necessity of good sanitation from every viewpoint. He handled the subject in a fine way and his address was well received by the people. Mr. Sutton had many strong points showing that neither town nor community can be sanitary without a good water system.

The new State Park is one of some grandeur and is reached by fine roads from all sections. The State road passing through the park is on the Seneca Trail, thus making it of historic interest in itself.

In order to make the Little Levels in which Hillsboro is situated more sanitary we must have a good water system Mr. Sutton says one or more large artesian wells will supply Hillsboro and the entire community with an abundant supply of water. The people should give this due consideration for Hillsboro will be the "mec-

stand in your stead always as he has so aptly done in the past."

Again, at a motion from the Chaplain, softly the lines of America Forever played, as background, as one man after another walked slowly forward. Just like school graduation quite a long time before. No doubt every guy there felt some little emotion and had various thoughts upon which to dwell—a prayer of thanksgiving, fleeting incidents of the past, or remembering, as ever he did, all those valued calculations of the future. Perhaps, too, the foremost thought was just to get that sheepskin and the ruptured duck into his hands as fast as possible and feel and touch and look at them, and get them all in tow before this all proved to be a fantasy or a very ethereal dream. It all occurred too suddenly to be true. A brisk voice said Wooddell, Clyde W AF35429092, 46th Troop Carrier Sq. 317th Troop Carrier Group. Going forward and receiving the Cer-

it of historic interest in itself.

In order to make the Little Levels in which Hillsboro is situated more sanitary we must have a good water system Mr. Sutton says one or more large artesian wells will supply Hillsboro and the entire community with an abundant supply of water. The people should give this due consideration for Hillsboro will be the "mecca" for the thousands of tourists who will visit this famous historic Battlefield Park.

Hillsboro is just four miles south of the Park. Its altitude is 2300 feet above sea level and no more beautiful spot can be found in our country for summer homes and tourists camps. Safe water will be the cry of the tourists.

The State Health Department recently issued information for the benefit of the traveler regarding the safe water supplies of the state. The careful check up on the public water supplies by the sanitary engineers has resulted in the placing along the main highways signs reading "Safe Drinking Water, West Virginia State Health Department.", Chief Sani-

Carrier Group. Going forward and receiving the Certificate of Discharge, must certainly be awakened any moment by a lusty "Hey, you guys, this is the Army, fall out" or a more profound recovery as coming from the attempted occupation of the very edge of the "sack"—too late one hits the floor." Could this be such a fall? But fears extinguished themselves as I stretched forth my right hand for the handshake and then my left hand for the papers, and heard the Chaplain say, "Good luck, Clyde, you've earned and deserve it", A thank you, sir, and, it was my voice. Well it wasn't a dream after all.

In reality I would be a Mr. But always there would be memories of my service life to afford me some pleasures, in recalling, even though it was a very sad business. Someday, I

has resulted in the placing along the main highways signs reading "Safe Drinking Water, West Virginia State Health Department.", Chief Sanitary Engineer L. S. Tisdale said this work will illustrate the tremendous strides the state is making in getting safe water supplies and saving many citizens from the dread disease typhoid fever.

It is nearly one thousand miles around the state and all along route safe drinking water and approved tourist camps properly designated can be found. We would like for Mr. Tisdale to visit this section as this is a state park on the state road and this beautiful highway adds Indian history to the historic park. It is not only of interest to the entire state but is of national interest. Tourists will come from all states. Large numbers are passing through now and commenting on the scenic beauty. It is here that the traveler stands and looks up on the scene spread out before him and he expressed that feeling of sublimity which ever impressed the traveler when surrounded by lofty mountains.

ax and fights her way out the cabin. Then—but don't miss "Stark Love!" It is said to mark a definite advance in cinematic art.

Dear Editor:

I would like to correct the mistakes which I read in your paper last week.

There was no little girl kidnapped from my home. My brother, Sam Alderman's little boy came up amiss while at my home. We all suppose he took him but I want everyone to understand that I did not have any hand in it and knew nothing at all about it. Neither was Mr. and Mrs. Landis invited to my home at that time but phoned over and said that they were coming. Although I have invited them to my home and they have been at my home more than once. Neither was Mr. Kellison on the North Fork, when the little boy disappeared. He was at church with his wife and family.

Mrs. C. H. Kellison.

Mountaineer ChalleNGe receives grant

Mountaineer ChalleNGe Academy's Pocahontas County Youth Mentor Program has received $550 from a Community Mini-Grant. The grant was funded by the Federal Block Grant for the Prevention and Treatment of Substance Abuse through the Division on Alcoholism and Drug Abuse, WVDHHR, and the West Virginia Prevention Resource Center. The grant money was used to purchase BABES puppets which will be used for Substance Abuse Prevention activities in conjunction with the Pocahontas Family Resource Network.

These puppets recently made their debut at the Trifold Youth Center. Karen Larson and Stephanie Grimes, Certified Presenters, introduced the seven puppets: Buttons and Bows McKitty, Myth Mary (squirrel) Early Bird, Donovan Dignity (wise owl), Recovering Reggie (dog), and Rhonda Rabbit. After the lessons in story form were presented, the boys and girls examined the puppets and made paper bag puppets to take home.

BABES — Beginning Alcohol and Addictions Basic Education Studies—is a primary prevention program designed to give children a lifetime of protection from substance abuse. The BABES Program targets the areas of self-image, feelings, decision-making, peer pressure, coping skills, alcohol and other drug information, and getting help.

Due to a lack of state government funding, the County Youth Mentor Program has been discontinued. The success of the program is credited to the help and support the community gave.

Foster families needed in county

FLOOD

There is a lot of things that could be said about the first day of spring this year, most of them unprintable, but at least the season can only improve over its beginning.

The rain started about midnight Friday and continued through the night and most of Saturday morning. The heaviest rainfall was in the Cheat Mountain area causing high water in the Greenbrier, Tygarts Valley, and Shavers Fork Rivers. Rainfall for the period was 2.97 inches at Green Bank, 2.90 inches at Snowshoe, 3.08 inches at the Scout Camp, 3.44 inches at Bartow, 2.25 inches at Buckeye, and an unofficial report of 3.5 inches at Cass. The County average was about 2.37 inches. At Valley Head in Randolph County the reading was 3.64 inches.

The Greenbrier at Marlinton was at 3.9 feet at 7 a. m. Saturday, but was at 8.4 feet at noon and hit flood stage, 10 feet, at 1 p. m. It was at 10.6 feet at 2 p. m., 11.6 feet at 4 p. m., and crested at 12.3 feet at 6 p. m. It was falling by 8 p. m. and went below flood stage between midnight and 2 a. m. Sunday.

At Clover Lick the crest was 7.8 feet at 3:30 p. m. Whittaker. The track to Durbin was blocked by a slide near Hosterman.

Basements in the Durbin area were flooded from surface water. Part of Rt. 250 slid away between Durbin and Bartow and blocked the railroad tracks below.

Bartow-Frank-Durbin firemen were busy Saturday and Sunday pumping basements in Durbin, Bartow, Back Mountain and Arbovale, North Fork of Deer Creek was full and a lake formed behind the new road from Rt. 28 to cass.

The Tygarts Valley was hard hit with flooding at various places. Rt. 219 was closed at Dailey from 3 pm Saturday until 6 am Sunday On the Shavers Fork the Bowden Hatchery had 20,000 fish washed from rearing ponds and several campgrounds were washed out.

STATE PARK DEDICATED

BIG CROWD CELEBRATES THE FOURTH ON DROOP

On last Wednesday July 4. the Droop Mountain Battlefield State Park was dedicated in due form Governor Howard M. Gore received it for the people of the State of West Virginia from Hon John D Sutton. chairman of the legislative commission. This commission was appointed at the last session of the Legisla to buy the battle site for a State Park. as a memorial for all time of the men who fought in the greatest battle of the Civil War on West Virginia soil.

The crowd is estimated at ten thousand people. While the greater number of those present were from Pocahontas and Greenbrier counties here were many people from other West Virginia counties and the adjoining State of Virginia. It was one of the largest crowds to assemble in Pocahontas county. It perhaps equalled the number of men engaged in the Battle of Droop Mountain.

Historic preservation survey and planning grant applications being taken

Applications are now being accepted for historic preservation survey and planning grants through the State Historic Preservation Office (SHPO) of the West Virginia Division of Culture and History. Approximately $80,000 is earmarked for this grant program, which is funded with money appropriated by the U.S. Congress through the National Park Service Historic Preservation Fund.

State or local government agencies, not-for-profit organizations, for-profit firms or organizations, and educational institutions are eligible to apply. Eligible projects include architectural and archaeological surveys, preparation of nominations to the National Register of Historic Places, heritage education programs relating to preservation activities, pre-development activities, and comprehensive planning documents and development projects. Funded projects must be completed by June 30, 2005.

Grant funds are awarded on a matching basis. A competitive process is used to determine the recipients with the final decision being made by the West Virginia Archives and History Commission. The Commission selects projects that best meet the established priorities and criteria. Development projects will be considered only when all the justifiable funding needs of eligible projects in other categories have been addressed. All grant monies must be administered in accordance with federal and state requirements. The deadline for applications is October 31.

Program descriptions and application packets, including funding priorities and selection criteria, are available by contacting Pamela Brooks, at (304) 558-0220, ext. 720, or by writing: SHPO, West Virginia Division of Culture and History, The Cultural Center, 1900 Kanawha Boulevard, East, Charleston, WV 25305-0300.

The West Virginia Division of Culture and History, an agency of the West Virginia Department of Education and Arts, brings together the state's past, present and future through programs and services in the areas of archives and history, the arts, historic preservation and museums. The Cultural Center is West Virginia's official showcase for the arts. Visit the Division's website at www.wvculture.org for more information about programs of the Division.

at Green Bank, 2.90 inches at Snowshoe, 3.08 inches at the Scout Camp, 3.44 inches at Bartow, 2.25 inches at Buckeye, and an unofficial report of 3.5 inches at Cass. The County average was about 2.37 inches. At Valley Head in Randolph County the reading was 3.64 inches.

The Greenbrier at Marlinton was at 3.9 feet at 7 a. m. Saturday, but was at 8.4 feet at noon and hit flood stage, 10 feet, at 1 p. m. It was at 10.6 feet at 2 p. m., 11.6 feet at 4 p. m., and crested at 12.3 feet at 6 p. m. It was falling by 8 p. m. and went below flood stage between midnight and 2 a. m. Sunday.

At Clover Lick the crest was 7.8 feet at 3:30 p. m. The Buckeye gauge was at 10.46 at 12:30 p. m. Saturday, up to 14.99 at 5 p. m. and crested at 15.51 at 8 p. m.

Fortunately the Knapps Creek watershed didn't get an excess of rain or problems at Marlinton would have been much worse than they were. The creek was at 6 feet at noon and reached a crest of 6.5 feet at 5 p. m. It was falling by 5:30 p. m.

By contrast the river crest at Marlinton was 13.5 feet in the flood on March 7, 1967, and 13.1 feet on October 8, 1976.

The Weather Service at Elkins notified Richard Barlow, County Emergency Services Director, at 6:30 Saturday morning that trouble was on its way. The operation center at the Marlinton Fire House was

cass.

The Tygarts Valley was hard hit with flooding at various places. Rt. 219 was closed at Dailey from 3 pm Saturday until 6 am Sunday On the Shavers Fork the Bowden Hatchery had 20,000 fish washed from rearing ponds and several campgrounds were washed out.

Pocahontas Memorial Hospital

The flooding waters of Greenbrier River and Knapps Creek spared Pocahontas Memorial Hospital from apparent serious damage or disaster this past Saturday. As the water began to fill the river banks, the Fire Department personnel began feeding information to us regarding the river conditions and expected or projected flood crest levels.

With this information, Hospital personnel were called in to activate the disaster plan to help prepare the Hospital for the impending threat. Thereafter, volunteers also appeared and within a few minutes the Emergency Room was relocated, as was the Medical Laboratory. Supplies and equipment from the Business Office, X-ray Department and Dietary Department were also relocated. In the early afternoon, as the water began to invade the area behind the Hospital, sand bags were placed at the Emergency entrance ramp. As it turned out, the sand bags prevented real flooding of the basement area as the flood water eventually crossed the Emergency

6 feet at noon and reached a crest of 6.5 feet at 5 p. m. It was falling by 5:30 p. m.

By contrast the river crest at Marlinton was 13.5 feet in the flood on March 7, 1967, and 13.1 feet on October 8, 1976.

The Weather Service at Elkins notified Richard Barlow, County Emergency Services Director, at 6:30 Saturday morning that trouble was on its way. The operation center at the Marlinton Fire House was set up by 7:30. Firemen were on duty until midnight Saturday and again Sunday until into the afternoon.

In Marlinton water overflowed from the river in the usual places. First Avenue was covered above and below Main Street. Main Street had water backed up from the sewers between Second and Third Avenues. Second Avenue was covered at Ninth Street and Third Avenue had water from Glade's south to its end. There was water on Fourth Avenue above and below Main Street.

Fas Chek had about two inches of water in the store.

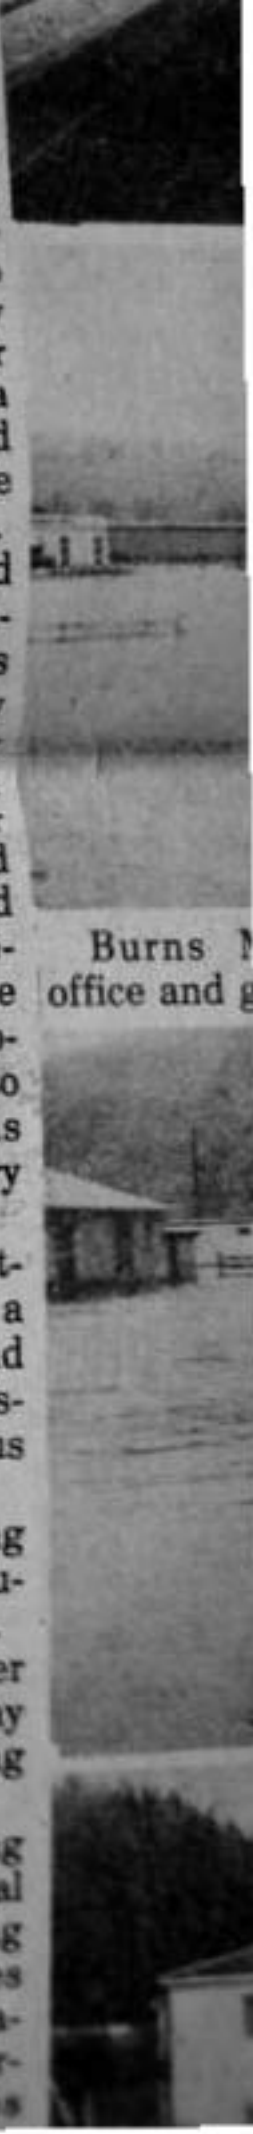
The Hospital got some water from sewer back-up and seepage but sandbags prevented water from coming in the emergency entrance. The Presbyterian and Methodist Churches had seepage. The McK Building basement filled with water as did the basement at the Municipal

minutes the Emergency Room was relocated, as was the Medical Laboratory. Supplies and equipment from the Business Office, X-ray Department and Dietary Department were also relocated. In the early afternoon, as the water began to invade the area behind the Hospital, sand bags were placed at the Emergency entrance ramp. As it turned out, the sand bags prevented real flooding of the basement area as the flood water eventually crossed the Emergency ramp entrance. Only a small amount of water seeped through the sand bags. The water that did find its way to the basement was from drain line back-up, and ground seepage. It was confined to certain areas and was pumped out as necessary throughout the night.

As the flood waters crested around eight p.m., a sigh of relief arose and thanks given for the Hospital being spared serious damage.

The effort of evacuating water and cleaning continued throughout the night. Disinfecting and further clean-up continued Sunday morning, along with airing and drying the areas.

Monday morning, along with volunteers, Hospital personnel began moving equipment and supplies back to their proper locations. As of Monday afternoon, normal routines



McClintic, Judge or the United States Court for the Southern District or West Virginia, and a native of Pocahontas county; Governor Howard M. Gore, Governor of West Virginia; Hon. E. T. England, Congressman from this the Sixth District; Hon J. Alfred Taylor, former congressman and nominee of his party for Governor of West Virginia. Andrew Price, President of the West Virginia Historical Society, was the presiding officer of the day.

Among the veterans present were M. J. McNeel, N D McCoy, R. F. Diehl, of the Confederate arm; J W. Tyler, J D. Sutton and Peter McCarty of the Union army

There were more than a thousand automobiles in the Park Wednesday The traffic was handled and the cars parked with military precision by members of Marlinton Post of the American Legion. State Trooper Jack Tidd had the assistance of a quad in handling things.

So great was the crowd that only a few thousand people could get within hearing of the speakers.

POCAHONTAS TIMES **EDITOR Bill McNeel presents Heidi Zemach with the certificate for her award winning article.**

Pocahontas Times wins BNC award

Former Pocahontas Times contributing writer Heidi Zemach earned a Better Newspaper Contest award at the West Virginia Press Association Banquet in Wheeling Saturday night.

Zemach's story, "Deer Make Travel Treacherous" was awarded second place in the Best News Feature category. Judges noted the story was "well written and well researched."

Times Managing Editor Pamela Pritt was elected president of West Virginia Press Services.

Circulation Manager Carol Moore and Advertising Manager Julie Gibson, along with staff Sunny Given and Kim Totten attended the three-day convention which included seminars on postage savings, printable document format (PDF) creation, digital photography, health insurance portability and privacy act (HIPPA) and homeland security, as well as newsroom management taught by members of the Freedom Forum.

Valerie Pritt also attended portions of the convention.

Zemach is now news director for Allegheny Mountain Radio.

Council receives report on Pinnacle project

Third Avenue had water from Glade's south to its end. There was water on Fourth Avenue above and below Main Street.

Fas Chek had about two inches of water in the store.

The Hospital got some water from sewer back-up and seepage but sandbags prevented water from coming in the emergency entrance. The Presbyterian and Methodist Churches had seepage. The McK Building basement filled with water as did the basement at the Municipal Building. Homes with water were Allen Parsons, Dora Neighbors, Paul Simmons. Others had water around their houses.

Riverside was hit when the river forced Stony Creek to overflow and run along Rt. 219. Homes flooded were those of Charles Cutlip, Leonard Cutlip and Cheryl Brown.

Water surrounded Foodland but employees were able to control the small amount that came in. The underpinnings of several mobile homes in Burns Trailer Park were damaged and one home was moved slightly. Burns Motor Freight had two feet in their office and shop building. Rt. 219 was covered in two places but not blocked.

Below Buckeye the River

sigh of relief arose and thanks given for the Hospital being spared serious damage.

The effort of evacuating water and cleaning continued throughout the night. Disinfecting and further clean-up continued Sunday morning, along with airing and drying the areas.

Monday morning, along with volunteers, Hospital personnel began moving equipment and supplies back to their proper locations. As of Monday afternoon, normal routines returned.

On behalf of the Board of Trustees and the Administrator, our sincere thanks and appreciation are extended to all volunteers and Hospital personnel, who worked long, hard hours during the crisis and afterwards to help it return to normalcy, and to Mr. Fred Burns, Jr., and members of the Fire Department, who kept us informed of the river levels.

Thanks to you all.

L. H. Loftin,
Administrator

Marlinton Council

The Marlinton Town Council met on Tuesday for its public hearing on the proposed 1982-83 budget. Present were Mayor Doug Dunbrack, Recorder Joe Smith, Fred Burns, Sr.,

Homes
and First

great historical interest. It over hangs the beautiful Little Levels region of Pocahontas county, and to the east are the forest clad ranges paral leling the main Alleghenies, with the waters of the Greenbrier showing in a few places; to the west and a thousand feet higher are the rich Back Allegheny Mountains. There are few views that surpass the outlook from Droop Mountain.

In the Park are a few fields, but the most of the area is woodland Some of the undergrowth is being cut away, and soon it will be about the most pleasant spot in the whole Greenbrier Valley.

The positions of the various units of the opposing armies have been marked. Mr. Sutton is doing thi work, has his own recollection of the battle to guide him; the recollection of other Union and Confederate Veterans, and the complete voluminous reports of more than twenty commanding officers of both armies.

The battle of Droop Mou. tain was

Commission considers financial matters

The County Commission met for a regular meeting on Tuesday.

The Commission voted to approve a resolution agreeing to be the fiscal agent for a $6800 grant to fund the first phase of improvements to the water system for Thornwood. The money is from the Rural Community Assistance Program, which is handled by West Virginia Community Action Directors Association. This grant will pay for an access road to the site for a well and to level an area for a water storage tank.

Commissioners discussed the award of a $25,000 grant from the Governor's Community Partnership Grant Program (funded by Legislative Budget Digest funds). However, they were not aware of what the grant was supposed to be for. Commissioner Reta Griffith said she was assured by Delegate Bill Proudfoot the funds could go to any project of the Commission's choice.

Putting $20,000 towards the meat curing facility at the high school was discussed since the commissioners had earlier this year voted to allocate Hotel/Motel Tax funds to this project. However, it was decided this was

gation Plan for the Commission's approval. The plan was developed following a series of public meetings around the county. A resolution adopting the plan was approved. (Details of the plan will be in an article in a later paper.)

The commissioners discussed the need to approve a county ordnance that will set "addressing standards" for the 911 system. The county is required to develop "city style" addresses to make it easier for emergency personnel to locate homes and businesses. Although the program will be of benefit to residents, commissioners noted that meeting the standards for road names may cause some disagreements. Public meetings will be held as the process gets under way.

In another matter concerning emergency services, Shawn Dunbrack was named as County Emergency Services Director with Richard Barlow moving to the position of Assistant Director. It was noted that the two men agreed to their new positions. Mr. Barlow's service as county director since 1972 was commented on by the commissioners.

marked. Mr. Sutton is doing thi work, has his own recollection of the battle to guide him; the recollection of other Union and Confederate Veterans, and the complete voluminous reports of more than twenty commanding officers of both armies.

The battle of Droop Mountain was the most important engagement in West Virginia in the war between the States. It marked the decline of Confederate strength in the mountains. The date of the batile was November 6, 1863 This was a bat between West Virginians. In some instances brother against brother in the opposing armies In the Union army there was one regiment of Pennsylyania, the 14th and the 28th Ohio Infantry, but the brunt of the fighting was done by the 2nd, 3rd and 10th West Virginia Regiments In the Confederate army were the 19th, 20th. 22nd and 14th Virginia regiments, which were all composed of West Virginians The Confederate commanders were General W. L Jackson and General Echols. The Union commander was General W

award of a $25,000 grant from the Governor's Community Partnership Grant Program (funded by Legislative Budget Digest funds). However, they were not aware of what the grant was supposed to be for. Commissioner Reta Griffith said she was assured by Delegate Bill Proudfoot the funds could go to any project of the Commission's choice.

Putting $20,000 towards the meat curing facility at the high school was discussed since the commissioners had earlier this year voted to allocate Hotel/Motel Tax funds to this project. However, it was decided this was not an allowed use of H/M money and the action was rescinded.

Deciding on the use of this money will be on the agenda for the next meeting.

The Commission took under consideration the requests for carry-over funds from the 2002-03 fiscal year from the Sheriff's Department, emergency services, senior citizens, county Fire Board, Hillsboro Fire Department, MTA Authority, Mountain RC&D Board, and the Family Resource Network.

Karen Larson, with the FRN, presented details on her group's request for $10,000. She explained that most of the money would could towards purchasing materials for the FRN's substance abuse program.

At first glance, the county's $645,000 balance at the end of the fiscal year would seem to mean the commissioners would

benefit to residents, commissioners noted that meeting the standards for road names may cause some disagreements. Public meetings will be held as the process gets under way.

In another matter concerning emergency services, Shawn Dunbrack was named as County Emergency Services Director with Richard Barlow moving to the position of Assistant Director. It was noted that the two men agreed to their new positions. Mr. Barlow's service as county director since 1972 was commented on by the commissioners.

Deputy Sheriff David Walton met with the Commission concerning the employment of a new 911/Correctional Officer. He asked the Commission to approve Florence Pritt for the position, which was done. She is replacing Brian Puffenbarger, who was employed and resigned after one week, Deputy Walton said.

Good news was received on the project to construct a regional sewage treatment system for the Snowshoe - Slaty Fork area. In a letter to the Pocahontas County Public Service District, Russell L. Isaacs, from the West Virginia Infrastructure and Jobs Development Council, stated "the Council has determined that the project is technically feasible within the guidelines of the Infrastructure and Jobs Development Act." The letter continued to state that the Council recommends that the PSD pursue its

the Confederate army were the 19th, 20th. 22nd and 14th Virginia regiments, which were all composed of West Virginians The Confederate commanders were General W. L Jackson and General Echols. The Union commander was General W. W Averell, a military genius of the Civil War, second to Stonewall Jackson.

The Confederates occupied the mountain, guarding the river road to Greenbrier county, but leaving the Caesar Mountain side unguarded The Union Army was camped in the Levels. General Averell made a feint against the front of Droop Mountain, and he sent three or more regiments around the end of Caesar and attacked the unguarded flank of the Confederates Here took place one of the hardest fights of the war. The Confederates broke and made their escape by the way of Lewisburg, passing through that town by a matter of minutes before General Duffie could cut them off with an army he was bringing up over the Midland Trail.

presented details on her group's request for $10,000. She explained that most of the money would could towards purchasing materials for the FRN's substance abuse program.

At first glance, the county's $645,000 balance at the end of the fiscal year would seem to mean the commissioners would have sufficient funds to meet all requests and more. However, it was quickly noted that this figure includes a $248,000 unencumbered balance needed for the new fiscal year's budget and $420,000 in federal Payment in Lieu of Taxes for the new fiscal year that has already been received. Subtracting these two amounts leaves a $23,000 deficit for 2002-03.

The positive on the situation is that the new budget only includes $300,000 in PILT money. The $120,000 difference prevented the county from actually having a deficit for the past year.

Commissioners decided to allocate only $25,000 towards the carry-over requests, leaving the balance for unforeseen expenditures. After a discussion, it was voted to allocate $9500 to senior citizens, $9500 to emergency services, $4000 to the Fire Board, and $1000 to the FRN.

Becky Payton presented the completed County Hazard Miti-

Virginia Infrastructure and Jobs Development Council, stated "the Council has determined that the project is technically feasible within the guidelines of the Infrastructure and Jobs Development Act." The letter continued to state that the Council recommends that the PSD pursue its funding for the project.

The proposed project calls for the PSD to construct a 1.5 million gallon per day treatment plant, which will replace the existing Snowshoe treatment facilities and also add service for the customers in the Big Spring Valley. Mr. Isaacs letter was accompanied with letters from the state Division of Environmental Protection, Health Department, and Public Service Commission supporting the project.

The Commission also had a letter from John Simmons on the East Fork Industrial Park Sludge Remediation Project. Mr. Simmons is working as a consultant for the project. He wrote that the wet weather this spring and early summer had prevented the contractor, Manno Construction, from completing the project. However, he wrote that he is reminding the company (and threatening their bond) that the weather situation has approved and urging them to get back on the project.

Magistrate Court

Mark Newkirk, Sean Milliner, Jack Cummins

Jack Cummins, Sean Milliner, Mark Newkirk, and Jamie Burks will be in Huntington on March 24-27 for All-State Music Honors.

Jack, Sean, and Mark were selected to the All-State Band. Jamie is now participating in All-State Choir for a second time.

These students were selected for their honors by auditions, in competition with high schools throughout all of West Virginia. They have achieved a unique and distinguished honor.

On Saturday, March 27, these four musicians will perform with the Band and Choir after many hours of rehearsal. They will represent Pocahontas County among the best West Virginia has to offer.

The Confederates broke and made their escape by the way of Lewisburg, passing through that town by a matter of minutes before General Duffie could cut them off with an army he was bringing up over the Midland Trail.

But to speak about the Fourth of July celebration on Droop Mountain Battlefield State Park last Wednesday, it was the biggest and most satisfactory picnic this writer has ever attended. The opportunity to meet and greet old friends and to meet and make new acquaintances was the best ever. Everyone brought a basket, and this region has the best cooks in the known world. The speakers were men who had proven themselves and earned positions of importance and honor in the state and the nation They had messages to bring and they brought messages to their fellow citizens. The weather was perfect, and it was a day well

Times Managing Editor Pamela Pritt was elected president of West Virginia Press Services.

Circulation Manager Carol Moore and Advertising Manager Valerie Pritt also attended portions of the convention.

Zemach is now news director for Allegheny Mountain Radio.

Council receives report on Riverside project

Marlinton Town Council held a called meeting on Tuesday, August 12. The Mayor and three council members were present.

Fred Burns, Jr., presented an engineer's survey and drawing of property he recently purchased at Riverside. There is a 10 ft. alley adjacent to the property and he submitted a proposal to put a 30 ft. street through the tract, exchanging the .22 acres contained in the alleyway belonging to the town for .77 acres of his property to make a 30 foot road from east to west through the middle of the land, parallel to the present street at Riverside. Also a service or pick-up street close the river may be proposed depending on the levee project.

Discussion followed with a local property owner at Riverside questioning whether he might lose access to a street on the side of his property if the levee closed the other side but he and Mr. Burns agreed to discuss that between themselves and make some provision for access.

The Ordinance/Resolution was approved by Council on first reading.

A second reading will be held on Tuesday, August 26, at 7 p.m.

In response to a request, Attorney Martin Saffer gave his opinion concerning the ordinance about trailer courts. He said individual trailers may be located if space meets specifications but a second trailer needs approval from the Health Department as well as meeting space requirements. The Mayor will get the Building Inspector to get in touch with the Health Department.

The Mayor reported that the deadline for a payment of $50,000 on the Shrader property was due August 14 and it might be possible that the money from the State would not arrive before the date, although it had been approved and Senator Helmick assured him that it is on the way. Council approved a resolution approving the short-term temporary financing of the $50,000.

Following the Council meeting three members of the Marlinton Building Committee for the new project met for the first time. This committee is legally necessary for the project. Leslie Cain was elected chair person. Terms set for the members were: Sam Brill, 5 years, Glen Wade, 4 years, Ernie Shaw, 3 years, Leslie Cain, 2 years, Jane Price Sharp, 1 year.

---

more, pled guilty on the 8th to spotlighting and fleeing on foot. Magistrate Hevener sentenced him to ten days in jail on both offenses, to be served concurrently, with fines totaling $150 and court costs of $120. Conservation Officer J. L. Queen filed the charges.

Phillip C. Dean, Sr, of Marlinton, was arrested on August 10 by State Police Tpr. M. S. Wetzel and charged with domestic battery. He was released on $500 bond.

Chase A. Walther, of Durbin, appeared in Magistrate Hevener's court on the 13th and pled guilty

Russell Jessee, a senior at Pocahontas County High School, placed in the top ten in the Regional Mathematics Contest held at Nicholas County High School on Saturday, March 20, 1982. Russell received a trophy for his outstanding efforts and will compete in state competition at Concord College in April.

Other counties involved in competition were Greenbrier, Fayette, Braxton, and Nicholas. The other members of our team were Paula Burks and Ernie Scragg, who are members of the Senior Class. Juniors who participated were Houston Henshew, Brenda Curry, Chris Jessee, Jamie Burks, Wayne Peery, and David Liptak. These students answered short-answer questions and timed-questions as well as team questions.

A three-member team from the freshman class represented our school in ninth grade competition. Patrick Jessee placed as the second alternate. Other participants were Alma Beverage and Robin Hevener.

Have your car ready to be washed and cleaned on Saturday, May 8 as a massive car wash is planned by the Marlinton Band Boosters.

A SUCCESSFUL WARRIOR Basketball Camp was held last month at Marlinton Middle School under the direction of PCHS coaches and basketball players.

Hoops camp nets county players

On July 21-24 Warrior Basketball Camp was held at Marlinton Middle School. The fundamentals of basketball were taught by PCHS varsity basketball coach Bob Sheets, head football coach Mike Knisley, and several PCHS basketball players: Evan Dale, Grant Dale, Zak Warner, Caroline McKean, Emily Bland, Dustin Cutlip, Clay Baxter, Brooke Dickenson, Ben Jewell, Rachel Wayne.

From 9 a.m. to 1 p.m. thirty-one students were involved in drills, games, or contests. On Tuesday the free throw contest was won by Jedrek Sheets and in the older division, Nebraska Beverage. On Wednesday the game of "Knockout" was won by Lakota Jonese in the younger division, and Bill Currence in the older division. On Thursday Jedrek Sheets and Nebraska Beverage won the game of "Buzzer Beater" in their respective divisions. The camp ended with full court games in both the younger and older divisions as well as a coach's game. Each participant received a Warrior Camp T-shirt.

Camp could not be held at PCHS because of construction storage use and Coach Sheets greatly appreciates the concern of Principal Frances McLaughlin and the efforts of Marlinton custodians, Tim Wade and Martha McCray, that allowed camp to be conducted.

Camp participants were: Coy Beverage, Nebraska Beverage, Lee Brown, Chris Caplinger, Trevor Caplinger, Mikey Callison, Makinsey Cochran, Billy Currence, Logan Dale, Lucas Faulknier, Matthew Faulknier, Ray Hanshew, Kachine Jonese, Lakota Jonese, Brittany Judy, Dillon Kelly, Derek Kiner, David Kiner, Skylar Knisely, Ethan Lash, Nathanial Lash, Payton Mann, Abby McCoy, Logan Plumley, Andrew Pritt, Aaron Sharp, Dexter Skidmore, Jacob Sheets, Jedrek Sheets, Gabriel Stovall, and Aaron Totten.

wife and four children survive. For a number of years Mr. Simmons has lived at Alderson.

The sudden death of John F Moss, on Sunday, July 1, came as a shock to his many fried and relatives. Mr. Moss had apparently been enjoying good health and his death was quite unexp cted He was found in his chair on the front porch of his home shortly after noon He probably had sat down for a nap as was his custom and passed on quietly without waking. Byers Moss was just starting for the home of his father when notified of his death.

Mr. Moss was in his 71st year. He was born in Braxton county Feb. 17 1858, but the greater part of his life was spent in Pocahontas county. Mr Moss was buried Monday afternoon July 2, in the Buckley graveyard on Bucks Run, the funeral service being conducted by Rev. M P. Calhoun

Mr. Moss is survived by six children, Mrs. Jim Workman, Misses Maggie and Daisy Moss, and Byers, John and Homer He is survived also by twelve grandchildrrn.

A SUCCESSFUL WARRIOR Basketball Camp was held last month at Marlinton Middle School under the direction of PCHS coaches and basketball players.

KILLS BIG RATTLESNAKE

Joe Symes killed a very large rattlesnake on Spice Run last Friday Mr Symes has been practically deaf for many years, but when the rattler sounded his alarm, he heard as well as ever he did Had he not heard, he would have stepped on the snake, which was the largest of its kind Resuming his walk he saw an immense blacksnake, which he killed The rattler was estimated to be seven feet long and the blacksnake five feet. Mr Symes was in Marlinton on Saturday, and his hearing appeared to be still pretty good

Golden Wedding Celebration

Mr. and Mrs. Frank L. Garrett, of 43B Elgin Boulevard, Hagerstown, Maryland, were honored recently on their 50th wedding anniversary, at the home of their daughter, Naomi Marquiss, who co-hosted the event with her sister, Susan DaCosta, of Grand Cayman, B.W.I.

Frank Garrett and the former Elizabeth "Lizzie" Barrett were married at the Methodist parsonage in Seebert on February 23, 1932, by the minister, the late M. G. Helmentoller. They are the parents of three living children. They have five grandchildren, five step-grandchildren and a host of step-great-grandchildren.

Opening the evening's six o'clock activity, prayer was offered by Minister Earl E. Marquiss, a son-in-law.

The two daughters rendered "Whispering Hope," the bride's favorite hymn, and "I Was Raised on Lovin' Jesus," accompanied by a step-great-granddaughter, Debra Thornton, Samuel, had composed for the occasion, and which he sang, accompanying himself on the guitar. Samuel and his wife, Joan, who live in Nashville, Tennessee, were unable to attend.

Mr. Garrett recounted, by tape recording made earlier, some of the interesting experiences leading up to and including his marriage to Mrs. Garrett. Later on in the program, speaking in person, he expressed his gratitude for Providential help as he endeavored to rear his family rightly.

Following touching remarks by the daughters concerning cherished childhood memories of their Christian home with resultant endearment of their parents to them, neighbors and friends attending expressed their appreciation of the fine couple.

Mrs. Garrett then expressed her thanks to God for His love and care through the years, for her children, and for her appreciation to all who had helped to make this occa-

COUNTY CAMP

The prospects are for the best camp we have had in Pocahontas county. The camp has increased so that we will have to have two camps. It is the plan of the camp officials to have the members from the Hillsboro, Marlinton, Cass, Greenbank and Durbin Clubs to meet with the first camp, July 16 21 This includes both the senior and junior clubs in each place Besides this we want the older club members In other clubs who desire to attend. There are a good number of high school students in other clubs like Huntersville, Onoto and Edray who can attend the first camp.

It is particularly desired that the members from the clubs in Marlinton attend the first camp. This will allow them to attend the Chautauqua and there will be no conflict. The enrollment cards and the food and equipment sheets have been sent to the members desiring same. If you have not received them call or write for them.

We had eleven leaders at Volvnteer's Camp and eleven girls at Older Girls Camp at Jackson Mills These with the help from the leaders and volunteer workers will help materially in building up the program for our camp.

Marlinton will celebrate Bike Night

A gigantic roar will herald the arrival of hundreds of motorcycles in Marlinton on the evening of Friday, September 12, for the town's annual Bike Night celebration. A parade of bikers attending the West Virginia State Harley Owners Group (HOG) Rally at Snowshoe Mountain will depart from the resort at 6 p.m. and travel south on US 219, arriving in Marlinton at approximately 6:30. They will be joined in Marlinton by other bikers and fans for a bike show and a dance on the downtown streets.

Motorcycles of all makes are welcome to enter the bike show. Registration for the general public will begin at 3 p.m. at the intersection of 8th Street and Third Avenue in downtown Marlinton. Awards will be presented at 9 p.m. The bike show is sponsored in part by the Pocahontas County Chamber of Commerce.

The band Cruzin will entertain the crowd with old-time rock and roll from 6-10 p.m. Food will be available from street vendors and at local restaurants.

The Marlinton Business Association will organize a Poker Walk for HOG Rally participants on Thursday, Friday and Saturday.

Bike Night is sponsored by the Town of Marlinton and the Pocahontas County Convention and Visitors Bureau in appreciation of the many bikers who make Pocahontas County a touring destination. For further information, contact the Pocahontas County CVB at 800-336-7009.

WEATHERHOLT—CUTLIP

Announcement has been made of the marriage of Miss Nora Belle Weatherholt. daughter of Mr. and Mrs Chas Weatherholt to Mr. Leonard Cutlip of Riverside. The wedding took place Tuesday July 3 at eight o'clock in the parsonage of the Methodist minister, Rev. S R. Neel performing the ceremony. The witnesses being Miss Weatherholt, sister of the bride, Mrs. Neel, Mrs. Frank Hunter and Miss Hannah

Mr. Cutlip is a progressive business man of Riverside, the merchant and owner of the filling station of that community.

Immediately after the ceremony the happy couple left for a short motor trip Best wishes follow these young people.

CARD OF THANKS

We wish to thank the people for their kindness and sympathy during the illness and death of our dear daughter and wife Mrs. Portia Sharp Daniels.

Letters to the E

Dear Editor:

It is disappointing to see how Marlinton Town Council proposes to deal with inappropriate horse traffic—by banning all horse traffic in town. Surely existing traffic and trespassing ordinances are enough to handle the problems that are occurring!

Prohibiting horse traffic in town on streets and alleys is not the answer. By doing so, you stymie any riders who might be using the Greenbrier River Trail from enjoying Marlinton—say, perhaps, lunch at The River Place, or enjoying a picnic on the river at the City Park.

Poor behavior on the part of a few is no reason to punish responsible riders from enjoying a viable form of transportation in city limits. Issue citations to the offenders, and enforce the existing laws.

And while you're at it, why don't you discuss erecting some hitching posts around town, since you propose to remove parking meters? If gas prices keep going up, folks may start riding their horses to work.

Echoes From The Legislature

Dr. Geo. F. Hull, our member of the House, seems to have met with a measure of defeat, during the past few days, in his efforts to amend the country doctor bill presented by Delegate W. F. Crow, of Marshall County.

He also took a decided stand against the Hallahan bill granting an annual pension of $6,000 to judges of the state supreme court, and stated in his speech before the House, that our taxpayers were already over burdened at the present time.

As we see it, he was right, and it is rather too bad that a few more of his constituents could not have been of the same opinion.

A judge of the state supreme court draws a salary touching the $10,000 mark, and out of this income he should be able to make sufficiently safe investments during his period of service to insure the comfort of himself and family, after his retirement at 65 years of age.

To quote Dr. Hull, "the state owes no man a living who is able bodied," and we might add that the fostering of bills of this nature, encourages a tendency toward parasitical growths on the finances of our state.

Letters to the Editor

Dear Editor:

It is disappointing to see how Marlinton Town Council proposes to deal with inappropriate horse traffic—by banning all horse traffic in town. Surely existing traffic and trespassing ordinances are enough to handle the problems that are occurring!

Prohibiting horse traffic in town on streets and alleys is not the answer. By doing so, you stymie any riders who might be using the Greenbrier River Trail from enjoying Marlinton—say, perhaps, lunch at The River Place, or enjoying a picnic on the river at the City Park.

Poor behavior on the part of a few is no reason to punish responsible riders from enjoying a viable form of transportation in city limits. Issue citations to the offenders, and enforce the existing laws.

And while you're at it, why don't you discuss erecting some hitching posts around town, since you propose to remove parking meters? If gas prices keep going up, folks may start riding their horses to work.

David and Sunny Given
Cass

Dear Editor:

To the residents of Lake Street who complained about us trimming the trees along the street:

If you "concerned citizens" had so much interest in the trimming of the trees along the street that you felt it necessary to file complaints with the Town Office, why did you not bother to trim the trees yourself? Or why not come out of your house while we were trimming the trees to lend a hand or ask us in person why we were voluntarily doing the job ourselves?

The trees were planted by the Town of Marlinton a few years ago on the town right-of-way. Only a handful of property owners have bothered to keep the trees trimmed so that they do not project out into the street, scratching passing cars. As the residents who must pass by each and every tree on the street, we were tired of getting our vehicles scratched by the overhanging branches. We had contacted the town to have the branches trimmed and were not satisfied by their response time to our requests for the branches to be trimmed, therefore we took it upon ourselves to volunteer our time, tools and effort to cut the branches.

The branches trimmed were only those that were overhanging the right-of-way and we did not trespass on any private property to cut the limbs. We picked up each and every branch and leaf and hauled them to the town cemetery property for proper disposal.

I am sure that our volunteer work saved the town maintenance crew time and money that could be better spent elsewhere in the community.

It is a sad commentary on our community, when neighbors helping neighbors is met by complaints and criticism behind your back.

Shawn and Karen Dunbrack
Marlinton

Dear Editor:

I would like to thank *The Pocahontas Times* for printing the article and pictures I sent to you about the Cheat Mountain Conference held at the Tygarts Valley High School gym on April 2-6. The article appeared in the May 15 paper. Not only did you print the pictures of the Pocahontas County first and second place winners, your paper listed all the coaches' and players' names.

Then your paper also had pictures of David Kiner, 4th grade Most Valuable Player, and Aaron Totten, 6th grade MVP, taken to add to the already enclosed picture of Jimmy Wiley, 5th gade MVP.

I just want every one of your readers to know what a great paper you publish weekly. You go the extra mile to make your paper #1.

The same article was sent and never ran in *The InterMountain*. This was very disturbing since the tournament was held in Randolph County, and Tim Coberly, a Tygart Valley coach and referee, was instrumental in organizing this conference.

So, once again, thanks *Pocahontas Times*. I see many trips to the State Tournaments in Charleston in the future for Pocahontas County.

CORBETT'S MANGLED BODY FOUND ON TRACK BELOW CASS STATION

Identification Is Made by Papers Found in Pockets

A mutilated body, thought to be that of Dave Corbett, a well known resident of this county who had not been seen for over two months, was found on the rail three hundred yards below the Cass station at Cass about thirty minutes after it had been mangled beneath the wheels of the East bound manifest freight which passes through there between the hours of four and five a. m., said a report reaching here early this morning.

It has not been determined in what manner Corbett was killed, but the supposition is that he was coming back into Cass on the freight, after an absence of more than two months, and in attempting to get off, in some unknown manner, got caught and was dragged beneath the wheels of the moving train. His body was so badly mutilated that identification was made by papers found in his pockets.

Corbett, it is understood, has a wife and two children living in Washington, D. C. He also has one brother, Omer Corbett, who lives at Dunmore. His age, it is said, was about 45 years. He had worked as cookee in the lumber camps in this county, but had never made it his permanent home. He was a rover.

Prosecuting Attorney, Allen P. Edgar was summoned and went to Cass this morning, intent on holding an inquest.

taxes, the motorists who pay this tax get real benefit from it through decreased cost of maintenance on their cars and increased mileage on improved highways.

The Airplane Arrives

The citizens of Marlinton who think that the airplane may be in common use in the distant future are wrong. Recent figures show a rapid growth which indicates that the use of the airplane will become general much quicker than is anticipated at this time.

According to figures of the Department of Commerce, there are more than 5600 airplanes in use today, not to mention those used by Federal agencies, and almost 20,000 miles of airways in operation. Moreover, 1,324 airports and landing fields exist at this time and almost another thousand are in the proposal state. There are 368 municipal landing fields included in his number but it does not include more than 4,000 fields, owned by various holders, up-

PCHS no longer 'severely impaired'

13 apply for superintendent's position

Pamela Pritt
Managing Editor

Thirteen people, some from as far away as Arizona, others from here in Pocahontas County have applied for the job at the helm of the county's school system, the board of education found out at its meeting Monday night.

As well as having assorted addresses, backgrounds among the candidates are diverse, as well.

From college professors to principals and one attorney, the Pocahontas County Board of Education will sift through their resumes and applications next week.

Applicants for the replacement of Dr. James B. Phares, who moved to Marion County in July are:

Dr. Stephen B. Akers, Principal, Bluefield Middle School

Roger G. Brady, Superintendent of Schools, Campbell County, Kentucky

Sue Hollandsworth, Principal/ Teacher, Hillsboro Elementary/Middle School

Don E. Johnson, Principal, Sutton Elementary School

Dr. J. Patrick Law, Part-time instructor, Marshall University Graduate College

Basil R. Legg, Jr., Attorney-at-Law, Clarksburg

Robert S. McCrum, retired, Kingwood

Gary B. Mitchell, Director of Facilities/Transportation, Mason County Schools, Point Pleasant

Thomas W. Sanders, Principal, Pocahontas County High School, Marlinton

Kenneth L. Segroves, Ph.D., Nogales, Arizona

Nicole Thorne, Kent State University, East Liverpool, Ohio

Ronald C. Williams, Principal, Hacker Valley Elementary School

Dr. R. Dwain Wilcox, Principal/Consultant, EMC Penna Bond, Hillsboro

The board spent a good deal of time on personnel issues in making a nearly 40-minute executive session.

A MATTER OF PRINCIPAL: BOE president Kermit Friel is flanked by Ruth Bland, Green Bank's new principal, and Dr. Allen Alberts, assistant principal at PCHS, above. The BOE tackled several personnel issues at Monday night's meeting. Below, VICA coach Gary Beverage presents plaques to team members Nick Blackman and Mathias Callison. The VICA team place first in the nation at their summer competition in Kansas City, Missouri.

Transferred: Patricia V. Thompson, from special education classroom/bus aide at Hillsboro to the same position at Marlinton Elementary

Both Bland and Alberts attended the meeting and received congratulations from the board.

Bland has been a teacher at Green Bank for 20 years and was faculty senate chair for five years, as well as dean of students for two.

"Green Bank is close to being the jewel of the county," she told the board, citing the pos-

it comes to the new geo-thermal heating system.

As of Monday, less than half the wells required for the system had been drilled and the completion of the system hinges on the wells, Sanders told the board.

Frame Drilling from Elkins has two drills on site and has promised to bring in a third, Sanders said.

"We're not going to do without heat," Irvine assured the board.

Sanders said the school has changed its driving policy so at [illegible] being drilled in the morning [illegible]

The board presented plaques to Gary Beverage, VICA team coach, and team members Nick Blackman and Mathias Callison.

PCHS' VICA team placed first in the nation. Blackman placed first in the president's competition with a score of 99.9%.

Both Blackman and Callison graduated in 2003 and will attend West Virginia University this fall.

In other personnel matters, the board rescinded the hiring of Cheryl A. McCullough and [illegible]

The Hillsboro Red Devils Middle School team, after finishing the regular season 2 and 10, pulled off an upset victory by beating Green Bank Middle School on March 3 and 6 in the first round of the Pocahontas County Middle School Tournament by a score of 35 to 40.

on which landings may be successfully made.

The latest development is the formation of finance companies to handle the sale of planes on a partial payment plan. It would seem to the non-expert that the airplane industry has reached a certain point of stability when such companies come into existence. This is further indicated by the estimate of the Department of Commerce that 10,000 planes will be built in the United States during 1929.

Boys Who Will Be Boys

Every teacher in Pocahontas county has had to contend with pupils, who were alert and intelligent, but who persisted in doing tricks not calculated to the establishment of good order or he teacher's peace of mind. Employed: Jane Buzzat Wilson, half-time counselor, Renee D. Hill, half-time custodian.

Terminated: C. Sue Dale, teacher.

Transferred: Ruth A. Rund, from Dean of Students/ itinerant Speech/Language Pathologist to Principal; Marsha L. Beverage from teacher at Marlinton Middle School to Title I teacher of Mathematics/Reading Specialist Marlinton Elementary School.

Employed: Doris A. Sutta, special education classroom aide

Pocahontas County High School

Employed: Dr. S. Allen Hammons II, assistant principal.

Transferred: Rebecca A. Evans, from half-time custodian II at Hillsboro to Cook I at PCHS.

Hillsboro Elementary/Middle School

Magistrate Court

A MATTER OF PRINCIPAL: BOE president Kermit Friel is flanked by Ruth Bland, Green Bank's new principal, and Dr. Allen Alberts, assistant principal at PCHS, above. The BOE tackled several personnel issues at Monday night's meeting. Below, VICA coach Gary Beverage presents plaques to team members Nick Blackman and Mathias Callison. The VICA team place first in the nation at their summer competition in Kansas City, Missouri.

Transferred: Patricia V. Thompson, from special education classroom/bus aide at Hillsboro to the same position at Marlinton Elementary.

Both Bland and Alberts attended the meeting and received congratulations from the board.

Bland has been a teacher at Green Bank for 20 years and was faculty senate chair for five years, as well as dean of students for two.

"Green Bank is close to being the jewel of the county," she told the board, citing the proximity of the NRAO user center and the community's love of learning.

Alberts told the board he hails from the Huntington area and has a strength in curriculum and instruction with a background in English.

The board granted Irvine permission to fill open positions before school begins.

Those positions include preschool teacher at Hillsboro Elementary, half-time pre-school teacher at Marlinton Elementary, fifth grade teacher at Marlinton Middle School, social studies teacher and half-time alternative education teacher at PCHS and the deans of students positions at Green Bank Elementary/Middle School and Marlinton Middle School.

PCHS Principal Tom Sanders proudly announced to the board that his school is no longer considered "severely impaired," a stigma brought on by low test scores the previous year.

The school may not be severely impaired academically, but school officials are facing some severe impairments when it comes to the new geo-thermal heating system.

As of Monday, less than half the wells required for the system had been drilled and the completion of the system hinges on the wells, Sanders told the board.

Frame Drilling from Elkins has two drills on site and has promised to bring in a third, Sanders said.

"We're not going to do without heat," Irvine assured the board.

Sanders said the school has changed its driving policy to allow only seniors to drive to school this year. The wells are being drilled in the parking lot adjacent to the main building. Once the drilling is finished, the lot can be used for parking again.

"You may hear complaints from students," Sanders said, noting that seniors' mentorships sometimes require that they drive to school.

Inside the high school, ceiling tile and insulation covered the floors, but that will be in order by August 21, the day teachers report to work.

"The tile must be back by day one," Sanders said.

However, up to 20% of the tile can be removed at a time to make sure the system is working. Sanders said testing has revealed some problems in the math wing.

Mid-State is on schedule inside the building, the principal said. "I worry about the drillers," he continued.

Cleaning the school will be another obstacle, Sanders said, and it might not be totally cleaned until next summer.

The board presented plaques to Gary Beverage, VICA team coach, and team members Nick Blackman and Mathias Callison.

PCHS' VICA team placed first in the nation. Blackman placed first in the president's competition with a score of 99.9%.

Both Blackman and Callison graduated in 2003 and will attend West Virginia University this fall.

In other personnel matters, the board rescinded the hiring of Cheryl A. McCullough and Cindy Brock as EMTs at PCHS for football games and practices and rehired them as co-EMTs. Either McCullough or Brock must attend every football game and practice this season.

Substitute teachers for the 2003-2004 school year are:

Margaret Baker, Geraldine Berry, Marilyn Beverage, Julie Brown, Cora Lee Carpenter, Mary Dawson, James Estep, Lowell Galford, Nancy Galford, Katherine Garber, Shirlene Groseclose, Julia Hefner, Janet Hill, Christopher Jessee, Christine Jewell, Debora Johnson, Cheryl Jonese, Jan Jonese, Patricia Keller, Robert Keller, Martha Lacasse, Katherine LaFleur, Pamela McCurdy, Mali Minter, Tatiana Mynuk, Donna Pennington, Robert Poage, Victoria Poundstone, Laura Pritt, Lucy Rittenhouse, Denise Sharp, Elaine Sheets, Sharla Sherman, Sheri Turley, Janell Wine, Carole Young and Charles Young.

The board meets next Wednesday to review applicants for superintendent and meets again in regular session August 25.

Locked gate is council topic

By Jason Bauserman

A locked gate to the town cemetery remains a point of contention in Durbin.

The cemetery can be reached only through the old school yard, now owned by an Ohio resident. At last month's council meeting, it was voted to contact the owner and remove the lock.

After this was done the owner returned and locked the gate again. He did meet with Mayor Donald Jennings and offered to leave a key with him. He told Jennings he wanted to protect his property, which had been broken into.

Council stood by their last decision and felt the lock needs to be removed from the gate.

Councilman Donald Peck proposed 10 to 12 horseshoe pits on town property next to the sewage plant. He said during Durbin Days it took six hours to complete the singles competition with five pits. Jennings said this could be used as a fundraiser for the town. Peck said this raised $459. Councilman John Riffe liked the idea and wanted to see this developed further as a town park. Council voted to set up the horseshoe pits.

Riffe inquired about the six benches his church had donated to the town. It was decided to disperse them around town immediately.

Jennings has contacted the Department of Highways about signs. He reminded citizens to stop for pedestrians on crosswalks.

There was much discussion on four-wheelers in town. Riffe wondered if Game Warden Howard Shinaberry could drive through town occasionally and check on this.

Councilman Pat Woodford said he was going to meet with Paul Gash from Charleston on Tuesday about fresh water runoff in town.

It was decided that when town employees make a purchase they need to ask the mayor or Councilman Woodford.

Council decided that all delinquent bills needed to be paid, or partially paid, within 30 days, otherwise they will be turned over to the magistrate.

Jennings wanted the ditch across Maple Street repaired. He felt concrete would be the answer.

Jennings also did not want the trash truck left in the town garage with trash left in it.

Mike Vance again discussed his storm sewer problem. There was much discussion but he was asked to wait until the next meeting.

Council member Nancy Benetato asked that the front door and garage door on the Town Office building be painted.

New residents to Durbin's Main Street also appeared at the meeting. Ed Phelps, who bought Sidney Jackson's building, asked for a building permit. He is presently remodeling and plans to live upstairs. He will rent out the downstairs store as a possible antique and collectibles business.

John and Patti West recently purchased the arcade on the corner next to the Mayor's Office. They also plan to sell antiques and collectibles and hope to open in about two weeks.

Sandy Varner was elected as the Recorder and Treasurer. Jennings thanked outgoing Recorder/Treasurer Renee Downing for her help in transition.

Man attacked by bear

Letters

Dear Editor:

On my way to the (State) Fair Friday, I witnessed something that never should have happened.

Before heading into Spring Creek in a blind curve, a car passed me, south bound, barely missing a large Department of Highways truck head-on and barely squeaking between me and the truck.

The car went off the road, hit the hill and rolled in mid-air two times. After getting someone to call 9-1-1, I went back to the scene.

Four beautiful young people were on the side of the road, one in the pasture and one lying limp by the fence.

Why, why, why do young people have to be in such a hurry? I pray to God my son and everyone else's sons and daughters realize how fast something can happen when you're going fast.

I give this message in good conscience; hopefully, someone will benefit.

Brenda Pritt

Man attacked by bear

Durbin resident could be first-ever confirmed case

by John McCoy
Daily Mail
Outdoors Editor

A Durbin man is recuperating from severe injuries to his hands after being mauled by a black bear.

According to Division of Natural Resources conservation officers, 26-year-old Philip Propst was chasing the bear with a pack of dogs at the time of the attack, which occurred Saturday.

"His dogs finally cornered the bear against a cliff near the head of Hatchety Run on Cheat Mountain," said the DNR's Lt. Col. Jim Daniel.

As Propst shot down the bank to call off his dogs, the bear reportedly broke free from the pack. Propst found himself blocking the only avenue of escape.

"According to the report, he threw up his hands to defend himself and got pretty badly bitten," Daniel said. "His left hand had all the bones broken across the palm, and the right hand suffered extensive damage that required surgery. He also had a puncture wound from a bite on one of his calves."

Propst's dogs rejoined the fray, and the bear beat a hasty retreat. Daniel says the injured hunter was able to summon help on a two-way radio. A friend quickly arrived and rushed Propst to Davis Memorial Hospital in Elkins.

A hospital spokesperson said Propst was discharged Monday (August 4). Calls to his Durbin home have not been answered.

"Propst did say, when he talked to the conservation officer who prepared the report, that blame for the mauling shouldn't be placed on the bear," Daniel said. "His exact quote was, 'It wasn't the bear's fault. I just got in his way.'"

Though West Virginia's bear-hunting seasons don't begin until mid-fall, chasing bears with dogs is permitted year-round. Daniel said the practice has never, to his knowledge, resulted in any injuries until now.

"In fact, this might well be the first-ever confirmed, documented case of injuries to to an attack from a West Virginia black bear," he said. "I'm not 100 percent sure on that, but this might be a first.

Editor's note: This story was reprinted with permission of Charleston Daily Mail, Nanya Friend, Editor.

...Clutter and I have ...Pocahontas Memorial Hospital with the health fairs, two years at the youth fair. Our job has been to be in charge of food for employees and other people who help with the activity.

Some people have asked me who furnishes all the good food we have for them. The answer is the employees of PMH. I think it is a great thing the employees do.

...in Pocahontas County should be proud of the employees of our hospital. It takes a great effort, money and time for them to get things ready for us to serve.

First Grade Learns About Health Care Workers

We met Mrs. Hamed, the public health nurse. She showed us movies about poisoning. She gave us Mr. Yuk stickers. Some of us had met Mrs. Hamed at the health office when we got ready for school. She gave us shots so we won't get bad diseases.

Dr. Jo Jones came to visit us at school. She showed us lots of tools that doctors use to do their jobs. We found out that Dr. Jones went to school for 23 years to become a doctor. She likes making people feel better, but she feels bad when a patient dies. We were surprised to meet a lady doctor.

We went to visit the workers at the hospital. We saw a man nurse. We met the lab people, the cooks, the X-ray technician, the hospital administrator, the housekeepers, and the orderly. We saw the X-ray machines, hospital rooms, the nursery, the operating room, the kitchen, and the emergency room. We rode in the elevator.

We were surprised to discover our P. E. teacher, Mrs. Wayne is a health care worker. She is an E. M. T. She had to go to school to learn to be an E. M. T. She likes to help people. She feels bad when the patient is somebody she knows. We learned that E. M. T.s are volunteers, they don't get paid.

We want to thank all of the health care workers who spent time teaching us about their jobs.

Mrs. Bartels' First Grade

young folks who have enrolled in the high school, one in the Freshmen class and the other in the Sophomore class.

Remus Brock has moved in the Gladwell house for this winter.

J. P. Beard is now at home.

Mrs. Jim Bruffey, of Seebert, was a visitor in town the last weekend.

The Richards Bros. Circus stopped in town last Thursday. The show consisted of about two dozen trucks. A large audience was there for the performance. This makes the second circus that has been in town during the past six weeks.

The football team tied the White boro made about nine first downs Sulphur team with no scores. Hills- while White Sulphur made perhaps three or four, but due to fumbles our team did not succeed in scoring. The team will play Renick here Saturday.

Camie Cutlip, builder and contractor, with the firm Hull and Cutlip, was a visitor in town the 15h. The contractors have almost completed the new school house at Beard.

Holstine named All-American Scholar

The United States Achievement Academy announced recently that Danielle Holstine, of Dunmore, has been named an All-American Scholar.

The USAA has established the All-American Scholar Award Program to offer deserved recognition to superior students who excel in the academic disciplines. The All-American Scholars must earn a 3.3, or higher, grade point average. Only scholars selected by a school instructor, counselor, or other qualified sponsor are accepted. These scholars are also eligible for other awards given by the USAA.

Danielle, who attends Pocahontas County High School, was nominated for this national award by Ron Hall.

DANIELLE HOLSTINE

Danielle will appear in the All-American Scholar Yearbook, which is published nationally.

"Recognizing and supporting our youth is more important than ever before in America's history. Certainly, winners of the All-American Scholar Awards should be congratulated and appreciated for their dedication to excellence and achievement," said Dr. George Stevens, Executive Director of the United States Achievement Academy.

The Academy selects All-American Scholars upon the exclusive recommendation by teachers, coaches, counselors, and other qualified sponsors. Once awarded, the students may be recognized by the USAA for other honors.

Danielle is the daughter of Mike and Heather Holstine, of Dunmore.

4-H'ers win State Livestock Judging Contest

The Pocahontas County Senior Livestock Judging team won the State Livestock Judging Contest in Morgantown on July 31. The team consisting of Jennifer Rose, Sarah Beard, Jillian Rose, and Steven Beard will represent West Virginia at the National Contest which will be held in Louisville, Kentucky, in November 2003 as part of the North American International Livestock Exposition.

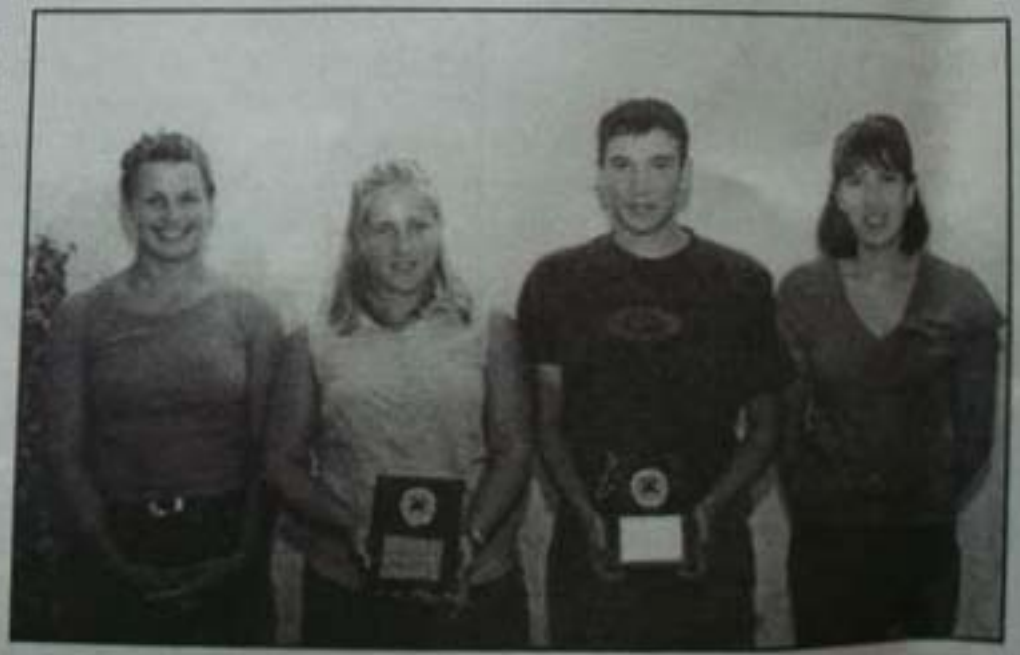
Members of the Senior team also did well individually in the state contest. Jennifer Rose placed 1st overall, 2nd in swine, and 1st in beef. Sarah Beard placed 5th overall and 3rd in sheep.

Pocahontas County was also well represented in Morgantown by two junior teams consisting of Eric Rose, Zach Graham, Joel Galford, Kurt Mothes, Danielle Mothes, Chelsea Walker, Miranda McNabb, and Jesse Walker.

Zach Graham brought home honors by placing third highest junior individual in swine.

Youth from throughout West Virginia competed in the State Livestock Judging Contest, which was designed to teach individuals how to identify quality breeding and market animals and increase their public speaking skills in giving oral reasons for their decisions.

Adults who shared their time, knowledge, and skills to work with these judging team members were: Martin Macqueen (Senior coach), Joe Walker (Junior coach), Lowell Galford, and Susan Davis. The twelve 4-H'ers were accompanied to Morgantown July 30-31 by Martin and Julie Macqueen, Shirley Wilkins, Annette Graham, Bill and Barbara Beard, Robert and Tonja Mothes, Bee and Connie Rose, Lowell Galford, and Robbie, Rosemary and Bobbie Jo McNabb.



2003 STATE WINNING Senior Livestock Judging Team: l to r: Jillian Rose, Jennifer Rose, Steven Beard, Sarah Beard.

ONOTO

It has been a long time since anything has been said about this neck of woods, so for fear we loose our job we will proceed to say a few things.

In the first place there has not been much to write about, and we do not like to write unless we can give something of interest.

So far we have had a very fine winter. To date there has not been any snow of any consequence. However at this writing it is snowing, and prospects are good for a considerable snow.

Lumber hauling has been the chief industry in this section for a considerable time, and it looks as though it was going to continue.

A. S. Galford, and Morris Friel have been skidding some logs for George H. Moore Mr. Moore has a good mill on his farm, and should make some good lumber.

S. Reid Moore, and G. M. Moore were guests of Mr. and Mrs. F. C Baxter Sunday last.

Mrs. A. C. Barlow was shopping at Edray Monday and calling on friends at the same time.

Mrs. George A. C. Auldridge has been on the sick list for a few days.

Mr. and Mrs. C V. Hanlin, and son Loyal attended the Banquet given at the Hall Saturday night by the

George H. Moore Mr. Moore has a good mill on his farm, and should make some good lumber.

S. Reid Moore, and G. M. Moore were guests of Mr. and Mrs. F. C Baxter Sunday last.

Mrs. A. C. Barlow was shopping at Edray Monday and calling on friends at the same time.

Mrs. George A. C. Auldridge has been on the sick list for a few days.

Mr. and Mrs. C V. Hanlin, and son Loyal attended the Banquet given at the Hall Saturday night by the Pocahontas Encampment I. O. O. F. No III. And say the least it was a swell occasion. Five turkeys were slain for the occasion, and other things were there in abundance. Hon. C. L. Simpson, Grand Scribe, and Hon. A. J. Wilkinson of Huntington addressed the audience in a very able manner, and very impressive. A number of local speakers responded, in a very able manner. Among them were Ira D. Brill, C. W. Price, S. N Hench. All told the occasion was a very enjoyable one and deserves to be applauded. We understand there were four applications filed for the encampment.

We are glad that we are a resident of W. Va. for the the following reasons: West Virginia stands fourth in Sunday School effeiency in the United States. W. Va has more coal than any state in the Union

West Nile Virus renews focus on horse vaccine

Commissioner of Agriculture Gus R. Douglass is again encouraging horse owners to vaccinate their animals following an August 7 Centers for Disease Control (CDC) report announcing that cases of West Nile Virus (WNV) had tripled in the United States in the previous week.

"Because West Nile Virus did not appear in this country until 1999, it is not a part of the standard, multi-disease vaccine given to many horses," said Commissioner Douglass. "However, the West Nile vaccine is available separately and has proven to be an effective means of protection against the disease."

The CDC reported that 164 people in 16 states have contracted the disease, compared with only 59 cases a week ago, and has been found in animals in 38 states. At the same time last year, the disease was reported in 112 humans in only four states.

WNV is rarely deadly to humans, but about 1 in 150 people who contract it develop encephalitis or meningitis, serious and potentially lethal conditions.

However, death rates are much higher in horses that contract the disease.

"Research has indicated that up to 40 percent of the horses that get the West Nile die from it," said Dr. Joe Starcher, state veterinarian and director of the West Virginia Department of Agriculture's (WVDA) Animal Health Division. "Given the wide distribution of the disease throughout the country and the state, vaccination is highly recommended."

So far in West Virginia, birds have tested positive for WNV in three counties: Kanawha, Greenbrier and Morgan. Perhaps more importantly, surveillance has revealed two birds carrying eastern Equine Encephalitis (EEE or triple-E) in birds in Wood and Nicholas counties.

"Triple-E and West Nile are very similar diseases, with very similar symptoms," continued Starcher. "Both cause stumbling, stupor and fever of 102 degrees or more. The difference is that with triple-E, the horses eventually go down—and stay down."

Fatality rates in horses may run as high as 90 percent, said Starcher, but EEE is included in the standard "five-way" vaccine for horses, along with Western Equine Encephalitis, tetanus, rhinopneumonitis and flu.

Starcher also strongly recommended that horse owners vaccinate against rabies, another deadly disease prevalent in West Virginia. "I've been at the State Fair the past couple of days doing spot checks on animals coming in for shows, and the people bringing in horses are really scared that their animals could be at risk," he said.

"They can put their minds at ease if they'll call their local veterinarian and arrange to have a full series of vaccinations for their horses. It not only protects their animals, it also prevents them from spreading one of these diseases to other animals."

Young-:-Brown

Mr. and Mrs. Warren Brown, of Huntersville, are proud to announce the marriage of their daughter, Wanda Jane to Omar Leon Young on March 27, 1982.

The ceremony was performed at the home of the bride's parents by Rev. Robert Cruikshank.

The best man was Alvon Ryder and the bridesmaid was Jackie Carden.

Family and friends attended the wedding.

Out of town guests were Mrs. Bonnie Lemon, of Clifton Forge, Virginia, Mr. and Mrs. Clifford Carpenter, of Charleston, Mr. and Mrs. Fred Roth, of Buckhannon and Mr. and Mrs. Don Shrader, of Stuarts Draft, Virginia.

The couple is residing at Edray.

Wedding Announcement

Mose Burks and Mary Sibyl Fowler wish to announce their forthcoming marriage. The ceremony will be performed on April 3, 1982, at the Mt. Kennison Church of God on Stamping Creek at four o'clock in the afternoon.

Reception will be held at the home of General Triplett following the ceremony.

All friends and relatives are welcome to attend.

McLaughlin-:-Buzzard

Mr. and Mrs. Mack Buzzard, of Frost, announce the marriage of their youngest daughter, Wanda Lisa, to Robert William McLaughlin, son of Mr. and Mrs. Lee McLaughlin, of Dunmore, on March 27, 1982, at 2:00 o'clock in the afternoon. The couple was united in marriage in a double ring ceremony in the bridegroom's home by Rev. B. B. Mitcham.

A small reception was held afterward for relatives and neighbors. The couple is now residing in Kimper, Kentucky.

Richard Barlow, Marlinton, Harry Holsopple, Hillsboro, Dewey Hoover and Alfred Ervine, Green Bank, Merle Kerr, Dunmore, and Curtis Kincaid, Minnehaha Springs, are going to Charleston this week to take their 32nd Degree in the Masons.

Wedding

Rodanthe, North Carolina—The wedding of Gail Lowry and Ken Price took place on Hatteras Island, North Carolina, on Sunday, July 13, at sunrise. The bride was given in marriage by her daughters, Kimberlie, of Raleigh, North Carolina, and Carrie, of Christiansburg, Virginia.

Leslee McCarty, of Hillsboro, officiated at the ceremony, and Steven J. Shaluta, Jr., of Charleston, took the wedding photographs. Donna Bedwell, of Orange, Virginia, directed the wedding and her husband, Michael, performed a special wedding song.

Mrs. Price carried a hand-cut bouquet of flowers from her West Virginia garden and wore an ankle-length cotton and lace white dress.

The Prices honeymooned on Hatteras Island with their children and a few friends and then traveled to Asheville, North Carolina.

Mr. Price is Superintendent of Schools in Pendleton County, and Mrs. Price is Director of Tourism in Pocahontas County.

The couple will reside in Pendleton County.

FIELD NOTES

Ms. Dennis Jackson, of Lorain, Ohio, reports a fine tomato crop. She and her son-in-law, Paul Layman, were experimenting on a new variety of climbing tomato, the Burgess. These tomatoes are very inexpensive, being three packs for a quarter. These tomatoes are supposed to grow about 25 feet high but Mrs. Jackson and Paul staked theirs only ten feet high. They proved out to be a very good producer having around one-hundred bushels from fifty vines. Mrs. Jackson and Paul expect to go into full swing raising the Burgess tomato for their roadside vegetable stands next year.

Our Teachers

At a meeting of the Pocahontas County Board of Education, it was ordered that schools open on Tuesday, September 1, 1953. The regular teachers' meeting will be held on Monday, August 31st, in the Marlinton High School Auditorium, beginning at 10 o'clock.

Teachers have been employed and placed as follows:

Brushy Flat—Louise M. Burns.

Buckeye—Zell P. Lewis.

Caesar Mountain—Arlene J. Cutlip.

Campbelltown—G. Pearl Carter.

Cass—J.K. Arbogast, Principal, Vera K. Swadley, Macel K. Harris, Ruby Gum, F. Wilmer

Honored on 30th Anniversary

Mr. and Mrs. Claude Sharp were honored with a surprise 30th Anniversary Party February 27, 1982, at the Edray Community Center.

The event was hosted by the couple's children, Mr. and Mrs. James Hedrick of Renick, Mr. and Mrs. Ronnie Wilfong of Denies and Ron, of Marlinton, Mr. and Mrs. Claude Sharp, Jr., Lisa and Doug, of Marlinton, Mr. and Mrs. Ray Johnson and Andrea, of Dumfries, Virginia, and Mr. and Mrs. Ed Jarvis, David and John, of Charleston.

Sheet cakes were baked by Jean McClure. Two cakes were decorated with pink and yellow roses. The center cake was decorated with roses, wedding bells and four wedding bands. The refreshment table was covered with a green and yellow cover and decorated with wedding bells. Presiding at the green and pink punch bowls was Par Lena Johnson. Assisting at the refreshment table were Wherry Wilfong and Dawna Hedrick.

The Community Center was decorated with a 30th anniversary poster made and painted by James Hedrick. The gift table was decorated with green and yellow and centered with a flower arrangement of yellow roses, streamers of green and yellow topped off the decorations.

The guest book was attended by Dawna Hedrick and assisted by Par Lena Johnson and Sherry Wilfong.

Those attending from Marlinton were Mr. and Mrs. Jack Angell, Mr. and Mrs. Andy Sharp, Mr. and Mrs. Tony Ricottilli, Mr. and Mrs. Leon Hannah, Mr. and Mrs. Gray McComb, Mr. and Mrs. Jim Webb, Jackie Moore and Pam Dilley, Mr. and Mrs. Ray Sharp, Mr. and Mrs. Jerry Clifton, Mr. and Mrs. Loy Sharp, Luther Bright, Mr. and Mrs. Carl Sharp, and Jeff and Nathan, Mr. and Mrs. Lewis Sharp and Vicki, Mr. and Mrs. Sonny Cutlip and Debbie and Mr. and Mrs. Austin Sharp.

Despite the heavy snow storm, friends from out of town were Mr. and Mrs. Bennie Furr and son, Bath, Virginia, Mr. and Mrs. Louie Maiuri, Glasgow, Mr.

Pilot legal research centers to be created

The West Virginia Supreme Court is partnering with the West Virginia Library Commission to create nine pilot legal research centers in libraries throughout West Virginia.

The Supreme Court received a $45,000 grant from the State Justice Institute in late July to fund the legal research centers for one year. If the project is successful, the Court may apply for more funding to continue and expand the project.

The Supreme Court and the Library Commission will work together to establish legal research centers in three urban public libraries, three rural public libraries and three circuit court law libraries. The Court is surveying public and circuit court librarians to determine the best locations for legal research centers. The first center will open on October 1. The remaining eight centers will open by March, 2004.

As part of the legal research centers' services, trained librarians will assist members of the public with legal research questions. Patrons also can use legal research computer databases and written legal materials. "Public libraries have limited funds to purchase legal research materials and many of our patrons have legal research questions," West Virginia Library Commission Secretary J. D. Waggoner said.

Supreme Court Chief Justice Larry Starcher also described the partnership between the West Virginia court and library systems as mutually beneficial. "A librarian's job is to help people find information," Starcher said. "Placing legal research centers in libraries is logical because we can serve the largest number of people in a comfortable setting."

The State Justice Institute is a non-profit organization established by federal law to award grants to improve the quality of justice in state courts nationwide, facilitate better coordination between state and federal courts, and foster innovative, efficient solutions to common problems all courts face. More information is about SJI is available at www.statejustice.org.

Historic Preservation Survey and Planning Grants available

Applications are now being accepted for historic preservation survey and planning grants through the State Historic Preservation Office (SHPO) of the West Virginia Division of Culture and History. Approximately $80,000 is earmarked for this grant program, which is funded with money appropriated by the U.S. Congress through the National Park Service Historic Preservation Fund.

State or local government agencies, not-for-profit organizations, for-profit firms or organizations, and educational institutions ae eligible to apply. Eligible projects include architectural and archaeological surveys, preparation of nominations to the National Register of Historic Places, heritage education programs relating to preservation activities, pre-development activities, and comprehensive planning documents and development projects. Funded projects must be completed by June 30, 2005.

Grant funds are awarded on a matching basis. A competitive process is used to determine the recipients with the final decision being made by the West Virginia Archives and History Commission. The Commission selects projects that best meet the established priorities and criteria. Development projects will be considered only when all of the justifiable funding needs of eligible projects in other categories have been addressed. All grant monies must be administered in accordance with federal and state requirements. The deadline for applications is October 31, 2003.

Program descriptions and applications packets, including funding priorities and selection criteria, are available by contacting Pamela Brooks, at (304) 558-0220, ext. 720, or by writing: SHPO, West Virginia Division of Culture and History, The Cultural Center, 1900 Kanawha Boulevard, East, Charleston, West Virginia 25305-0300.

The West Virginia Division of Culture and History, an agency of the West Virginia Department of Education and the Arts, brings together the state's past, present and future through programs and services in the areas of archives and history, the arts, historic preservation and museums. Visit the Division's website at www.wvculture.org for more information.

Rev. Gerardo Nguyen-Ngoc

New Catholic Priest at St. John Neumann's

Rev. Gerardo Nguyen-Ngoc is the new Catholic priest in Pocahontas County, living at St. John Neumann's in Marlinton; he likes to be called That-Son. He was born in Vietnam and came to Wheeling as a teenager. He graduated from Wheeling Jesuit University, went on to graduate school at St. Mary's University and Seminary in Baltimore and received his Master in Divinity at St. Meinrad Seminary in Indiana.

His request to Bishop Bernard Schmitt to minister in rural West Virginia resulted in his present assignments: St. Mark's in Bartow, with service on Saturday at 5:30 p.m.; St. John Neumann in Marlinton, with service at 9 a.m. on Sunday, and in wintertime services are also provided at Snowshoe Mountain Resort.

He has served in St. Joseph Parish, Weirton, St. Michael Parish, Wheeling, Sacred Heart Parish, Powhatan, Our Lady of Victory, Gary, Our Lady Queen of Apostles, in Kimball, Saints Peter and Paul Parish, Oak Hill, Our Lady of the Hills, Elkview, St. James Parish, McMechen, St. John Parish, in Benwood, and St. Anne's Parish, Clendenin.

One of his strong interests is to be more involved with providing spiritual direction of inmates at correctional facilities.

He wants to get to know the people in the communities and work with local churches and ministers, assisting in work in this area.

Preservation Alliance of West

Work will be plentiful here when

Commission just says 'no' to new sheriff's vehicles

Pamela Pritt
Managing Editor

A request from Pocahontas County Sheriff Robert Alkire for new vehicles met with a "no" from county commissioner who have already budgeted for one new vehicle this year.

Alkire said three deputies' vehicles are seven years old and have more than 100,000 miles on their odometers.

"They won't make it another three years," the sheriff said. "They're going to become dangerous."

Two of the three vehicles were used at purchase and had been wrecked, Alkire said later.

Commissioners held fast, due in part to a report commissioner Reta Griffith referred to that said the sheriff's department was in good shape.

"We're told we're one of the better equipped counties in the state," she said.

The sheriff's department has nine vehicles, seven of which are for patrol. Of those, one is brand new, one is a year old, one is two years old and one is three years old.

The commission budgets for a new vehicle for the sheriff's department each year.

Alkire was successful in obtaining funds for new pistols for his department.

Deputies will carry Sig-Sauer .357 semi-automatic pistols and trade in the Smith and Wesson pistols they now carry.

Alkire will purchase holsters and other utilities necessary, perhaps with money from cars the department will auction later this year.

The cost for the total package is more than $4000.

John Leyzorek asked the commission to consider purchasing cheaper weapons.

"The power of the police is not in fire power, but in respect for the law and the will of the people," he said.

Larry Taylor asked the commission to adopt home confinement rules to be sent to the circuit court for approval, which the commission did.

Leyzorek also complained to the commission about the federally mandated "Help America Vote" act which dictates that counties will replace existing voting procedures with touch-screen computer voting.

The county must have those computers no later than 2006 and Leyzorek said he was concerned that no paper trail would mean no way to conduct a recount or even to verify the vote.

"The whole thing may need to be rethought," he said.

The commission hired a full-time custodian, increasing Mike Cain's weekly time by 15 hours. Cain can begin immediately.

The commission also appointed Norris Long, Caroline Sharp and Tracy Samples to the Parks and Recreation Board, adopted a resolution to endorse the Scottish Rite Club Patriotism Education Program and voted to act as an agent for 2002 and 2003 transportation grants for the Marlinton Business Association.

Additionally, the commission declared September 22 Family Day, endorsing a proclamation that encourages families to eat dinner together.

Commissioner James Carpenter was absent, as he attended the Commissioner's Association meeting at Snowshoe Mountain Resort.

Pocahontas was the host county for the event.

Forestry team places third in nation

West Virginia captured third at the 24th annual National 4-H Forestry Invitational held at the Jackson's Mill 4-H Conference Center near Weston, from July 27 through July 31. The team competed against 15 other states at the four-day event sponsored by the International Paper Company Foundation and the Cooperative Extension Service. The team was represented by: Bryan Dilley and Nicole Wilfong, of Dunmore, Curtis Helton of Marlinton and Craig Hamons of Droop. The team was coached by Mike Burns of Marlinton. The assistant coach/chaperone was Mary Sue Burns.

Wilfong placed fourth individually and Helton placed sixth.

The team from Alabama took top honors at the Invitational. They were followed by Pennsylvania and West Virginia respectively. Capturing the high-point individual award was Hollie Cordner, of Alabama. Second place was captured by Amanda Luker, of Alabama, and third by Brittany Brown, also from Alabama. Daniel Gordon, of Georgia, received the Joe Yeager leadership award given to the individual who demonstrated excellent communication, management, decision-making and interpersonal skills.

At the Invitational, students compete for overall team and individual awards in tree identification, tree measurement, forest health (forest entomology and forest pathology) compass traverse, topographic map use, forest evaluation, and the Forestry Bowl, a fast paced event fashioned after popular television quiz shows.

The Marlinton Moose Lodge sponsored Pocahontas County's Forestry Team by making a donation of $500.

4-H is the youth education program of the Cooperative Extension Service of the U.S. Department of Agriculture and the state land grant universities.

CURTIS HELTON ACCEPTS $500 from David Cain, representing the Marlinton Moose Lodge.

More than five-and-one-half million youngsters participate in 4-H and nearly 100,000 are part of the 4-H Forestry Program.

The International Paper Company Foundation, which was founded in 1953 as a philanthropic grant-making organization, primarily addresses existing and emerging educational needs, as well as civic needs within the communities where International Paper has operating businesses. The Foundation also supports those organizations where employees actively volunteer.

Foundation Stone to perform

If variety is the spice of life, then the Pocahontas County Opera House is a well seasoned melting pot!

Pocahontas girls win High Point University team camp championship

by Bruce McKean

The Pocahontas County High School YBOA Dairy Queen Girls Basketball Team and 26 other teams from West Virginia, Virginia and North Carolina traveled to High Point University in High Point, North Carolina, July 26 for the fourth of four girls team camps.

The camp was divided into three divisions: varsity, junior varsity and junior high.

The PCHS team competed in the 12 team varsity division and played 14 games from Sunday through Wednesday. The PCHS girls finished the regular games with a 7-7 record versus many Class AAA and Class AAAA schools. Four Lady Warriors losses were by less than nine points.

A varsity single elimination tournament was held on Thursday with the varsity teams divided into small and large school divisions. PCHS received a bye in the first round of the small school tournament based upon their camp record. Port Chiswell HS, of Max Meadows, Virginia, beat William Monroe HS, of Stanardsville, Virginia, for the right to play PCHS.

The Lady Warriors' state tournament experience showed as the local girls never trailed in the Fort Chiswell game, winning 50-29. All games were 30 minutes with the clock stopping only for foul shooting in the final two minutes of each half. Seniors Caroline McKean and Ashley McNabb led all scorers with 12 points each. McKean added 7 rebounds and 5 steals and McNabb grabbed 3 rebounds and 4 steals.

Senior Rachel Wayne hit two threes and had 10 total points with 6 assists. Junior Brooke Dickenson led all scorers with 11 points and 4 steals. Wayne was next with 9 points and 4 assists. McNabb contributed 8 points and 4 steals. Dickenson garnered 5 steals and 6 points. Leading rebounder was Burner with 4. Junior Emily Bland completed the scoring with 2 points. The PCHS girls and volunteer coach Frosty McNabb accepted a team plaque and individual medals for their camp championship.

Various contests were held during the week, including a three point shot contest. Wayne advanced to the finals of the three point contest and in front of a full gymnasium, she managed to hit 10 three point shots in one minute to beat all the finalists. Wayne was presented a plaque for being the three point champion. Dickenson rebounded for Wayne in the contest.

Five girls, McNabb, McKean, Burner, Wayne and Dickenson, were the high scorers in the sixteen camp games and illustrated how balanced the team is. The first game of the camp saw all eleven girls scoring in a lop-sided 42-8 win over Wilfiam Monroe HS and the team tallied 25 steals with Senior Angie Foe getting 5 and Dickenson grabbing 6.

McNabb scored the most points in one game, 18, and had a double-double with 10 rebounds in a 30-37 loss to George Wythe HS, of Wytheville, Virginia. McKean and McNabb had double doubles in the win over Meadowbrook HS, of Richmond, Virginia. McNabb scored 14 points and McKean put in 10 points and each had 10 rebounds. The team grabbed 30 rebounds in a 44-13 win over William Monroe HS with Burner getting 10 points, 8 rebounds and 4 steals. Recording blocked shots in the games were: Bland, Foe, Coleman, McKean, McNabb and Dickenson. Junior Whitney Curry, Sophomore Kelli Hickson and Freshman Heidi Beverage came off the bench all week and contributed to each game.

No stats were available for three games and one was a prized one point win over Class AAA Princeton Senior High School. PCHS will play Princeton in the opening round of the Pit Row Classic in December. PCHS led Princeton by as much as 13 points and held on for the win.

Tim McClung, Frosty and Julie McNabb chaperoned the girls during the week. Several parents provided transportation to and from High Point. Many businesses and citizens have contributed to the many fundraisers that go to support the Pocahontas County YBOA summer girls basketball program that included a week long camp at Mountain State University in Beckley for many of the younger girls in the program. Jane Coleman chaperoned and made arrangements for that camp experience with the help of several other parents.

Proudfoot, the son of a sixth-generation Randolph County landowner, lives on a farm up the Weaver Road, at the northwestern edge of Randolph County, joins Elkins High School teacher Bob Irwin, plus incumbent House members Joe Martin and Charlie Jordan in a four-way race for the Democratic nomination in the June primaries. The two winners of that race will then face the Republican candidates in the November balloting.

Describing himself as a "conservative Democrat," Proudfoot says he'll be able to represent those people who are "not being heard. I feel I can represent those people," he said, and he indicated he would launch an evening and weekend campaign schedule to criss-cross the two-county area which is now the 27th delegate district under the recently approved redistricting plan.

O. D. WARWICK DEAD

O. D Warwick died at the Hospital at Montgomery on March 30, 1926 For a number of years he had been in failing health from ulcers of the stomach. His age was 57 years, having been born at Valley Center, Virginia, on December 22, 1868

On last Thursday his body was buried at Mt. View Cemetery, the funeral being conducted from the Methodist church in the presence of a large congregation, by his pastor, Rev. S R. Neel, assisted by Rev. H. H. Orr

Mr. Warwick was the son of the late Peter H. Warwick and Caroline Matheny Warwick. Of his father's family there remain his two brothers, Forrest and Jesse Warwick.

On June 23, 1893, Mr. Warwick married Miss Annie May Carter. She and their three children survive him; Gladys, now Mrs. E. M. Baker, of Wheeling; Marjorie, now Mrs. R W. Howard, of Sharples, and Jewell, at home.

Weddings

Alderman – Sterste

LeAnna Rejoice Alderman and Brent William Sterste were united in marriage on May 17, 2003, at Johnson Chapel, Amherst College, Amherst, Massachusetts, with Audrey Walker and Andrew Snekvik officiating.

LeAnna is the daughter of Norman and Carol Alderman, of Marlinton. She is a 1995 graduate of Pocahontas County High School, a 1999 graduate of Amherst College, and will complete her Masters at Suffolk College in Boston in 2003.

Brent is the son of Peter and Cynthia Sterste, of Southhampton, Massachusetts. He is a 1996 graduate of Hampshire Regional High School, a 2000 graduate of Amherst College, and will receive a Masters in Divinity from Harvard Divinity School in 2003.

Local attendants include Melissa Ames and Lindell Alderman. Shonda and Shanna Carr were flower girls.

A reception was held following the ceremony.

The couple went on a honeymoon to New Hampshire and Canada.

They make their home in Belmont, Massachusetts.

Combs – Sheets

Chantry Combs and Jessica Sheets will be united in marriage on Saturday, August 9, 2003, at 1:30 p.m. at the First Baptist Church Huntersville.

A reception will follow at Lake Moomaw in Mt. Grove, Virginia.

Kerr – Hall
Wedding Correction

The location of the Kerr-Hall wedding ceremony set for August 9, 2003, has been changed to the Durbin Church of the Brethren, Durbin, with the reception following at the Green Bank Senior Center in Green Bank.

BATTLE OF DUNCAN'S LANE

Is I understand it, the Duncan Lane fight was just above where Wm. Gilmer, Jr., now lives, it being the Henry Duncan place; have heard it told that the Federals tried to rally behind the barn. The names as I recollect them were Walt Allen, Sam Young, C. C. Silva, Moffett Rogers, Jas. L. Rogers, John Armstrong, John E. Adkison, Bernard Sharp. The last four mentioned were wounded—Sharp fatally.

I do not recall ever having heard election mentioned in connection with the scrap at Duncan's Lane. It seems to have occurred later in the season than May. J. M. A.

Confessed thief convicted

by Pamela Pritt
Managing Editor

The contrast in victim and perpetrator could not have been more stark.

Ninety-year-old Argile Arbogast, affable, polite, elated to see the property that had been pillaged from his home more than a year ago and Joseph Eugene Howard, 42, stony-faced, contentious, admitting to a Pocahontas County jury last week that he had, in fact, robbed Arbogast on April 13, 2002.

The contrast was so conspicuous, Howard's attorney reminded the nine women and three men on the jury they couldn't deliberate on "the adorable factor."

"I can't beat that," Eric Francis told the jury. "Nobody could beat that." Francis said his client might be considered a "sorry s.o.b." but that was not the criteria the jury was to judge.

Francis said Howard had to be guilty of the crimes charged—felony burglary and grand larceny.

Howard testified that he had robbed Arbogast of a pair of handheld radios, binoculars, a Colt .38 revolver police special, ammunition and $12 in quarters because he needed gas money—property he said he couldn't sell because it was too old. He denied stealing a 250-3000 Savage rifle with a Leopold scope, a Ruger .44 semi-automatic rifle and a Remington 870 shotgun, which Arbogast said were missing, but were not recovered.

Howard was found in possession of the other items, except the quarters, a week later in Mason County, North Carolina, when he was arrested for stolen vehicle and weapons charges.

Felony burglary requires that the perpetrator break and enter to gain access, while grand larceny charges mean the perpetrator must have stolen more than $1000 in cash or property.

The defendant apparently rolled the dice in his testimony while admitting to the jury that he stole from Arbogast, denied the property was worth more than $1000 and denied breaking into a dwelling, instead saying Lucille Arbogast allowed him access to the Arbogast home.

Arbogast said the coffee was in a sandwich bag. He invited upstairs to get her husband, Howard said he quickly left the foyer and entered the dining room.

"I did a visual search of the house," he said. Howard said he took the handheld radios and binoculars from the gun cabinet and while he took note of the firearms in the cabinet, he testified he did not take them.

When Argile Arbogast came down stairs Howard said, the elderly man offered him the use of his telephone to call Kincaid.

"They offered to make me breakfast," Howard testified. But he told the Arbogasts he wanted only coffee. Since Arbogast didn't drink the brew, Howard said he left the kitchen to get some instant coffee from his van.

"I shot up the stairs and took a bowl of quarters," he said. "I went through the drawers and got the gun and took the stuff to the van."

Howard said he brought back the coffee and stayed 15-20 minutes before he "begged off" and left the Arbogasts' home.

He didn't find Kincaid and went to Huntersville, stopping at McNeill's Market in Buckeye along the way.

Howard said he didn't return to Arbogast's home later that day and break in the back door.

Francis instructed Howard to don his vest, which has been in evidence since his arrest, and demonstrate stuffing it with the holster of the gun, the ammunition, radios and binoculars.

Howard speedily accomplished this deed, hiding the items in a slit cut into the quilted lining of the vest.

Under cross examination by Pocahontas County Prosecuting Attorney Walt Weiford, Howard admitted to being a thief and admitted to the crime of larceny.

"I'm thinking petit larceny," Howard said. "I couldn't trade off those items. They're too old. The only thing it proves is I stole some of it."

Argile Arbogast told a different story about the morning of April 12, 2002.

Arbogast said he was upstairs when his wife answered the door at about 10 a.m. He said she called for him and he answered the door. "I said, 'What do he [Howard] want?'"

"Yes, sir," Arbogast said. "I carried it many times."

Arbogast said he used the radios for communication purposes on the farm, leaving one at home with his wife and carrying the other in case of a fall or other calamity. But on bear hunts, he "talked business."

Arbogast estimated the total value of his missing belongings to be more than $2000.

Although the prosecution had a positive identification of the perpetrator from the victim and at least a partial confession from the defendant, the linchpin of its investigation was Droop Mountain resident Danny Blankenship.

Blankenship told the jury he saw Howard on Brushy Mountain, where he has owned a camp for several years.

On that spring morning last year, Blankenship went there early to hear the turkeys calling. When he left around 8:30 a.m., he met a stranger in a strange white van bearing out of state license plates.

The stranger told him he was looking for Delmas Kincaid, a person Blankenship knew had property on the mountain, as well.

Blankenship gave him directions to Kincaid's residence near Mill Point.

Because Brushy Mountain is so secluded and because Blankenship is wary of strangers who go there, he was suspicious of someone with out of state license plates finding his way to that remote location.

The stranger had to proceed up the mountain to find a place to turn around on the one lane road, Blankenship said.

So the Droop Mountain man went slowly on his way to the gate on U. S. Rt. 219.

"I took my time," he testified. "I thought sure he'd catch me."

Blankenship waited at the gate until the stranger came down the mountain.

"He didn't seem right," Blankenship testified. "I decided to get his license number."

And so he wrote North Carolina LSJ 3375 on a piece of envelope in his truck.

[illegible] with North Carolina cops.

Blankenship contacted the West Virginia State Police who NCIC, learning that the van was in custody in North Carolina.

The North Carolina Highway Patrolman who arrested Howard traveled to Marlinton to testify about Howard's arrest there.

Trooper Gary Cook said he sometimes helped out at the retail store where his wife works on his days off. The store has apartments above it, Cook testified, and a white Dodge Ram van showed up in mid-April of last year, the driver staying with a man who was behind on his rent.

Cook said he took note of the van because it always backed into its parking place although the spot's proximity to the highway made that difficult.

When the van was parked so that he could read its license number, Cook ran the plates through NCIC, finding out the vehicle was stolen.

As Howard approached the van it, Cook asked if it belonged to him to which the answer was yes.

Cook, who was in uniform at the time, arrested Howard and charged him with possession of a stolen vehicle and possession of a firearm by a felon.

The jury took two hours and 45 minutes to reach a verdict of guilty to both grand larceny and burglary.

Weiford plans to try Howard as a recidivist, or habitual criminal, using a 1983 burglary charge from Georgia and a 1997 felony breaking and entering in Highland County, Virginia, to bolster the charge.

Howard has been convicted on various property crimes including felony receiving stolen property, breaking and entering and grand larceny, as well as attempted escape.

To be tried as a recidivist, the defendant must have been convicted of a crime of violence or potential violence.

The prosecutor said he would file an Information this week. A arraignment is scheduled in front of Chief Judge Frank Jolliffe Friday.

The court accepted felony pleas from four people in the past week.

Tommy Vandevender, 64, of [illegible] for his unpaid medical expenses and lost pay.

ed food to the emergency workers during the flood crisis.

Cranberry Wilderness

Congressman Cleve Benedict today requested that a House subcommittee delay consideration of his legislation to designate the Cranberry Back Country as a national wilderness area because of new developments involving leases to drill for natural gas in the area.

"I have recently learned that the Cabot Oil and Gas Corporation has obtained leases to drill within the Cranberry Wilderness Study Area which raises several new issues regarding my legislation," Benedict said. "We do not know the extent of recoverable gas reserves in the area but they could be extensive. We also do not know how much it will cost the taxpayers if these min-

But the tune that he played would awaken the dead,
Dancing and wild all the evening.

One of our old time fiddlers has gone. Edn Hammond used to rouse the spirits of the deep in the old days. There is a belief that the wilderness produces the best fiddlers. Many years in the depths of the forests enables an artistic soul to interpret the rustling of the leaves, the song of the birds, and the ripple of the stream and weave them to music. Hammond composed and his masterpiece, "Hannah Gutting Fish," we had with use for years on a record of a phonograph. It was complete even to the beating of the foot of the fiddler on the floor. It was soothing. It told of the home in the forest, and in the still of a summer's evening. The return of the master of the house with a goodly catch of mountain trout which he gave to his devoted wife. Hannah tenderly places her babe in its crib to slumber and takes the fish and goes tripping to the side of a mountain brook, and there fights the black, black gnats, and prepares the trout in

Francis said Howard had to be guilty of the crimes charged—felony burglary and grand larceny.

Howard testified that he had robbed Arbogast of a pair of handheld radios, binoculars, a Colt .38 revolver police special, ammunition and $12 in quarters because he needed gas money—property he said he couldn't sell because it was too old. He denied stealing a 250-3000 Savage rifle with a Leopold scope, a Ruger .44 semi-automatic rifle and a Remington 870 shotgun, which Arbogast said were missing, but were not recovered.

Howard was found in possession of the other items, except the quarters, a week later in Macon County, North Carolina, when he was arrested for stolen vehicle and weapons charges.

Felony burglary requires that the perpetrator break and enter to gain access, while grand larceny charges mean the perpetrator must have stolen more than $1000 in cash or property.

The defendant apparently rolled the dice in his testimony, while admitting to the jury that he stole from Arbogast, denied the property was worth more than $1000 and denied breaking into a dwelling, instead saying Lucille Arbogast allowed his access to the Arbogast home.

Howard testified that [illegible] looking for Delmas Kincaid's nearby property. He stopped at Arbogast's to ask for a cup of coffee, he said.

Howard said Lucille Arbogast answered his knock and let him in the door. When she went [illegible] but observed [illegible] Kincaid's nearby property. He stopped at Arbogast's to ask for a cup of coffee, he said.

Howard said Lucille Arbogast answered his knock and let him in the door. When she went [illegible] a bowl of quarters," he said. "I went through the drawers and got the gun and took the stuff to the van."

Howard said he brought back the coffee and stayed 15-20 minutes before he "begged off" and left the Arbogasts' home.

He didn't find Kincaid and went to Huntersville, stopping at McNeill's Market in Buckeye along the way.

Howard said he didn't return to Arbogast's home later that day and break in the back door.

Francis instructed Howard to don his vest, which has been in evidence since his arrest, and demonstrate stuffing it with the holster of the gun, the ammunition, radios and binoculars.

Howard speedily accomplished this deed, hiding the items in a slit cut into the quilted lining of the vest.

Under cross examination by Pocahontas County Prosecuting Attorney Walt Weiford, Howard admitted to being a thief and admitted to the crime of larceny.

"I'm thinking petit larceny," Howard said. "I couldn't trade off those items. They're too old. The only thing it proves is I stole some of it."

Argile Arbogast told a different story about the morning of April 12, 2002.

Arbogast said he was upstairs when his wife answered the door at about 10 a.m. He said she called for him and a stranger at the door asked for some hot water so he could make coffee.

Arbogast said the coffee was in a sandwich bag. He invited the man inside and offered him breakfast.

"That's what my people did when I grew up," he said.

But Arbogast noticed that Howard was curious about his house.

"The old people called it a 'roving eye,'" he testified.

During their conversation, Arbogast said he told his visitor they were attending a ramp supper that evening with their son, even disclosing the time they were leaving.

But Arbogast was dubious of the visitor and after he left, attempted to follow him, traveling seven miles into Marlinton, but never again seeing the large white van in which Howard traveled.

When they returned that evening at 7, Arbogast found his back door open, but locked.

"Hey, man, we've been robbed," Arbogast said he told his wife. The man testified he locked the door himself prior to leaving for the evening.

His hunch was confirmed when he went upstairs where "everything was all over everywhere," he testified.

Arbogast was obviously [illegible]

On that spring morning last year, Blankenship went there early to hear the turkeys calling. When he left around 8:30 a.m., he met a stranger in a strange white van bearing out of state license plates.

The stranger told him he was looking for Delmas Kincaid, a person Blankenship knew had property on the mountain, as well.

Blankenship gave him directions to Kincaid's residence near Mill Point.

Because Brushy Mountain is so secluded and because Blankenship is wary of strangers who go there, he was suspicious of someone with out of state license plates finding his way to that remote location.

The stranger had to proceed up the mountain to find a place to turn around on the one lane road, Blankenship said.

So the Droop Mountain man went slowly on his way to the gate on U. S. Rt. 219.

"I took my time," he testified. "I thought sure he'd catch me."

Blankenship waited at the gate until the stranger came down the mountain.

"He didn't seem right," Blankenship testified. "I decided to get his license number."

And so he wrote North Carolina LSJ 3375 on a piece of envelope in his truck.

A week later, he heard about Arbogast's home being broken into and about the white van with North Carolina tags.

Blankenship contacted the West Virginia State Police who, in turn, called the Pocahontas County Sheriff's Department.

McNeill's Country Mart owner Michael McNeill also placed Howard in the area that day, making telephone calls at the pay phone outside his store on two occasions and once entering to purchase a drink.

"I'm just suspicious from trouble I've had in the past," McNeill noted, and thus, he paid attention to Howard and to the large van he drove, noting the North Carolina license plates and Howard's hat with a "V."

McNeill was able to tell Pocahontas County Sheriff Robert Alkire about that person when the sheriff began his investigation the following Monday.

Alkire said Argile Arbogast called him Monday morning and told him someone had broken into his house, ransacked it and taken his property.

The sheriff said he found a pry mark on the back door and a mattock nearby that matched the mark.

"Mr. Arbogast had a suspect in mind," Alkire testified. He took information from the Arbogasts, but did not dust anything for fingerprints, he said.

vehicle was stolen.

As Howard approached the van, Cook asked if it belonged to him to which the answer was yes.

Cook, who was in uniform at the time, arrested Howard and charged him with possession of a stolen vehicle and possession of a firearm by a felon.

The jury took two hours and 45 minutes to reach a verdict of guilty to both grand larceny and burglary.

Weiford plans to try Howard as a recidivist, or habitual criminal, using a 1983 burglary charge from Georgia and a 1997 felony breaking and entering in Highland County, Virginia, to bolster the charge.

Howard has been convicted on various property crimes including felony receiving stolen property, breaking and entering and grand larceny, as well as attempted escape.

To be tried as a recidivist, the defendant must have been convicted of a crime of violence or potential violence.

The prosecutor said he would file an Information this week. A arraignment is scheduled in front of Chief Judge Frank Jolliffe Friday.

The court accepted felony pleas from four people in the past week.

Tommy Vandevander, 64, of Thorneywood, pleaded guilty to unlawful assault and agreed to make restitution to his victim for his unpaid medical expenses and lost pay.

Stacy Barron, 44, of Marlinton, pleaded guilty to third or subsequent offense DUI in exchange for the prosecution taking no position on the terms of her incarceration. Barron could be sentenced to home confinement. Weiford said that, according to the evidence, she had toxic levels of alprazolam and greater than therapeutic levels of oxazepam in her bloodstream on the night of her arrest.

Keith O. Pondexter, 42, of Marlinton, pled guilty to delivery of a Schedule III controlled substance, hydrocodone. Weiford said the state had evidence against Pondexter on audio- and video-tape.

Anthony Allen Woody, 22, of Marlinton pleaded guilty to breaking and entering, burglary and two counts of grand larceny.

Woody is charged in connection with the breaking and entering of C. J. Richardson's in Marlinton and with the burglary of the home of Josh Hoover on Dry Creek. He agreed to cooperate with authorities about a possible arson at the Hoover home.

In exchange, the state agreed to drop charges of conspiracy and unlawful use of a vehicle.

able gas reserves in the area but they could be extensive. We also do not know how much it will cost the taxpayers if these mineral rights must be compensated for in order to make the Cranberry a wilderness area."

The Congressman's legislation, introduced last December, provides for a land exchange to compensate for the privately owned mineral rights beneath the Cranberry, presently owned by the CSX Corporation. In February, the Cabot Oil and Gas Corporation leased the oil and gas rights from CSX for approximately 110,000 acres within the Monongahela National Forest and recently announced plans to drill exploratory gas wells there. Two of the wells would be in the area proposed for wilderness designation.

Argile Arbogast told a different story about the morning of April 12, 2002.

Arbogast said he was upstairs when his wife answered the door at about 10 a.m. He said she called for him and a stranger at the door asked for some hot water so he could make coffee.

Arbogast said the coffee was in a sandwich bag. He invited the man inside and offered him breakfast.

"That's what my people did when I grew up," he said.

But Arbogast noticed that Howard was curious about his house.

"The old people called it a 'roving eye,'" he testified.

During their conversation, Arbogast said he told his visitor they were attending a ramp supper that evening with their son, even disclosing the time they were leaving.

But Arbogast was dubious of the visitor and after he left, attempted to follow him, traveling seven miles into Marlinton, but never again seeing the large white van in which Howard traveled.

When they returned that evening at 7, Arbogast found his back door open, but locked.

"'Hey, man, we've been robbed.'" Arbogast said he told his wife. The man testified he locked the door himself prior to leaving for the evening.

His hunch was confirmed when he went upstairs where "everything was all over everywhere," he testified.

Arbogast was obviously pleased to see his gun in its holster when Weiford held it for him to identify.

So the Droop Mountain man went slowly on his way to the gate on U. S. Rt. 219.

"I took my time," he testified. "I thought sure he'd catch me."

Blankenship waited at the gate until the stranger came down the mountain.

"He didn't seem right," Blankenship testified. "I decided to get his license number."

And so he wrote North Carolina LSJ 3375 on a piece of envelope in his truck.

A week later, he heard about Arbogast's house being broken into and about the white van with North Carolina tags.

Blankenship contacted the West Virginia State Police who, in turn, called the Pocahontas County Sheriff's Department.

McNeill's Country Mart owner Michael McNeill also placed Howard in the area that day, making telephone calls at the pay phone outside his store on two occasions and once entering to purchase a drink.

"I'm just suspicious from trouble I've had in the past," McNeill noted, and thus, he paid attention to Howard and to the large van he drove, noting the North Carolina license plates and Howard's hat with a "V."

McNeill was able to tell Pocahontas County Sheriff Robert Alkire about that person when the sheriff began his investigation the following Monday.

Alkire said Argile Arbogast called him Monday morning and told him someone had broken into his house, ransacked it and taken his property.

The sheriff said he found a pry mark on the back door and a mattock nearby that matched the mark.

"Mr. Arbogast had a suspect in mind," Alkire testified. He took information from the Arbogasts, but did not dust anything for fingerprints, he said.

After he contacted Blankenship about the license number, he ran the number through

propelty, breaking and entering and grand larceny, as well as attempted escape.

To be tried as a recidivist, the defendant must have been convicted of a crime of violence or potential violence.

The prosecutor said he would file an information this week. A arraignment is scheduled in front of Chief Judge Frank Jolliffe Friday.

The court accepted felony pleas from four people in the past week.

Tommy Vandervander, 64, of Thorpe, pleaded guilty to unlawful assault and agreed to make restitution to his victim for his unpaid medical expenses and lost pay.

Stacy Barron, 44, of Marlinton, pleaded guilty to third or subsequent offense DUI in exchange for the prosecution taking no position on the terms of her incarceration. Barron could be sentenced to home confinement. Weiford said that, according to the evidence, she had toxic levels of alprazolam and greater than therapeutic levels of oxazepam in her bloodstream on the night of her arrest.

Keith O. Pondexter, 42, of Marlinton, pled guilty to delivery of a Schedule III controlled substance, hydrocodone. Weiford said the state had evidence against Pondexter on audio- and video-tape.

Anthony Allen Woody, 22, of Marlinton pleaded guilty to breaking and entering, burglary and two counts of grand larceny.

Woody is charged in connection with the breaking and entering of C. J. Richardson's in Marlinton and with the burglary of the home of Josh Hoover on Dry Creek. He agreed to cooperate with authorities about a possible arson at the Hoover home.

In exchange, the state agreed to drop charges of conspiracy and unlawful use of a vehicle.

All four will be sentenced in September pending a probation report and will remain free on their existing bonds.

land, all of it, from the topsoil to the center of the earth,'' Benedict said. ''The potential liability to the taxpayer is substantially increased if we have to compensate for additional mineral rights such as gas. We need to know more about this situation before we proceed.''

Benedict made his request to Congressman John Seiberling, Chairman of the House subcommittee on Public Lands and National Parks, which is considering the legislation.

———

A report out this week is that the Cabot Oil & Gas Corporation and the CSX Corporation have halted plans to drill the two gas wells directly affecting the proposed Cranberry Wilderness Area. One was to be within the area and the other on its boundary.

CSK, the owner of the minerals, in the Cranberry

swelling stream, the fiddle told the naked stars the joy and grief of man

I heard a lot of music the other evening at the armory but it was more or less by fits and starts. I had not heard so much that I could not sleep, and so I left before the square dances began but they tell me that there was some dancing before the the night was over. I always thought that I would like to dance if it was permitted, especially with girls. It seems to be a game in which girls add considerable zest and interest. I do not know to this day whether I ever could dance or not. I drifted through some mysterious motions in the square dances of the old days, to the magic of the fiddle. Some captain of the game would call the figures, that is, give the command There was one peculiar form where the dancers faced away from each other, when the captain barked out, "Do si do!" That sentence always bothered me. I wondered what it meant in the original of whatever language it came from. And after many years I got an inkling of it in stud poker poker language. The gentleman of Spanish birth and breeding announced that he had to go on: "Aces do si do." It seems

stud poker poker language. The gentleman of Spanish birth and breeding announced that he had to go on: "Aces, do si do." It seems that his first card dealt turned down was an ace and his next card was another ace turned up. Thus he had his aces "back to back," the highest possible hand to go with. Now if that is not what do si do means, find out for yourselves.

Fiddling was not only a question of skill but endurance. A fiddler added greatly to the joys of the young persons, but the amusement was not only frowned upon by the great majority of the best and most powerful persons, but absolutely forbidden the children. Thou shalt not dance, was an added commandment. The way it worked as a rule was that it was thoughly impressed upon the child say of five or six years of age. He must never dance. That and the alternative of hell-fire took strong hold upon his imagination, and he pursued the noiseless tenor of his way, until he became hazy with youth. Then he would fall and trip the light fantastic toe and find great sport in dodging the lightning that was supposed to strike him down for his disobedience. Then he would marry some fine, mountain girl, and when

Open Church Wedding

Rayetta Lynne and Thomas Leo, together with their parents, Mr. and Mrs. Ray L. Landis and Mr. and Mrs. Stephen Barnisky, announce their marriage and the beginning of their new life together on Saturday, the seventeenth day of April at half after two o'clock, at the First Baptist Church, Huntersville, West Virginia.

Engagement

Mr. and Mrs. Dwayne E. Wise, Chambersburg, Pennsylvania, announce the engagement of their daughter, Darlene Wise, to Tommy L. Kelley, son of Tom Kelley, Dunmore, and Shirley Kelley, Marlinton.

Miss Wise is a 1979 graduate of Chambersburg Area Senior High School. She is employed at a Nursing home as a nurse's aide. Her fiance is a 1977

Open Church Wedding

Marshall Shearer and Sandra Bennett, along with their parents, Mr. and Mrs. Robert Bennett and Mr. and Mrs. Junior Shearer would like to invite you to their wedding on April 10, 1982, at 2:00 in the afternoon at the Slatyfork United Methodist Church. All friends and relatives are invited. A reception will be held at the Edray Community Center.

Forthcoming Marriage

Carolyn F. (Gibson) Palko would like to announce the open outdoor wedding of her daughter, Saundra S. Palko (Sandy) to John E. Wilfong, son of Mr. and Mrs. Reed Wilfong, of Marlinton, on May 1, 1982, at two o'clock in the afternoon at the Buckskin Boys Scout Camp.

Relatives and close friends are invited.

A reception will follow at the Edray Community Center.

an added commandment. The way it worked as a rule was that it was thoughtly impressed upon the child say of five or six years of age. He must never dance. That and the alternative of hell-fire took strong hold upon his imagination, and he pursued the noiseless tenor of his way, until he became hazy with youth. Then he would fall and trip the light fantastic toe and find great sport in dodging the lightning that was supposed to strike him down for his disobedience. Then he would marry some fine, mountain girl, and when they had children, they would tell them about the time they were five and six years old that under no circumstances must they ever dance Under this good old plan the mountains raised the best men and women the world ever saw, and it is to be hoped that there is enough of the iron left in the present hectic generation to save us after the days of this cataclysm have passed, and reason has resumed her away.

Sinful as it may be, wicked and worldly, and sad beyond conception, it is only honest to say that I wished the other day that I could meet with a couple of dozen other youngsters on a smooth floor, with one of those old fiddlers present, and once more try to shake a foot to the romantic pleadings of a fiddle. But the kids would not stand for it. Grandpa must behave

ation to save us after the days of this cataclysm have passed, and reason has resumed her away.

Sinful as it may be, wicked and worldly, and sad beyond conception, it is only honest to say that I wished the other day that I could meet with a couple of dozen other youngsters on a smooth floor, with one of those old fiddlers present, and once more try to shake a foot to the romantic pleadings of a fiddle. But the kids would not stand for it. Grandpa must behave. I am sure the fiddler would have enjoyed it more for there in that great room he was like a lamb in a large place. It took more than a fiddle string to fill that aching void.

The perpetual motion of a good bow arm in the old days, was one of the long distance tests. Along about the sixth hour of the dance, the fiddler would take time out for refreshments. This was about two o'clock in the morning, and the shank of the evening. At this time he would probably get a sureptitious drink or two, and the bucks would make him up his purse. Being thus refreshed, encouraged, aud strengthened he was able to furnish music for the dance until breakfast. Music consisted of

Letter

Dear Editor:

This is the first and probably the last letter that I'll ever write to you, but when I read last week's story about the "dreadful conditions" in our County Jail, my blood just boiled!

I, and a lot of other taxpayers would like to know just what does Jones and Hickson think the jail is, the Holiday Inn? I, for one, am sick and tired of hearing these characters cry and complain about the conditions of the jail. I was under the impression that being put in jail was supposed to be punishment for breaking the rules of our society, but these jailbirds seem to want all the comforts of home at the expense of us taxpayers.

A. Exercise: What a laugh! Anything other than a short walk to the State A.B.C. Store or down the alley to sip some "Sweet Lucy," would be like work for some of these characters. The only exercise they want is the bending of their elbow to indulge. They wouldn't exercise if they had the opportunity!

Letter to the Editor

If you, the readers of th
paper, have learned an
thing from articles I hav
written over the past seve
or eight years (and hu
dreds of you have said th
you have) don't forget th
have all been free for t
reading. The motive h
been to inform people
things that may affect y
in some way. None ha
been personal, simp
things and conditions. Y
are now looking at ma
things you thought were
true.

It now appears that spa
is no longer available in t
paper for articles such
has been written, due to t
many exciting, usef
things that are happeni
in Pocahontas County, th
you read about in t
paper. For these reason
have decided to discontin
the articles and hope so

Letter to Editor, County Commission and Citizens

As all have read in the paper we are asked to have a clean-up week. All of this is a good idea, and a must if our county is to be kept clean. but look at the other side of the problem i. e., the dumps are full up to the driveways with glass and other trash. The dump man has not taken time to prevent this problem (Hillsboro area). Perhaps out to lunch or sitting under a shade tree talking to friends and cursing people for putting trash over the fence. You are expected to drive over all kinds of trash, mud, wire, etc. to the backside to dump or get abused out, no respect for you nor your car.

I think the dump should be open seven days a week so people can dump when they please. This would help eliminate trash along the fence and roadways. Some farmer or private person with a small tractor and bucket would probably be glad to push this trash back [illegible] cheaper than hiring

alley to sip some "Sweet Lucy," would be like work for some of these characters. The only exercise they want is the bending of their elbow to indulge. They wouldn't exercise if they had the opportunity!

B: Inmates not provided with "personal hygiene supplies," like toothbrush, toothpaste and even combs. I doubt if these two brush their teeth or comb their hair at home, let alone in jail. Let their friends spend some of their wine money on these items, no one buys these things for me or my family but me. Let them buy their own!

C. Lack of Communication Rights: They say that they can't use the phone to prepare their cases, Bull! I doubt that one in 100 could or would prepare anything for themselves except maybe a bowl of cornflakes. That's why we have that great organization called the A. C. L. U. (American Civil Liberties Union) to jump on the case for characters like Jones and Hickson. The A. C. L. U. will file suit against just about anybody for anything.

D: Visitation Rights: [illegible] What a shame! Why don't

be no sleep for anyone in the house. This gave rise to the platform dance. A plank floor was laid in the shade of the trees and there the dances were held, but that had its draw backs. Chaperone it ever so carefully, there remained an outlaw ele ment who would insist on bringing jugs to the picnic, and the surgeon would say it in stitches. The old time doctor sewed some of the finest seams you ever saw as a result of parties of this kind. They say in the city, that certain lawless youths carry something on the hip. Tney ought to have seen the full bellied jug of the old days.

That fiddle music the other night carried me back. The boys and girls were taking it with a rather bored look. But I could see old fellows standing on tip-toes and trying to get a fill of the music, and getting along about as well as if they were eating thin soup with a splinter. I felt like saying to the old boys to yearn no more, for a tender grace of a day that is dead, will never come back to us.

on that?

H: Jail Staff: They claim that the only person on duty is the Dispatcher, What do they want? A baby sitter for each inmate? As for no Deputy being assigned to the jail, well, they're busy patrolling the roads, trying to keep the drunks and dope addicts from killing themselves or us.

The County Jail probably could stand some minor changes, but just remember boys, if it wasn't for the robbers, thieves, rapists, dope peddlers and murderers, we wouldn't have any need for jails, would we? Behave yourselves and than "you poor souls" won't have to worry about the terrible conditions in any jail.

I also have to wonder just how much, if any, taxes you two have ever paid to the County? If you ever did, I'll bet the grand total for both of you wouldn't be enough to buy a good lunch for a humming bird.

were taking it with a rather bored look. But I could see old fellows standing on tip-toes and trying to get a fill of the music, and getting along about as well as if they were eating thin soup with a splinter. I felt like saying to the old boys to yearn no more, for a tender grace of a day that is dead, will never come back to us.

Here is one solution of the craze for fiddle music. For something near a hundred years it was the only music known on the Western Waters. It stands to reason that none of the larger instruments could be imported to the log houses of the wilderness. That was to come later. They could not pack them in. The fiddle could come in adding only a few ounces weight, and if one was not brought with the frying pan, the axe, and the auger, and the rifle gun, and the knife, then one could be made out of the native woods without trouble.

There has been much said about the Cremona violins, and the immense price that they bring today. But it takes a more discriminating

come in adding only a few ounces weight, and if one was not brought with the frying pan, the axe, and the auger, and the rifle gun, and the knife, then one could be made out of the native woods without trouble.

There has been much said about the Cremona violins, and the immense price that they bring today. But it takes a more discriminating ear than mine to sense their superiority over the ancient fiddle whittled out with a pocket knife on the head of Bitter Creek. At Cremona in Italy, the fiddles made by some of the neighbors have attained a great reputation, and they are favorite themes for song and story in modern times. At Cremona, the Amati, Stradivari, Guarneri, and Ruggieri families, all fine old Italian hands, could make good fiddles, and they sell at a fortune now. The older the better. They have been at it over three hundred years.

Fiddler McIlwaine, of Erbacon, in the adjoining county of Webster

behind bars. People everywhere are sick and tired of your kind, so clean up your act, boys, and try to act like human beings, not animals! By the way, I have to wonder just how long it's been since either of you tried working for a living, you know, earning money to "buy" what you want? I know a lot of people who do an honest day's work everyday, who are not half as healthy as you two are. Some of them don't possess a lot of worldly goods but at least they get out and work for what they have.

The next thing you boys will be demanding will probably be a color TV and a good stereo/radio.

As for there not being a washer and dryer in the jail for your convenience, why don't some of your family or friends take your clothes

reputation, and they are favorite themes for song and story in modern times. At Cremona, the Amati, Stradivari, Guarneri, and Ruggieri families, all fine old Italian hands, could make good fiddles, and they sell at a fortune now. The older the better. They have been at it over three hundred years.

Fiddler McIlwaine, of Erbacon, in the adjoining county of Webster, went to the contest the other day carrying his precious fiddle. He took a taxicab. Got out of the cab and forgot his fiddle. He discovered his loss and was wild about it. It was a Cremona. A Stradivarius, worth twenty thousand dollars. I know this to be true for I saw it in the paper. He had to play on a borrowed fiddle. After the big show was over, the priceless fiddle was discovered in a pawnshop, where it had been put up for fifty cents by some old timer crazy to get money to attend the fiddler's concert.

I can remember plenty of cases where organs and pianos were carried to people's houses slung on great poles. There is no question about the universal longing for music. With a great mountain people, the

As for there not being a washer and dryer in the jail for your convenience, why don't some of your family or friends take your clothes to one of the two laundramats here in town (you could use your wine and gas money to wash your clothes). The next thing we know, you'll be demanding maid service at the jail. I'll bet that the attorney who prepared your petition is employed by the A.C. L. U., Right?

This letter is signed by a citizen who is sick and tired of hearing about all the "mistreatment" of the dirty, low-down, common criminals all over America who want to be "molly coddled" while they're paying for what they do against society. You boys sure cause a lot of trouble, in jail or out!

P. S. I'll bet that you don't even have a toothbrush at home.

Keith Moore

been put up for fifty cents by some old timer crazy to get money to attend the fiddler's concert.

I can remember plenty of cases where organs and pianos were carried to people's houses slung on great poles. There is no question about the universal longing for music. With a great mountain people, the boys and girls born in the mountains, found in the fiddle the highest expression of melody and it had a strange and fascinating effect upon them, which was thoroughly well understood by their spiritual advisers. The Scotch intellect controlled. While it is said that Oliver Cromwell had a fiddler, on investigation, it seems that the facts are these. That once when Oliver Cromwell was at a castle, that in a hidden apartment from which no sound could issue, was a noble fugitive who played tunes on a fiddle unbeknownst to old Ironsides, and after the restoration, he went by the name of Oliver's fiddler.

For more than a hundred years the hardwood forests of the Appalachians guarded by a savage race had stopped the advance of the Christian people. It remained for the Scotch to conquer it and to bring about the

from which no sound could issue, was a noble fugitive who played tunes on a fiddle unbeknownst to old Ironsides, and after the restoration, he went by the name of Oliver's fiddler.

For more than a hundred years the hardwood forests of the Appalachians guarded by a savage race had stopped the advance of the Christian people. It remained for the Scotch to conquer it and to bring about the formation of a republic.

At that time these immigrants had been raised in a faith that taught that everything that was pleasant was sinful. It was wrong to laugh. It was wrong to write poetry. It was a sin to visit a friend on Sunday. While it was right to bathe, to swim for pleasure was sinful. It was a sin to travel on Sunday, even to cross a river that was rising. It was a sin for a tavern keeper to entertain as a guest a Roman Catholic. It was a sin to shave on Sunday. The list of things that were prohibited includes almost everything that is encouraged now, except possibly that whiskey was classed as a food at that time. And

sure and check for these changes before tournament next year.

Among t

these laws though not the secular laws of the land were far more binding. The Church took over the control of the country. Organized legislative bodies, later to furnish the initiative in America for the most powerful of all nations. The Church, and I speak of the Presbyterian church. had power of imprisonment, to impose fines, to whip, or to brand with a hot iron. Doing penance before the congregation was one of the usual ways of getting right with the Church.

To even listen to music was prohibited, much less to make music. There could be no music in the churches, and not even at weddings was it permitted. A special act was passed making it an offense punishable with a fine and such further punishment as the session saw fit to have music at weddings. See register of the Presbytery of Glasgow and other records.

Senator Byrd announced Monday that Elaine Friel, daughter of Mr. and Mrs. Elster C. Friel, of Route 1, Marlinton will receive an appointment to the U. S. Naval Academy in Annapolis, Maryland. The Pocahontas senior has been found fully qualified and will be appointed to the Class of 1986. She will enter the Academy in June, 1982. Elaine received the nomination from Senator Byrd in December, 1981.

Miss Friel is a member of the Society of American High School students, National Honor Society, captain of the soccer team, choir pianist, member of the high school POPS group.

Mr. Byrd said, "I'm very proud of Elaine's accomplishment and I'm sure her family and friends are proud of her as well."

Miss T. E. E. N.

Forty-eight young women from throughout the mountain state will be competing for the title of 1982 West Virginia Miss T. E. E. N. in Huntington this weekend, April 16—18. Among them will be Kimberly Cohenour, of Marlinton!

The state-wide winner will receive a $1,000 in educational scholarships and an opportunity to participate in the national finals at Albuquerque, New Mexico, during Thanksgiving Week.

Pageant guests will include Tracy Weaver of Fairmont, 1981 West Virginia Miss T. E. E. N. and recently crowned Michelle Johnson of Memphis, 1982 Tennessee Miss T. E. E. N.

Speech and talent finals will be held at the Huntington Holiday Inn-Downtown on Friday, April 17, at 7:30 p. m. Rehearsals and a luncheon with the judges are scheduled for Saturday and the Pageant gets underway at 7:30 p. m. The public is invited.

Judging for poise, personality, scholastic and civic achievements as well as talent will be Jaclyn Smith and John Thompson, Richard Lucas, Sally Pipinbrink, Huntington and Carol Waybright, Charleston.

have music at weddings. See register of the Presbytery of Glasgow and other records.

Dancing was especially prohibited and condemned and singers were to be put in prison.

At the same time down about London way, for instance, there was another set that was headed towards Fiddler's Green, a particular enclosure of the Elysian fields, where there is to be perpetual mirth, a fiddle that never ceases to untiring dancers, plenty of grog, and unlimited tobacco. This section assigned especially to sailors.

The only fiddle known in Scotland was the Caledonian Cremona, a name for the itch, so called from the scratching movement evoked.

It was in the plan of life that these two elements were to meet in the New World, and to form a race known as the American, to which we are all proud to belong. We are surely the children of immigrants, though now that the word is ab-

ONE WOULD WONDER why one's parents would be as excited about their daughter winning $1000 as the daughter herself. As the last name was drawn for the $1000 prize at the Marlinton Moose Lodge, Tracy Mamak was wondering how to come up with the money for her college tuition. Well, Tracy, now you know. Tracy will be attending Dabney Lancaster College, in Clifton Forge, and majoring in Electronics. Pictured left to right: Barry Sharp, Governor, Tracy Mamak, and Dean Jones, Administrator.

scratching movement evoked.

It was in the plan of life that these two elements were to meet in the New World, and to form a race known as the American, to which we are all proud to belong. We are surely the children of immigrants, though now that the word is abhorred.

Then came the fiddle and desire and duty conflicted, but both played their parts. It resulted in a civilization that with all its faults is the best that the world has yet seen.

Gradually the instrumental instruments found their way into the church building, though I do not recall having seen a fiddle in church. And the new fangled dances have dispensed with the fiddle. The hope of the land hug each other to fixed music.

There is a subconsciousness that yields to the sinful fiddle. and that draws us to its wicked strains, while duty points the other way.

History Alive! program brings "Mad" Anne Bailey to Opera House in August

On August 12, history will come alive as Patty Cooper portrays "Mad" Anne Bailey. The History Alive! program was created by the West Virginia Humanities Council to explore history directly with noteworthy historical characters. These presentations are not one-person plays. They are intended to be lively, engaging sessions in which [illegible]

tierswoman who could handle a horse, hatchet, and long rifle as well as any man. When her husband was killed in the battle of Point Pleasant in 1774 she was compelled to avenge his death and embarked on a new life as border scout and messenger. The 1861 poem "Anne Bailey's Ride" commemorates her heroic 1791 ride alone through over 100 miles of mostly wilderness, when Fort Lee (Charleston) was threatened with attack, to Fort Savannah (Lewisburg) and her return with desperately needed gunpowder.

The program is formatted into three parts. The first part is a monologue: The character introduces the historical, social, and political issues that represent the era. (15-25 minutes). The second part is a discussion with the character: The character initiates a discussion with the audience, allowing an opportunity to ask questions, debate, and disagree with the character. (10-15 minutes). The third part is a discussion with the presenter: The presenter "breaks character" to answer questions and continue the discussion as a researcher rather than as the character. (5-10 minutes).

Patty Cooper will be at the Opera House on August 12, at 7 p.m. The program is free to the public.

Sally Scott

. . . and Sally Scott Remembers

A young woman from Dogs Mountain in Pocahontas County started work as a school cook 42 years ago and was greeted by scenes like the one above--first graders with rickets-swollen fingers, drinking their free milk from canning jars.

Touched by the nutritional needs of these Depression-era children, the new school cook informed the county board of education that her meager weekly salary was to be used to help finance the modest school lunch program, then supported by the Works Progress Administration (WPA).

When called upon, Sally Scott—who retired in 1977--still serves as a volunteer school cook, presiding over the sparkling kitchen at Hillsboro Elementary School, warming to the mealtime chatter of well-fed children. To a recent visitor, she pointed out that she often cooks for four of her great-grandchildren.

And she recalled the way it used to be.

The casualties of the nation's stricken economy, she said, were children. Swollen knuckles a symptom of rickets, were commonplace.

Was the report true? Had the plight of those children really prompted her to donate half her $10.20 weekly salary for school meals?

She confirmed it matter-of-factly.

When Sally Scott went to work as a school cook, America's spotty school lunch program was in trouble. The WPA had spawned and supported it for nearly a decade, primarily as a job generator, but as the nation entered a wartime economic period the WPA projects were closed down. The WPA's demise threatened lunch programs at nearly 400 schools in 30 West Virginia counties. The state's first child nutrition lobbying coalition converged on the state capitol, and the legislature responded, appropriating $18,000 to help the state's Sally Scotts continue to feed children at school.

The veteran school employee recalled, "The children brought their own bowls and spoons, if they had any. We didn't have a real sink for washing utensils. Two old, grey washtubs--one for rinsing and the other for sterilizing--that's how we did it. We had to build our own fires in the coal stove. This meant carrying the coal upstairs ourselves. We cooked right in the classroom and the children ate at their tables.

"We endured. We survived it."

Indeed. They prospered. Since that first state appropriation in 1943, West Virginia hasn't wavered in its commitment to the school lunch program, with annual appropriations growing to well over $1 million. That support, combined with federal assistance since 1947 under the National School Lunch Act, now provides over 30 million school lunches every year for West Virginia children. Supplementing that effort is the school breakfast program, initiated by federal legislation in 1966 and expanded by a 1972 amendment. Additional federal legislation produced the child care food program, the special milk program and the summer food service program--all beyond the fondest dreams of Sally Scott as she toiled four decades ago over her steaming tubs.

The building where Sally Scott fired the coal cookstove stands today near the modern Hillsboro Elementary School. She confided that while bustling about the new school's modern kitchen, she often remembers the old days. "Every time I pass by that building I remember those washtubs and that coal stove and the big day we finally got a sink. I can still see the faces of those kids, with their bowls and donated spoons."

Why, a visitor wondered, was she compelled to give half her pay to the school lunch program?

"It was something I felt I should do," she said. "Times were bad--and they got worse. After WPA funding stopped, we didn't have enough county money to make up the difference."

School records confirm that long-ago contribution, according to Hillsboro principal Kan Nottingham. "Sally Scott is a remarkable lady," he said. "She still volunteers her time to cook for the children whenever we need her."

For 26 of her 37 years as a school cook, Sally Scott wasn't eligible for retirement benefits. In her youth, she gave what she could for hungry children. In doing so, she helped leave a legacy that is her joy in old age.

Cell phones infringe upon personal space and sensibilities

By Bob Kellison

I have resisted being the owner of a cell phone even though it's the in-thing to do. My reasoning is that there are times when I want to be disconnected from the high-tech world. Even then it's hard to get away from the clamor. For instance, it's not uncommon to be in the deepest woods with colleagues discussing a forestry practice when a jingling comes from the pocket of one of the party. Invariably the affected person sinks off behind a tree to take a call from the photo shop that his pictures are ready or from his wife who is lamenting that the family dog refuses to eat the new brand of puppy chow.

With my resistance to that modern means of communication, I thought I was in select company with a few of my acquaintances. But one-by-one, these acquaintances are attracted to wireless communication like flies to honey. My admonishment to one of them:

Dear Bro:

I've heard through the grapevine that you've abandoned your principles and bought a cell phone that is with you every waking hour, be it in car, office, home or church. For shame! I counted you among my ilk for refusing to buy one of the contraptions because of the danger and aggravation they impose. For instance, people behind the wheel go into never-never land when engaged in a phone conversation. As a case in point, I was recently in the nation's capital on a busy street when a flummox-user made a left turn in front of our oncoming car. A hard stop on our part was all that prevented a serious accident. The offending party continued on his way, never aware of his offense and never removing the electronic marvel from the side of his head. He must have been talking to a White House intern.

I don't buy the car-trouble reason you've given your wife for buying the phone. In bygone days, you would have gone to the nearest farmhouse or flagged an oncoming motorist to get help in an emergency. With 16 million new vehicles being put on the road each year, you wouldn't have to wait more than a couple of minutes for someone to happen by, even on the most rural roads. What better way to meet a good Samaritan?

I guess you know that you and your minion of wireless users are clogging the airways. Worse, you're saturating the numerical system to the point that those of us using regular telephones will soon have to dial long distance instead of the usual local call just to talk to the next-door neighbor. We might have to create a whole new numerical system to handle the increased use of cell phones.

Worse than the liability of driving while using the phone and clogging the airways is the invasion of my personal space. Try sitting elbow-to-elbow in a commercial airport while waiting for the boarding call of a plane to your destination. It's not uncommon for three or four cell-phone conversations to be taking place within arm's length, all while I'm trying to digest the content of the latest issue of *The Pocahontas Times*. I've overheard details about secret business deals, employee firing, clandestine affairs, change-of-life events, and more. The invasion of my privacy has become so common that I'm forming a society that will fight back. The centerpiece of the society will be the invention of a machine that will either jam the phones within a given radius, or it will make disgusting noises, such as burping or expelling gas. I was hopeful of soliciting you as a member since you're a phone-line jammer with slovenly habits, but alas.

Yours for a civilized society,

Billy Bob

THE FIRST SETTLER IN HILLSBORO

A Biography of John McNeel

By Elizabeth C. Sheet

John McNeel was born in Frederick county, Virginia, in 1745, and passed much of his early life in Cumberland, Maryland.

Mr. McNeel seemed to be fond of athletics and in a contest his antagonist was badly injured. To avoid arrest and trial for murder he fled and followed the trend of the Alleghenies. A long while was spent in the wilderness without much food, causing suffering of the mind and the shape his body was in cannot be imagined by any of us. Finally going deeper and deeper into the Wilderness, he came at last in view of the Levels in 1765.

The place was covered mostly with trees surrounded by large mountains. This seemed like home to Mr. McNeel and he decided to settle here. He chose a place to build his cabin near the present home owned by Hon. M. J. McNeel. Traces of his cabin have been seen by many people

trees surrounded by large mountains. This seemed like home to Mr. McNeel and he decided to settle here. He chose a place to build his cabin near the present home owned by Hon. M. J. McNeel. Traces of his cabin have been seen by many people yet living, between the gate and the public road and his residence. If this spot could be traced, it would be well to mark it with a piece of marble gotten close by to show that he was the first settler in Little Levels District.

Here Mr. McNeel prayed over his guilt and prayed with a broken heart, and hunted for food, subsisting mostly on venison and trout.

One day while hunting he met Charles and Edward Kennison from his old home, who had come here prospecting for a situation. From these men he learned that the man he had been boxing with was not killed and not even seriously hurt. This was indeed good news to him, because he felt free from all bloody stains.

Mr. McNeel shared his cabin with his friends and helped them

Stricklin – Bauserman Upcoming Marriage

Steve and Donna Stricklin, of Green Bank, are delighted to announce the engagement and upcoming marriage of their daughter, Tara Lee Stricklin, to Jonah Lee Bauserman.

Tara, formerly of York, Pennsylvania, graduated from Pocahontas County High School in the class of 2000. She attended Marshall University and is now employed by Pocahontas County Free Libraries as head librarian at Durbin and assistant at Green Bank.

Jonah is the son of Jason and Julia Bauserman, of Bartow. He is a 1998 graduate of Pocahontas County High School. As a senior he mentored at National Radio Astronomy Observatory in the School to Work Program. Jonah has been employed as an electronics technician since graduating. He assembles and tests receivers for the Green Bank Telescope. He is also vice president of Bauserman & Sons, Inc., a family construction firm.

Tara and Jonah will be united in marriage on Saturday, August 23, at 1:30 p.m. Pastor Chip Hill will perform the wedding at Word of Faith Church in Monterey, Virginia.

Combs – Sheets

Chantry Combs and Jessica Sheets will be united in marriage on Saturday, August 9, that afternoon. No gifts please - your presence is her present!

Two die in weekend accidents

Pocahontas County had two fatal accidents this weekend, both on U. S. 219 within less than 10 miles of each other.

The first, on Friday, took the life of Ron Janz, of Buckeye.

Janz, 49, was traveling north when his 1991 Toyota pickup truck crossed the center line and went over the embankment on the road's left side, according to a Pocahontas County Sheriff's Department spokesperson.

The truck ran along the edge of the embankment until it struck a tree, she said.

According to the accident report, there was no indication of braking or that Janz tried to stop, leading investigators to believe he may have been asleep or otherwise unconcious, she continued.

The accident occurred at 6 p.m. The truck was a total loss.

The following day, William B. "Brad" Short, of Valley Head, was killed while traveling south on U. S. 219 in Mace at 9:28 a.m.

Short, who was riding a 1997 Suzuki Quad, apparently tried to avoid colliding with a 1994 Chevrolet C71 Extended Cab pickup truck, but was unable to do so, according to the sheriff's spokesperson.

The truck, driven by Pennsboro resident Danny C. Hornich, was traveling north and turned left into the path of the motorcycle, she said.

The accident report said Short started braking and skidded off the edge of the pavement, but could not stop before hitting the truck between the front tire and the door, she explained.

Hornich, 53, was not injured and his truck suffered moderate damage.

The Suzuki was a total loss.

No charges have been filed; however, the accident is still under investigation by Chief Deputy M. Craig Doss, of the Pocahontas County Sheriff's Department.

tract of land adjoining his tract. The three then set out for the lower valley of Virginia.

While visiting home John McNeel married Martha Davis who was born in Wales in 1740. Shortly after their marriage they came out to Levels, A few acres was soon cleared off, and plenty to subsist upon was raised.

Mr. McNeel was deeply impressed with a sense of gratitude to God for his care, and after all to fall into such a wealthy place that he built a place for worship, the White Pole church.

In a few years the Dunmore war opened up. McNeel and the two Kennisons went into camp at Lewisburg and joined the expedition at Point Pleasant, October 10. 1774. They went across the Eastern mountain and enlisted in same company that went from Frederick county, served through the Revolution and then took up the peaceful trend of their lives where they had left off.

at the thought of being part of the Kiss The Pig Campaign to raise funds for the American Diabetes Association. County Commission President Joel Callison was the winner (?) in the fund raising effort and did his duty by kissing the reluctant porker on Saturday. His wife, Stella, is at the left.

Callison kisses pig for Diabetes Association

Joel Callison was the winner of the Kiss a Pig Campaign by a snout.

Callison raised just $64 dollars more than opponent Reta Jackson Griffith to grab the honor Saturday during Pioneer Days.

Callison, Griffith and write-in candidate Grace Ray raised more than $4200 to send to the American Diabetes Association.

The biggest single fundraiser was the pig roast held July 5 at Marlinton Municipal Park. The roast garnered $1430 in just five hours.

Paul Hill was auctioneer for several items including savings bonds donated by Pendleton County and First Citizens Banks and an office desk set donated by Citizens National Bank.

Roger Trusler and Griffith bought the bonds. Freda Jackson purchased the desk set. In addition, Neal Kellison was the high bidder on a gold coin and Griffith, a stuffed pig.

Greenbrier Investments purchased the pig cake and donated the dessert to Pocahontas Memorial Hospital.

Mike and Mary Sue Burns provided music for the afternoon event.

More than 28 businesses and volunteer organizations donated to the cause, as did numerous individuals, allowing the fundraisers to purchase food for the event. Pocahontas Foodland donated the pork.

"It was nice to see people working toward a goal," said the keeper of the cash, Beth Hill. "I was very pleased with it. I hope it will be an annual event that will grow."

concern about a "race for wastewater allocation" by a "foreign mega group" that will not leave treatment capacity for others.

Mr. Moran indicated that this is not a problem because an increasing number of customers will give the PSD the financial ability to provide more waste treatment capacity. One way this can be done by moving the discharge outlet [illegible]

dent Callison noted that the Commission is facing an immediate problem in finding a replacement for Kermit Friel on PSD. Mr. Friel had to resign from the PSD when a following a court ruling that his could not serve on the agency and also be on the Board of Education. He expects, however, that whoever is on the PSD the project will

Meet Your Candidate Bill Proudfoot

DEMOCRAT FOR THE HOUSE OF DELEGATES

BILL PROUDFOOT

Bill Proudfoot is an educator, a farmer, a rental property owner and a one-time industrial worker. Bill began his work experience at a very early age while working on his father's farm near Elkins, and later working in the coal mines for a short period of time.

Bill graduated from Elkins High School, served three years in the U.S. Army while being trained as a welder and a machinist. He worked as a machinist five years while working his way through college and also, worked as a heavy equipment operator. Bill received his B.A. Degree in Education from Fairmont State College and his Master's Degree from Marshall University.

Bill feels that his broad work experience and education are the result of his self-determination and independence taught by his parents. "Two statements that took on a special meaning in my life and helped to accomplish my career goals were: Your education is something no one can take from you! Anything that's worthwhile doesn't come easy!"

"Our family is very close. I guess it comes from the

Kennisons went into camp at Lewisburg and joined the expedition at Point Pleasant, October 10, 1774. They went across the Eastern mountain and enlisted in same company that went from Frederick county, served through the Revolution and then took up the peaceful trend of their lives where they had left off.

While Mr. McNeel was at Point Pleasant a child was born and died before his return. The mother with her own hands prepared the coffin and grave and buried it.

They reared five children, two sons and three daughters. Each of these children were married and reared large families.

Mr. McNeel was the first man to settle in Little Levels when only twenty years of age. Mr. McNeel also laid the foundation of the Methodist church and first established Methodism in Pocahontas county.

Mrs. John McNeel laid the first body to rest in the McNeel graveyard Mr. McNeel lived to be eighty years of age and died in 1825.

easy!"

"Our family is very close. I guess it comes from the whole family working together on the farm. The kitchen was a special place in our home. At the dinner table, we evaluated the work progress for the day, set new goals for the next day and worked on any family problems. It may seem old-fashioned, but, it feels good looking back and remembering the closeness our family shared," stated Bill.

Bill is the son of Mr. and Mrs. W. D. Proudfoot who reside on a farm in rural Randolph County. Bill is presently operating a farm adjoining his father's Purebred Charolais Farm. For the last nine years, he has been working as a teacher and a guidance counselor. Bill is married to Carolyn Heaster Proudfoot, a teacher at Elkins Junior High School.

KNAPPS CREEK

Cliff Sharp has finished his lumber job on Knapps Creek.

Elmer McLaughlin and family of Dunmore, moved to the C. P. Collins farm last week. We welcome them to our community.

The roads are almost impassable between Frost and Huntersville.

Leo Dever has returned home from Dunsmore Business College.

Little Chesley Moore is very ill at the home of his father, Grover Moore

M M. Watson moved from Knapps Creek to Neola last week.

Sherman Gibson's family has been very sick with flu, but are better.

Leland Malcomb is in North Carolina working for the Hill Road Co.

John Smith, who fell from a wagon sometime ago and broke his ankle, is somewhat improved.

Our schools are doing good work. Miss Enid Harper teaches the Sunset school and Miss Lucile Beard the Moore school.

On Thursday March 25th a fine deer was seen on C. D. Newman's farm. It did not tarry long but soon went off to the mountains.

W. G. Ruckman, who broke his arm a few weeks ago, is now able to be out again.

JOE GRIMES RECEIVED the Clutter/Rhoades Scholarship for pharmaceutical students.

Local resident earns award

The following students were recognized by the West Virginia University School of Pharmacy as part of the WVU Weekend of Honors:

Joseph Grimes, of Marlinton, received the Clutter/Rhoades Scholarship. This award was created by Jennifer Clutter in memory of her grandmother, Mary Lavaughn Clutter, and her great-grandmother, Mary Lea Rhoades. The scholarship is earmarked for a School of Pharmacy student who is also a parent.
